FOREWORD

For a cyclopedia to attain the dignity of a standard work of reference, and to maintain that position, certain distinctive features are essential. The chief of these, outside variety of topics and accuracy, are independence, originality, progressiveness, convenience, lucidity, and

brevity.

Independence and originality cannot be acquired without departing from the old-time methods of pedantic Latinity, unfamiliar scientific and technical terms, and diffusiveness, which, even in modern times, still seek to make knowledge the prerogative of a privileged class. Progressiveness is obtained by adopting up-to-date methods of organization, preparation, and production, and employing the ingenious principle of the expansive card-index, so that the latest data may be added until the very day of printing each edition. Convenience is found in the concise disposition of matter, and its arrangement in the form of compact volumes, of handy size for ready reference, in place of large and clumsy volumes, inconvenient to handle on account of their size and weight, which are by many supposed to represent the correct style for all cyclopedic works of reference. Lucidity and brevity are attained by the development, through the patient and laborious work of editors and compilers, of the fine and difficult art of condensation, in which the constant aim is to synthesize or crystallize the ever-growing mass of ancient and modern information into the concrete and attractive form of "race knowledge." This term was introduced by Professor Patton, of Princeton University, to distinguish the sifted and verified knowledge of a subject useful to the whole world from the detailed knowledge required by specialist or expert, and indicates a simple and concise handling which, while meeting all reasonable demands of scholarship, brings the profoundest learning within the comprehension of any attentive or thoughtful mind.

Since the beginning of the twentieth century there has been enormous activity among the publishers of leading nations to produce new cyclopedias, with the purpose of presenting the whole range of universal information according to modern standards and requirements, and of exhibiting the wonderful progress made in all departments of human knowledge and

endeavor during the previous century.

In the making and distribution of cyclopedias, the need of a popular reference work of more compact form than those in ordinary use was made strikingly apparent both to editors and publishers, by the thousands of questions poured daily into the offices of magazines and journals, which, by arrangement were referred to the cyclopedists for reply. In the majority of instances, the answers could have been found by reference to the venerable and ponderous types of cyclopedias. But these, wherever possessed, apparently had been relegated to the repose of library shelves, after the novelty of possession had worn off, while the trouble attendant on disturbing them for research was, apparently, greater than the slight inconvenience caused by writing and waiting for a brief answer to a simple question.

Under these circumstances, the conviction grew that a more convenient form of reference work was necessary for ordinary use, one which, if kept in the home on the reading-table, in the student's room on a handy shelf,

1-J.

or in the office or store on the work-desk, would become an indispensable and authoritative source of the information needed in connection with

the current news of every-day life.

The ordinary skip method of reading newspapers, magazines, etc., is not conducive to self-culture. Every day interesting information is given about places and subjects of which most people know very little and remember less from the knowledge acquired in school days. But a ready glance into a convenient reference work will put one in possession of the necessary information, and if the knowledge is acquired at the time when the subject is a topic of general discussion, it is likely to be permanently retained.

The "reference habit' is one of the most delightful and profitable that can be inculcated in young persons or cultivated by men and women for the worthy purpose of extending education throughout the whole of adult life. The more convenient the form of reference work at hand, the oftener it will be used, and when this can be done with the least possible waste of time, the reference habit frequently changes the whole mental attitude,

transforming an ordinary into a well-informed person.

With the conviction fully confirmed that such a convenient work of reference was urgently needed, the publishers of the present work, after mature deliberation, decided upon a striking departure and a revolution in the ordinary methods of cyclopedia making. Adopting a novel and original plan which would allow them to make use of the latest sources of information right up to the date of publication, they determined to build a work which should present the modern, solid, alive, and up-to-date American view of everything worth knowing in the fewest possible words; a work for the use of students and others which would fit them to take part in the conversation or enjoy the society of any well-informed circle.

part in the conversation or enjoy the society of any well-informed circle.

The result, as embodied herein, exhibits the truly American characteristic of the exact knowledge sought; giving the pith of each subject, the essential facts, condensed to the plainest terms consistent with accuracy and clearness, and presented in a convenient form for ready reference. The salient features of each topic treated and its modern aspect follow the title and impress themselves at once upon eye and mind. The old, stereotyped, pompous, so-called cyclopedic style gives way to a bright, modern presentment of knowledge and facts. Without needless wading through a mass of words, the reader immediately grasps the knowledge sought. Every subject is condensed or distilled to an essence of crystal clearness, in order to secure the compact and convenient size aimed at. Moreover, this plan of condensation or crystallization has allowed the inclusion of a greater number of titles than are to be found in the larger works of reference, for over 150,000 separate titles will be found in the various volumes of this work, as compared with the 50,000 or 60,000 subjects in the ordinary cyclopedias.

The publishers have also aimed at making the work doubly attractive by reason of its illustrations. Text-cuts, half-tones and artistic threecolor page plates, considerably beyond the plane of the average cyclopedic illustrations, contribute largely to a full understanding of the crisp descriptive matter. Special attention was also directed towards providing a clear type, easy for reading and restful to the eyes, instead of the small, fatiguing, eye-straining type, so frequently complained of in the larger

forms of cyclopedic dictionaries.

The whole work, modern in conception and treatment, accurate, clear, concise, and up-to-date in a thoroughly practical sense, is a standard, ideal

reference library, providing a short cut to all knowledge. No work on a similar scale of convenience has been attempted hitherto, and the publishers, gratified by its comprehensive scope and reliability, feel confident that its compact form will make it, though small, a powerful rival for preferential and general use in school, home, store, or office, over the larger types of cyclopedias, gazetteers, or dictionaries.

As a result of the great World War, the boundaries of practically every

country in central Europe have been changed.

Cities and towns were wiped out by the hundreds and new ones have sprung up from their ruins. Hence, the editors have given special attention to the presentation of the central European countries, states, provinces, cities and towns under their present educational and advanced economical conditions.

A more comprehensive knowledge of these conditions may be attained by reference to the Chronology of the World War in the appendix of this works.

Part II of this Appendix treats exclusively of the activities of the United States in the war, and Part III of the general progress of the war, independently of the United States. These two parts, in connection with maps of the belligerent countries, will enable the reader to trace with clearness and accuracy the various campaigns, their progress, and special activities.

Part I of this Appendix is confined to the American campaign in Mexico

-the futile quest of Villa.

The editor and publishers wish to acknowledge here the most cordial and efficient co-operation in their task by a very large number of distinguished specialists and of representatives of the United States and

Canadian Governments.

Among them should be especially mentioned, on the part of the Among them should be especially mentioned, on the part of the United States Government: Hon. William Gibbs McAdoo, Secretary of the Treasury; Hon. Newton Diehl Baker, Secretary of War; Hon. Josephus Daniels, Secretary of the Navy; Hon. Franklin Knight Lane, Secretary of the Interior; Hon. David Franklin Houston, Secretary of Agriculture; Hon. William Cox Redfield, Secretary of Commerce; Hon. William Bauchop Wilson, Secretary of Labor; Hon. Albert Sidney Burleson, Postmaster-General; Hon. George Otis Smith, Director of the United States Geological Survey; Hon. Sam. L. Rogers, Director of the Bureau of the Census; Hon. E. E. Pratt, Chief of the Bureau of Foreign and Domestic Commerce; and Hon. John Barrett, Director-General of the Pan-American

On the part of the Canadian Government: Hon. George E. Foster, M. P., Minister of Trade and Commerce; Hon. J. D. Hazen, Minister of Marine and Fisheries; and Hon. R. H. Coats, B. A., F. S. S., Dominion

Statistician and Controller of the Census.

a, the first letter in the English and other alphabets, ultimately derived from the Phœnician, is traced by some to a char-

acter belonging to the Egyptian hieratic alphabet. Alpha, the Greek name of the letter, corresponds closely to aleph ("an ox"), the Phœnician name (see ALPHABET). The form which it has as a capital is the earliest. The sound which originally belonged to it, and which is still its characteristic sound except in English, is that heard in far, farther, palm, etc. A, in music, is the sixth note in the diatonic scale of C.

Aard-vark, (that is, "earth-pig"), a burrowing insect-eating animal of the order Edentata found in South

AARD-VARK.

Africa. The name "pig" is given to it from the shape of its snout. It is about 5 feet long, with a thin tapering tail, and long upright ears. It is nocturnal in its habits and very timid. Its flesh is considered a delicacy.

Aard-wolf, a singular carnivorous recreant to his trust in the absence animal, first brought from South Af- of Moses upon the Mount, and made rica by the traveler Delalande. Its the golden calf for the people to wor-

size is about that of a full grown fox, which it resembles in both its habits and manners, being nocturnal, and constructing a subterraneous abode.

Aargau, or Argovie, a canton of Switzerland, bounded on the N. by the Rhine, which separates it from the grand-duchy of Baden, elsewhere by the cantons Zürich, Zug, Lucerne, Bern, Solothurn, and Basel; area, 543 square miles. Pop. (1913) 236,869, more than half of whom are Protestants. The capital is Aarau.

Aarhaus, a city of Denmark, capital of a division of the same name. It is situated on the Cattegat, and has an excellent and safe harbor, which admits vessels of light draught, the construction of such craft being the chief industry of the place. It has considerable manufacturing and is the centre of a large trade, being connected with the rest of the Jutland region by the State railway, and regular steamers to Copenhagen and Great Britain. The town is among the oldest in Denmark, and is noted as being the site of the first Christian church in the kingdom. Its bishop's see dates from 948. It has a cathedral commenced in 1201, which is a fair example of early 13th century Gothic architecture. Pop. Est. 74,256

Aaron, son of Amram (tribe of Levi), elder brother of Moses, and divinely appointed to be his spokesman in the embassy to the court of Pharaoh. By the same authority, avouched in the budding of his rod, he was chosen the first high-priest. He was recreant to his trust in the absence of Moses upon the Mount, and made the golden calf for the people to wor

ship. He died in the 123d year of his age, and the high-priesthood descended

to his third son, Eleazar.

Aaron's rod, in architecture, is a rod like that of Mercury, but with only one serpent twined around it.

Ab, the eleventh month of the civil year of the Hebrews, and the fifth of their ecclesiastical year, which begins with the month Nisan. It answers to the moon of July, that is, to part of our month of July and to the beginning of August; it consists of 30 days.

Abaca, or Manila Hemp, a strong fibre yielded by the leaf-stalks of a kind of plantain (Musa textilis) which grows in the Indian Archipelago, and is cultivated in the Philippines. The outer fibres of the leafstalks are made into strong ropes, the inner into various fine fabrics.

Abaco, GREAT and LITTLE, two islands of the Bahamas group.

Abacus, a Latin term applied to an apparatus used by the Chinese for facilitating arithmetical operations, consisting of a number of parallel cords or wires, upon which balls or beads are strung, the uppermost wire

ABACUS.

being appropriated to units, the next to tens, &c .- In classic architecture it denotes the tablet forming the upper member of a column, and sup-porting the entablature. In Gothic architecture the upper member of a

column from which the arch springs.

Abaddon, in the Bible, and in every rabbinical instance, means the angel of death, or the angel of the abyss or "bottomless pit."

Abalone, a Californian name for the ear-shells or sea-ears, a gastropod of the family Haliotidæ. The animal feeds on sea-weeds, creeping along the rocks. When in repose it draws all its parts under the saucer-like shell, and clings like a limpet to whatever it is attached. The Chinese use the body for food, and the shell is employed in

making buttons, inlaying, and all purposes for which mother of pearl is used.

Abatis, or Abattis, in military affairs, a kind of defense made of felled In sudden emergencies, the trees are merely laid lengthwise with the branches pointed outward to prevent the approach of the enemy.

Abba, Guiseppe Cesare, an Italian poet; born in 1838 at Cairo Montenotte. He took part in the expedition of Garibaldi into Sicily in 1860, which

Abbas Hilmi, Pasha, Khedive of Egypt, born in 1874, oldest son of the Khedive Mehemet-Tewfik. He succeeded his father as Khedive in 1892; was deposed in 1914, when Great Britain assumed a protectorate over Egypt; and was succeeded his over Egypt; and was succeeded by Prince Hussein Kaniel Pasha.

Abbas I., surnamed the GREAT; born in 1557, was the seventh Shah or King of Persia of the dynasty of the Cufis. He died Jan. 27, 1628.

Abbassides, the name of a race who possessed the caliphate for 524 years. There were 37 caliphs of this race who succeeded one another with-out interruption. They drew their de-scent from Abbas-ben-Abd-el-Motallib, Mahomet's uncle. Their empire terminated in Mostazem in 1257.

Abbe, Cleveland, an American meteorologist, born in New York city, Dec. 3, 1838. He was the "Old Probabilities" and meteorologist in the U. S. Signal Service in 1871-91, and meteorologist of the U. S. Weather Bureau from 1891 till his death on Oct. 28, 1916.

Abbey, a monastery or religious community of the highest class. governed by an abbot, assisted generally by a prior, sub-prior, and other supordinate functionaries; or, in the case of a female community, superintended by Abbeys or monasteries first East. The abbeys in Engan abbess. arose in the East. land were wholly abolished by Henry VIII. at the Reformation. In the United States the word "monastery" is generally used for male religious houses; "convent" for female.

Abbey, Edwin Austin, an American artist, born in Philadelphia, April 1, 1852. Besides illustrating man books and painting a number of no table pictures, he designed a series of paintings for the Boston Public Library, on the "Holy Grail." He was commissioned by King Edward VII. to paint the coronation scene in Westminster Abbey. He died Aug. 1, 1911.

Abbot, the superior of a monastery of monks erected into an abbey or priory. Abbot is also a title given to others besides the superiors of monasteries; thus, bishops, whose sees were formerly abbeys, are called abbots. Among the Genoese, the chief magis-trate of "Abbot of the People."

Abbot, Ezra, an American Greek scholar, born at Jackson, Me., April 28, 1819. He was one of the Amer-ican committee of New Testament re-He died at Cambridge, Mass., March 21, 1884.

Abbot, Henry Larcom, an American military engineer, born in Beverly, Mass., Aug. 13, 1831; graduated at the United States Military Academy in 1854; became brevet Major-General of Volunteers in the Civil War, and sub-sequently Colonel and Chief of Engineers of the United States army, and was retired in 1895. Died, Oct. 1, 1927.

Abbot, Willis John, an Amercan journalist and author, born in Connecticut in 1863. With the exception of a "Life of Carter Harrison," his works consist principally of popular histories for young people. Editor of Christian Science Monitor, 1921-27, since then has been on that paper's editorial board.

Abbotsford, the home of Sir Walter Scott, situated on the S. bank of the Tweed a few miles above Mel-At the time Scott bought the estate in 1811, it was called Clarty Hole, but his antiquarian spirit moved him to connect the place with the old monks of Melrose Abbey, who formerly cross-ed the river near the house. He re-tained all of the ancient Scotch architecture that could be used, and en-larged the building to its present dimensions. The property remains in the possession of the author's descendants to the fourth generation.

Abbott, Charles Conrad, an American archæologist, born at Trenton, N. J., 1843. He has discovered palæolithic human remains in the Delaworth of the beautiful and the state of the beautiful and the beau

mo race as far south as New Jersey. A large collection of archæological specimens made by him is now in the Peabody Museum, Cambridge, Mass., where he was stationed in 1876-1889.

Abbott, Edwin Abbott an English theologian and Shakespearean scholar, born in London, Dec. 20, 1838. From the City of London School he passed, in 1857, to St. John's College, Cambridge.

Abbott, Emma, American dramatic soprano, born in Chicago, III., in December, 1849. After years of hard work, she went abroad in 1872 and studied with Sangiovanni at Milan, and Delle Sedie in Paris, and afterward sang in opera with great success. In 1878 she married E. J. Wetherell, of New York. She died in Salt Lake City, Utah, Jan. 5, 1891.

Abbott, Jacob, an American writer of juvenile stories, born in Hallowell Me., Nov. 14, 1803; died Oct. 31, 1879. He graduated from Bowdoin College, studied for the ministry, was professor of mathematics at Amherst for four years, and in 1834 established the Eliot Church in Roxbury, after having been principal of a girls school in Boston. After 1839 he devoted his whole time to literature and wrote and published more than 200 volumes, among them the famous Rollo Books. In collaboration with his brother John, he wrote a number of histories for juvenile readers, with whom he was a great favorite. His works have a considerable sale in the first years of the 20th century.

Abbott, Sir John Joseph Caldwell, a Canadian statesman, born in 1821. He took an active part in the Senate, leading the Conservative side. On the death of Sir John Macdonald, in 1891, he become Premier, resigning in the following year on account of ill-health. He died in 1893.

Abbott, John Stevens Cabot, an American author. born at Brunswick, Me., Sept. 18, 1805; brother of Jacob Abbott; author of "History of Napo-leon; "History of the Civil War;" "History of Frederick the Great;" and numerous other works on kindred themes. He died, 1877.

A. B. C. Mediators, the diplomatic representatives in the United States of Argentina, Bolivia, and Chile, who, under an offer of friendly offices by their respective governments, attempted a settlement of the controversies between the United States and Mexico. Several conferences were held at Niagara Falls and Washington in 1914-15, and a plan was drafted for the restoration of order in Mexico, but no practical results followed.

Abdallah-Ibn-Yazim, Moham-medan conqueror of Spain, known as "Theologian." He died 1058.

Abd-el-Kader, very renowned by the persevering courage with which he opposed the aggressions of the French against his country, born in Oran in 1807. He preached a holy war against the French occupation of Algiers, and called upon the faithful to rise and expel the infidels. For a period of 15 years he contrived to defend his country, and fight against the encroachments of France; but in 1847 he was compelled to surrender himself a prisoner. He died May 26, 1883.

Abd-er-Rahman I., a Caliph of Cordova, born in Damascus in 731. He founded a Moorish dynasty in Spain, made Cordova his capital and became an independent sovereign. The mosque at Cordova (now used as a cathedral), ornamented with rows of cupolas, supported by 850 pillars of jasper, was built by him. He died in 787.

Abdication, Royal, a resignation of sovereign power, forced or volun-tary. Noted modern instances include tine of Greece, both in 1917. King Manoel of Portugal; Wilhelm II of Germany, 1918; Alfonso of Spain, 1931.

Abd-ul-Aziz, the 32d Sultan of the Ottoman Turks, was born Feb. 9, 1830. His government had great difficulties to contend with in the Cretan insurrection, the struggle of Rumania and Servia for full autonomy, and finally the outbreak of Mohammedan minated by the fall of Sebastopol affanaticism. In 1871 the Sultan strove ter a long siege, in 1856. He was suc-

to get the succession settled upon his son, instead of his nephew Murad, in accordance with Turkish custom. At last a conspiracy forced him to abdicate the throne, May 30, 1876. Four days later, the unhappy Sultan was found dead, it is almost certain by foul play.

Abdul-Hamid II., 34th Sultan of Turkey, born Sept. 22, 1842, the second son of Sultan Abdul-ul-Medjid; succeeded to the throne in 1876, on the deposition of his brother, Murad Defeated in the war of 1877-1878 with Russia, he was compelled by the Treaty of Berlin to surrender a small portion of territory in Europe and Asia, to recognize the independence of the vassal States in Europe, and to acknowledge Bulgaria as a tributary principality. In 1895-1896, during the massacres of the Armenians, he took an active part in the negotiations with the European powers. In 1897, Greece forced war on Turkey in behalf of the Cretans, and in 1898, after another uprising in Crete. Great another uprising in Crete, Great Britain and Russia forced Turkey to evacuate the island. A constitution granted Turkey in 1876, before his accession, was quickly suppressed by him, and he ruled despotically until 1908, when he was forced to restore it by a revolutionary party known as the Young Turks. A legislative as-sembly was elected and a large meas-ure of liberty granted, but in April, 1909, a reactionary movement at Constantinople led to the occupation of the city by troops favoring the Young Turks party, and the deposition and exile to Salonica of the Sultan. He was nppe, in 1848; Alexander of Bulgaria, in 1886; King Milan of Servia, in 1886; William of Wield, Mpret (Emperor) of Albania, in 1914; and Czar Nicholas of Russia and King Coustantine of Greece, both in 1917. King Manuel of Parts in 1918.

Abdul-Medjid, a Sultan of Tur-key, born April 23, 1822; succeeded to the throne July 1, 1839, at the early age of 17. The great event of his reign was the Crimean War, in which France and England allied themselves with Turkey against the encroachments of Russia, and which was ter-minated by the fall of Sebastopol afceeded by his brother, Abdul Azia Khan. He died June 25, 1861.

Abdurrahman Khan, Ameer of Afghanistan; born in Kabul in 1844; was the eldest son of Ufzul Khan, and nephew of the Ameer Shere Ali. In July of 1880 he was formally chosen by the leading men of Kabul and ac-knowledged by the British Indian Government as Ameer of Afghanistan. From the British Indian Government he received a subsidy of \$800,000 a year, with large gifts of artillery, ri-fles, and ammunition to improve his military force. In March, 1900, he declared his sympathy with England. He died in Kabul, Oct. 3, 1901.

Abel, the second son of Adam and brother of Cain. The latter was a tiller of the ground; Abel a shepherd. Both brought their offerings before the Lord; Cain, the first-fruits of the ground; Abel, the firstlings of the flock. God accepted the offering of Abel; the offering of Cain he rejected. The latter, instigated by envy mur-The latter, instigated by envy, murdered his brother in the field.

Abel, Sir Frederick Augustus, an English chemist, born in London in 1827. Was president of the Brit-ish Association in 1890. Died London, Sept. 8, 1902.

Abel, Niels Henrik, a Norwegian mathematician, born at Findö, Aug. 5, 1802. He became a lecturer at the University of Christiania, and the school of engineering there. His works deal mainly with the theory of elliptical functions, which his discoveries greatly enriched. He died wound eries greatly enriched. He died young, April 6, 1829.

Abelard, (or Abailard), Pierre, a monk of the order of St. Benedict, equally famous for his learning and his passion for Heloise; born in 1079, near Nantes, in the little village of Pallet, which was the property of his father Berenger. His inclination led him to prefer a literary life; and in order to devote himself fully to philosorder to devote himself fully to philosophy he ceded his patrimony to his brothers. He studied poetry, rhetoric, philosophy, jurisprudence, and theology, the Greek, Hebrew, and Latin languages; but scholastic philosophy chiefly engaged his attention. Having learned all that Brittany could teach him, he went to Paris, the university of which attracted students from all

peaux, a follower of Anselm and an extreme Realist, was the most skillful disputant of his time, and Abelard, profiting by his instructions, was often victorious over his master in contests of wit and logical acumen. The friendship of Champeaux was soon succeeded by enmity; and Abelard, who had not yet completed his 22d year, removed to Melun, whither he was soon followed by a multitude of young men, attracted from Paris by his great reputation. Hostility etil. his great reputation. Hostility still pursued him, but he left Melun for Corbeil, nearer the capital, where he was still more admired and persecuted. Soon after he ceased teaching to recruit his strength; and after two years returned to Paris, and found that his former teacher had removed to a monastery outside the city.

He again joined issue with him and gained so complete a triumph that he opened in Paris a school of rhetoric, the fame of which soon deprived all the others of their pupils. Shortly afterward he was appointed to his rival's chair in the cathedral school of Notre Dame, where he educated many distinguished scholars, among whom were the future Pope Celestin II., Pe-ter of Lombardy, Bishop of Paris, Berenger, Bishop of Poictiers, and St. Bernard.

At this time there resided close to Notre Dame a young lady, by name Heloise, niece of the canon Fulbert, then of the age of 17, and remarkable for her beauty, genius, and varied accomplishments. complishments. Abelard became in-spired with such violent love for Heloise as to forget his duty, his lectures, and his fame. Heloise was no less susceptible. Under the pretext of finishing her education, he obtained Fulbert's permission to visit her, and finally became resident in his house. His conduct in abusing the confidence which had been placed in him opened the eyes of Fulbert. He separated the lovers, but too late. Abelard fled with her to Brittany, where she was de-livered of a son, who died early. Abelard now resolved to marry her secretly. Fulbert gave his consent, the marriage was performed, and in order to keep it secret Heloise remained with him, he went to Paris, the university of which attracted students from all parts of Europe. Guillaume de Cham-lectures. Abelard, however, carried her off a second time, and placed her in the convent of Argenteuil.

Fulbert erroneously believed it was intended to force her to take the veil, and under the influence of rage subjected Abelard to mutilation. He became, in consequence, a monk in the abbey of St. Denis, and Heloise took the veil at Argenteuil. After time had somewhat moderated his grief he resumed tracking. At the Council of sumed teaching. At the Council of Soissons (1121), no defense being permitted him, his "Essay on the Trinity" was declared heretical, and he was condemned to burn it with his own hands. Continued persecutions obliged him at last to leave the abbey of St. Denis and to retire to a place near Nogent-sur-Seine, where he built a rude hut in which he determined to live a hermit's life. Even here, however, students flocked to him, and they built him an oratory, which he dedicated to the Holy Ghost and hence called Paraclete. Being subsequently appointed abbot of St. Gildas de Ruys, in Brittany, he invited Heloise and her religious sisterhood, on the dissolution of their monastery at Argenteuil, to reside at the above oratory, and received them there. He lived for some 10 years at St. Gildas. Ultimately, however, he fled from it and lived for a time in other parts of Brittany.

St. Bernard of Clairvaux, the leading opponent of the rationalistic school of Abelard, laid his doctrines before the Council of Sens, in 1140, had them condemned by the Pope, and obtained an order for his imprisonment. Abelard appealed to the Pope, published his defense, and went to Rome. Passing through Cluny, he visited Peter the Venerable, who was abbot there. humane and enlightened divine effected a reconciliation between him and his enemies, but Abelard resolved to end his days in retirement. The severe penances which he imposed upon himself, together with the grief which never left his heart, gradually consumed his strength, and he died, a pattern of monastic discipline, in 1142, at the abbey of St. Marcel, near Chalon-sur-Saone. Heloise begged his body, and had him buried in the Paraclete, of which she was at that time the abbess, with the view of reposing in death by his side. In 1800 the

Museum of French Monuments at Paris, and in November, 1817. were deposited under a chapel within the precincts of the church of Monamy. The small chapel, in the form of a beautiful marble monument, in which the figures of the ill-fated pair are seen reposing side by side, is now one of the most interesting objects in the Parisian cemetery of Pere la Chaise.

Abelard was distinguished as a grammarian, orator, logician, poet, musician, philosopher, theologian, and mathematician. As a philosopher he founded an eclectic system commonly, but erroneously, termed Conceptualism, which lay midway between the prevalent Realism, represented in its most advanced form by William of Champeaux, and extreme Nominalism, represented in the teaching of his other master Roscellin, and largely approached the Aristotelian philosophy. In ethics Abelard placed much emphasis on the subjective intention, which he held to determine the moral value as well as the moral character of man's action. Along this line his work is notable, owing to the fact that his successors did little in connection with morals, for they did not regard the rules of human conduct as within the field of philosophic discussion. His love and his misfortunes have secured his name from oblivion; and the man whom his own century admired as a profound dialectician is now celebrated as the martyr of love. The letters of Abelard and Heloise have been often published in the original and in translations. Pope's poetical epistle "Eloisa to Abelard" is founded on lations. them. Abelard's autobiography, entitled "Historia Calamitatum," is still extant. The chief work on the life of Abelard is Remusat's "Abelard" (true vols Paris 1945) "Santal (two vols. Paris, 1845). See also Compayre's "Abelard and the Origin and Early History of Universities" (1893; series of "Great Educators"). A complete edition of his work was published by Cousin (two vols. Paris, 1849-1859).

at the abbey of St. Marcel, near Chalon-sur-Saone. Heloise begged his body, and had him buried in the Paraclete, of which she was at that time the abbess, with the view of reposing in death by his side. In 1800 the ashes of both were carried to the

Dr. Abercrombie died suddenly, Nov. 14, 1844.

Abercrombie, Sir Ralph, a British general, born in 1738. He was commander-in-chief in the West Indies, in 1795; in the attempt against Holland, in 1799, and in the expedition to Egypt. Mortally wounded in the beginning of the battle of Alexandria (March 21, 1801), the general kept the field during the day, and died some days after his victory.

Aberdeen, the chief city and sea-port in the North of Scotland, lies at the mouth and on the N. side of the river Dee, 111 miles N. of Edinburgh. Population of the parliamentary burgh

(1921) 158,969.

Aberdeen, George Hamilton Gordon, Earl of, born in 1784. He took office as Secretary of State for Foreign Affairs in 1828, in the ministry formed under the Duke of Wellington, and in 1843 in the Peel ministry. Entering public life as a Tory, his policy was that of non-interference in the efficient of forming states. In in the affairs of foreign states. 1853, Earl Aberdeen was selected to head a new ministry, which for some time was extremely popular. He en-deavored to prevent the country from entering upon the conflict with Rus-sia, but all his efforts were unavail-Failing to receive sufficient support to carry out his measures, he resigned in 1855. Died Dec. 14, 1860.

Aberdeen, Sir John Campbell, Hamilton Gordon, seventh Earl of, born in 1847. He served as Governor-General of Canada (1893-1898), and as Lord-Lieutenant of Ireland in 1886 and after 1905. His wife, Ishbel Maria, Marchioness of Aber-deen, born in 1857, daughter of Lord Tweedmouth and direct descendant of Robert Bruce, is an accomplished orator, and organized the Irish Village at the Columbian Exposition in Chicago in 1893. For many years she furthered the welfare of women.

Abernethy, James, a Scotch civil engineer, born in Aberdeen in 1815. As a boy he assisted his father on the extension of the London docks, and afterward designed and built the

provement of the Danube at Vienna; reclaimed Lake Aboukir, in Egypt, and proposed the Manchester shipcanal. He was the first to apply hydraulic power for working lock-gates. He died March 8, 1896.

Abernethy, John, an eminent English surgeon, founder of the School of St. Bartholomew's; born in London, April 3, 1764. He died at Enfield, April 28, 1831.

Abert; John James, an American military engineer, born in Virginia in 1788; served in the War of 1812; was made chief of United States topographical engineers in 1838; assisted in developing important canals and other works; member of the Geographical Society of France. He died in 1863.

Abesta, or Avesta, the name of one of the sacred books of the Persian magi, which they ascribe to their great

founder Zoroaster.

Abgar, or Abgarus, is the name or title of 28 princes of Edessa, in Mesopotamia. The most notable of these princes is the 14th of the name. a contemporary of Jesus, and was said to have written a letter to Jesus and to have received an answer from Him. These letters, translated into Greek from the Syriac by Eusebius of Cæsarea, were denounced as spurious by Pope Gelasius in 494 and soon lost all redit. The letter from Abgar contains a request that Jesus should visit him, and heal him of a certain disease. In the reply, Jesus is represented as promising to send a disciple to heal him after His ascension. What purported to be copies of this correspondence came to light in 1900. For other fables in this connection, see Lipsius' "Die Edessenische Abgar-Lipsius' "Die sage" (1880).

Abgillus, surnamed Prester John, a king of the Frisons. He attended Charlemagne to the Holy Land, and did not return with him, but made great conquests in Abyssinia, which was called, from him, the empire of Prester John. He lived in the 8th

century.

Abiathar (the father of abunlock and dock at Aberdeen, the docks dance), a high-priest of the Jews, son at Swansea, Newport, Cardiff and of Ahimelech, who had borne the same Hull, and the Cavour canal in Italy; office, and received David in his house. designed the accepted plan for the im- This so enraged Saul that he put Ahim-

elech and 81 priests to death; Abi- Agitation became acute after the setathar alone escaped the massacre. He afterward was high-priest, and often gave King David testimonies of his fidelity. But after this he conspired with Adonijah, in order to raise him to the throne of King David, his fa-ther, which so exasperated Solomon against him that he divested him of the priesthood, and banished him A. M. 3021 (B. c. 1014).

Abib, a name given by the Jews to the first month of their ecclesiastical year, afterward called Nisan. It answered to the latter part of March

and beginning of April.

Abigail, the beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail took the blame upon herself, and succeeded in appeasing the anger of David. Ten days after, Nabal died, and David sent for Abigail and made her his wife. (I Sam. xxv: 14, etc.)

Abliene, city and capital of Taylor county, Tex.; on the Texas & Pacific railroad; 200 miles N. of Austin; has flour, cotton-seed oil, and planing mills, machine shops, creamery, chair and mattress factories, and large cattle trade. Pop. (1930) 23,175.

Abiogenesis, name given by Prof. Huxley to the theory of spontaneous generation, i. e., that living matter can be produced from that which is not in itself living matter. It is the antithesis of biogenesis.

Abishai, son of David's sister Zeruiah, and brother to Joab.

Abo, Archipelago of, an extensive group of low, rocky islands in the Baltic Sea, spreading along the S. and W. coasts of Finland, opposite the city of Abo, rendering the naviga-tion difficult and dangerous.

Abo, Peace of, a treaty concluded Aug. 17, 1743, between Russia and Sweden, by which Russia retained a part of Finland and restored to Sweden the remainder on condition that the latter power should elect the Prince of Holstein-Gottorp successor to the

Abolitionists, in United States history, those who advocated the abo-lition of African slavery in the South-ern States. The anti-slavery agitation dates back even to colonial days.

tlement of the war troubles of 1812-1815. In 1833, the formation of a National Anti-Slavery Society took place in Philadelphia, and in 1848 of the Free Soil Party. The abolition movement was powerfully promoted by William Lloyd Garrison, who issued a newspaper, "The Liberator," for the better dissemination of his views; and also by Wendell Phillips, Charles Sumner and others. The more extreme agitators among them denied the duty of obedience to the Constitution, since it contained the clause warranting the Fugitive Slave Law, and they de-nounced it as "a covenant with death and an agreement with hell." In practice they violated it by systematically assisting in the escape of runaway slaves. A line of stations known as the "Underground Railroad" was secretly arranged, along which the fu-gitives were passed from point to point, concealed from pursuers, and cared for until they reached safety in Canada. In Boston, Garrison was mobbed, and the abolition cause in the United States counted among its martyrs Elijah Lovejoy, shot in Alton, Ill., in 1837, and John Brown, hanged in Virginia in 1859. In 1840 the abolitionists divided on the ques-tion of the formation of a political anti-slavery party, and the two wings remained active on separate lines to the end. It was largely due to the abolitionists that the Civil War, when it came, was regarded by the North chiefly as an anti-slavery conflict, and they looked upon the Emancipation Proclamation as a vindication of this

Aboma, a large and formidable American snake, called also the ringed Anciently it was worshipped by the Mexicans.

Aborigines, the earliest known inhabitants of any other land.

Aboukir, a small village on the Egyptian coast, 10 miles E. of Alexandria. Aboukir bay is celebrated for the naval battle in which Nelson annihilated the French fleet on Aug. 1-2, 1798. This decisive victory gained Nelson the title of Baron Nelson of the Nile; and the battle is often spoken of as the battle of the Nile. See APPENDIX: World War.

About, Edmond, a French novelist, born in Dieuze, Lorraine, Feb. 14, 1828; died in Paris, Jan. 17, 1885.

Abra, a province of Luzon, Philippine Islands; on the N. W. coast; area, 1,484 square miles; pop. (1903) 51,860, of whom 14,037 were wild; capital, Bangued.

Abracadabra, a magical word among the ancients, recommended as an antidote against several diseases. It was to be written upon a piece of paper as many times as the word contains letters, omitting the last letter of the former every time, and suspended from the neck by a linen thread. It was the name of a god worshipped by the Syrians, the wearing of whose name was a sort of invocation of his aid.

At present, the word is used chiefly in jest, to denote something without meaning.

Abraham, son of Terah, and brother of Nahor and Haran, the progenitor of the Hebrew nation and of several cognate tribes. At the goodly age of 175, he was "gathered to his people," and laid beside Sarah, in the tomb of Machpelah, by his sons Isaac and Ishmael.

Abraham, Plains of and Heights of, a table-land near Quebec, rising above the St. Lawrence, where the battle of Quebec was fought between the British and French (1759).

Abranyi, Kornel, a Hungarian poet, novelist, and publicist; born in Budapest, Dec. 31, 1849. As a member of the Hungarian diet and as editor of the "Pesti Naplo," he is an important political figure in Hungary.

Abrogation. The term is used popularly as the equivalent of repeal, whether by statute or contrary usage.

Abruzzi, Prince Luigi Amadeo, Duke of, Italian explorer; born in Rome, Jan. 30, 1873; a nenhew of

King Humbert, in May, 1899, he started on an expedition, in the specially prepared steamer "Star of Italy," for Franz Josef Land, intending, when frozen in, to use sledges in a search for the North Pole and the balloon explorer, Dr. Andrée. He returned to Norway in September, 1900, after having reached a point in latitude 86° 33' N., surpassing Nansen's furthest N. record by 19'.

Absalom, the third son of David, king of Israel, remarkable for his beauty and for his unnatural rebellion against his father, which led to his untimely death.

Abscess, a gathering of pus in any tissue or organ of the body. Abscesses may occur in almost any portion of the body. They are of three types: the acute abscess, or phlegmon, arising from an inflammatory tendency in the part; the chronic abscess, connected with scrofulous or other weakness in the constitution; and the diffused abscess, due to contamination in the blood.

Absenteeism, a term applied to the owners of estates in a country who habitually absent themselves from that country, and spend the income of their estates in it in another country. Used more particularly regarding Irish landlords who live elsewhere.

Absinthe, a liqueur made principally in Switzerland, and much used by the French; composed of volatile oil of wormwood, oil of anise and other ingredients mixed in alcohol. It is an intoxicant, more agreeable to the taste than usual alcoholic beverages, but its persistent use leads to extreme physical and mental disorders.

Absolution. The Roman Catholic Church, since the fourth Lateran council in 1215 A. D., invests the priest with power in his priestly office to pronounce absolution from sins that have been confessed. In most other Churches, absolution is no more than a general or formal declaration that God will forgive the sins of penitents, with exhortation to seek such forgiveness.

Abstinence, the act or habit of refraining from something to which we have a propensity, or in which we find pleasure; but it is more particularly applied to the privation or sparing use of food. Abstinence has been enjoined and practiced for various

ends, as sanitary, moral, or religious.

Church.

Abul-Abbas, Abd-Allah, first of the Arabian dynasty of Absides; a caliph of incredible cruelty, on account of which he was called "al Suffah" ("The Sanguinary"). On assurances of amnesty, he beguiled 90 members of the Ommiad family (the preceding dynasty) into a converted to Christianity in the time of and rods. He died in 754.

Abuna, the title given by the Ethiopian Christians to their metropolitan. He is the chief of the secular clergy.

Abu-Simbel, Ibsambul, or Ip-

end only to Thebes.

Abyssinia, or Habesh, an ancient Abstinence of flesh on certain days is kingdom of Eastern Africa. The offiobligatory in the Roman Catholic cial name of the country is the Empire Church.

The time during which life can be supported under total abstinence from food or drink, is usually stated to vary from eight to ten days; the period may, however, be greatly prolonged. Total abstinence, as a term, has also special reference to alcoholic drinks.

Abt, Franz, a German song writer; born in Saxony, Dec. 22, 1819. He studied theology at Leipsic, but abandoned it for music. He is well King of Shoa. The principal divisions known as composer of the favorite song, "When the Swallows Homeward foms of Shoa are the provinces or kingsong, "When the Swallows Homeward foms of Shoa in the S., Amhara in the Fly." of Ethiopia. It has an estimated area snown as composer of the lavoite of shown as composer of the lavoite of song, "When the Swallows Homeward doms of Shoa in the S., Amhara in the Fly." He visited the United States in 1872. He died March 31, 1885.

Abu-Klea, a place in Egypt, on the route across the country between Korti and Metammeh, both on the great bend of the Nile below Khartum; was the scene of a battle on Jan.

17, 1885, in which Sir Herbert Stewart defeated the Mahdi's forces.

Abu-Klea, a place in Egypt, on the riving in the N., to which territories. Addis Adaba in Shoa is the present residence of the ruler, but the Abyssinian royal residences largely consist of houses very slightly built, and thus resemble more or less permanent camps rather than towns. Other territories.

ily (the preceding dynasty) into a converted to Christianity in the time of hall, where they were slain with whips the Emperor Constantine, by some missionaries sent from Alexandria. In the 6th century the power of the sovereigns of their kingdom had attained its height; but before another had expired the Arabs had invaded the country, and obtained a footing in Adel, though sambul, the site of two temples on the Nile, constructed by Rameses II.

The principal beauties of the facade of the larger temple (119 feet broad, and more than 100 feet high) are the four internal commotions and now invaded internal commotions sitting colossi, each more than 65 feet by external commotions and now invaded by external enemies (Mohammedans and Gallas). To protect himself from the last the Emperor of Abyssinia aptolia, on the Straits of Gallipoli. In plied, about the middle of the 16th centernal commotions and now invaded by external commotions and now in tolia, on the Strates of Gampon. Implied, about the middle of the four centres its neighborhood Xerxes, when he intury, to the King of Portugal for assuaded Greece, crossed with his immense army the Hellespont, on a bridge of boats. Memorable also from being the scene of the loves of Herotella and was sent, and the empire saved. The Roman Catholic priests saved. The Roman Catholic priests and Leander, and from Byron having having now ingratiated themselves adopted its name in his "Bride of have been the ancient This, and to have been sections of the leander Rome. This attempt, however, was

resisted by the ecclesiastics and the people, and finally ended, after a long struggle, in the expulsion of the Roman Catholic priests about 1630. The kingdom, however, gradually fell into a state of anarchy, which, about the middle of the 18th century, was complete.

Abvssinia thus became divided into a number of petty independent states. A remarkable, but, as it proved, quite futile attempt to resuscitate the unity and power of the ancient kingdom was commenced about the middle of the 19th century by King Theodore, who aimed at the restoration of the ancient kingdom of Ethiopia, with himself for its sovereign; but his cruelty and tyranny counteracted his politic measures. In consequence of a slight, real or fancied, which he had received at the hands of the British government, he threw Consul Cameron and a number of other British suband a number of other briush subjects into prison in 1863, and refused to give them up. To effect their release an army of nearly 12,000 men, under the command of Sir Robert Napier, was dispatched from Bombay in 1867. After being defeated in a battle Theodore delivered up the captives and shut himself up in Magdala, which was taken by storm on April 13. Theodore was found among the slain, and probably died by his own hand.

In 1885 Italy asserted a protectorate with disastrous results; defeat by Menelek's troops at Adowa in 1896 made them abandon all claims except to the Eritrean colony on the Red Sea. Menelek transferred his capital to Addis Ababa, where British, American and French interests became active. On Dec. 13, 1906, an agreement was signed between Great Britain, France and Italy to conserve their interests in Abyssinia, by maintaining the po-litical and territorial status quo and the open door. After agreeing to stop slavetrading Abyssinia joined the League of Nations in 1923. In 1928, after a lapse of 20 years, the U. S. resumed diplomatic relations. resumed diplomatic relations with Ethopia. On Oct. 7, 1928, Ras Tafari Makonnen was crowned Negus of Abyssinia sharing the sovereignty with his aunt, Empress Judith. Early in 1930 unrest broke out into open re- French institution, originally founded

volt. The cause was Ras Tafari's carrying a process of modernization op-posed by the conservatives, especially the supporters of Empress Judith and the Coptic Church. On Mar. 31, 1930, a battle was fought in which Ras Guga Wali commander of the rebels and husband of the Empress was killed. Ras Tafari proclaimed himself emperor and immediately started many engineering projects reforms and among the latter being the Lake Tsana dam. Pop. (est.) 10,000,000.

Acacia, plants which abound in Australia, in India, in Africa, tropical America, and generally in the hotter regions of the world. In California several species are cultivated in the open for tannin and for timber. The Black Watte has in its bark four times as much tannin as the best oak.

Academus, a Greek mythical hero who rescued Helen after her abduction by Thesues, revealed her hiding-place and was thenceforth held in honor by the Lacedæmonians. The term 'acad-emy' is derived from his name.

Academy, the gymnasium in the suburbs of Athens in which Plato taught. The word is also applied to a high school designed for the technical or other instruction of those who have acquired the rudiments of knowledge.

Academy, French, an institution founded in 1635 by Cardinal Richelieu for the purpose of refining the French language and style. It became in time the most influential of all literary societies in Europe. Together with the Academy of Inscriptions and Belles Lettres, the Academy of Moral and Political Sciences and the Academy of Sciences, it composes the National Institute of France.

Academy of Arts, The Royal, a British institution for the encourage-ment of painting, sculpture, and de-signing; founded in 1768 by George III., with Sir Joshua Reynolds as president.

Academy of Design, National, an American institution, in New York city, founded in 1826, conducting schools in various branches of the fine arts, and holding semi-annual exhibi-

in 1648 at Paris under the name of the Academy of Painting and Sulp-ture. In 1795 it was joined to the Academy of Architecture, and has borne its present name since 1819.

Academy of France at Rome, an institution for the advanced study of the fine arts in Rome, Italy, founded by Colbert in 1666, during the reign of Louis XIV. It was at first estabthe Corso, and, in 1803, at the villa al Society of London.

Medicis. The young artists, painters, sculptors, architects. spend four years there, with an annual pension of 3,500 francs and traveling expenses.

Academy of Inscriptions and Belles Lettres, an institution founded at Paris by Colbert in 1663, under the name of Petite Académie. Com-parative philology. Oriental, Greek, and Roman antiquities and epigraphy have received the attention of the Academy, which has published a series of invaluable records and works.

Academy of Medicine, a French institution, founded in Paris in 1820, for the purpose of keeping the gov-ernment informed on all subjects appertaining to the public health.

Academy of Moral and Political Science, founded at Paris in 1795, is composed of 30 members, divided into 5 sections, with 5 free acaddemicians, 5 foreign associates, and 30 corresponding members.

Academy of Natural Sciences of Philadelphia, an institution founded in 1812.

Academy of Political and Social Science, American, an institution organized at Philadelphia in 1889 and incorporated in 1891.

Academy of Sciences, an institution founded at Paris, in 1666, by Colbert and approved by Louis XIV. in 1699, has now 66 members, in 11 sections, with two perpetual secretaries and 100 corresponding members.

Academy of Sciences and Arts, American, an academy established in Boston in 1780 by the Council and House of Representatives of Massachusetts; the successor of an institution founded by Franklin.

Academy of Sciences, The Imperial, a Russian institution, founded in St. Petersburg by Catherine I., in 1725, and largely endowed by Catherine II.

Academy of Sciences, The National, an American institution, founded in 1863, consisting of 100 members, elected from among the most distinguished scientific men of the

Medicis. The young artists, painters, sculptors, architects, engravers and al, a German institution, in Berin, musicians who secure the annual prizes founded by Frederick I., in 1700; is divided into four sections, devoted to all the physics philosophy, and mathematics, physics, philosophy, and

> Acadia, a former French colony in North America, including Nova Scotia and nearly all of New Brunswick, settled in 1604. It grew so slowly that it numbered only 900 inhabitants in When, by the peace of Utrecht (1713), it was given to the English, the inhabitants, having refused to take the oath of allegiance, were ordered to leave their homes, and 5,000 emigrated to Louisiana and Georgia, and 2,000 were transported and scattered over New England. The story of their sorrow is touchingly introduced into Longfellow's "Evangeline.

> Acanthus, the name of three ancient cities of Egypt, of Caria and of Macedonia. The latter is noted for

COIN OF ACANTHUS.

the canal across the peninsula of Mt. Athos through which Xerxes sailed on his way to Greece.

Acanthus, a genus of herbaceous shrubs, order Acanthaceæ, mostly tropical, two species of which, A. mollis and A. spinosus (the bear's-breech or brankursine), are characterized by large white flowers and deeply indented shining leaves. They are favorite ornamental plants in gardens.-In architecture the name is given to a kind of foliage decoration said to have been

suggested by this plant, growing around a basket, and much employed in Roman and later styles.

Acapulco, a seaport of Mexico, on the Pacific, with a capacious, wellsheltered harbor; a coaling station for steamers, but with no great trade.

Pop. 6,000.

Acclimatization, the process of accustoming plants or animals to live and propagate in a climate different from that to which they are indigenous. The numerous varieties which many species of plants and animals present are sufficient in any view to afford considerable scope for adaptation to climate.

Accolade, in heraldry, the cere-mony by which in mediæval times one

was dubbed a knight.

Accolti, Bernardo, an Italian poet (1465-1535. Leo X. esteemed him highly, and made him apostolic secretary, cardinal, and papal legate at Ancona. He drew up the papal bull against Luther (1520).

Accordion, a well-known keyed instrument with metallic reeds. The accordion was introduced into America from Germany about 1828. Improvements have been made on it in the flutina, the organ-accordion, and the concertina.

Account, in banking, commerce law, and ordinary language, a regis-

try of pecuniary transactions.

Aceldama, a field purchased by the Jewish chief priests and elders with the 30 pieces of silver returned by Judas. It was used as a place of in-terment for strangers. The traditionary site is on a small plateau half way up the southern slope of the valley of Hinnom, near the junction of the lat-ter with the valley of Jehoshaphat. (See Matt. xxvii: 3-10; Acts i: 18.

Acetic Acid, an acid produced by the oxidation of common alcohol, and of many other organic substances. Pure acetic acid has a very sour taste and pungent smell, burns the skin, and is poisonous. From freezing at ordinary temperatures (58° or 59°) it is known as glacial acetic acid. Vinegar is simply dilute acetic acid. Acetic acid is largely used in arts, in medi-cine, and for domestic purposes.

Acetylene, a gas composed of car-

a disagreeable odor, suggesting garlic. Subjected to pressure it will liquefy at a weight of 68 atmospheres. It is best produced by the action of water on carbide of calcium, and is used thus in bicycle lamps. The production of the gas is attended with considerable risk. as a too sudden application of water to the carbide will generate enormous quantities which is liable to explode when mixed with air and subjected to the slightest heat, even rubbing the vessel in which it is contained being sufficient to produce an explosion. The gas is much less poisonous than the ordinary illuminating gas, and under proper conditions can be used as a safe and cheap illuminant.

Acheans, one of the four races into which the ancient Greeks were divided. In early times they inhabited a part of Northern Greece and of the Peloponnesus. They are represented by Homer as a brave and warlike people. A confederacy or league existed among the twelve towns of this

region.

Achard, Franz Karl, a German chemist, born in Berlin in 1754. He devoted himself to the development of the beet-sugar manufacture, and, after six years of laborious endeavor, he discovered the true method of separating the sugar from the plant. He was appointed director of the class of physics in the Academy of Science, in Berlin, and died in 1821.

Achard, Louis Amedee, a French novelist and publicist, born in 1814. He died in 1875.

Achates, a friend of Æneas, whose fidelity was so exemplary that fidus Achates (the faithful Achates) became a proverb.

Achenwoll, Gottfried, a German scholar, born in Elbing, Prussia, Oct. 20, 1719; became professor at the University of Gottingen, first of philoso-phy and afterward of law; is regarded as the founder of the science of statistics. He died in Gottingen, May 1, 1772

Acheron, the river of sorrow, which flowed around the infernal realms of Hades, according to the

mythology of the ancients.

Acherusia, a lake of Campania, near Capua. Diodorus mentions that, bon and hydrogen, colorless and with in Egypt, the souls of the dead were conveyed over a lake called Acherusia, and received sentence according to the actions of their lives. The boat which carried them was called Baris, and the ferryman Charon, etc.

Achilles, son of Peleus, king of the Myrmidons, in Thessaly, and of Thetis. His mother's desire for his safety made her try to make him invulnerable when a child by anointing him with ambrosia, and again by dipping him in the river Styx, from which he came out proof against wounds, all but the heel, by which she held him. He was the bravest of the Greeks in the Trojan War, in which he was slain. He is the hero of Homer's Hiad.

Achilles' Tendon, TENDON OF ACHILLES, the strong tendon which connects the muscles of the calf with the heel, and may be easily felt with the hand. The origin of name will be understood from the above article.

Achmet Tewfik Pasha, a Turkish statesman, born in 1818, at Constantinople. His father was a Greek convert; his mother was a Jewess. In 1877 the Sultan appointed him President of the first Turkish Chamber of Deputies; then he became Governor-General of Adrianople, and showed himself a stern ruler in the war of 1877. In 1878 he was Premier and signed the Peace of Santo Stefano. He died in June, 1891.

Achromatic, in optics, transmitting colorless light, that is, not decomposed into the primary colors, through having passed through a refracting medium. A single convex lens does not give an image free from the prismatic colors, because the rays of different color made up of white light are not equally refrangible, and thus do not all come to a focus together, the violet, for instance, being nearest the lens, the red farthest off. If such a lens of crown-glass, however, is combined with a concave lens of flintglass—the curvatures of both being properly adjusted—as the two materials have somewhat different optical properties, the latter will neutralize the chromatic aberration of the former, and a satisfactory image will be produced. Telescopes, microscopes, &c., in which the glasses are thus composed are called achromatic.

Acids, in chemistry, a salt of hydrogen in which the hydrogen can be replaced by a metal, or can, with a basic metallic oxide, form a salt of that metal and water. Many organic acids occur in the juices of vegetables, some in animals, as formic acid in ants.

Acland, Christina Harriet Caroline Fox, daughter of the Earl of Ilchester, born in 1750; died at Tetten. near Taunton, England, July 21, 1815. Her husband, Major John Dyke Acland, of the British Army, was captured with Burgoyne at Saratoga. He being severely wounded, she joined him in the American lines, and tenderly nursed him. Major Acland was so touched by the kindness of the Americans to himself and wife that, after his return to England he fought a duel with an officer who spoke insultingly of Americans.

Acne, a genus of skin diseases containing those characterized by pustules, which, after suppurating imperfectly, become small, hard, red, circumscribed tubercles on the skin.

Acolyte, Acolyth, and Acolothist, in the Roman Catholic Church, one of the inferior orders of the clergy, whose office it is to attend upon the deacons and subdeacons in the ministry of the altar, to light and hold the candles, to bear the incense, to present the priest with wine and water, etc.

Aconite, a plant familiarly known as the monk's-hood, or wolf's-bane. Its active principle is aconitine.

Acorn, the well known fruit of the oak. In the early ages, acorns constituted a principal part of the food of man. At present they are used for the feeding of pigs, etc.

Acosta, Joseph, a Spanish Jesuit, who, from being a missionary in Peru, became provincial of his order; born at Medina del Campo in 1547; died at Salamanca in 1600. His "History of the West Indies," first printed in Spanish, is universally known.

Acoustics, the science of sound. We are sensible of sound when we are affected by certain vibrations in the air or other matter in contact with our organs of hearing. In ordinary cases of hearing the vibrating medium is air, but fishes hear under water, and all substances that vibrate may be employed to propagate and convey sound.

Sound is reflected in a manner analogous to the reflection of light. When it is reflected from a plain surface the reflected sound comes as if it was propagated from a point beyond the surface at a distance equal to the distance of the real point of propagation from the surface. Sounds produced in one focus of a hollow ellipsoid are reflected to the other focus. Whispering galleries are instances of the reflection of sound to a focus, or to form sound caustics. Echoes are familiar instances of reflection of sound. Lenses have been formed of collodion filled with different gases, and by means of these sound has been refracted in a manner which is analogous to the refraction of light by glass lenses.

Acre, an American and English measure of land, containing 4,840

square yards.

Acre, or St. Jean d'Acre, a sea-port of Syria, formerly called Ptolemais; on a promontory at the foot of Mount Carmel. This town, capital of the pashalic of the same name, is famous for the memorable sieges it has sustained.

Acropolis, the high part of any ancient Greek city, usually an eminence overlooking the city, and frequently its citadel. Notable among such citadels were the Acropolis of Argos, that of Messene, of Thebes, and of Corinth, but pre-eminently the Acropolis of Athens, to which the name is now chiefly applied.

Acrostic, a poetical composition, disposed in such a manner that the initial letters of each line, taken in order, form a person's name or other complete word or words.

Act, in dramatic language, a portion of a play performed continuously, after which the representation is suspended for a little, and the actors have the opportunity of taking a brief rest. Acts are divided into smaller portions called scenes. (See Shakespeare throughout.)

In parliamentary language, an ellipsis for an act of congress, legislature,

In law: (1) Anything officially done by the court. (2) An instrument in writing for declaring or proving the truth of anything. Such is a report, a certificate, a decree, a sentence, etc.

In bankruptcy, an act, the commission of which, by a debtor, renders him liable to be adjudged a bankrupt.

Act of Settlement, an act of the Parliament of England in 1701, vesting the hereditary right to the English throne in Sophia, Electress of Hanover, and her Protestant descendants. constituting the source of the sover-eignty of the house of Hanover or Brunswick, the present ruling line.

Act of Supremacy. (1) An act of the Parliament of England, in 1534, by which the king was made the sole and supreme head of the Church of England. (2) A re-enactment of the above, with changes, in 1559.

Act of Toleration, an act of the reign of William and Mary, granting freedom of religious worship, under certain comparatively moderate conditions, to all dissenters from the established Church of England, except Roman Catholics and persons denying the Trinity.

Act of Uniformity. (1) An act of the Parliament of England (1559), adopting a revised liturgy for the Church of England, entitled "An Act for the Uniformity of Common Prayer and Service in the Church, and Administration of the Sacraments." (2) An act of Parliament (1662), requiring that the revised Book of Common Prayer and Ordination of Ministers, and no other, should be used in all places of public worship and be assented to by clergymen. By this test more than 2,000 non-conforming clergymen were ejected from their churches.

Acta Sanctorum, or Martyrum, the collective title given to several old writings, respecting saints and martyrs in the Greek and Roman Catholic Churches, but now applied especially to one extensive collection begun by the Jesuits in the 17th century.

Actinic Rays, rays capable of producing chemical decomposition, as in photography, in the coloring of flowers and fruit. All ether waves, from all sources and of all lengths, may now be considered as actinic, some substances being decomposed by certain wave lengths and other substances by different wave lengths.

Actinism, the chemical principle of light. Three distinct principles ema-

nate from the sun - light, heat, and actinism. Numerous examples of the effects of their influence occur daily, which are erroneously attributed to the light which we see. It is actinism which fades colors, bleaches linen, rots fabrics, tans the human skin, puts out the fire, and performs the operations of photography. It acts principally by abstracting oxygen from the bodies which it affects. There may be actin-ism without light, or vice versa. Yel-low glass transmits the latter, but stops the former. Dark blue glass, which transmits but little light, is quite pervious to actinism. Blue objects reflect great quantities of it, while red or yellow ones reflect but little or none. The electric and lime lights give out great quantities of actinism from their blue tinge; and gas and candles but very little, from their yellow color. The amount of actinism received from the sun differs considerably, according to the time of year, being at its maximum about the end of March, and gradually diminishing until the end of December, when it arrives at its minimum. Actinism, in large quantities, is necessary to the proper condition of the human system.

Actium, a promontory on the W. coast of Greece, jutting out on the N. W. extremity of Acarnania, not far from the entrance of the Ambracian Gulf (Gulf of Arta), at present called La Punta. It is memorable on account of the naval battle fought here between Antony and Octavianus Sept. 2, 31 B. C., ending in victory for Octavianus.

Actor, in the drama, one who represents some part or character on the

Acts of the Apostles, the fifth book of the New Testament. It contains a narrative of the achievements of the leading apostles, and especially of St. Paul, the greatest and most successful of them all. Its author was St. Luke (compare Luke i: 1-4 with Acts i: 1), who was Paul's companion from the time of his visit to Troas. (Acts xvi: 8-11) to the period of his life, when he penned the second epistle to Timothy (II Tim. iv: 11). Adab. See Up-nun-ki.

1000; was appointed Archbishop of Bremen and Hamburg in 1045, and papal legate to the North in 1053. He soon extended his spiritual sway over Scandinavia, and carried Christianity to the Wends. He died at Goslar, March 16, 1072.

Adam and Eve, the names of the first pair of human beings in the account of the creation given in the book of Genesis. Adam is strictly a generic name, applicable to both man and woman, as used in the book of Genesis. but it came to be a proper name, used with the article, as in chapters ii, iii, and iv. The origin of the name is un-certain, but is usually connected with the Hebrew root Adam, "to be red." It is often derived from Adamah, "the ground," but this is taking the simpler from the more developed form.

Adam, Juliette (Mme. Edmond Adam, née Lamber), a French journalist and author of many works; born Oct. 4, 1836; editor of the "Nou-velle Revue" (the organ of the Ex-treme Republicans), which she founded in 1879. Her second husband, Edmond Adam, was a prominent politician; became a life senator, and died in 1877. She retired from journalism in 1899.

Adam's Apple, in botany (1) the name given by Gerarde and other old authors to the plantain tree, from the notion that its fruit was that sinfully eaten by Adam in Eden. (2) The name given, for the same reason, to a species of citrus.

In anatomy, a protuberance on the fore part of the throat, formed by the "os hyoides." The name is supposed to have arisen from the absurd popular notion that a portion of the forbidden fruit, assumed to have been an apple, stuck in Adam's throat when he attempted to swallow it.

Adam's Peak, a mountain in the middle of the island of Ceylon. It is a resort of Moslem and Buddhist pilgrims, and also notable on account of an upright shadow which it casts, apparently projected on vapor. Height, 7,420 feet.

Adams, Abigail, wife of John Adams, second President of the United Adalbert, a great German eccle- States; orn at Weymouth, Mass., siastic, born of a noble family about Nov. 23, 1744. Her letters, contained in "Familiar Letters of John Adams and His Wife, Abigail Adams, during the Revolution," evince keen political sagacity, and throw valuable light upon the men and the public affairs of the time. She died at Quincy, Mass., Oct. 28, 1818.

Adams, Brooks, an American essayist and politician, born at Quincy, Mass., 1848. He is the son of Charles Francis Adams, and a lawyer by profession. Besides contributions to magazines, he has written "The Emancipation of Massachusetts" (1887). He died Feb. 13, 1927.

Adams, Charles Francis, an American statesman, born in Boston, Aug. 18, 1807; was candidate for Vice-President in 1848, twice elected to Congress, was Minister to England from 1861 to 1868, and member of the Geneva Arbitration Commission of 1871. His chief literary work was "Life and Works of John Adams" (10 vols., 1850-1856), his grandfather. He also edited the writings of his father, John Quincy Adams. He died in Boston, Nov. 21, 1886.

Adams, Charles Francis, Jr., an American soldier and writer, born in Boston, May 27, 1834. He graduated from Harvard in 1856, served in the Civil War from 1861 until 1866 when he retired with the brevet rank of brigadier-general in the regular army. After 1874 he chiefly gave attention to historical and financial questions, everything he published attracting widespread attention. He was president of the Union Pacific Railroad until 1890. He died March 20, 1915.

Adams, Charles Francis, an American lawyer, born in Quincy, Mass., Aug 2, 1866. Mayor of Quincy, 1896-97. Secretary of the Navy in Pres. Hoover's Cabinet, Mar. 1929.

Adams, Charles Kendall, an American educator and historian, born at Derby, Vt., Jan. 24, 1835; died, July 26, 1902. After graduating from the University of Michigan in 1861, he studied abroad, and after holding various professorships, became president of Cornell University in 1885. In 1892 he became President of the University of Wisconsin. He was editor of Johnston's Encyclopædia and other reference works.

Adams, Henry, an American historian, born in Boston, Mass., Feb. 16, 1838; grandson of J. Q. Adams. He was for some time editor of the "North American Review," and Professor of History in Harvard College. His principal work is the "History of the United States." Died, 1918.

Adams, John, 2d President of the United States; born in Braintree, Mass., Oct. 19, 1735. He was educated at Harvard and adopted the law as a profession. His attention was directed to politics by the question which began to excite the colonies as to the right of the English Parliament to impose taxation upon them, and he took up a position strongly opposed to the claims of the mother country. In 1765 he published in the Boston "Gazette" some essays, which were reprinted in London in 1768, under the title of "A Dissertation on Canon and Feudal Law," the subject really treated in which was the government of the colonies and the rights of the colonists. In 1774 he was chosen a delegate from Massachusetts to the 1st Continental Congress. On his return he was appointed a member of the Provincial Congress, which had already begun to take aggressive measures against the home government. In 1775 he again attended the Continental Congress at Philadelphia, in which he set himself in determined opposition to all attempts at reconciliation with the home government, and succeeded in persuading Congress to take means of national defense. To secure the good-will of Virginia he proposed Washington for the command of the army. Next session he was appointed a member of committee on naval affairs and drew up the regulations which still form the basis of the American naval code. At the beginning of 1776 he accepted the post of chief-justice of Massachusetts. but he soon after resigned the appointment. He published at this time "Thoughts on Government, applicable to the Present State of the American Colonies," in which he supported selfgovernment by the different colonies with confederation. He seconded the motion for a declaration of independence proposed by Richard Henry Lee of Virginia, and was appointed a member of committee to draw it up. He

was a signer of the Declaration. He was also appointed a member of the Committee on Foreign Relations. He was next appointed chairman of the board of war and ordnance, a position which he held for 18 months. Near the end of 1777 he was sent to France on a special mission, and for 10 years he resided abroad as representative of his country in France, Holland, and England. He succeeded in negotiating various loans with Holland, and after taking part in the peace negotiations was appointed, in 1785, the first minister of the United States to the court of St. James. He was recalled in 1788 and elected Vice-President of the republic under Washington. In 1790 he published "Discourses on Davila," in which he opposed the principles of the French revolution. In 1792 he was reëlected Vice-President, and at the following election he became President. The country was then divided into two parties, the Federalists, who favored aristocratic and were suspected of monarchic views, and the Republicans. Adams adhered to the former party. Hamilton did his utmost with his own party to prevent the election of Adams, and his term of office proved a stormy one, which broke up and dis-solved the Federalist party. His re-election was again opposed by Hamilton, which ended in effecting the return of the Republican candidate Jefferson. Living to a great age he be-came, as one of the last survivors of the Revolution, a hero to the following generation. In 1820 he became a member of a State convention to revise the constitution of Massachusetts. He died July 4, 1826, on the 50th anniversary of the Declaration of Independence, and on the same day as Jefferson. Adams's works were ably and carefully edited by his grandson Charles Francis Adams.

Adams, John Quincy, 6th President of the United States, son of John Adams, 2d President; born in Braintree, Mass., July 11, 1767. In his 11th year he accompanied his father on his first embassy to France, and was placed at school near Paris. He returned with his father in about 18 months, but soon went back to Europe. and attended school in Holland and at the East River bridge. He died Dec. the University of Leyden. At the age 13, 1899.

of 15 Francis Dana, his father's secretary of legation, who had been appointed on a diplomatic mission to Russia, took him with him as his private secretary. After 14 months' stay in Russia he traveled back alone through Sweden and Denmark to The Hague. Soon after his father's appointment as ambassador at London he returned home to complete his studies. He graduated at Harvard in 1788, entered the office of Theophilus Parsons, and in 1791 was admitted to the bar. He now began to take an active interest in politics. He wrote a series of letters to the Boston "Senunder the signature of "Publicola," in reply to Payne's "Rights of Man," and in 1793 defended Washington's policy of neutrality under the signature of "Marcellus." These letters attracted attention, and in 1794 Washington appointed him minister to The Hague. In 1798 he received a commission to negotiate a treaty of commerce with Sweden. On the accession of Jefferson to the presidency he was recalled. The Federalist party had still sufficient influence in Massachusetts to elect him to the Senate in 1803. On the question of embargo, he abandoned his party. Having lost his reëlection on this account, he immedi-ately resigned his seat and retired to the professorship of rhetoric at Harvard, which he held from 1806 to 1809. On the accession of Madison he was appointed (1809) ambassador to Russia. He assisted in negotiating the peace of 1814 with England, and was afterward appointed resident minister at London. On the accession of Monroe to the presidency he was offered and accepted the post of Secretary of State, and at the expiration of Monroe's term of office he succeeded him in the presidency (1825). In 1831 he was returned to Congress by Massachusetts, and represented that State till his death, Feb. 21, 1848.

Adams, Julius Walker. American civil engineer, born in Boston, Mass., Oct. 18, 1812; took part of the course at the United States Military Academy; was Colonel of the 67th New York Volunteers in the Civil War; and was the pioneer engineer of

Adams, Maude, an American actress, born at Salt Lake City, Nov. 11, 1872; daughter of an actress who was leading woman of a stock company in that city, under the stage name of Adams. At 16 years of age Miss Adams joined E. H. Sothern's company in the "Midnight Bell;" afterward she was in Charles Frohman's stock company, and later supported John Drew. She made a great success in J. M. Barrie's "Little Minister" and "Peter Pan."

Adams, Oscar Fay, an American compiler and miscellaneous writer,

born in Worcester, Mass.

Adams, Samuel. an American statesman and Revolutionary patriot, born at Boston, Mass., in 1722. He was elected to the Massachusetts legislature in 1765, was a delegate to the first Continental Congress in Philadelphia, and a signer of the Declaration of Independence. He was active in framing the constitution of his native state, which he served as President of the Senate. Lieutenant-Governor (1789-1794), and Governor (1794-1797). He was zealous for popular rights, and fearless in his opposition to monarchism. He died in 1803.

Adams, Sarah Flower, an English hymn-writer; born at Great Har-low, Essex, Feb. 22, 1805. In 1834 she was married to William Bridges Adams, a noted inventor. She wrote many lyrics and hymns, the most popular of which is "Nearer, My God, to Thee." She died in August, 1848.

Adams, William Taylor, an American author and editor, best known by the pseudonym "Oliver Optic;" born July 30, 1822. He was a voluminous and highly popular writer of fiction for young readers, his works including several series of travel and adventure. He died March 27, 1897.

Addams, Jane, an American philanthropist, born in Cedarville, Ill., lanthropist, born in Cedarville, III., State, 1882; Second Assistant Secre-Rockford College in 1881, and after tary of State, 1886. Appointed Secre-tary of State ad interim to fill vacan-post-graduate studies in Europe and the United States, became an active tary of State ad interim to fill vacan-topy. Sept. 17 to Sept. 29, 1898; was social reformer. She inaugurated in critical period of the Chinese troubles and Sept. 1900. Died. 1924. House, an adaptation of the "social in Aug. and Sept. 1900. Died, 1924. settlement" plan to Chicago condi- Adelsberg, a town of Austria tions. She has acted as street clean-Hungary, remarkable for stalactical ing inspector in Chicago, and has lec-caves in its vicinity. The principal

tured on the improvement of the condition of the poor in great cities. 1909 she became president of the National Conference on Char ies and Correction, and in 1917 was chairman of the Woman's Peace Party. Notable publications: "Democracy and Social Ethics" (1902), and "A New Con-science and an Ancient Evil" (1911).

Addison, Joseph, an English essavist, son of the Rev. Lancelot Addison, subsequently dean of Lichfield; born at his father's rectory, Milston, Wiltshire, May 1, 1672. Died at Hol-land House, June 17, 1719. He was one of England's greatest writers.

Beside the independent efforts of his own he aspired to be a judge and censor of the literary productions of others, and he was, perhaps, beyond any man of his day, well qualified for the task. Certainly his judgments had less force and perhaps less depth than Johnson's, but they had much more breadth, harmony, and completeness. were woven with more art into a system depending on theoretical principles, and were delivered with a grace and eloquence of which the oracular moralist was no master. If his system was somewhat shallow, it had probably the merit of directing attention more to criticism, and preparing the way for better and more philosophic standerds of appreciation. Addison was buried in Westminster Abbey.

Ade, George, an American journalist and author, born in Kentland, Ind., Feb. 9, 1866. He has written fables, novels, and many successful plays,

Adee, Alvey Augustus, Second Assistant Secretary of State of the United States since 1886, born in As toria, N. Y., Nov. 27, 1842; appointed Secretary of Legation at Madrid, 1870; Chief of Diplomatic Bureau, 1878; Third Assistant Secretary of State, 1882; Second Assistant Secre-

Adelsberg, a town of Austria-

one, in the mouth of which the Poik disappears in a vast chasm, extends to the distance of two or three miles, and is found to terminate in a lake. After proceeding 200 yards into it a vast gloomy space, called the Dome, forming a hall 300 feet long by 100 feet high, is entered. The river is heard rushing below, and on crossing it by a wooden bridge and ascending a flight of steps cut in the rock, a series of lofty halls, supported by gigantic concretions resembling lofty Gothic columns, and apparently filled with statues of exquisite whiteness and delicacy, meets the view.

Adelung, Johann Christoph, a German philologist and lexicographer; born in Spantekow, Aug. 8, 1732. His life was devoted to an exhaustive investigation of his native language, which he traced to its remotest origins with a patience and a thoroughness that have remained unsurpassed. He died in Dresden, Sept. 10, 1806.

Aden, a peninsula and town belonging to Great Britain, on the S. W. coast of Arabia, 105 miles E. of the strait of Bab-el-Mandeb, the entrance strait of Bab-el-Mandeb, the entrance to the Red Sea. The peninsula is a mass of volcanic rocks, 5 miles long from E. to W., and rising to 1,776 feet. It is joined to the mainland by a narrow, level, and sandy isthmus. The town is on the eastern shore of the peninsula, stands in the crater of an extinct volcano, and is surrounded by harron cindar-like rocks. Frequently barren, cinder-like rocks. Frequently the heat is intense; but the very dry, hot climate, though depressing, is unusually healthy for the tropics. It has a garrison and strong fortifications, and a population of over 43,000.

Adirondack Mountains, the highest range in New York State, covering an area of about 12,500 square miles, and occupying parts of Clinton, Essex, Franklin, and Hamilton counties. These mountains, the real-gried formettion of which are the geological formation of which are chiefly granite, run in five parallel ranges; the highest range, or Adirondack proper, is on the E. side of the district, and the peaks rise to a great height. Mt. Marcy is 5,345 feet; Gray peak, 4,900 feet; White Face, 4,870 feet, etc. This whole district, some-times called the Adirondack Wilder-

cept the tallest peaks, and some of

these forests are still unexplored.

Adirondack Preserve, a district principally forest land, set apart by the State of New York, for the protection of the watershed of the Huusun and other rivers of the State, for public recreation, and for the practical study of forestry. It covers Hamilton county, and parts of Essex, Clinton, Fulton, Lewis, Oneida, Saratoga, Warren, Washington, Franklin, Herkimer and St. Lawrence counties, and contains many mountains and lakes. Area 1,917,063 acres. The Preserve is famous for summer resorts.

Adjutant, in military language, in the United States army, an officer se-lected by the colonel, whose duties in respect to his regiment are similar to those of an adjutant general with an army. Adjutant general: the principal organ of the commander of an army in publishing orders. The same organ of the commander of a corps, or department, is styled assistant adjutant general. The adjutant general has charge of the drill and discipline of the army.

Adjutant Bird, a large grallatorial or wading bird of Asia belonging to the stork family.

Adler, Felix, an American lecturer and scholar, born at Alzey, Germany, 1851. The son of an eminent Jewish 1851. The son of an eminent Jewish rabbi, he emigrated when young to the United States, where, and at Berlin and Heidelberg, he was educated. After being for some time professor at Cornell University, he founded in New York (1876) the Society of Ethical Culture, of which he is lecturer. Similar societies have been established elsewhere in the United States and in other countries. He is an effective writer and speaker. He has published "Creed and Deed" (1878); "The Moral Instruction of Children (1892). In June, 1902, he was called to the newly-created professorship of social and political ethics in the department of philosophy in Columbia University.

Adler, Hermann, a German writer, born in Hanover, May 29, 1839. He has lived most of his life in England, having been, since 1891, Chief Rabbi of the British Empire. D. 1911.

Administration, in law, the manmess, is covered with dense forests, ex- agement of the personal estate of anyone dying intestate, or without an executor. The word is also applied to the official terms of the President of the United States, and the Governors of States, mayors, etc., and to their official advisers.

Admiral, the title of the highest rank of naval officer. In 1917 the United States navy had on the active list one admiral and twenty-four rearadmirals and on the retired list seventy-four rear-admirals. After the declaration of war against the Imperial German Government many retired rear-admirals were recalled to active service.

Admiralty Island, a mountainous island, 90 miles long, off the W. coast of Alaska, to the N. E. of Sitka; belongs to the United States.

Admiralty Islands, a group of 40 islands, to the N.E. of New Guinea; Basco, the largest of them, being 60 miles in length, and is mountainous, but fruitful. The total area of the islands is 878 square miles. Together with adjoining groups, they were annexed by Germany, in 1885, but were put under the mandate of Great Britain after the World War.

Adobe, the name given in southwestern America to sun-dried bricks, and the structures built of them.

Adonai, a Hebrew name for the Supreme Being; a plural form of Adon, "lord," combined with the pronoun of the first person. In reading the Scriptures aloud, the Jews pronounce "Adonai" wherever the old name "Jhvh" is found in the text, and the name Jehovah has risen out of the consonants of "Jhvh," with the vowel points of Adonai.

Adonis, a pheasant's eye. A genus of plants so called because the red color of the species made them look as if they had been stained by the blood of Adonis. It is a beautiful plant, with bright, scarlet flowers, and having very markedly composite leaves, with linear segments. Plants of this genus are easily cultivated.

Adoption, the act of taking a stranger into one's family, as a son or daughter; or the taking of a person, a society, etc., into more intimate relations than formerly existed with another person or society; or the taking of taking loss a son or created him cardinal, in 1146, and, in 1148, made him legate to Denmark and Norway, which nations he converted to the Christian faith. When other person or society; or the taking

as one's own, with or without acknowledgment, an opinion, plan, etc., originating with another; also the selecting one from several courses open to a person's choice.

Adrian, or Hadrian, Publius Ælius, a Roman emperor, born at Rome, 76 A. D. Entering the army quite young, he became tribune of a legion, and married Sabina, the heiress of Trajan, whom he accompanied on his expeditions, and became successively prætor, governor of Pannonia, and consul. On Trajan's death, in 117, he assumed the government, made peace with the Persians, and remitted the debts of the Roman people. In his reign, the Christians underwent a dreadful persecution. He built a temple to Jupiter, on Mount Calvary, and placed a statue of Adonis in the manger of Bethlehem; he also had images of swine engraved on the gates of Jerusalem, all of which acts indicate a contempt for Christianity. Adrian died at Baiæ, in 139.

Adrian I., Pope, born at Rome; succeeded Stephen III. in 772. Adrian died after a pontificate of nearly 24 years, 795.

Adrian II., born at Rome; succeeded Nicholas I. in the papal chair in 867. He had been married, and had a daughter by his wife Stephania, from whom he afterward separated in order to live in celibacy. During the pontificate of Adrian, Photius, Patriarch of Constantinople, withdrew from the Church of Rome, from which time the schism between the Greek and Latin Churches dates, which continues to this day. Adrian died in 872, and was succeeded by John VIII.

Adrian IV., the only Englishman who was ever raised to the dignity of the papal chair, succeeded Anastasius IV. in 1154. His name was Nicholas Breakespere; and for some time he filled a mean situation in the monastery of St. Albans. Being refused the habit in that house, he went to France, and became a clerk in the monastery of St. Rufus, of which he was afterward chosen abbot. Eugenius III. created him cardinal, in 1146, and, in 1148, made him legate to Denmark and Norway, which nations he converted to the Christian faith. When nominated pope, he granted to Henry

II. a bull for the conquest of Ireland. In 1155, he excommunicated the King of Sicily; and, about the same time, the Emperor Frederic, meeting him near Sutinam, held his stirrup while he mounted his horse. Adrian took the Emperor with him, and conse-crated him King of the Romans, in St. Peter's church. The next year the King of Sicily submitted, and was absolved. Died, supposed of poison, in 1159.

Adrianople, the third city in what was European Turkey, on the navigable Maritza (ancient Hebrus), 198 United States as reported in 1928 by miles by rail W. N. W. of Constantifor 1926. the seat of the Ottoman sultanate in 1366-1453, and contains the most magnificent Moslem temple extant-that of the Sultan Selim. It has been conspicuous in warfare several times. See APPENDIX: World War.

Adriatic Sea, a large arm of the Mediterranean Sea, extending, in a N. W. direction, between the E. coast of Italy and the W. coast of the Bal-

kan peninsula.

Adulteration, a term applied to the fraudulent mixture of articles of commerce, food, drink, drugs, seeds, &c., with noxious or inferior ingredients. The chief objects of adulteration are to increase the weight or volume of the article, to give a color which either makes a good article more pleasing to the eye or else disguises an inferior one, to substitute a cheap-er form of the article, or the same subtances from which the strength has been extracted, or to give it false strength. Laws against the practice have existed since the 13th century; it is forbidden in civilized countries.

Advent, a term applied to certain weeks before Christmas. Anciently, the season of Advent consisted of six weeks, and this is still the duration of it in the Greek Church. In the Roman Catholic Church, however, and in the Protestant Churches that observe Advent, it only lasts four weeks, beginning with the Sunday nearest St. Andrew's Day (Nov. 30), either before or after.

believed that Christ's second coming would occur in October, 1843. their hopes were not realized, the num-ber of believers decreased. The Adventists still look with certainty for the coming of Christ, but not at a fixed time. They are now divided into the following bodies: Evangelical, Advent Christian, Seventh Day, Church of God, Life and Advent Union, and Churches of God in Jesus Christ. The following table gives a summary of the

	Denominations		Member- ship
1.	Evangelical	153	20,449
2.	Advent Christian.	444	29,430
3.	Seventh Day	1.981	110,998
4.	Church of God	58	1,686
	Life and Advent	7	535
6.	Church of God in Jesus Christ		3,528
	Total Adventists .	2,729	166,626

Total Adventists . 2,729 Advocate. (1) Originally one whose aid was called in or invoked; one who helped in any business matter; (2) In law, at first, one who gave his legal aid in a case, without,

however, pleading.

Now, in English and American law. one who pleads a cause in any court, civil or criminal. It is not, properly speaking, a technical word, but is used only in a popular sense, as synony-mous with barrister or counsel. In the army the judge-advocate is

the officer through whom prosecutions before courts-martial are conducted. There is also a judge-advocate-general for the army at large.

Ædile, in ancient Rome magistrates who had charge of public and private buildings, of aqueducts, roads, sewers, weights, measures, the national worship, and, specially when there were no censors, public morality.

Ægean Sea, the old name of the gulf between Asia Minor and Greece, now usually called the Grecian Archipelago.

Adventists, a sect in the United Egina, a Greek island about 40 States, founded by William Miller, square miles in area, in the Gulf of and sometimes called Millerites, which Ægina.

MODERN TYPES OF DIRIGIBLES

1—German Zeppelin captured by French after raiding London.
2 and 3—French types of observation dirigibles.
4—British dirigible of the coast defense type.

TYPES OF AMERICAN AEROPLANES

5—American warplanes on the French front.
6—Speedy biplane with 135 H.P. motor.
7—U. S. officers inspecting aeroplanes at a training camp.

Ægis, the shield of Zeus, which had been fashioned by Hephæstus (Vulcan). It was the symbol of divine protection.

Æneas, a Trojan prince, the hero of Virgil's great epic.

Æneid. one of the great epic poems of the world. It was written in Latin by Virgil, and published after his death, which took place about 16 B. C.

Æolian Harp, a harp played by AEolus—in other words, by the wind. It is made by stretching strings of catgut over a wooden sound-box.

Æolus, the god of the winds, who was fabled by the early poets to have his seat in the floating island of AEolia; but the Latin and later Greek poets placed him in the Lipari isles.

Æpinus, Francis Maria Ulric Theodore, a distinguished electrician, who was the first to see the affinity between magnetism and electricity in its full extent. Born at Rostock, Ger-many, in 1724; died at Dorpat, in Livonia, in 1802.

Aerodynamics, the science which treats of the force exerted by air when in motion.

Aeronautics, the art of aerial navigation by ballooning and aviation. Balloons use a baglike receptacle inflated with some form of gas, and include both free flying balloons and the dirigibles, while the word "aviation" is limited to heavier-than-air machines with lifting or sustaining surfaces. Full description of various kinds of aircraft is given near the end of this article.

The first form in which the idea of aerial locomotion naturally suggested itself was that of providing men with wings, and the myths of Dædalus and Icarus show that the attempts of man to soar above the earth commenced in prehistoric times. A wooden pigeon which sustained itself in the air for a few minutes is recorded as having been invented by Archytas of Tarentum, 400 years B. C. Suetonius states that Simon Magus was killed in Rome during the reign of Nero by attempting to fly from one house to another.

air supporting a man seated on a chair. In the 13th century, Elmerus, a monk, is said to have flown more than a furlong from the top of a tower in Spain. Father Francesco Lana (1631-87), an Italian physicist, de-scribes an ingenious but impracticable flying machine. Leonardo da Vinci, the Italian artist and scientist, at the end of the 15th century drew plans for an airship, and brought the matter within the scope of scientific research by declaring the problems to be solved were purely mathematical and me-chanical. Giovanni Batista Dante, a mathematician of Perugia, made several flights above Lake Thrasimene by means of artificial wings attached to the body, near the close of the 15th century, but discontinued them after an accident. In the 17th century, Besnier, a locksmith of Sable, France, prudently began to leap from one safely on flights from elevated posi-tions, passing over houses, and over rivers of considerable breadth. Bishop Wilkins, Sir George Caylay and others, towards the end of the 18th century, busied themselves with speculation and experiments on the subject of aviation.

Henry Cavendish, about 1766, discovered the great levity of hydrogen gas—slightly over 14 times less than that of atmospheric air-and the following year Dr. Black, of Edinburgh. announced in his lectures that a thin bladder, filled with this gas, must ascend into the air. Cavallo made the requisite experiments in 1782, and found that a bladder was too heavy, paper not air-tight, but that soap-bub-bles filled with hydrogen rose to the ceiling of the room, where they burst. The first successful balloon was made by the Montgolfier brothers, sons of Peter Montgolfier, a paper manufac-turer of Annonay, France. It was a parallelepiped or six-sided bag of silk, containing 40 cubic ft.; inflated with hot air from burning paper it rose to a height of 36 ft. The brothers, after seeing a petticoat sail to the ceiling when left to dry by a fire, had conceived the idea that a bag filled Friar Roger Bacon (1214-94) con-structed a machine consisting of a smoke, would float in the air. Larger pair of hollow copper globes, ex-hausted of air, which could rise in the Aeronautics Aeronautics

fed by chopped wood from time to time, being kindled under the aper-ture of the balloon to produce the smoke cloud; the true cause of ascension, the rarefaction of the heated air, was not discovered till a later period. The Montgolfier successes led to Charles' experiments with hydrogen gas. Within a short time several capsuccessfully made in heated air balloons, and on Nov. 21, 1783, Pilatre de Rozier and the Marquis d'Arlandes made the first independent aerial expedition rising 3,000 ft. and descending safely, though not without being exposed to considerable danger, 9,000 ft. from their starting point. Ten days later, on Dec. 1, Messrs. Charles and Roberts ascended in a hydrogen baltravelled over 31 miles. Charles devised many features of the modern balloon, including the valve used at the top, and the suspending of the car from a hoop that is attached to the gas bag. Over 52 balloon ascents are recorded in 1784. Blanchard, the first professional aeronaut, with Dr. John Jeffries of Boston, crossed the English Channel from Dover France, in a heated air balloon, Jan. 1, 1785. On June 14, 1785, Pilatre de Rozier with Mr. Romain attempted to cross from the French side, in a combination hydrogen and heated-air balloon, but the machine caught fire 3,000 ft. in the air and both men were The disaster was caused through unfortunate negligence and the cause of aeronautics did not suffer. The parachute (q. v.) was invented propelled by their own power, using & by Garnerin, who first made a descent steam engine to make the machine go Oct. 22, 1797.

Following these early experiments, among notable ascensions during the 19th century taken in the interests of science were those of Messrs. Robertscience were those of lateral science were those of lateral lateral

Mr. John La Mountain and two others made a remarkable journey from St. Louis, Mo., to Henderson in Jefferson Co., N. Y., a distance of 1,120 m., in 19 h. 50 m., or at an average speed of nearly a mile a minute. In 1900 this was exceeded by Count de la Vaulx's flight of 1,193 m. from Paris to Russia, while in Feb., 1914, Hans Berliner made a record of 1896.9 m. which has not been exceeded for distance. Capt. Hawthorne C. Gray on May 4, 1927, made an altitude record of 42,470 feet.

Regular balloon corps are attached to the armies of leading nations, and in their interests numerous attempts have been made to construct dirigible balloons. Gaston and Albert Tissendier achieved some success in 1884, but the first notable dirigible flight was that of Col. Renard on Apr. 9, 1884, when, in a cigar-shaped balloon, with a powerful motor and a front screw, he left Chalais-Meudon, and returned to his starting point in 23 minutes after describing an oblong course of five miles. Since then aerial navigation has developed along the lines of dirigible balloons and motor airplanes.

Heavier-than-air machines developed later than did balloons. An Englishman named Henson flew a plane with a 20 horsepower engine in 1843, and in 1888 Sir Hiram Maxim built a machine that was practically successful, and Ader flew to Paris in 1900. Prof. Langley, of the Smithsonian Institution, in 1896 made the first real flights of heavier-than-air machines, three-fourths of a mile, and he built other machines, the one of 1903 fail-ing because of injury in the take-off. This same machine, with its original engine, and slight structural changes, was flown in 1914 by G. W. Curtiss.

de Fonvieville, and Gaston Tissandier, by its own power in free flight, had 1867-69. In July, 1859, Mr. John sailed forward on a level course with-Wise, the American aeronaut with out reduction of speed, and had finally

landed without being wrecked." No plane previously flown had succeeded No in filling all these requirements of in filling all these requirements of successful flight. From this point onward there has been steady advance in aviation, the work of the Wrights at Dayton contributing much to this progress

Among the early records may be

noted:

Oct. 6, 1908. Wilbur Wright, in France, made first flight of more than

1 h. with a passenger. Oct. 30, 1908. Farman, in France, made first cross-country flight, 20 miles in 17 m.

July 25, 1909. Louis Bleriot made

31 m. Aug. 28, 1909. Glenn H. Curtiss, Oct. 29, 1910. Grahame-White, at

Aug. 28, 1909. Glenn H. Curtiss, at Rheims, won first Gordon-Bennett Aviation Cup, by 12.42 miles in 15 m. 50% s.

Oct. 19. 1909. Count Charles de Lambert made first flight over a city, at Paris, rounding the Eiffel Tower at height of nearly 1,500 feet, making the journey of 50 kilometers in as many minutes.

Jan. 7, 1910. Hubert Latham, at Mourmelon, France, broke height rec-

ord with 3,600 feet.

Jan. 11, 1910. Curtiss, at Los Angeles, Cal., broke record flight with passenger, 55 miles an hour.

April 19, 1910. Louis Paulhan, at Rheims, made new cross-country airplane record, 130 miles.

May 29, 1910. Curtiss won \$10,000 prize for flight from Albany to Governor's Island, N. Y., 150 miles, in 2 h. 32 m.; also making both an American cross-country record and the world's speed record for such

June 2, 1910. Sir Charles S. Rolls made first round-trip flight across English Channel without stop, 42 miles in 90 m. He was killed in a flight, July 12, following.

22, June 1910. Count Zeppelin opened the first regular airship passenger service with his "Deutschland," and carried 20 passengers from Friedrichshaven to Dusseldorf, 300 miles, in 9 h. On the 28th the airship was wrecked in a gale.

record, 158 miles without stop, in 2 h. 35 m. 30 s.

Sept. 23, 1910. Chavez crossed the Alps between Switzerland and Italy and died from injuries, 27th.

Oct. 15, 1910. Walter Wellman, with five others, attempted to cross the Atlantic from Atlantic City, N. J., in the dirigible balloon "America," but was compelled by storm to abandon the balloon off Cape Hatteras on the 18th, having been in the air nearly 72 hours and covered about 850 miles.

Oct. 17-19, 1910. Alan R. Hawley and Augustus Post, in balloom "America II," made record for sustained flight, from St. Louis, Mo., to

Belmont Park, won the Bennett cup, beating world's speed record for 100 kilometers (62.1 miles) in 61 m., 4 74-1000 s.

Oct. 31, 1910. Ralph Johnstone, at Belmont Park, made biplane height record, 9,714 feet; was killed in flight

at Denver, Nov. 17.
Nov. 7, 1910. Phil O. Parmelee made fastest cross-country flight and was the first to carry freight: Dayton

Dec. 9, 1910. M. Legagneux, at Pau, France, in monoplane, made height of 10,499 feet; world's record, April 12, 1911. Prier flew from London to Paris (251 miles) in 2 h.

Aug. 2, 1911. Vedrines, from London to Dieppe to Paris (267 miles) in 3 h. 50 m.
Dec. 2, 1911. Prevost, with one passenger, made altitude flight at

Courcy, France (9,840 ft.)

In 1925 the outstanding events were the flight of the two Japanese aviators, Abe and Kawachi, who flew in two planes from Tokyo to London by way of Siberia, Germany, and France, and back to Tokyo, blazing the way for a trans-Siberian air mail; and the flights of Arrachart from Paris to Constantinople and back by way of Copenhagen in 64 h. 35 m., and of Francesco de Pinedo, an Italian aviator, from Rome to Melbourne, Tokio, and home again.

On May 9, 1926, the Americans, Com. Richard Evelyn Byrd and Floyd July 7, 1910. M. Olieslagers, at Bennett, flew to the North Pole in a Rheims, made new world's endurance three-motored Fokker, making a 16 Aeronautics Aeronautics

hour trip from Svalbard (Spitzbergen) and back. They were the first men ever to reach the Pole by airship. Two days later the Amundsen-Ellsworth-Nobile expedition of 17 men, in the semi-rigid dirigible, "Norge," made the first flight that linked the two hemispheres by way of the North Pole, flying from Svalbard to Teller, Alaska. Another event of this year was the flight of the English aviator, Alan Cobham, from London to Capetown and back, in a single-engined plane, 16,000 miles over jungle and plane, 16,000 miles over jungle and desert, making the trip south in 94 flying hours. In 1900 a London-Capetown trip had been made but in a multi-motored plane and with many stops. Begun in Nov. 1925, Cobham's trip was completed in April 1926, and in Oct. he flew from London to Melbourne and back to London, 28,000 miles in 320 hours. In Sant 28,000 miles, in 320 hours. In Sept. 1926, A. E. Godfrey made the first trans-Canada flight. The "Good Will Flight" of American planes around Central and South America, under command of Maj. Dargue, began Dec. 21, 1926, and three of the original five planes completed the trip at Washington, D. C., on May 2, 1927.

The outstanding event of 1927 was the first solo non-stop crossing of the Atlantic Ocean, continent to continent, by Charles Augustus Lindbergh, in his Ryan monoplane, "Spirit of St. Louis, 3,610 miles in 33 h. 29 m., from Roosevelt Field, Long Island to Le Bourget Field, outside Paris, He Bourget Field, outside Paris. He started at dawn on May 20 and reached Paris the night of May 21. His flight had been prefaced by breakris fight had been pretaced by breaking the transcontinental record, for he flew from San Diego to Curtiss Field, Long Island, with one stop at St. Louis, flying time, 21 h. 22 m. On June 4-6, after a non-stop flight from Roosevelt Field to a spot near Eisleben, Germany, where lack of gasoline forced a landing, Clarence D. Chamberlin and C. A. Levine brought gasoline forced a landing, Clarence B. Chamberlin and C. A. Levine brought to an end their attempt to reach Berlin without stop. They had made 3,905 m. in their plane, the "Columbia." They later continued to Berlin. 3.905 m. in their plane, the "Columbia." They later continued to Berlin. On June 9, Com. R. E. Byrd. Bernt Acosta, George Noville, and Berndt Balchen took off in a Fokker monoplane for Paris and after 40 hours flight were forced down in the surf reached the Pole and then, with his

a few miles off Ver-sur-Mer on the Normandy coast, and reached shore, on July 1, on a rubber raft. They had made a non-stop flight of 4,200 miles, outdistancing both Lindbergh and Chamberlin. Nungesser and Coli, French aviators, had attempted a flight from Paris to New York on May 9 but they disappeared and no trace was found of them. Lester J. Maitland and Albert Hegenberger flew from Oakland, Cal., to Wheeler Field, 5 miles from Honolulu, June 28-29, being 25 h. 50 m. in the air, and carrying to success the flight in which Com. John Rodgers had failed in 1925, when but 300 miles from his goal.

A trip similar to the American "Good Will" tour was made by the Italian, Com. Francesco de Pinedo, who, on June 15, returned to Rome after a flight which took in North Africa, South and Central America and many cities in the United States, a journey of 25,500 miles. The Portuguese aviator, Sarmento Bieres, flew over South America between Mar. 2 and June 15, flying from Lisbon to and June 15, flying from Lisbon to Boloma, West Africa, and thence to Natal, Brazil. He made a tour of South America in his seaplane. In August, Arthur C. Goebel won the Dole prize for a flight to Honolulu, flying from San. Francisco to Honolulu in 26 h. 17 m. 33 seconds. On this race several lives were lost. In October Lt. Dieudonne Costes and Com. Joseph Lebrix, French aviators, flew from Paris to St. Louis in Senegal, and thence to Port Natal. Brazil. gal, and thence to Port Natal, Brazil, a total of 4,700 m, in about 45½ flying hours, crossing the South Atlantic from Africa to South American mainland without stop-over. They toured South America by plane, flew to various cities in Central America, Mexico, up to New York, west to the Pacific, crossed by steamer to Tokio, and flew home to Paris by way of China, India, Syria, and Greece, reaching Paris in April, 1928.

Outstanding feats of 1928 include

Aeronautics Aeronautics

crew of 15 headed the "Italia" back for his base, but they ran into fog, fell, and crashed. One was killed and several injured. Nobile was picked up by the Swedish aviator, Lundborg, on June 24, and others by the Russian ice-breaker Krassin on July 12. Roald Amundsen and Rene Guilbaud who set out in a seaplane to go to Nobile's aid, were never heard from after leav-ing Tromso on June 18. June 7, 1928, Wilmer Stultz, and L. E. Gordon crossed from Newfoundland to Burry Port, Wales, in 20 h. 40 m., carrying the first woman passenger to cross the the first woman passenger to cross the Atlantic from west to east, Miss. Amelia Earhart, herself an able aviator. One of the most remarkable flights of all time was that of Capt. C. E. Kingsford-Smith, Capt. C. P. Ulm, both Australians, and H. W. Lyon, Jr. and J. W. Warner, Americans, who flew from San Francisco to Honolulus to Suya in the Fiji cans, who flew from San Francisco to Honolulu, to Suva, in the Fiji Islands, and to Melbourne, Australia. They started May 31 and reached Brisbane on June 9, continuing to Melbourne, took a non-stop flight to Perth, and back to Melbourne on Aug. 12, and on Sept. 10 to Wellington, New Zealand. During their entire trip they were in direct communication with the mainland by means of their radio apparatus.

The pieneer flight from Europe to

The pioneer flight from Europe to America direct was made Apr. 12-13, 1928, by Baron von Huenefeld, Capt. Koehl, and Com. Fitzmaurice, crossing from Dublin to Greenely Island, Canada, where they were forced down by lack of fuel after a flight of 36½ hours in their monoplane, the "Bremen." All non-stop records were "Bremen." All non-stop records were broken by the Italian flyers, Arturi Ferrarin and Carlo Delprete in a flight from Rome to Brazil, 58½ hours, in which they covered 4.448.82 miles, on July 4-5. Bert Hinkler, an Australian, flying alone in an open-cockpit plane, made a 12,000 mile flight from London, England, to Port Darwin, Australia, in 15½ days, starting on Feb. 7. Arthur Goebel, Hawaii flight winner of the Dole prize, made a new record for transcontinental flight, Aug. 19-20, of 18 continental flight, Aug. 19-20, of 18 h. 58 m. from Los Angeles to Curtiss

York (landing at Lakehurst) and back to Germany in October. In Dec. 1928 Col. Lindbergh started a tour of good will to Mexico, Central America, and Cuba, which was completed Feb. 13, 1929, at St. Louis, Mo.

On Feb. 5, 1929, Capt. Frank M. Hawks flew from Los Angeles to Roosevelt Field, L. I., in 18 h. 21 m. 59 seconds. This cut over half an hour from Goebel's record of the previous August. Then, on June 27, Capt. Hawks established a new record from east to west for transcontinental flights, from Roosevelt Field to Los Angeles in 19 h. 10 m. 32 seconds. Seven hours and 14 minutes later he started on his return trip and despite strong head winds reached Roosevelt Field again in 17 h. 44 m. 39 seconds, thus breaking his own west to east record made in February. He also broke his own record of 13½ h. be-tween Los Angeles and the Mississippi River, making it in 11 h. 45 minutes.

On Apr. 26 a Royal Air Force monoplane, piloted by A. G. Jones-Williams, landed at Karachi, India, the first to make a non-stop flight from England to India, a distance of 4,130 miles, in 50 h. 38 minutes. On May 26, Reginald L. Robbins and James Kelly made a new record for sustained Kelly made a new record for sustained flight by remaining aloft for 172 h. 31 m. 10 s. in their monoplane "Fort Worth." June 14, the plane "Yellow Bird" commanded by Capt. Assolant, with two companions, flew from Old Orchard, Me., to Cornillas, Spain, 3,128 miles, in 29 h. 52 m. The DO-X, world's largest passenger hydroaeroplane was launched at Lake Constance, Switzerland, July 14, 1929. The DO-X is an all-steel plane weighing 34 tons fully loaded. She has an extreme length of 150 feet from tip to tail, her wings are ten feet thick and there is a span of 150 feet from wing tip to wing top. From each wing project six great turrets and in each turret are installed two engines of 525 horse-power each. Two pilots are required who do nothing but obey the captain's orders, two chief engineers control the engine room dials and an engineer and h. 58 m. from Los Angeles to Curtiss four mechanics supervise the motors. Field, L. I. The giant dirigible, Graf The DO-X was designed and built by Zeppelin, made a round trip from Count Dornier in Germany, but Friedrichshafen, Germany, to New equipped with American-made motors.

In an experimental "high altitude" flight from Glendale, Cal., to Roosevelt Field, Long Island, Apr. 19-20, 1930, Col. Charles A. Lindbergh and Mrs. Lindbergh made the transcontinental trip in 14 hours, 45 minutes and 32 seconds, cutting Capt. Hawks' record by 2 hours, 56 minutes and 33 seconds. Actual flying time was 14 hours, 23 minutes 27 seconds, average speed over 180 miles an hour, distance traveled 2700 miles. The flight was made at an altitude of from 14,000 to 15.500 feet.

On May 24, 1930, Amy Johnson, 22 years old, completed a solo flight from Croydon, England to Australia and was the first woman to attempt the

12,000 mile trip.

An endurance record was made on July 4, 1930, when John and Kenneth Hunter of Sparta, Ill., landed at Sky Harbor, Chicago, after completing 553 hours, 41 minutes and 30 seconds continual flying. Refueling was carried on by two brothers of the aviators. The former record of 420 hours 21 minutes and 30 seconds was beaten by 133 hours and 20 minutes.

One of the most disastrous accidents in the history of aviation occurred Oct. 4, 1930, when the British airship, R-101, largest in world, left Cardington, England, on her maiden voyage, bound for Karachi, India, carrying passengers and crew to the number of 54 including many noted English airmen, crashed and was burned. During the first night of her voyage, heavy wind and rain storms rendered the R-101 unresponsive to her controls and she bumped against several low hills between Rouen and Paris. In the morning of Oct. 5, at Allonne, two miles from Beauvais, France, her nose dipped violently three times; at the third dip she exploded and burst into flames. 46 persons perished. The R-101 was 777 feet long, 131 feet in diameter and cost about \$5,000,000.

On July 28, 1930, the R-100, British airship, left Cardington, England, with St. Hubert Airport, Montreal, Can., as her destination. On August 1, she came up the St. Lawrence River Valley and safely made port. Zealand. The trip required 78 hours and 49 ket for pminutes. On August 13, after making \$867,033.

much needed repairs, she started the return trip arriving safely after being in the air 57 hours and 5 minutes. The R-100 is the largest airship afloat being 709 feet long and 133 feet in diameter. She has a cruising range of 4,000 to 6,000 miles, and, in addition to 50 passengers, can carry a load of 10 tons of freight. Her gas bags have a capacity of 5,157,000 cubic feet giving 156 tons gross lift. She can attain a top speed of 81 miles an hour, has three tiers of cabins and salons entirely within her envelope.

Atlantic was successfully crossed from Paris to New York when Captain Dieudonne Coste and his copilot, Maurice Bellonte, landed at Curtiss Field in their sesqui-plane "Question Mark" on Sept. 2, 1930. The trip required 37 hours, 18 minutes and 30

seconds in time.

The first non-stop solo flight between New York and Panama was successfully completed Nov. 10, 1930, when Capt. Roy W. Ammel of Dodge Centre, Minn., landed at Colon, Panama, after being in the air 24 hours and 35 minutes. The distance flown

was estimated at 3189 miles.

Exports of aeronautical equipment in 1929 increased almost three-fold over 1928, making 1929 the peak year thus far in commercial aeronautic activities. 354 American aircraft, valued at \$5,574,480 were purchased by 25 countries as compared with 162 planes valued at \$1,759,653 in 1928. 56% went to Latin America and the West Indies; between 3% and 4% went to Europe: 18% went to the Far East and the Antipodes. Aircraft engine exports increased in 1929 to 321 units valued at \$1,375,697, from 179 units valued at \$664,326, in 1928. Of the total engine exports, 37% went to Europe; 35% to the West Indies; 13% went to Asia and Oceania.

Germany lead the market with purchases of 49 engines valued at \$321,-471. Parts valued at \$2,252,208 were exported in 1929, as compared with \$1,240,244 in 1928. 22% went to Europe; 24% to Latin America; 13% to the Far East, Australia and New Zealand. Soviet Russia lead the market for parts, her purchases totaling

Aeronautics Aeronautics

and new records made. One of the first of importance was the altitude record made on Apr. 10, 1931 by Miss Eleanor Smith, former holder of the world's altitude and duration fight records for women, when she ascended 32,000 feet in a Bellanca Skyrocket monoplane, thus exceeding the former woman's record of 28,743 feet made by Miss Ruth Nichols in March, 1931, by 3257 feet.

On April, 1931, Charles W. A. Scott, Australian aviator, flew from the Lympne Air Field, England, to Port Darwin, Australia, in 9 days 4 hours and 11 minutes, thereby setting a new record for the 12,000 mile flight. His time was 19 hours better than that made by Wing Commander Charles Kingsford-Smith, the former

record holder.

Miss Ruth Nichols, American aviatrix and former holder of the world's altitude record for women, established a new speed record on Apr. 13, 1931, when she drove her Lockheed-Vega monoplane over a three-kilometer course at Grosse Isle, Michigan, at an average speed of 210.65 miles an hour. The previous official record was 181.15 miles an hour made in 1930 over the

same course by Miss Amelia Earhart. In May, 1931, Walter Lees and Frederick Brossy, American aviators, established a new non-refueling flight record when they kept their Bellanca plane, equipped with a Packard-Diesel oil-burning engine, aloft for 84 hours and 33 minutes at Jacksonville, Fla. The previous non-refueling flight record was 75 hours and 23 minutes, set by Lucian Brossouret and Emil Rosse, French fliers, on Mar. 1, 1931, in Algeria.

The first successful ascension into the stratosphere was made in May, 1931, when Professor Auguste Piccard and Charles Kipfer, Swiss scientists, ascended in a balloon to a height of about 52,462 feet, the highest altitude yet reached by man. Remaining aloft about eighteen hours they descended May 27, on the Gurgle glacier in the Oetz Valley, Austrian Tyrol. The purpose of the flight was to study the cos-

In 1931 many new events occurred above the earth within which the temperature ceases to fall with increasing altitude but rises at first and then remains approximately constant. The gondola from which the scientists made their observations, was a hollow aluminum ball, about five feet in diameter.

> On June 23, 1931, Wiley Post and Harold Gatty, American aviators, took off from Roosevelt Field, Long Island, New York, in an attempt to circum-navigate the world by aeroplane in less time than required by the Graf Zeppelin on her memorable world-flight. On July 1, 1931 they successfully completed their flight, landing at Roosevelt Field after traveling a distance of 15,474 miles in 8 days, 15 hours and 35 minutes. Total flying time 4 days. 10 hours and 8 minutes. Average speed 145.8 miles per hour.

In April, 1931, the U.S. Department of Commerce, made public the following information regarding the growth of air passenger traffic in the year 1930: a total of 417,505 passengers were carried as against 173,000 for 1929; miles flown increased from 25,141,499 in 1929 to 36,945,203 in 1930; mail poundage increased from 7,772,014 to 8,324,255 and express matter from 1,866,879 to 2,869,255. Passenger miles flown were 51,482,633 in 1930. The annual cost of air mail operations increased from \$765,549 in 1926 to \$20,015,969 in 1930. The figures for the intervening years are as follows: \$2,643,454 in 1927; \$7,432,-721 in 1928; \$17,042,521 in 1929. In 1926 there were eighteen airway services operating 128 planes. By 1930 these had increased to 122 services with 600 planes. Scheduled air mileage in 1926 was estimated at 8,039 miles; in 1930, 41,501 miles. 675 pilots were employed at the end of 1930. The government was operating 15,258 miles of lighted airways at the end of 1930 with 3,221 additional miles under construction. There were 45 radio communication stations; 33 radio range beacons; 143 weather reporting stations; 8,400 miles of automatic telegraph typewriter services; 1,290 revolving beacons; 363 of the flashing mic rays in the stratosphere which is type and 140 privately owned certified a layer of atmosphere about 7 miles by the Department of Commerce.

On May 27, 1931, two units of lighter than air—coal gas, hydrogen, equipment for aeronautical research or helium. were dedicated and demonstrated at Langley Field, Virginia. One of these is a wind tunnel accommodating full sized aeroplanes and the other a con-crete channel more than a half mile in length for testing sea-planes. In the wind tunnel, a blast of 115 miles an hour can be developed with great fan blades powered with eight thou-sand horse-power motors. In this piece of equipment, planes can be subjected to every stress and strain they are likely to meet with in actual flight under all atmospheric conditions. The building housing the tunnel is 224 feet by 434 feet and is 100 feet high. The cost was \$1,000,000. The channel for testing sea-planes is covered so as to keep out air currents which would disturb the accurate measurement of the action of pontoons and hulls being tested. These pontoons or hulls are mounted upon a carriage running along a track in the channel at controlled speeds up to sixty miles an to determine various stresses.

The following descriptions of the more standard forms of aircraft will be found of interest:

LIGHTER - THAN - AIR CRAFT. These may be divided into several classes as: "Non-rigid," "Semi-rigid" "Rigid." The term "aerostat" has become popularly used as synonymous with "lighter-than-air" craft or balloon. These are also divided into two classes as: Dirigible and non-dirigible, according to whether they are equipped with mechanism for being driven by power or not. The term "blimp" is a contraction of the British technical term "B-limp." Non-rigids and Semirigids have their fabric envelopes dependent upon internal gas pressure which is suspended the "basket." to maintain their form, whereas the usually of wickerwork, which affords rigid type has a structural frame work a balance. A drag or controlling rope fabric cover (envelope) is drawn afford a means of allowing people on tightly, whereby the shape is maintained independently of internal prestude becomes so low as to let it trail sure. In rigid airships the gas is contained within fabric cells which are normally flabby from being only partially filled. Their power of ascension in all these is by inflation with gases are small balloons sent up without

ADVANTAGES OF NON-RIGIDS. These are transportability and the elimination of the rigid members reelimination of the rigid memoers required in the semi-rigid airships. Disadvantages are: Heavy fabrics needed for strength; short life of fabrics owing to high gas pressure; inaccessibility to repair during flight; unreliability of the pressure.

REPRESENTATIVE TYPES. The French developed "Astra-Torres (cross section has the form of an ace of clubs or trefoil). Most of car suspension is inside the envelope. The envelope interior is divided into four compartments by three longitu-dinal diaphragms which form a triangle and retain the shape of the envelope cross section. Vent holes in the diaphragms permit equalization of gas pressure. Four ballonets—two forward and two outside the diaphragms — a re cross-connected by equalizing airducts in the inner side of the envelope. A blower transmits air to the ballonets. An advantage hour. Instruments record every move-lies in the rigging being mostly en-ment. These records are then studied closed, hence affording little wind resistance

SEMI-RIGID TYPES. Goodyear "Pilgrims" and "Puritans" are small blimps much used for sport and other purposes in America; they deviate from non-rigid construction in having a keel construction (magnesium girder of triangular section 21 feet long and tapering at the ends.

FREE BALLOONS. These are forcibly carried by the air-currents in uncontrolled directions, the ballast or loss of gas alone having action otherwise. They are usually spherical. Rubberized silk is generally used for the fabric, but cotton is sometimes called into play. The bag is surrounded by a cotton cord netting from on the ground. The extent of the usefulness of the ordinary free balloon is

very restricted.
SOUNDING BALLOONS.

Aeronautics Aeronautics

passengers but having self-recording meteorological instruments. They are used for obtaining facts concerning the state of the air strata through

which they penetrate.

CAPTIVE BALLOONS. For certain purposes, especially for observa-tions, the "captive" balloon (held in control to the earth by ropes, cables, etc.) is preferable to the "free" bal-loon. Chief of this class is the "kite" balloon to which are added supplementary tail members or lobes of sausage form. These latter enable the balloon to act exactly as does a kite and enable it to withstand considerable wind pressures. It consists of a main bag that retains the gas and a smaller bag (termed "ballonet"), which is filled with air which rushes into the opening to take care of ex-pansion or contraction of the gas in the main bag under influence of sunheat, cold air-currents, etc.

RIGID AIRSHIPS. These are evolutionary developments from Zep-pelin-I, built by Count Zeppelin in 1900. The rigid airship's hull consists of a framework of latticed girders running longitudinally and transversely, braced by wire tension members. A keel function as longi-tudinal corridor through the ship and provides stowage space and a structure to carry fuel, ballast, bombs, structure to carry fuel, ballast, bomos, cargo, crew's quarters, etc. At first placed externally to the hull, it is now usually—as with the "Los Angeles"—constructed internally. In the "Los Angeles," U. S. Navy airship, the bottom of the keel drops slightly below the circumscribing circle. The below the circumscribing circle. The gas which affords buoyancy is contained in cotton cloth cells with goldbeaters' skin to provide gas-tightness. The cells press against the hull's girders, and bulging between is restrained by netting or wiring. Metalclad airships (duralumin enclosed) are in experimental phases still. Below the keel or corridor are suspended cars (control, power, passenger, etc.) The control car is in the center line about 15% of the length of the ship aft of the bow (in the "Los Angeles" it ex-tends from 15% to 25% of the length aft the bow. Location of the pas-senger car is undefined, but is usually

hold an airship safely to earth, when not in flight, either of two ways is employed. It is sheltered in sheds ("hangars") or moored by the nose to a tall tower or mast in such a way as to swing freely with wind changes.

Comparison between the useful factors inherent in heavier-than-air ships and lighter-than-air craft is difficult, their sphere of action being so different as well as their construction. One advantage in favor of the dirigible lies in the matter of fuel consumption. An airship of 150 ton capacity traveling at 70 miles per hour requires only one quarter the fuel per ton mile, and at 105 miles per hour only one half the fuel per ton mile needed to propel 1 ton of airplane 1 mile.

HEAVIER-THAN-AIR CRAFT AMPHIBIAN. An airplane designed to rise from and alight on either land or water. BIPLANE. An airplane having two main supporting surfaces located one above the other. FLYING BOAT. A design of seaplane sup-ported, when resting on the surface of the water, by a hull or hulls providing flotation besides serving as fuselages. To obtain lateral stability the central hull type is usually equipped with wing-tip floats. MONOPLANE. An airplane designed with one main an arpiane designed with one main supporting surface, sometimes divided into two parts ("wings") by the fuselage. PUSHER AIRPLANE. An airplane having the propeller or propellers in the rear of the supporting surfaces. QUADRUPLANE. An airplane with four main supporting surfaces located one above one ing surfaces located one above another. SEAPLANE. Any airplane Any airplane designed for rising and alighting on water. SHIPPLANE. A landplane designed to rise from and alight on a ship's deck. TANDEM AIRPLANE. An airplane having two or more sets of wings of the same substantial area, one located in front of the other on about the same level. TRACTOR AIRPLANE. An airplane having its propeller or propellers forward of the main supporting surfaces. TRIPLANE. An airplane having three main supporting surfaces one located above the other. HELICOPTER. An aircraft supported in the air by rotating systems of horizontal blades or wings MOORING MASTS. In order to ("airfoils"). The helicopter's pro-

perties consist of vertical progress while horizontal speed is at the mercy of the winds. ORNITHOPTER. A heavier-than-air craft propelled by flapping of wings, bird like. GLIDER. Any form of airplane operated with-out a power plant. It is steered into the air-current to rise.

LIGHT AIRPLANES. THE SHORT SATELITE. A nearly all-metal monoplane with all-duralumin fuselage. Wing construction is cantilever (truss) with wooden spars, duralumin rigs, fabric-covered, Under-carriage V-Type engine, 20-cylinder horizontally opposed ABC Scorpion, 11.37 hp. Westland Woodpigeon, an equal wing biplane; wings fold above equal Wing Diplane; wings fold above trailing spar. Wooden fuselage, V-type undercarriage. Engine, ABC Scorpion, 37 hp. Westland Widgeon.

—Fuselage and tail unit similar to Westland Woodpigeon, but it is a monoplane. Ryan M-1 monoplane.

Fuselage of welded chrome-molybdenum steel covered with fabric. No denum steel covered with fabric. No wires used for bracing. Steel tail surfaces. Engines easily changed by removal of 4 steel bolts. Engine is Wright Whirlwind 200 hp. It is, in some senses, not a light plane. Ryan MI has carried a pay-load of 644 pounds off the ground with 390 feet run and a 2,000 feet climb in 2 minutes with maximum speed of 135 miles per hour. In modified form, Lindbergh's Spirit of St. Louis was a Ryan MI with greater wing spread Lindbergh's Spirit of St. Louis was a Ryan MI with greater wing spread and a Whirlwind engine. R. R. A. Light Monoplane.—Product of the Kreider-Reisner Aircraft Co., of Hagerstown, Md., is a low wing monoplane; weight with gas and oil for races is 320 pounds; reaches 112 miles per hour. Pander (Dutch) miles per hour. Pander (Dutch)
Light Plane.—High wing monoplane,
one-piece wing. Engined with an
Anzani 3-cylinder 25 hp. Length 16
ft. 3 in. Span 26 ft. 3 in. Weight
empty 420 pounds; maximum speed
75 miles per hour.

MEDIUM WEIGHT PLANES.— Most planes built are of medium weight and built to carry 2 to 4 passengers. Pitcairn Orowing is a biplane with 0X5 motor; flying speed of 90 miles per hour maximum and 78 miles cruising speed. Span of upper wing 36 ft., lower wing 35 ft. the consensus of opinion of experts 11¾ in. Length 26 ft. 2 in.; weight that commercial airplanes should have

empty 1,345 pounds. PITCAIRN FLEETWING.—A biplane designed for short hops with passengers, express or mail. Quick take-off, rapid climb. Upper wing span 38 ft., lower wing 33 ft. 1 in., length 25 ft. 11 in., weight empty 1,802 pounds, 160 hp. Maximum speed 106.2 miles per hour. Buhl-Verville CW3.—A biplane. Wings may be folded back; when extended they reach 35 ft. Weight with Curtiss 0X5 is 1,380 pounds empty; high speed 95 miles per hour. With Wright Whirlwind (200 hp.) engine, weight empty 1,415 pounds; high speed 133 miles per hour. Universal Fokker.—Cabin type monoplane. Can carry pilot, 4 pasmonoplane. Can carry pilot, 4 pas-sengers and 80 pounds baggage 600 miles, or pilot and 6 passengers 300 miles. Maximum of safety: Does not nose dive or spin when stalled; sinks under even keel. Cockpit and cabin under even keel. Cockpit and cabin of heavy triangulated steel protection. Quick take-off, complete freedom from fire hazard. Solidly built to withstand slamming in commercial use. Span 47 ft.; length 33 ft.; high speed with full load 118 miles per hour. Wright Bellanca Monoplane.—A cabin plane, has made 51 hours 31 minutes endurance test in 1927 with Bert Acosta and Clarence Chamberlin pilots. High speed 132 miles per hour; can seat 5 speed 132 miles per hour; can seat 5 passengers comfortably. Fuselage is constructed in 3 sections. Cabin has 9 windows; span 45 ft.; length 24 ft. 9 in. Weight empty 1,790 pounds; with payload of 5 passengers 3,230 pounds. The celebrated flight in "Columbia" with Chamberlin and Levine from New York to near Berlin attested the grand qualities of the Wright-Bellanca monoplane. Curtiss Carrier Pigeon.—A mail or freight biplane of large capacity, able to carry half a ton (40,000 letters) of mail or parcel post packages. Span 41 ft. 11 in.; length over all 28 ft. 41 ft. 11 in.; length over all 28 ft. 7½ in. Engine is Liberty-12 of 400 hp. at 17 revolutions per minute. Weight empty 3,208 pounds; useful load 1,856 pounds; high speed 128 miles per hour.

MULTI-MOTORED AIRPLANES.

Aeronautics Aeronauties

a power plant of more than one engine. where of course the aerodynamic effi-ciency is not thereby too greatly in-creased. With increase in number of engines, forced landings are reduced in the opposite ratio. Forced landings caused through structural defects are now practically a very remote possibility. But the power plant, greatly as it has been perfected in recent years, still represents considerable sources of danger of stoppage. Troubles in ignition or carburetion are the chief in ignition or carburetion are the chief dangers. Danger of fire appears impossible to suppress entirely when using highly combustible fuel oils for spark explosion, even with an ever improving cooling system. The experience of those operating commercial commercial air lines appears to favor the triple motor power plant. The difficulties of installing three engines is strictly nominal. One is placed at the nose of the fuselage and the other two are mounted outboard on either side. Space limits forbid mention of more than a few multi-motored airplanes.

HEINKEL TWIN-MOTOR BI-PLANE. The Heinkel Model HD-20 is built by the Heinkel Flugzeugwerke is built by the Heinkel Flugzeugwerke at Warnemunde, Germany, is engined by two Wright Whirlwind J-4-B engines, and has proved highly successful. This is a sesqui-plane (from Latin, sesqui-1½) and is convertible for use over land or water. The frame work of the machine is of welded steel tubing and covered by "doped" (technical term used in accompation for the nical term used in aeronautics for the coating of parts with a tough watercoating of parts with a tough waterproof material of cellulose) fabric.
The beautiful streamlining of all its
parts and absence of any wires makes
this a handsome craft, and unusually
safe in the air. Span (upper), 42 ft.;
lower, 28 ft. 10 in.; length over all
31 feet. Weight empty, 2.860 pounds;
with full load, 4.290 pounds; maximum speed, 117 miles per hour. A
single engine will keep it in the air
unless overloaded. CAPRONI CA73
BOMBER. During the World War
the Italian constructor Caproni built
very large bombing planes and biplanes. His smaller and later planes
are numerous. His engines are invery large bombing planes and biplanes. His smaller and later planes are numerous. His engines are installed in an individual "nacelle" (frame work in which the engine is slung) above the body, a practice frequently seen in seaplanes. In this becomes unnecessary. TYPES. THE Pros 2

biplane the upper wing is somewhat smaller than the lower one; both are of thick section. The engines are radials, installed tandem, Jupiter aircooled, 420 hp. each; the forward engine drives a 2-blade propeller and engine drives a 2-blade propeller and the after engine a 4-blade propeller. Span is 82 ft.: length, 49.5 ft.; weight empty, 7,055 pounds; load that can be carried, 4,409 pounds; speed 115-118 miles per hour. It has been converted for commercial use to a 10 passenger machine. C. B. A. I. TWO-MOTOR BOMBER. The C. P. A. Co. is French and the machine is a monology with two 500 hr. wetera monoplane with two 500 hp. water-cooled Hispano-Suiza engines. Wings are standard wood box spar construc-tion and fuselage of standard wood and wire construction. Its high speed is 130 miles per hour. REMINGTON-BURNELLI AIRLINER. A large (wing span 78 ft.) biplane twin motored airliner. A peculiarity is that the two Liberty engines are mounted side by side in the fuselage, which is side by side in the fuselage, which is of duralumin, same as the wings. FOKKER TRI-MOTOR FVII. A commercial transport airplane that can carry 2 pilots and 10 passengers, 540 pounds baggage for 500 miles at 100 miles per hour. An airplane of this type was the first to fly over the North Pole as well as being the first tri-motored airplane to cross the Atri-motored airplane to the comment. North Pole as well as being the first tri-motored airplane to cross the Atlantic in one hop. It is equipped with three Wright whirlwind air-cooled radial 200 hp. engines; speed 100 miles per hour. BLERIOT 4-ENGINE AIRLINER. This carries 17 passengers besides pilot and navigator-mechanic. It is a biplane and the four engines are set on the leading edges of the wings either side of the fuselage. Cruising speed is 90 miles per hour. Engines are 230 hp. Rengult Renault.

1

SEAPLANES. The navies of the world have done an enormous amount of experimenting in flying machines of which the "landing" gear consists of boat hulls; other constructions have appended floats or pontoons. As Aeronautics Aeronautics

CURTISS NAVY RACER. This is a typical twin pontoon racing seaplane. It is a very small machine with but 22 ft. wingspan; the lower wingspan being but 20 ft. Overall length from propeller hub to tail is 20 feet. Total wing area 144 square feet; total weight, 2,738 pounds. Navy PN Series. These boat-seaplane designs originated in the U. S. Navy as a development of the F-5-L navy flying boats so widely applied in the service. PN-7 has high lift wings and two Wright T-2 engines. The designation PN-7 means Naval Patrol Plane, seventh in the series. Load 14,800 pounds; maximum speed 105 miles per hour; length overall, 49 feet, 11 inches. Both wing spans 72 feet 10 inches. Crew complement consists of first pilot walls silest maken in the series of th first pilot, relief pilot, mechanic gun-ner, radio operator. BOEING PB-1.— Its outstanding features are: two 800 hp. Packard engines in tandem between the wings; each engine drives a 4-bladed propeller. Crew is com-posed of 5 to 7 men. Maximum speed 125 miles per hour with range of 11.9 hours. Span of both wings 37 feet 6 inches; load weight 24,000 pounds.

SUPERBOATS. In Europe great seaplanes are being designed by Prof. Junkers, Dr. Rumpler, the Italian constructor, Ricci Bros., etc. They are to carry 100 to 135 passengers engined by 4,600 to 10,000 hp. plants, capable of flying 125 miles per hour or so. The aim, generally is to open aerial_transportation to South America. These superboats are to use 8 to 10 motors each.

AIRPLANE PARTS AND FUNC-TIONS. All airplanes, in their makeup, contain the following parts: One or more sets of wings or lifting surfaces (aerofoils); a fuselage or body to which they are attached and which carries a pilot and load and an engine or engines with their propellers. The rear end of the fuselage (known as rear end of the fuselage (known as "empennage") contains vertical and horizontal rudders, also vertical and stabilizing fins. Below the fuselage is a "landing gear" consisting of wheels and a "tail skid" for land service, or, for taking off from and alighting on water, a boat hull, float or pontoons. The FUSELAGE. This is generally the main body or structure

tanks, passengers or other "useful load," besides a pilot and crew. To it are attached the wings and controlling surfaces. With seaplanes the boat hull, float or pontoons, correspond to the airplane's fuselage. Parts of the fuselage are: a "cockpit" open space for pilot or passengers. If completely housed this is termed a "cabin." CONTROL STICK. The vertical arm by means of which are operated the longitudinal and lateral controls of an airplane. Fore and aft movement of the stick controls pitching, while side to side movement controls rolling. NACELLE. This is an enclosed shelter for passengers or for power plant; it is free from the tail part. "Longerons" are the longitudinal members of the fuselage's framework. A "monocoque" fuselage is formed of a series of circular or oval bulkheads spaced the length of the fuselage and covered with a skin of plywood glued and fastened by rivets, copper wire stitching or otherwise. The skin of the fuselage gives it its form, besides its structural rigidity. Internal bracing wire may thus be obviated. The spaces between the bulkheads are termed "bays." EM-PENNAGE. The combination of the tail parts (steering body) is so termed. It consists of: (1) the horizontal "stabilizer," a fixed surface (airfoil) which lessens the pitching motion— it is sometimes called the "tail plane;" (2) the movable vertical rudder for producing yawing movements (steering to right or left); (3) the "elevator" which is usually hinged to the "stabilizer" and used to impress a pitching movement of the airplane; (4) the "fin," a fixed surface parallel to the longitudinal axis, to secure stability. Flexible steel cables ("constability. Flexible steel cables ("control wires") connecting the cockpit with the rudders and ailerons enable the pilot to control these steering members. WINGS. The term "wing" is generally used to designate the whole or a portion of the main supporting surfaces of an airplane; in the latter case one speaks of the "wing" "laft wing" "unper "right wing," "left wing," wing," "lower wing," etc. "upper service, or, for taking off from and larger than a lighting on water, a boat hull, float or pontoons. The FUSELAGE. This include the "ailerons," hinged or is generally the main body or structure of the machine—it carries engine, fuel part of the trailing (rear) edge of

Aeronautics Aeronantics

the wing. Their function is to impress or control a "rolling" or "banking" movement. The front that cleaves the air is known as the "entering edge" of the wing. Wings of air-planes are "cambered" in their cross section, the convex surface facing upward and the lower surface being con-cave, usually. The reason for this convex curvature of the wing's upper convex curvature of the wing's upper surface is, that it is proven an area of reduced pressure is brought about which produces suction or "lifting force" (the desirable function of the wing area). Strength is the one factor even more important than efficiency; hence many forms of wing section have been devised. The earlier method of a framed plane surface braced with wires has had to give way to trussing and sectional building in order to carry the far greater loads now needed. These sections braced together are covered externally with a fabric treated suitably with resinous coatings for strength and impermeability of moisture. Duralumin or other light metal alloys are frequently used for thus sheathing the skeleton of ribwork

AIRPLANE ENGINES. Airplane power, or even less in some cases. With water-cooled engines 2 pounds with water-cooled engines 2 pounds per horsepower (in the larger horse-powers) has been developed. ME-CHANICS OF THE ENGINE. In general it may be said that all air-craft engines are four stroke cycle engines, taking four strokes of the piston or two revolutions of the crank for each four strokes, or working stroke in each cylinder. The four strokes and their action are as fallows: (1) SUCTION STROKE. In this the intake valve opens and, the piston moving down, draws a mixture of gas and air into the cylinder from the carburetor. (2) COMPRESSION STROKE. With intake and exhaust into a highly combustible condition. World War. The object was to design (3) POWER STROKE. The piston a standard engine that could be built baving reached the top of the stroke, on "mass production" methods used

a spark plug fires, causing explosion of the condensed gas mixture; this forces the piston down and supplies the power. (4) EXHAUST STROKE. Here the intake remains closed while the exhaust valve opens and allows the dead gas to be forced out on the upward stroke of the piston; this clears the cylinder for the next charge. Of the four strokes but one is a power (explosion) stroke. In an engine of 6 cylinders the crankshaft actually receives but 3 impulses every revolution; with 8 cylinders we get 4 explosions for each revolution, and so on. This explains the need for multiple cylinder engines in aircraft.

SOME ENGINE TYPES. AIR-COOLED ENGINES. An early aircooled engine was the Anzani 6-cylinder fixed radial. Of greatest modern imfixed radial. Of greatest modern importance are: Wright-Morehouse; Bristol "Cherub," "Wright" "Gale" L-4; Meteor Motor Radial (small 60-pound 4-cylinder X-type); Fairchild-Caminez (converts reciprocating piston motion into rotary motion of the propeller shaft through rollers in pistons operating on a double camb. Detons operating on a double cam); Detroit Aircraft Engine (5-cylinder, 60-75 hp.); Super Rhone (improved warmotors range from 2-cylinder to forms time rotary Rhone engine converted having 14, 16, 18 and 24 cylinders, to fixed radial type); Wright Whirl-The weight has been so refined that wind J-4A and J-4B (9-cylinder, 200) a complete power plant of the radial hp., now a standard): Pratt and cylinder air-cooled type may weigh Whitney "Wasp" (9 cylinder, adoptnot more than 1.5 pounds per horseling much of the Whirlwind type. Aircooling is attained by causing the windstream from the propeller to strike the cylinders. The system has too many advantages to be enumerated here, such as: great reduction in weight, doing away with the plumb-ing system with its leakages and other defects. WATER-COOLED EN-GINES. Many of the war-time engines are still in use on account of the great stocks left over. Of such are the Curtiss OX series, the Hispano-Suiza, the Liberty motor, the German Mercedes (upon this early type were based the Hall-Scott, the Liberty, and the more modern Packard is a rethe carburetor. (2) COMPRESSION finement of it, also the Renault 12-STRO KE. With intake and exhaust cylinder V). The Liberty Motor was valves closed, the piston moving up compresses the mixture of gas and air Government Service on entering the

in motor car plants. They are of V design (45" angle), 400 hp. at 1,700 revolutions per minute; weight 806 pounds—2 pounds per hp. Improvements in contracts. ments in construction are numerous.

AERONAUTIC INSTRUMENTS. While ocean navigation faces the difficulty of locating and directing a course in two dimensions, aeronautic navigation has the manifest greater complexity of steering in a three di-mensional course. When, in 1919, Read and Alcock crossed the Atlantic in their small aircraft, a complaint was that in the fog or clouds they at was that in the log of clouds they at times were unconsciously progressing upside down—with heads pointing to earth—at short intervals. Such was the poverty of instrumental equipment of the birdmen of that day. One instrument of precision after another has been added continuously since then so that under any adverse conditions the airpilot is able to see be-fore him on an "instrument board" many functional actions of the parts of which his plane consists. He is therefore able to minimize his dangers by controlling the deviations of these members visibly demonstrated before him in his cockpit. At the time when the epoch-making transatlantic flight was made (May, 1927). Lind-bergh had as aids to visibly control the machine's mechanism the following indicators before him on his instru-ment board: Oil pressure gauge; compass indicator; altimeter; magneto switch; bank and turn indicator; tachometer; fore and aft level indicator and inclinometer; 8-day clock, primary pump. Page thus partially classifies the instruments: (a) Engine instruments: Switch, ammeter; tachometer; thermometers; fuel and oil level gauges; fuel and oil consumption gauges; engine gauges, air pressure and oil pressure gauges; supercharger indicators. (b) Airplane control aids: bank and turn indicator; rate of climb indicator; pitching indicator; air speed indicator; altimeters; anti-stall devices; gyroscopic control. (c) Airplane navigation aids: altimeter! magneto compass: earth induction compass; Goerz sun compass; sextants; clock; air distance recorder; drift indicator; radio directional compass. clock; air distance recorder; drift in-dicator; radio directional compass. (d) Special airship (balloons) instruments; manometer, gas pressure usually hinged to the stabilizer.

alarm; gas leak indicators; gas temperature indicators; statoscopes.

AERONAUTIC NOMENCLA-The following additional terms have been approved by the National Advisory Committee for Aeronautics:

AERODYNAMICS, the science treating of the motion of air and other gaseous fluids, and of the forces on solids in motion relative to such fluids.

AERONAUTICS. The science and art pertaining to the flight of aircraft.

AILERON. A hinged or pivoted auxiliary surface of an airplane, usually part of the trailing edge of a wing, the primary function of which is to impress a rolling moment on the airplane.

AIRPLANE. A mechanically driven aircraft heavier than air, fitted with fixed wings, and supported by a dynamic action of the air.

AMPHIBIAN. An airplane designed to rise from, and alight on, either land or water.

AUTOGIRO. A form of helicopter. BANK. to incline an airplane laterally, i. e., to rotate it about its longitudinal axis. Right bank inclines the plane with right wing down. Also used as a noun to describe the position of an airplane when its lateral axis is inclined to the horizontal.

BODY. The fuselage, hull or nacelle (including cowling and cover-BODY. ing), and nacelle mounting.

CEILING. "Absolute." The maximum height above sea level at which a given airplane would be able to maintain level flight, assuming standard air conditions. "Service." The height above sea level, assuming standard air conditions, at which a given airplane ceases to be able to rise at a rate higher than a small specific one.

COCKPIT. The open spaces in which a pilot and passengers are accommodated. When the cockpit is completely housed in, it is called a cabin.

ELEVATOR. A movable auxiliary

FINS. Small fixed surfaces, attached to different parts of aircraft, parallel to the longitudinal axis, in order to secure stability; for example, tail fins, skid fins, etc. Fins are sometimes adustable.

GLIDER. A form of aircraft similar to an airplane, but without a power plant.

HELICOPTER. A form of aircraft whose sole support in the air is derived directly from the vertical component of the thrust produced by rotating airfoils (surfaces).

LANDING GEAR. The understructure which supports the weight of an aircraft when in contact with the surface of land or water and reduces the shock on landing. There are five common types: Boat type, float type, skid type, wheel type, and ski type.

LOAD. "Pay." That part of the useful load from which revenue is derived, viz., passengers and freight. "Useful." The crew and passengers, oil and fuel, ballast other than emergency, ordinance and portable equip-

MULTIPLANE. An airplane with two or more main supporting surfaces placed one above another.

ORNITHOPTER. A form of aircraft heavier than air deriving its chief support and propelling force from flapping wings.

PROPELLER. "Pusher." A propeller mounted to the rear of an engine or propeller shaft. "Tractor." A propeller mounted on the forward end of the engine or propeller shaft.

RUDDER BAR. The foot bar by means of which the control cables leading to the rudder are operated.

SIDE SLIPPING. Flight in which the lateral axis is inclined and the airplane has a component of velocity in the direction of its lower end of the lateral axis.

SKID. A runner used as a member of the landing gear. "Tail Skid." A skid used to support the tail when in contact with the ground. "Wing Skid." A skid placed near the wing tip and designed to protect the wing "Wing from the ground.

It is usually caused by turning. banking insufficiently, and is the opposite of side slipping.

SOAR. To perform sustained free flight without self-propulsion; it is called "up-current soaring" if performed in ascending air, "dynamic soaring" in other cases.

SPEED, CRITICAL. The lowest speed of an aircraft at which control can be maintained.

SPIN. A maneuver consisting of a combination of roll and yaw, with the longitudinal axis of the airplane inclined steeply downward. The air-plane descends in a helix of large pitch and very small radius, the upper side of the plane being on the inside of the helix of the helix.

STABILIZER. A normally fixed airfoil (surface) whose function is to lessen the pitching motion. It is usually located at the rear of an aircraft and is approximately parallel to the plane of the longitudinal and lateral axis.

STAGGER. The amount of advance of the leading edge of an upper wing of a biplane, triplane, or multiplane over that of the lower, expressed either as percentages of gap or in degrees of the angle whose tangent is the percentage just referred to.

STALL. The condition of an air-plane when from any cause it has lost the air speed necessary for support or control.

TAIL GROUP (or Tail Unit). The stabilizing and control surfaces at the rear end of an aircraft, including stabilizer, fin, rudder, and elevator.

TAXI. To run an airplane over the ground, or a seaplane on the surface of water, under its own power.

TRACTOR AIRPLANE. An airplane with the propeller or propellers forward.

WARP. To change the form of a wing by twisting it.

WING LOADING. The gross weight of an airplane fully loaded, divided by the area of the supporting surface.

ZOOM. To climb for a short time SKIDDING. Sliding sidewise away at an angle greater than that which from the center of curvature when can be maintained in steady flight,

LIBRARY

the airplane being carried upward at the expense of its kinetic energy. This term is sometimes used as a noun, to denote any sudden increase in the upward slope of the flight path.

Early aviation records end with 1914, the breaking out of the World War. The great development in aerowar. The great development in aeronautics was due in a degree to the tremendous efforts put forth by all contending nations during this mighty struggle to perfect this new engine of warfare. They covered 1,960 miles. July, 1929 saw the British dirigible, R 34, under command of Maj. G. H. Scott make the prescript from England. Scott, make the crossing from England Scott, make the crossing from England to Mineola, L. I. in 108 h. 12 m. between midnight of July 1 and early July 6. The return trip was made July 10-13, the entire round trip consuming 75 h. 30 m. flying time, this being the first round trip by airship. In 1919 the navy sea plane NC-4 flew from Newfoundland to Plymouth, England, with stops at the Azores Islands and Lisbon, Portugal. In May, 1919. Hawker and Grieve. English 1919, Hawker and Grieve, English aviators, attempted a non-stop flight from St. Johns, Newfoundland, to Ireland, but were forced down by engine trouble after making 1,100 miles. Fortunately they were picked up by a steamer. In June, 1919, Capt. John Arthur W. Alcock and Lieut. John Arthur W. Alcock and Lieut. Brown, British aviators, made a successful non-stop flight from Newfoundland to Clifden, Ireland, in 16 hours and 12 minutes. In America the air mail service was inaugurated on Sept. 8, 1920. On July 1, 1924, continuous day and night flying over mail routes began. In 1924 a wonderful exploit was performed by Lieut. Manghan, who flew from New York to San Francisco in 18 hours and 20 minutes. 20 minutes.

The first accomplished flight around the world was made by American aviators in 1924. The airmen—Lieuts. Smith, Arnold, Nelson, Harding, Wade and Ogden-made it in practically six months, but the actual flying time was only 366 hours for a distance of 27,000 miles. The dirigible balloon Shenandoah, America's airship or airship Shenandoan, America's in maintaining it, but of a latest first giant Zeppelin, during 1924 made the flight from Lakehurst. New Jersey, to Camp Lewis, Washington, and return, a distance of 9,000 miles, in 18½ and British India was long uncertain, days. While making a flight to the

Middle West on Sept. 3, 1925, the Shenandoah ran into a violent squall near Caldwell, O., and was wrecked, killing 14 of her crew, including Com. Zachary Lansdowne. The German made Zeppelin ZR-3 flew from Friedrichshafen, Germany, to Lakehurst, New Jersey, in 81 hours and 25 min-utes in a non-stop flight. The number of passengers carried was 32 and passengers carried was 32 and freight transported, 95,000 lbs. Greatest speed, 80 miles, with average speed of 50 miles per hour. This dirigible was afterwards christened the "Los Angeles."

Aeronautic Periodicals. In the United states, in 1926 there were 7 aeronautical magazines published; the Aeronautical Chamber of Commerce of America (New York City) pub-lishes its "Aircraft Year Book." Of house organs there were 7 publications. Foreign aeronautical magazines in 1926 in the following countries; Aus-1926 in the following countries; Australia (1); Austria (1); Belgium (1); Czecho-Slovakia (1); Denmark (1); France (7); Germany (5); Gt. Britain (8); Hungary (1); Italy (7); in Buenos Ayres (1); South America (1); Spain (1); Sweden (1); Switzerland (1).

Afghanistan, the land of the Afghans, a country in Asia, bounded on the E. mainly by India, S. by Baluchistan, W. by Persia, and N. by the Russian Transcaspian territory. Bokhara and the Russian Pamir territory; length about 560, breadth

ritory; length about 560, breadth about 450 miles; area about 245,000 square miles; pop. about 6,380,500.

The inhabitants belong to different races but the African area.

races, but the Afghans proper form the great mass of the people. These call themselves Pushtaneh or Puktaneh, Afghans being the Persian name. They are an Iranic race, and are divided into a number of tribes, among which the Duranis and Ghilzais are the most important, the latter being the strongest of all the tribes. A tradition, evidently modern and legendary, gives them an Israelitish origin. The Afghans are bold, hardy, and warlike, fond of freedom and resolute in maintaining it, but of a restless,

THE GIANT BRITISH DIRIGIBLE R-34

The R-34, the first dirigible to cross the Atlantic Ocean later crashed into a hillside at Howden, England on January 28, 1921, wrecking three of its five motors. A strong gale took the craft toward the sea, and Lieutenant Drewe in command and his crew landed safely after a twenty-eight hour struggle in mid-air.

Copyright U. & U.

to between the Ameer Abdur-Rahman, and Sir Mortimer Durand. The boundary agreed on was demarcated shortly afterward and is so drawn as to leave Chitral, Bajaur, Swat, Chilas, and Waziristan to Great Britain, while Afghanistan is given the territories of Asmar, Birmal, and Kafiristan. Abdur Rahman was succeeded by his son, Habibulla, who was assassinated, Feb. 20, 1919. His son, Amanullah Kahn tried to introduce modern ideas, abolish the harem, and educate the women. As result, his people rebelled and he abdicted in Jan., 1929, in favor of his brother who, within the week, lost the throne to Basha Sakao. Basha Sakao was later executed, Nadir Khan being then recognized as the lawful ruler of Afghanistan.

Africa, one of the three great divisions of the Old World, third in area of the five continents, lies nearly due S. of Europe and S. W. of Asia. It is of a compact form, nearly equal at its extreme points in length and breath. The N. section of the continent, however, has an average breadth of nearly double the S. This great change of form arises from the greater projection of the upper part toward the W., and the transition on this side from the broad to the narrow section is effected suddenly by an inward turn of the W. coast, which faces S. for nearly 20° of longitude, forming the Gulf of Guinea, the greatest indentation of the coast.

Africa is united to Asia at its N. E. extremity by the Isthmus of Suez, now crossed by a great ship canal. From this point the coast runs in a W. and somewhat N. direction to the Strait of Gibraltar, the point of greatest proximity to Europe. This N. coast forms the S. shore of the Mediterranean Sea, and brings all the N. terranean Sea, and brings all the N. countries of Africa into proximity with the European and Asiatic countries lying contiguous to that great ocean highway, which formed the chief me-dium of communication between the principal divisions of the ancient

The center of Africa possesses an exuberant tropical vegetation.

extremity of Africa is the remarkable variety, size, and beauty of the heaths, some of which grow to 12 or 15 feet, in the fertile parts of Nubia.

The fauna of Africa is extensive and varied, and numerous species of mammals are peculiar to the continent. According to a common view of the geographical distribution of ani-mals, the N. of Africa belongs to the Mediterranean sub-region, while the rest of the continent forms the Ethiopian region. Africa possesses numerous species of the order quadrumana (apes and monkeys), most of which are peculiar to it. They abound remarkable are the chimpanzee and the gorilla. The lion is the typical carnivora of Africa. Latterly he has been driven from the constant the carnivora of Africa. been driven from the coast settlements to the interior where he still reigns king of the forest. There are three varieties, the Barbary, Senegal, and Cape lions. The leopard and panther rank next to the lion among carnivora. Hyenas of more than one species, and jackals, are found all over Africa. Elephants in large herds abound in the forests of the tropical regions, and their tusks form a principal article of commerce. These are larger and heavier than those of Asiatic elephants. The elephant is not a domestic animal in Africa as it is in Asia. The rhinoceros is found, like the elephant, in Middle and Southern Africa. Hippopotami abound in many of the large rivers and the lakes. The zebra and quagga used to abound in Central and Southern Africa, but the latter is said to be now entirely extinct. Of antelopes, the most numerous and characteristic of the ruminating animals of Africa, at least 50 species are considered peculiar to this continent, of which 23 used to occur in Cape Colony. The giraffe is found in the interior, and is exclusively an African animal. Several species of wild buffaloes have been found in the interior, and the buffalo has been naturalized in the N. The camel, common in the N. as a beast of burden, has no doubt been introduced from Asia. The horse and open pastoral belt at the extremities the ass (onager) are natives of Baroft the tropics is distinguished by a bary. The cattle of Abyssinia and rich and varied flora. A special characteristic of the vegetation of the S. but extremely light. In Barbary and

the Cape of Good Hope the sheep are broad-tailed; in Egypt and Nubia they are long-legged and short-tailed. Goats are in some parts more numerous than sheep. The ibex breed extends to Abyssinia. Dogs are numerous, but cats rare, in Egypt and the Copts of Egypt, the Abyssinians, and the natives of Madagascar, the

There is a marked distinction between the races in the N. and E. of the great desert and those in the Central Sudan and the rest of Africa and trai Sudan and the rest of Africa and the S. The main elements of the population of North Africa, including Egypt and Abyssinia, are Hamitic and Semitic, but in the N. the Ham-ite Berbers are mingled with peoples of the same race as those of prehistoric Southern Europe, and other types of various origins, and in the E. and S. E. with peoples of the negro type. The Semitic Arabs are found all over the N. region, and even in the Western Sahara and Central Sudan, and far down the E. coast as traders. The Somalis and Gallas are mainly Hamitic. In the Central Su-dan and the whole of the country between the desert and the Gulf of Guinea the population is pure negro — people of the black, flat- or broadnosed, thick-lipped type, with narrow heads, woolly hair, high cheek-bones, prognathous jaws. Scattered among them are peoples of a probably Hamitic stock. Nearly the whole of the narrow S. section of Africa is inhabited by what are known as the Bantu races, of which the Zulu or Kaffir may be taken as the type. The languages of the Bantu peoples are all of the same structure, even though the physical type vary, some resembling the true negro, and others having prominent noses and compara-tively thin lips. The Bushmen of South Africa are of a different type from the Bantu, probably the remains of an aboriginal population, while the Hottentots are apparently a mixture of Bushmen and Kaffirs. Scattered of Bushmen and Kaffirs. Scattered over Central Africa, mainly in the forest regions, are pigmy tribes, who are generally supposed to be the remains of an aboriginal population. The bulk of the inhabitants of Mada-The gascar are of Malay affinities. total population is estimated at about 145,000,000.

As regards religion, a great pro-

portion of the inhabitants are heathens of the lowest type. Mohammedanism possesses a large number of adherents in Northern Africa and is rapidly spreading in the Sudan. Christianity prevails chiefly among the Copts of Egypt, the Abyssinians, and the natives of Madagascar, the latter having been converted in recent times. Elsewhere the labors of the missionaries have also been attended with promising success. Over a great part of the continent, however, civilization is at a low ebb, and in the Kongo region cannibalism is extensively prevalent. Yet in various regions the natives who have not come in contact with a higher civilization show considerable skill in agriculture and various mechanical arts, as in veewing and metal weaking.

weaving and metal working. Political Divisions .- By diplomatic arrangements, mainly since 1884, great areas in Africa were allotted to Great Britain, France, Germany, Portugal, Belgium, and Italy, as being within their respective spheres of influence, in addition to colonial posby the European powers prior to the outbreak of the World War were estimated as follows: France, 4,000,000 mated as follows: France, 4,000,000 square miles; Great Britain, 2,700,000; Germany, 1,000,000; Portugal, 825,000; Kongo Free State, 900,000; Italy, 200,000; Spain, 80,000. In 1910 the former British colonies of Cape Colony, Natal, Transvaal, and Orange River were federated as provinces in a Union of South Africa with inces in a Union of South Africa, with Gen. Louis Botha as the first premier, and the seat of the executive government at Pretoria and the legislative at Cape Town. Other British colonies are Lagos, Gold Coast, Gambia, Sierra Legos, Gold Coast, Gambia, Sierra Leone, and Mauritius. Egypt and Tripoli were long under Turkish rule, but Tripoli became an Italian colony in 1912, and Egypt a British protectorate in 1914. The Kongo Free State now belongs to Belgium. Abyssinia and Morocco are the chief native African independent States. Germany lost to the British, German South-west Africa in 1915, Kameroon country in 1916, and German East Africa also in 1916.

Commercial Conditions.—The annual commerce of Africa amounts to over \$700,000,000, of which \$429,000,

000 represents the value of the imports. Necessarily in so large an area with so many tribes and peoples who keep no records of their transactions, a considerable amount of commerce must pass without being recorded in

any way.

Railroad development in Africa has been rapid in the past few years and seems but the beginning of a great system which must contribute to the rapid development, civilization, and enlightenment of the "Dark Continent." Already railroads run N. from Cape Colony about 1,500 miles and S. from Cairo about 1,200 miles, thus completing 2,700 miles of the proposed "Cape to Cairo" railroad, while the intermediate distance is about 3,000 miles. At the N. numerous lines skirt the Mediterranean coast, especially in the French territory of Algeria and in Tunis, aggregating about 2,500 miles; while the Egyptian railroads are, including those under construc-tion, about 2,300 miles in length. Those of Cape Colony are over 3,000 miles in length, and those of Portuguese East Africa and the Transvaal are another 1,000 miles in length. Including all of the railroads constructed or under construction, the total length of African railways is nearly 12,500 miles. A large proportion of the railways thus far constructed are owned by the several colonies or states which they traverse, about 2,000 miles of the Cape Colony system and nearly all of that of Egypt belonging to the state. Airplanes for mail and passenger service cover many routes.

That the gold and diamond mines of South Africa have been and still are wonderfully profitable is beyond question. The Kimberley diamond mines, 600 miles from Cape Town, supply 98 per cent of the diamonds of commerce, though their existence was unknown prior to 1867 they have thus been in operation but about 30 years. It is estimated that \$350,000,000 worth of rough diamonds, worth double that sum after cutting, have been produced from the Kimberley mines since their opening in 1868-1869, and this enormous production would have been greatly increased but for the fact that the owners of the various mines there formed an agreement to limit the out-

put so as not to materially exceed the world's annual consumption.

Equally wonderful and promising are the great Witwatersrand gold fields of South Africa, better known as the Johannesburg mines. Gold was discovered there in 1883, and in 1898 before the Boer War, which temporarily suspended work, the annual yield had reached over \$55,000,000. Since the opening of the 20th century, the development of the principal European colonies has progressed more rapidly than previously, notwithstanding the Herreros war in German S. W. Africa, and the maladministration of the Congo Free State. The projection of railroads into the interior from seaboard towns, many to eventually connect with the Cape to Cairo route, is a powerful factor in internal development. On that line, at the great Victoria Falls of the Zambesi River, a cantilever bridge, 560 ft. long, built across the gorge by the American Cleveland Bridge Co., was opened in 1905. Electric power is developed at the fells and envertee religence converted the falls and operates railroads, copper and coal mines, within a radius of 600 miles.

Agamemnon, king of Mycenæ and Argos, son of Atreus and Eriphyle, brother of Menelaus and commander-in-chief of the Grecian army at the siege of Troy. Returning from Troy, Agamemnon was treacherously murdered by his wife; who, during his absence, had formed an attachment with Ægisthus, son of the noted Thyestes. This catastrophe is the subject of the "Agamemnon" of Æschylus, one of the most sublime compositions in the range of the Grecian drama.

Agaña, town and seat of administration of Guam, the largest of the Ladrone Islands, ceded by Spain to the United States after the war of 1898. It is an important naval and cable station, between San Francisco and Luzon in the Philippines.

Agape, a love feast, a kind of feast held by the primitive Christians in connection with the administration of the sacred communion.

mous production would have been greatly increased but for the fact that the owners of the various mines there formed an agreement to limit the out-

on the principle of a community of goods, which he established at Charlinch, near Taunton, England, in 1845. New attention was called to this sect in September, 1902, when J. H. Smyth Piggott, successor to Prince, publicly declared in the church of the sect at Clapham, near London, that he, in his own person, was Christ, who had come again, and was received as such by his congregation. An angry mob sought to attack him, but he was protected by the police.

Agassiz, Alexander, an American zoölogist and geologist, son of J. L. R. Agassiz, born in Neuchâtel, Switzerland, Dec. 17, 1835. He came to the United States with his father in 1849; graduated from Harvard in 1855; and received the degree of B. S. from the Lawrence Scientific School in 1857. In 1859 he went to California as assistant on the United States Coast Survey. From 1860 to 1865 he was assistant curator of the Museum of Comparative Zoology at Harvard University; and, from 1860 to 1869, superintendent of the Calu-met and Hecla mines, Lake Superior. On the death of his father in 1873, he was appointed curator of the Museum of Comparative Zoology, holding that position until he resigned in 1885. In 1900 he completed a series of deep sea explorations for the United States government. His chief works are List of Echinoderms" (1863); "List of Echinoderms" (1863):
"Exploration of Lake Titicaca" (1875-1876); "Three Cruises of the (1875–1876); "'Blake" (1880). March 28, 1910. He died at sea,

Agassiz, Jean Louis Rodolphe, a Swiss naturalist; born in Motier, Switzerland, May 28, 1807. In 1846 he came to the United States on a lecturing and exploring tour. The professorship of zoology and geology in Harvard College was offered him in 1847, and as he had previously been offered the use of the United States survey vessels for exploring purposes he accepted the offer. While at Har-vard he wrote several volumes, some of which were of a popular nature, but most of them were devoted to scientific research.

acter " (1850): "Contributions to States" (4 vols. 1857-1862); "Zo-ölogie Générale" (1854); "Methods of Study in Natural History" (1863). His contributions to the development of the principles of natural science in his special departments are very numerous and of high authority. In 1855 he was enabled by the liberality of Nathaniel Thayer to make, for the sake of his failing health, a long-contemplated voyage to Brazil. He was accompanied by his wife, who wrote an account of the voyage. In 1871 he visited the S. shores both of the E. and of the W. coast of North America. After some years of unsuccessful efforts to get a government marine station established, he was enabled by private munificence to fit up one on Penekese Island in Buzzard's bay. Agassiz's last work was the organization of this establishment, of which he wrote an account in 1873 to the British Association. He died in Cambridge, Mass., Dec. 14, 1873. His widow, ELIZABETH CARY AGAS-

SIZ, was born in Boston, Mass., in 1823; died June 27, 1907. She closely identified herself with her husband's scientific work, accompanying him on many of his travels, and supplementing his researches with her own literary work. Probably she will be best remembered for her early agitation for the collegiate education of women. and as the president of the Harvard Annex, now Radcliffe College, from its institution till November, 1899, when she resigned. Mrs. Agassiz published "Louis Agassiz; His Life and Correspondence," and was joint author, with Alexander Agassiz, of "Seaside Studies in Natural History."

Agate, a mineral classed by Dana as one of the cryptocrystalline varieties of quartz, some of the other minerals falling under the same category being chalcedony, carnelian, onyx, hornstone, and jasper.

Agave, an extensive genus of plants. The best-known species is the American aloe, called maguey by the Mexicans. Its hard and spiny leaves Among his more important works form impenetrable hedges. The fiber were: "Principles of Zoölogy," in makes excellent cordage. The expressed connection with Dr. A. Gould (1848); juice is employed as a substitute for "Lake Superior, its Physical Char- soap; also manufactured into a ciderlike liquor, called pulque by the Mexi-

Age, any period of time attributed to something as the whole, or part, of its duration; as the age of man, the several ages of the world, the golden

Ageda, the name of a plain, 90 miles from Buda, where the Jewish rabbis held a meeting, in 1650, to debate whether the Messiah had come; the question was decided in the nega-

Agesilaus, King of Sparta (397-360 B. C.), was elevated to the throne chiefly by the exertions of Lysander. He was one of the most brilliant soldiers of antiquity. He died in his 84th year.

Agincourt, now Azincourt, a small village in the center of the French department of Pas-de-Calais, celebrated for a bloody battle between

the English and French, Oct. 25, 1415. The battle lasted three hours, and was a signal victory for the English, due mainly to the archers.

Agnew. Cornelius Rea, an American physician, born in New York, Aug. 8, 1830; Professor of Dis-eases of the Eye and Ear in New York College of Physicians and Sur-He was a graduate of Columbia College, and later studied in Euof the State of New York at the beginning of the Civil War, when he became medical director of the New York State Volunteer Hospital. As member of the United States Sanitary Commission, he contributed largely to its success. In 1868, he founded the its success. In 1868, he founded the Brooklyn Eye and Ear Hospital. He was interested in the public schools of New York; became founder of the Columbia College School of Mines, and, in 1874, one of the trustees of the college. His writings are chiefly monographs on diseases of the eye and ear. He died April 8, 1888.

Agnew, David Hayes, an American surgeon and medical writer, born Nov. 24, 1818; for many years Pro-fessor of Surgery at the University of Pennsylvania. He died 1892.

Agnosticism, a word used by Professor Huxley, to express the

higher affections, nothing can be known. Facts, or supposed facts, both of the lower and the higher life, are accepted, but all inferences de-duced from these facts as to the existence of an unseen world, or of beings higher than man, are considered unsatisfactory, and are ignored. Agnostics, positivists, and secularists have much in common, and many people exist to whom any one of the three names might be indifferently applied.

Agouti, a South American animal. The agoutis live for the most part upon the surface of the ground, not climbing nor digging to any depth; and they commonly sit upon their haunches when at rest, holding their food between their forepaws, in the manner of squirrels. By eating the roots of the sugar-cane, they are often the cause of great injury to the planters. The ears are short, and the tail rudimentary. The animal is nearly 2 feet long. It is found in Guiana, Brazil, Paraguay, and some of the Antilles. It feeds voraciously on vegetable food.

Agra. (1) A former division of British India; now a part of the United Provinces of Agra and Oudh; area, 83,198 square miles; pop. (1911) 34,624,040. (2) The capital of Agra district, on the right bank of the Jumna, 139 miles S. E. of Delhi, by rail, and 841 miles N. W. of Calcutta. The city is considered especially sacred through Vishnu's incarnation there as Parasu Rama. Pop.

(1911) 185,449. Agrarian, as adjective (1) general, pertaining to fields or lands; (2) special, pertaining to laws or customs, or political agitation in connection with the ownership or tenure of

land. The agrarian laws, in the ancient Roman republic, were laws of which the most important were those carried by C. Licinius Stolo, when tribune of the people, in B. C. 367. The second rogation, among other enactments, provided (1) that no one should occupy more than 500 jugera (by one calculation, about 280, and by another, 333, acres) of the public lands, or have more than 100 large and 500 Professor Huxley, to express the small, cattle grazing upon them; (2) thought, that beyond what man can that such portion of the public lands know by his senses, or feel by his above 500 jugera as was in possession of individuals should be divided among all the plebeians, in lots of seven jugera, as property; (3) that the occupiers of public land were bound to employ free laborers, in a certain fixed proportion to the extent of their occupation. When, at a later period, efforts were made to revive the Licinian rogations, such opposition was excited that the two Gracchi lost their lives in consequence, and this, with their other projects, proved abortive. It is important to note that the land with which the Licinian, or agrarian, laws dealt was public land, belonging to the State, and not, as is popularly supposed, private property. The homestead laws of the United States are inspired by a purpose similar to the old Roman agrarian agitation—the distribution of lands among the people. "Agrarian" in Germany is the name of a political party which seeks to secure special protection for agricultural products.

Agricola, Cnæus Julius, Roman statesman and general, born in 37 A. D. He went to Britain in 77 A. D., strengthened the Roman power, and extended it to the Scotch Highlands. He died in 93.

Agricola, John, a polemical writer of celebrity, born at Eisleben, Saxony, in 1492; died at Berlin, in 1566. From being the friend and scholar, he became an antagonist, of Martin Luther. He entered into a dispute with Melanchthon, advocating the doctrine of faith in opposition to the works of the law, whence the sect of which he became leader received the name of Antinomians.

Agricola, Rudolphus, the foremost scholar of the "New Learning," in Germany, was born near Groningen, in Friesland, Aug. 13, 1443. His real name, ROELOF HUYSMANN (husbandman), he Latinized into Agricola: and from his native place he was also called Frisius, or Rudolf of Groningen. He died at Heidelberg, Oct. 28, 1485.

Agricultural Chemistry, that department of chemistry which treats of the composition of soils, manures, plants, etc., with the view of improving practical agriculture. The scince is comparatively young. The most important bases of agricultural Act.

chemistry to-day are the experimental stations which are found in agricultural colleges, and in many of the universities in various countries.

universities in various countries.

Agricultural Colleges, educational institutions, chiefly under government patronage, for the promotion of scientific farming. In 1862, the United States Congress passed a socalled land grant act, by which land scrip, representing 30,000 acres for every Senator and Representative, was issued to the States and Territories. the object being to provide a special fund for the creation of State and Territorial agricultural colleges. The land granted to the States by the act of Congress of 1862 amounted to 10,929,215 acres, of which 1,090,924 acres remained unsold in 1916. From the sale of lands permanent funds were created amounting to \$14,493,441 and yielding an income of \$964,579 for the benefit of the colleges. The total appropriation for the year ended total appropriation for the year ended June 30, 1915, from the U. S. Treasury in aid of colleges of agriculture and the mechanic arts under the acts of Congress of 1890 and 1907 was \$2,500,000, each of the forty-eight States and the two insular possessions receiving \$50,000. In 1916 there were 52 agricultural colleges for there were 52 agricultural colleges for white students with an enrollment of 114,905, and nineteen for colored students with an enrollment of 10,070. The property held for the benefit of the land-grant colleges had a total value of \$171,800,597 in 1915, and the total income from the National and State governments and private funds was \$36,027,005.

Several of the land-grant colleges in Southern States have established courses of study in textile industry, with special reference to the manufacture of cotton goods.

facture of cotton goods.

The Act of 1862 was supplemented by a second (Aug. 30, 1890), so that under both acts, each State and Territory having an agricultural college receives an appropriation annually from the United States treasury for support. The training of teachers of agriculture for high schools called for by the Smith-Hughes Act of 1917 resulted in development of such teaching. In 1925 there was a total of 659,370 students in schools benefitted under this Act.

Agriculture, the art of cultivating the ground more especially with the plow and in large areas or fields, in order to raise grain and other crops for man and beast; including the art of preparing the soil, sowing and planting seeds, removing the crops, and also the raising and feeding of cattle or other live stock. This art is the basis of all other arts, and in all countries is coeval with the first dawn of civilization. At how remote a period it must have been successfully practised in Egypt, Mesopotamia, and China we have no means of knowing. Egypt was renowned as a wheat country in the time of the Jewish patriarchs, who themselves were keepers of flocks and herds rather than tillers of the soil. During the Middle Ages agriculture advanced but slowly, the tools remained unchanged, and the work was done la-boriously and by rule of thumb, without thought of scientific methods. The first treatise on farming in English, was published in 1534, but it was not until more than 200 years later that real progress was made, after the introduction of clover into English fields. Potatoes were cultivated in the 16th century, and early in the 17th the Dutch gave particular attention to the cultivation of root crops. So each decade saw some improvement and growth, but it was not until the development of the virgin lands of the United States called for improved machinery and methods, that agriculture advanced with leaps and bounds. Under scientific culture, old lands are re-claimed and made as fruitful as ever; irrigation and the choice of crops suited to the soil, bring into profitable use lands once so hopeless as to be called desert, and the world's food supply promises to keep up with the growth of population.

As a result of the new conditions, to be a thoroughly trained and competent agriculturist requires a special education, partly theoretical, partly practical. In particular, no scientific cultivator can now be ignorant of agricultural chemistry, which teaches the con-stituents of the various plants grown as crops, their relation to the various soils, the nature and function of different manures, &c. In most countries graphic there are now agricultural schools or follows: colleges supported by the state.

The United States principal farm crops in 1930 were valued at \$6,274,-824,000. This valuation was computed on the basis of December 1, 1930, farm prices or on seasonal farm prices. Total acreage was 366,507,000 in 1930. The following figures estimate the principal crops for the calendar year 1930:

Corn, 2,081,048,000 bu.; all wheat 850,965,000 bu.; oats 1,402,026,000 bu.; barley, 325,093,000 bu.; rye 50,234,000 bu.; hay, 94,767,000 tons; white potatoes 361,090,000 bu.; sweet white potatoes 361,090,000 bu.; sweet potatoes 71,154,000 bu.; rice 41,367,000 bu.; tobacco 510,308,000 lbs.; cotton 14,243,000 bales; sugar beets 9,175,000 tons; sugar cane 3,108,000 tons; apples, 163,543,000 bu.; peaches 53,286,000 bu.; pears 25,703,000 bu.; grapes 2,368,557 tons; oranges 47,691,000 boxes; grapefruit 14,153,000 boxes; lemons 7,020,000 boxes. On Jan. 1, 1931, the value of live stock in the United States was \$4,366,447,000. This marked the lowest value of all live stock since January, 1912. The farm value of live stock by species on Jan. 1, 1930 was computed

species on Jan. 1, 1930 was computed as follows: Horses and colts, \$944,-709,000; mules and mule colts \$438,-019,000; cattle and calves \$3,321,992,-000; sheep and lambs \$450,684,000; swine and pigs \$732,560,000; cows and heifers \$1,872,385,000.

There was a continuance in the de-cline of horses on farms in 1930, the number on Jan. 1, 1931 being 12,-803,000. Mules declined from 6,279,-000 head in 1930 to 5,131,000 head on Jan. 1, 1931. Cattle increased to 58,955,000 head on Jan. 1, 1931. The number of hogs decreased to 52,323,-000 head on Jan. 1, 1931. Sheep increased in 1930 for the ninth consecutive reason the number of hogs care the number of 111000. tive year, the number being 51,911,000

on Jan. 1, 1931 compared with 50, 503,000 on Jan. 1, 1930.

In 1930, 1,543,000 persons left farms for towns and cities. A normal increase of 359,000 births over deaths increased the farm population on Jan. 1, 1931 to 27,430,000 compared with 27,222,000 on the same date, 1930. These figures show the first gain in farm population in ten years. The movement to and from farms by geographic divisions in 1930 is shown as

Division	To Farms	From Farms
New England .	51,000	52,000
Middle Atlantic	111,000	95,000
E. North Centi	ral. 236,000	228,000

survey of farmers' elevators is being into the machines, which thresh out, completed by the United States Department of Agriculture and holds straw is left on the ground. already reports from 3,331 associations. Of the above enumerated elevators two-thirds are operating on cooperative principles of limiting dividends on stock and paying dividends according to patronage. The general business of these elevators is found satisfactory. They have a paid-up capital stock of \$457,000,000 and a combined net surplus nearing \$25,000,000. Buildings and equipment to combined net surplus nearing \$25, bine-harvested wheat has somewhat the value of about \$60,000,000 are owned by them and they are carrying of, and they are carrying of, owned by them and they are carrying about \$22,000,000 for working capital. About 420,000 stockholders own the associations, and about the same number of non-member grain growers patronage dividends.

An economical device, which is greatly aiding wheat-growing farmers, is the "combine" machine. It relieves the former desperate condireign he enlarged Cæsarea Philippi tion of the farmer, who had to depend on migratory labor in harvesting his crop of small grain, with labor the Romans, he remained faithful to

s |do the work that called for the labor of five or six men. The combined harvester-thresher machine is no new device, but has been used for a num-ber of years on large wheat farms west of the Rockies, but these were mostly horse power machines and required 30 to 40 horses each. Necessities of World-War times gave stimulus for a one-man type, and manufacturers met the situation; and specially adapted types were produced for Middle West and Eastern farmers, Co-operative associations have an drawn and operated by automotive stimated membership of 3,000,000 of which about 70% is in the 12 North Central States; 12% in the South and the balance in the Pacific States.

Lloyd S. Tenny, Chief of the Bureau of Agricultural Economics the smaller can be run by one man. declared, on June 12, 1928, that the The operating speed of the smallest estimated number of farmer-owned elevators in the United States the grain to a swath of from 8 to 20 amounted to at least 4,000. A general feet. The straws with heads are drawn

A great advantage of the combine is that cutting and threshing have no interim between, while, in the Middle West and in the East, farmers have to cut their wheat in advance of full ripening and to allow it to dry out while shocked in the field. The weather is a source of danger. Several expert tests show that com-

an executive department of the United States Government, established by Congress in 1889; originally a bureau. It disseminates throughout the United patronize these elevators. Six out of seven associates reported surpluses reports, the latest and most valuable for last season, 61% reported dividends paid on stock, and 28% paid duces and distributes new and desir-

and 28% paid duces and distributes new and desirable seeds, plants, etc.

Agrippa II., Herod, tetrarch of Abilene, Galilee, Iturea and Trachonitis, born in 27 A. p. During his reign he enlarged Cæsarea Philippi and named it Neronias, in honor of Maintained in his power by becoming scarcer and dearer year by their interests, and tried to dissuade year. By using the "combine" machine (an automotive harvester-thresher) the farmer covers the work in a single operation. One of these machines will be a large to their interests, and tried to dissuade the Jews from rebelling. After the died. Before him the Aposoperation. One of these machines will be a large to their interests, and tried to dissuade the Jews from rebelling. After the died. Before him the Aposoperation.

Ague, an intermittent fever, in whatever stage of its progress or whatever its type. A person about to be seized by it generally feels some-what indisposed for about a fortnight previously. Then he is seized with a previously. Then he is seized with a shivering fit, which ushers in the cold stage of the disease. This passes at length into a hot stage, and it again into one characteristic of great perspiration, which carries off the disorder for a time. The remedy is quinine or some other anti-periodic.

Aguilar, Grace, an English novelist, born at Hackney, June 2, 1816; was the daughter of Jewish parents of Spanish origin. She died in Frankfort-on-the-Main, Sept. 16, 1847.

Aguinaldo, Emilio, a leader in the Philippine insurrection of 1896, and their chief in the Spanish-American War of 1898. He was born at Imus, in the island of Luzon, in 1870, and received all the advantages of such educational facilities as existed in Manila under the Spanish rule. In course of time he became mayor of Cavite Viejo, and because of the interest he took in the troubles of 1896, was forced to go to Hong Kong, re-maining there in exile on condition of a considerable payment by Spain. He returned in 1898, and succeeded in raising a revolt against Spain. He organized a provisional government in June 1898, of which he became president later. During the next year he attacked the American troops, and after many conflicts was captured by a stratagem, and in 1901 took the oath of allegiance to the United States and ceased to be a troublesome factor in the Philippine problem. He proved himself to be a man of great cunning, of marked ability, and of extraordinary personal magnetism.

Ahasuerus, a King of Persia, the Scriptures ascribe a singular deliverance of the Jews from extirpation, which they commemorate to this day by the annual feast of Purim.

Ahmedabad, (better Ahmadabad), chief town of a district in Guzerat, India, second among the cities of the Province of Bombay. Pop. 274,007.

Ai, a species of sloth, with three toes, on each foot, in this respect differing from the unau, which has but two. It extends from Brazil to Mexico.

Ailanthus, Aliantus, or Alianthus, a tree introduced into the United States in 1784. During the first half-dozen years it outstrips almost any other deciduous tree, the leading stems grow 12 or 15 feet in a single season. In four or five years, therefore, it forms a bulky head, but after that period it advances more slowly. The odor of ailanthus trees is disgusting to many persons, and for this reason they are not so much in favor as when first introduced.

Ainu, or Aino, the name of an uncivilized race of people inhabitating the Japanese island of Yezo, as also Saghalien, and the Kurile Islands, and believed to be the aboriginal inhabitants of Japan. They do not average over 5 feet in height, but are strong and active. They have matted beards 5 or 6 inches in length, and black hair which they allow to grow till it falls over their shoulders. Their complexion is dark brown, approaching to black. They worship the sun and moon, and pay reverence to the bear. They support themselves by hunting and fishing.

Air, the gaseous substance of which our atmosphere consists, being a mechanical mixture of 79.19 per cent. by measure of nitrogen and 20.81 per cent. of oxygen. The latter is abso-lutely essential to animal life, while the purpose chiefly served by the nitrogen appears to be to dilute the oxygen. Oxygen is more soluble in water than nitrogen, and hence the air dissolved in water contains about 10 per cent. more oxygen than atmospheric air. The oxygen therefore available for those animals which breathe by gills, is very much diluted with water.

Air-brake. See Brake.

Air-engine, an engine in which air heated, and so expanded, or compressed air is used as the motive power. They may be said to be essentially similar in construction to the steam-engine, though the expansibility of air by heat Ahriman, a Persian deity, the demon or principle of evil, the principle of good being Oromasdes or Ormuzd.

B.-2. and the compressed air may be conveyed to its destination by means of pipes. In such cases the waste air serves for ventilation and for reducing the oppressive heat.

Air-gun, an instrument for the projection of bullets by means of condensed air, generally in the form of an ordinary gun.

Air-pump, an apparatus by means of which air or other gas may be removed from an inclosed space; or for compressing air within an inclosed space. An ordinary suction-pump for water is on the same principle as the air-pump; indeed, before water reaches the top of the pipe the air has been pumped out by the same machinery which pumps the water.

Airships. See Aeronautics; Flying Machine.

Aisne, a river of France in the department of the same name; an affluent of the Oise; scene of a French defeat in 1915. See APPENDIX: World War.

Aix-la-Chapelle (Ger. Aachen), the capital of a district in Rhenish Prussia, situated in a fertile hollow, surrounded by heights, and watered by the Wurm, 39 miles W. by S. of Cologne. Pop. (1926) 145.748.

Cologne. Pop. (1926) 145,748.

Ajaccio, the chief town of the Island of Corsica, which forms a Department of France. It is the handsomest city of Corsica, and the birthplace of Napoleon I., whose house is still to be seen. Pop. (1926) 22,614.

Ajax, the name of two heroes of the Trojan War. Ajax, son of Telamon. King of Salamis, was next in warlike prowess of Achilles.

Aked, Charles F., Baptist ministér, born in Nottingham, England, in 1864. He visited the U. S. several times, and in 1907-11 was pastor of the Fifth Ave. Baptist Church, N. Y. C.

Akron, city and capital of Summit county, Ohio; on the Ohio canal and the Baltimore & Ohio and other railroads; 40 miles S. E. of Cleveland. It is the trade center of a large farming and manufacturing section; has one of the largest private printing offices in the world and extensive manufactories of rubber

goods; is the seat of Buchtel College (Universalist); and has a property valuation exceeding \$27,500,000. Pop. (1930) 255,040.

Akers, Benjamin Paul, an American sculptor, born in 1825. Studied in Florence and was especially noted for the rapidity of his work. He died in May, 1861.

Studied in Florence and was especially noted for the rapidity of his work. He died in May, 1861.

Alabama, a State in the East South Central Division of the North American Union; bounded by Tennessee, Georgia, Florida, Mississippi, and the Gulf of Mexico; area, 51,998 square miles; admitted into the Union, Dec. 14, 1819; seceded, Jan. 11, 1861; readmitted, June 25, 1868; number of counties, 67; pop. (1920) 2,348,174; (1930) 2,646,248; capital, Montager of the Market State of the Counties o

gomery.

The State has large wealth in its mineral resources, which include coal, iron, asbestos, asphalt, pottery and porcelain clays, marble, granite, phosphates, natural gas, gold, silver, and copper. The most valuable of these at present are coal and iron. The coal is all bituminous, and the iron is red and brown hematite. The 1929 iron production was 6,453,000 tons; coal 17,400,000 tons from 272 mines. Coal underlies about 8,000 square miles.

In the S. part of the State the soil is a light alluvial and diluvial; in the central, the cotton belt, limestone and chalk lands predominate; and in the N. part, which contains the Tennessee valley, there are very rich mineral lands. Besides the agricultural, mineral, and grazing lands, there are large tracts of valuable yellow pine forests. The most valuable productions are cotton and corn. Alabama produces about one-fifteenth of the country's cotton. The 1930 production was 1,473,000 bales from 3,938,502 acres.

In 1925 there were 2,349 manufacturing establishments reported, with 116,599 wage earners, earning \$101,-242,839, and producing goods valued at \$552,824,944. The leading industry is the manufacture of cotton goods, the steel and iron output ranking second. Coke and lumber production also rank high.

Under the Federal Reserve banking system of 1913. Alabama is in the Sixth district, of which Atlanta, Ga., is the reserve city. Official reports

Type of Monoplane Used on Aerial Passenger Service Operating Between Berlin, Amsterdam and London

WRECK OF THE SHENANDOAH
Showing the Gondola and Control Cabin. In All Fourteen Officers and
Men Were Killed and Two Injured. Sept. 4, 1925

SEAPORT OF AMALFI ON THE MEDITERRANEAN

for the year ending June 30, 1929 for all reporting banks showed a total of 350, with \$62,422,000 capital, \$252,-670,000 in deposits, \$377.962.000 total resources or liabilities, \$57,508,000 investments and \$11,863,000 with Federal Reserve.

Mobile handles nearly all the State's foreign commerce, is connected with the Gulf by a 30 foot channel and the State owns the terminal railway that joins all railroads with the docks. 1927 exports totaled \$44,964,596.

The school population was reported in 1916 at 774,976, of whom 473,150 were enrolled in the public schools, and 292,540 were in average daily attendance. There were over 7,000 public schools, white and colored pupils being taught separately; 10,212 teachpeng taught separately; 10,212 teachers; public school property valued at \$2,127,054,930. For higher instruction, there was 174 public high schools; 52 private secondary schools; 9 public normal schools; 9 universities and colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes; and \$25tete Agricultural and Mechanical Colleges for men and for both sexes for and a State Agricultural and Mechanical College at Auburn.

The strongest denominations numerically in the State are the Baptist, Methodist, and Presbyterian bodies, and all church property has a value exceeding \$15,000,000.

The railroad mileage, exclusive of switching and terminal lines, exceeds 5.250, having been greatly increased by the demands of industrial activities.

The governor is elected for four years, salary \$7500 per year; legislature meets quadrennially, salary \$4.00 per session day; Senate has 35 members, House 106; Representatives in Congress, 9; State Democratic.

Alabama Claims, a series of claims made in 1871, by the United States against the English Government for damages done to shipping during the Civil War, after a formal discourage between the control of discussion between the two govern-ments in 1865, and fruitless conventions for their settlement in 1868 and 1869. These damages were inflicted chiefly by the "Alabama," an armed vessel of the Confederate States, which was fitted out in a British port and permitted to sail in violation of

Switzerland, during the year 1872, and awarded the United States the sum of \$15,500,000 in gold, in satisfaction of all claims at issue. The Geneva tribunal was important as establishing an example of arbitration in place of war in the settlement of international differences, which, in this case, barely averted a war, and in defining the attitude of neutrals toward nations at war.

Alabama, The, a Confederate cruiser, which devastated American shipping during the Civil War. She was a bark-rigged steamer of 1,040 tons, built under secret instructions at Birkenhead, England. Her destination was suspected by the United States minister, but when orders for her detention were finally obtained, she had departed (July 31, 1862). She made for the Azores, where she was equipped and manned by an English crew, under the command of Capt. Raphael Semmes, of Maryland. She then proceeded to capture and burn vessels bearing the American flag, and the destruction wrought in less than two years amounted to 65 vessels, and two years amounted to 65 vessels, and about \$4,000,000 in property. In June, 1864, she put into Cherbourg, France, for repairs. Here she was intercepted by the Federal corvette "Kearsarge," Captain Winslow, and, after an hour's severe battle, the Alabama was sunk. The vessel was virtually a British privateer, and the course of the British authorities in permitting her to leave on her mission permitting her to leave on her mission of piracy showed connivance and sympathy with the Confederacy (see ALA-BAMA CLAIMS preceding). When the Alabama was sinking, a private British yacht, in rescuing survivors (including Captain Semmes), also saved them from capture by the Federalists.

Alabaster, in mineralogy, massive gypsum, white delicately shaded or banded.

Aladdin, the hero of an Arabian Nights' tale. A poor boy in China, he secures possession of a lamp and ring possessing magical powers. Rubbing the lamp brings to the service of the owner the powers of the slave of the existing international law. A tribunal, lamp, who gratifies every desire. The created in 1871 to pass upon these lamp is lost, but the slave of the ring claims, held its sessions in Geneva, lives happily ever afterwards, enjoying wealth and health.

Alamo, The, a mission church at San Antonio, in what is now Bexar co., Tex., converted into a fort. In 1836 it was occupied by about 150 of the revolutionists in the Texan War of Independence. Though attacked by 4,000 Mexicans under Santa Ana, the Texans held it from Feb. 23 to March 6, when Santa Ana took it by storm. All but seven of the garrison perished, six of these being murdered after their surrender, and one man escaping to report the affair. In this garrison were the celebrated David Crockett and Col. James Bowie, inventor of the bowie-knife. The memory of this massacre became an incitement to the Texans in subsequent encounters, and "Remember the Alamo!" became a war-cry in their struggle for freedom.

Alaska, a Territory in the Western Division of the North American Union, comprising the extreme northwestern part of the American continent; bounded by the Arctic and Pacific Oceans, Bering Sea, British Columbia, and the Northwest Territories of Canada; gross area, as far as determined, 590,884 square miles; purchased from Russia, in 1867, for \$7,200,000; seat of government,

Juneau; pop. (1920) 55,036. When the United States acquired this region, and till gold mining set in, fur sealing was the only industry. Oats, wheat, rye, barley, and buckwheat, among cereals; potatoes, turnips, peas, onions, and many minor vegetables; a variety of fruit and excellent hay are grown to advantage. Large tracts for farming have been reclaimed from wild areas, and agricultural experiment stations have been established at Sitka, Rampart, Fairbanks, Kadiak, and Matanaska.

The waters of Alaska contain over 100 species of food fish, but the principal fisheries are those confined to salmon, cod and herring. In connection with the Alaska coast there are at least 125,000 square miles of cod fishing banks, the greater ment.

abound, but as yet they do not support distinct industries.

Alaska's greatest wealth is found in its vast mineral resources, which are still subject to systematic exploitation. Lignite coal, native copper, cinnabar, graphite, iron ore, white marble, sulphur, mica, kaolin, manganese, asphalt, petroleum, and mineral springs are found in various sections. Until recently gold was the leading min-eral industry, but this has been supplanted by profitable operations in coal, copper, silver, petroleum, gypsum, marble, and tin.

Gold was discovered here, on the

Kenai peninsula, in 1848, but mining did not set in systematically till about 1880. It is interesting to note here that while the territory cost the United States in 1867 the sum of \$7,200,000, the production of gold alone up to 1928 amounted in value to \$366,031,098. Her entire exports to the United States alone, in 1927-28 totaled \$49,864,910 and consisted mainly of metals, furs, and fish. Population and output were reduced by the World War.

Means of communication greatly retarded the economic development of the territory. Now, the old trails and wagon roads are giving way to the modern railroad. In 1898 an aerial railway was completed over Chilkoot Pass, which greatly reduced the time between tidewater and the headwaters of the Yukon, and in 1914, after a prolonged agitation, Congress appropriated \$35,000,000 for the construction of a government railroad. Aviation is making accessible in a few hours places it took weeks to reach by dog sled, and the Legislature has had 33 landing fields laid out. The territory is well provided with

banking, educational, religious, and manufacturing activities, and has a considerable trade with the United States and foreign countries through the port of Juneau.

When first occupied Alaska was constituted a military district; in 1884 it was given a district government; and in 1912, a civil government with a legislature, consisting of a Senate of 15 members and a House of 30. It is represented in Congress by one part of which still awaits develop-ment. Whales and halibut also for four years by the President of U. S.

Alaska-Yukon-Pacific Exposition, an international exhibition held at Seattle, Wash., from June 1 to Oct. 16, 1909, to exploit the resources of Alaska and Yukon territories.

Albani, Marie Emma (Lajeunesse), a dramatic soprano and opera singer, born in 1852, at Chambly, near Montreal, Canada. After studying with Lamperti, at Milan, she made her debut at Messina (1870), in "La Sonnambula," under the name Albani, in compliment to the city of Albany, where her public career began. In 1878 she married Ernest Gye, of the Covent Garden Theater.

Albania, the name given to a region of West European Turkey between the Adriatic Sea, Greece, Macedonia, and Montenegro. The inhabitants form a peculiar people, the Albanians, called by the Turks Arnauts, and by themselves Skipetar. The Albanians are half civilized mountaineers, frank to a friend, vindictive to an enemy. They are constantly under arms, and are more devoted to robbery than to cattle rearing and agriculture. They live in perpetual anarchy, every village being at war with its neighbor. Many of them serve as mercenaries in other countries, and they form the best soldiers of the Turkish army. At one time the Albanians were all Christians; but after the death of their last chief, the hero Skanderbeg, in 1467, and their subjugation by the Turks, a large part became Mohammedans. The Albanians took a conspicuous part in the massacres in Macedonia in 1903. In the early part of the World War Prince William of Wied became emperor, but was forced to retire by Essad Pasha. Ahmed Zogu was made President in Sept. 1925, and was made I resident in Sept. 1928, and in Sept. 1928 he assumed the crown. Albania's trade, chiefly with Italy, was \$2,309,649 in exports, and twice that in imports. See APPENDIX: that in imports. World War.

Albany, a city of the United States, capital of the State of New York. Pop. (1920) 113,344; 1925 census 117,820. Settled by the Dutch in 1610-14. The State capitol is one of the grandest buildings in America. Albany has a university, an observatory,

and a State Library with over 90,000 volumes.

Albany Congress, an assembly of representatives of the most important British North American colonies, which was called together in 1754 by the British Government to consult in regard to the threatening French war. Two plans were proposed: First, a league with the Indians, which was carried out, and, second, a proposal offered by Franklin for a political union. In this a common president was proposed and a great council, representing the different colonies. This plan was rejected by the British crown, because it gave too much power to the colonies, and by the colonies because it gave too much power to the crown. The significance of this congress lies in the fact that it stimulated the union of the colonies.

Albert I., King of the Belgians, was born April 8, 1875, son of Prince Philippe of Saxe-Coburg and Gotha and Princess Marie of Hohenzollern-Sigmaringen; succeeded his uncle, King Leopold II., on Dec. 17, 1909; married Princess Elizabeth of Bavaria, Oct. 2, 1900; offspring, Prince Leopold, born Nov. 3, 1901, Prince Charles, born Oct. 10, 1903, Princess Marie-José, born Aug. 4, 1906. At the outbreak of the World War (1914), the Germans violated the guaranteed neutrality of Belgium by invading it in order to get into France for a dash on Paris. A reign of terror was immediately inaugurated, and the King and government were forced into flight. France promptly offered protection and asylum, resulting in the temporary establishment of the capital at Havre. See Appendix: World War.

Albert, Prince (Albert Francis Augustus Charles Emmanuel), Prince of Saxe-Coburg-Gotha, husband of the late Queen Victoria, of England; the second son of Ernest I., Duke of Saxe-Coburg, and of his first wife Louise, only daughter of the Duke of Saxe-Gotha; born Aug. 26, 1819. He died Dec. 14, 1861, after a short illness, and was buried in St. George's Chapel, Windsor, whence his remains were afterward removed to the mausoleum built by the queen at Frogmore.

Alberta, a N. W. Province of Can-ada lying N. of the State of Montana and E. of British Columbia with the Rocky Mountains on the W. The Province includes parts of the former districts of Alberta, Athabasca, Saskatchewan and Assinaboia and was admitted to the Federation by the Alberta Act of 1905. Area: 255,285 square miles, consisting of 252,925 square miles of land and 2,360 square miles of water. Pop. in 1930, 660,000. River systems provide Central Alberta with rich, fertile soil. Principal agricultural products: Wheat, oats, bar-ley, rye and flax seed. Natural resources: Coal, natural gas, petroleum and minerals. Manufacturers: Lumber, flour oatmeal, linseed oil, packing products, clay, brick, iron, glass and petroleum products. Alberta also abounds with whitefish, pickerel, pike, trout, etc. Exports: Grain, live-stock, meat and meat products, wool, butter, eggs, mining and timber products. The Province is represented by 6 The Province is represented by 6 persons from whose skin, hair, and members in the Senate and 16 in the eyes the dark coloring matter is ab-House of Commons. Nominally the executive is the Lieutenant-Governor, actually the power rests in the Executive Council or Cabinet of the Legisture. Principal cities and population: Edmonton (capital), 77,577; Calgary, 107,000; Lethbridge, 14,052; Red Deer, 2006; Medicine Hat 10,000.

Albertus Magnus, or Albert the Great, Count of Bollstädt, Bish-op of Ratisbon, a distinguished scholar of the 13th century; born in Lauingen, Suabia, in 1193, or according to some authorities in 1205. Among the sciences studied or illustrated by him were chemistry, botany, mechanics, optics, geometry, and astronomy. He fell into dotage some time previous to his death, in 1280. Albertus was probably the most learned man of his age, and of course did not escape the imputation of using magical arts and trafficking with the Evil One.

Albigenses, a religious sect opposed to the Church of Rome, coming first into prominence in the 12th century, and taking its name from Albiga, the old form of Albi, a city of Southern France, now capital of the department of Tarn. What their doctrines were has not been determined, as no formal statement of them was

ever drawn up. They inveighed against the vices and worldliness of the clergy, and there was sufficient truth in their censures to dispose their hearers to believe what they advanced, and reject what they decried. They had increased what they decreed. They had made the very much toward the close of the 12th century in the S. of France, about Toulouse and Albi, and in Raymond, Count of Toulouse, they found a patron and protector. As the con-demnation of their doctrines by the Church produced no effect, ecclesiastical officials were specially sent by the Pope to endeavor to extirpate the heresy. The assassination of the papal legate and inquisitor, Peter of Castelnau, in 1208, led to the proclamation of a crusade against them by Pope Innocent III., and after a strug-gle of many years, in which hundreds of thousands perished, they were virtually extirpated by the sword and the Inquisition.

Albinos, the name given to those sent. The skin of albinos, therefore, no matter to what race they belong, is of a pale milky hue, their hair is white, while the iris of their eyes is pale rose color. Their eyes are not well suited to endure the bright light of day, and they see best in shade or by moonlight. The peculiarity of albinism or leucopathy is not confined to the human race, having been observed in horses, rabbits, rats, birds, and fishes.

Albion, the oldest name by which the island of Great Britain was known to the Greeks and Romans.

Alboni, Marietta, an Italian contralto, born in Romagna, 1823. She made her debut as Orsini in "Lu-crezia Borgia." After singing in Europe for some years, she made a successful tour of the United States. On the death of her husband, Count Pepoli, in 1866, she left the stage, and in 1877 she married M. Ziegir, a French officer. She died in France in 1894.

Albret, Jeanne d', daughter of Margaret, Queen of Navarre, born in 1528. She married Antoine de Bourbon in 1548; gave birth in 1553 to a son, who was afterward Henry IV. of France; and on the death of her father, in 1555, became Queen of Navarre. She lost her husband in 1562, and eagerly began to establish the Reformation in her kingdom. Being invited to the French court to assist at the nuptials of her son with Margaret of Valois, she suddenly expired, not without suspicion of having been poisoned. Died in 1572.

Albright, Jacob, an American minister of the Methodist Church, born in 1759. His work lay among the Germans of Pennsylvania. Becoming impressed with the decline of religious life and of the doctrines and morals of the surrounding churches, he began a work of reform in 1790. He traveled about the country at his own expense, preaching his mission, until he founded in 1800 the EVANGELICAL ASSOCIATION. He died in 1808.

Albuera, a village of Spain, in the province of Badajoz, on the Albuera river; 13 miles S. E. of Badajoz. Here (May 16, 1811) a British and Portuguese army of 32,500, under General Beresford, defeated in a sanguinary battle a French army of 23,000 under Marshal Soult.

Albumen, or Albumin. In chemistry, the name of a class of albuminoids that are soluble in water, as serum and egg albumen.

Albuminuria, a disease characterized by the presence of albumen in the urine. It may be acute or chronic. Acute albuminuria is a form of inflamation of the kidneys. Chronic albuminuria, the commoner and more formidable malady, arises from grave constitutional disorders. It is often attended by or produces dropsy. Whether acute or chronic, but especially when the latter, it is generally called Bright's disease, after Dr. Bright, who first described it with accuracy.

Albuquerque, a city of New Mexico. Population 1930, 26,570.

Albuquerque, Affonso d', "the great," Viceroy of the Indies, was born in 1453, near Lisbon. Albuquerque landed on the Malabar coast in 1503, with a fleet and some troops; conquered Goa, which he made the seat of the Portuguese Government, and the center of its Asiatic commerce; and afterward Ceylon, the Sunda Isles, the Peninsula of Malacca

and (in 1515) the Island of Ormuz at the entrance of the Persian Gulf. He died at sea near Goa, Dec. 16, 1515.

Alexus, a Greek lyric poet; native of Mitylene; flourished in the 6th century B. c. Of his poems we have only fragments.

Alcala de Henares, a town in Spain, Cervantes' birthplace, on the Henares, 21 miles E. of Madrid by rail. Here was printed in 1517, in six folio volumes, at an expense of 80,000 ducats, the great Complutensian Bible.

Alcazar, the name of many castles and palaces in Spain. Ciudad-Rodrigo, Cordova, Segovia, Toledo and

ALCAZAR IN SEGOVIA.

Seville have alcazars. The one at Seville is an imposing relic of the Arab dominion.

Alcibiades, a famous Grecian statesman and warrior, son of Clinias and Deinomache, born in Athens about 450 B. C. After a brilliant and erratic career, distinguished equally by great achievements and lack of moral principle he was assassinated in 404.

Alcohol, a colorless, inflammable liquid, of agreeable odor, and burning taste, termed also spirit of wine, and ethylic or vinic alcohol.

Alcohol, Denatured, alcohol for use in the industries, in which medi-cinal properties have been destroyed; authorized by Congress in 1905.

Amos Alcott, Bronson, American philosophical writer and educator, one of the founders of the transcendental school of philosophy in New England, born in Wolcott, Conn., Nov. 29, 1799. Boston, March 4, 1888. He died in

Alcott, Louisa May, an American author, daughter of the preceding, born in Germantown, Pa., Nov. 29, 1832. She died in Boston, Mass., March 6, 1888. Few writers are more popular with children. "Little Women" being best loved of her books.

Alcuin, an English ecclesiastic, born at York in 735. He died in 804. He made with his own hand a copy of the Scriptures, which he presented to Charlemagne, and which became of great assistance to later editors.

Alden, Henry Mills, an American editor and prose writer, born at Mount Tabor, Vt., Nov. 11, 1836. He was graduated at Williams College and Andover Theological Seminary; settled in New York in 1861, became managing editor of "Harper's managing editor of "Harper's Weekly" in 1864, and editor of "Harper's Monthly Magazine" in 1868. He has published "The Ancient Lady of Sorrow," a poem; "God in His World"; etc. Died in 1919.

Alden, John, a magistrate of the Plymouth colony, born in 1599. His name is familiarized by the poem of Longfellow, "The Courtship of Miles Standish." He was originally a cooper of Southampton, was employed in making repairs on the ship "Mayflower," and came over in her with the Pilgrim Fathers. By some accounts he was the first to step ashore at Plymouth. In Longfellow's poem he is in love with and eventually marries Priscilla, with whom he had previously pleaded the cause of Miles Standish. He was for over 50 years

United States Consul-General He died Jan. 14, 1908. Rome.

Alder, the common name for a genus of plants (alnus), of the oak family. In the Eastern United States it is a very common shrub, branching freely from the roots, and forming dense clumps along the banks of On streams and in other wet places. the W. coast it often attains a height of from 40 to 60 feet in favorable locations. It is found in temperate and cold regions.

Alderman, a title pertaining to an office in the municipal corporations of the United States and England.

Alderman, Edwin Anderson, an American educator, born in Wilmington, N. C., May 15, 1861. In 1896 he was chosen President of the University of North Carolina; in 1900, of Tulane University (New Orleans); in

1904, of the University of Virginia.

Alderney, a British island in the English channel.

Aldershot Camp, a permanent camp of exercise on the confines of Hampshire, Surrey, and Berkshire, 35 miles S. W. of London.

Aldine Editions, the books printed by Aldus Manutius and his family, in Venice (1490-1597). They comprise the first editions of Greek and Roman classics; others contain corrected texts of modern classic writers, carefully collated with the MSS.

Aldrich. Nelson Wilmarth, United States senator from Rhode Island, recognized as the leading American authority on the protective tariff, and generally understood to be the real author of the McKinley Law as adopted. Born, Foster, R. I., November 6, 1841. President Providence Common Council, 1871-73; Speaker R. I. General Assembly, 1876; in Congress 1879 to 1883, when he resigned to take seat in Senate. He died April 16, 1915.

Aldrich, Thomas Bailey, an American poet, essayist, and writer of Standish. He was for over 50 years fiction, born in Portsmouth, N. H., a colonial magistrate. He died in Nov. 11, 1836. He spent his early youth in Louisiana, but at the age of Alden, William Livingston, an 'American humorous writer and journalist, born at Williamstown, Mass., he became editor of "Every Satur-Oct. 9, 1837. He was for a time day," and, in 1881, editor of the "Atlantic Monthly." He became equally eminent as a prose writer and poet. He died March 19, 1907.

Ale, a malt liquor, stronger than ordinary beer. It was the current name in England for malt liquor in general before the introduction of "the wicked weed called hops" from the Netherlands, about the year 1524. The two names, ale and beer, are both Teutonic, and seem originally to have been synonymous.

Alemanni, or Alamanni, a confederacy of several German tribes which, at the commencement of the 3d century after Christ, lived near the Roman territory, and came then and subsequently into conflict with the imperial troops. It is from the Alemanni that the French have derived their names for Germans and Germany in general, namely, Allemands and Allemagne, though strictly speaking only the modern Suabians and Northern Swiss are the proper descendants of that ancient race.

Alembert, Jean le Rond d', one of the most distinguished mathematicians and literary characters of the 18th century: born in Paris, Nov. 16, 1717. He died Oct. 29, 1783.

Alembic, a simple apparatus sometimes used by chemists for distillation.

Aleppo, a city of Turkey in Asia, in Northern Syria, and capital of the vilayet of Aleppo; on the Koeik river, 71 miles E. of the Mediterranean. The foundation of Aleppo dates back to about 2,000 years B. c. It was nearly destroyed by an earthquake in 1822, when it lost two-thirds of its 230,000 inhabitants. The present inhabitants are Turks, Greeks, Armenians, and Jews. Pop. about 140,000.

Aleutian Islands, or Catherine Archipelago, a group of about 150 islands, extending W. from Alaska peninsula for a distance of 1,650 miles; belongs to Alaska Territory. The islands are mountainous, with several volcanic peaks. The principal islands are Umnak and Unalaska. The inhabitants are nearly all Aleuts, a people allied to the Eskimos. These islands were discovered by Bering in 1728. Pop. about 3,000.

Alewife, a North American fish, belonging to the same family as the herring and the shad.

Alexander VI., Pope, Rodrigo Lenzuoli Borgia, a Spaniard, of Valencia, son of Isabelle Borgia, whose family name he took, born Jan. 1, 1431. At first he studied law, and then was appointed by his uncle, Pope Calixtus III., a cardinal before he was 25 years old. In 1458 he was made Archbishop of Valencia. After the death of Innocent vill. he was crowned Aug. 26, 1492, with great pomp and solemnity. To his son John, Duke of Gandia, he presented the duchy of Benevento, in 1487, which was separated from the estates of the Church. His daughter, Lucretia Borgia, was married to Giovanni Sforza, Lord of Pesaro, afterward to Alfonso di Biseglia, then thirdly to Alfonso d'Este, Prince of Ferrara. His son, Cæsar, who afterward got complete control of him, was made Archbishop of Valencia, and, in 1493, was appointed cardinal. Afterward, in order to create for him a secular principality, he made an alliance with Louis XII. of France. Cæsar Borgia, therefore, left the Church and became Duke of Valentinois. In 1501 he became Duke of the Romagna. On May 4, 1493, Alexander issued a bull dividing the New World between Spain and Portugal; on May 23, 1498, the execution of Savonarola took place by his order; and in 1501 he instituted the censorship of books. Alexander died Aug. 18, 1503, from poison said to have been intended for Cardinal Corneto.

Alexander I., Emperor of Russia, son of Paul I. and Maria, daughter of Prince Eugene, of Wurtemberg; born Dec. 23, 1777. On the assassination of his father, March 24, 1801, Alexander ascended the throne. One of the first acts of his reign was to conclude peace with Great Britain, against which his predecessor had declared war. In 1803 he offered his services as mediator between England and France, and two years later a convention was entered into between Russia, England, Austria, and Sweden for the purpose of resisting the encroachments of France on the territories of independent States. He was present at the battle of Austerlitz (Dec. 2, 1805), when the combined armies of Russia and Austria were defeated by Napoleon. Alexander was compelled to retreat to his dominions

Alexander Alexander

at the head of the remains of his army. In the succeeding campaign the Russians were again beaten at Eylau (Feb. 8, 1807), and Friedland (June 14), the result of which was an interview, a few days after the battle, on a raft anchored in the Niemen, between Alexander and Napoleon, which led to the treaty signed at Tillsit, July 7. The Russian emperor now for a time identified himself with the Napoleonic schemes. The seizure of the Danish fleet by the British brought about a declaration of war by Russia against Great Britain and Sweden, and Alexander invaded Finland and conquered that long-coveted duchy, which was secured to him by the peace of Friedrichshamn (1809). His having separated himself from Napoleon led to the French invasion of 1812. In 1813 he published the famous manifesto which served as the basis of the coalition of the other European powers against France. After the battle of Waterloo, Alexander, accompanied by the Emperor of Austria and the King of Prussia, made his second entrance into Paris. He died in the Crimen Dec. 1, 1825

and the King of Prussia, made his second entrance into Paris. He died in the Crimea, Dec. 1, 1825.

Alexander II., Emperor of Russia; born April 29, 1818; succeeded his father Nicholas in 1855, before the end of the Crimean War. After peace was concluded the new emperor set about effecting reforms in the empire, among the first being the putting of the finances in order. The greatest of all the reforms carried out by him was the emancipation of the serfs by a decree of March 2, 1861. The czar also did much to improve education in the empire, and introduced a reorganization of the judicial system. During his reign the Russian dominions in Central Asia were considerably ex-tended, while to the European portion of the monarchy was added a piece of territory, S. of the Caucasus, formerly belonging to Turkey in Asia. A part of Bessarabia, belonging since the Crimean War to Turkey in Europe, but previously to Russia, was also restored to the latter power. The latter additional control of the latter power. tions resulted from the Russo-Turkish War of 1877-1878, in which the Turks were completely defeated, the Russian troops advancing almost to the gates of Constantinople. Toward the end of the czar's life several attempts at

his assassination were made by Nihilists, and at last he was killed by an explosive missile flung at him in a street in St. Petersburg, March 13, 1881. He was succeeded by his son,

Alexander III Alexander III., of Russia, son of Alexander II., was born Maich 10, 1845, and married the daughter of the King of Denmark in 1866. After his father's death, through fear of assassination, he shut himself up in his palace at Gatschina. His coronation was postponed till 1883, and was celebrated with extraordinary magnifi-cence, and with national festivities lasting several days. Through the fall of Merv, the subjugation of the Turkomans in Central Asia was completed. In 1885 hostilities with England with regard to the defining of the frontier between the Russian territories and Afghanistan, for a time seemed imminent. In European affairs he broke away from the triple alliance between Russia, Germany, and Austria, and looked rather to France. He was aggrieved by the new Bulgarian spirit. His home policy was reactionary, though strong efforts were made to prevent malversation by officials, and stern economics were practiced. The liberties of the Baltic Provinces and of Finland were curtailed, the Jews were oppressed, and old Russian or-thodoxy was favored. Several Nihilist attempts were made on his life, and he kept himself practically a prisoner in his palace. He died at Livadia, Nov. 1, 1894.

Alexander III., King of Scotland, born in 1241, in 1249 succeeded his father, Alexander II. Riding on a dark night between Burntisland and Kinghorn, he fell with his horse and was killed on the spot, March 12, 1286. A monument (1887) marks the scene of his death. His death led to the attempt of Edward I. of England to destroy the liberties of Scotland, which resulted in the crushing defeat of the English under Edward II. at Bannockburn.

Alexander I., King of Servia, born Aug. 14, 1876; son of King Milan I. In 1889 Milan abdicated and proclaimed Alexander king, under a regency till he should attain his majority (18 years). On April 13, 1893, when in his 17th year, Alexander sud-

denly took the royal authority into his own hands, and summarily dismissed the regent. On Aug. 5, 1900, he married Mme. Draga Maschin. He was the fifth of his dynasty, which was founded by Milos Todorovic Obrenovic in 1829. On the night of June 10, 1903, the military at Belgrade revolted, soldiers surrounded the palace, and the leaders broke into the royal apartments and murdered King Alexander and Queen Draga, and also two brothers of the Queen and members of the Cabinet. This extinguished the Obrenovitch dynasty, except as represented by a natural son of former King Milan, whom the latter had acknowledged and made legitimate.

Alexander, Archibald, an American clergyman, of Scottish de-scent, was born in Virginia, April 17, 1772, and died at Princeton, N. J., Oct. 22, 1851. He studied theology, and performed itinerant missionary work in various parts of Virginia; became president of Hampton-Sidney College in 1736, and pastor of a Presbyterian church in Philadelphia in 1807. On the establishment of Princeton Theological Seminary in 1812, he was appointed its first professor, a position which he held till his death. His eldest son, JAMES WADDELL ALEX-ANDER (1804-1850), was a Presbyte-rian minister in Virginia, New Jer-sey, and at New York; and afterward professor in Princeton Theological Seminary. He contributed to the "Princeton Review," wrote more than 30 children's books, a life of his father, and miscellaneous works. Joseph Addison Alexander, third son (1809-1860), graduated at Princeton in 1826, lectured there on Biblical Criticism and Ecclesiastical History, and for the last eight years of his life filled the chair of Biblical and Ecclesiastical History. He was engaged at the time of his death, along with Dr. Hodge, on a commentary of the New Testament. He is best known by his commentaries and "Prophecies of Isaiah" (1846-1847; revised edition, 1864), and the "Psalms Translated and Explained" (3 volumes, 1850), both of which have had a large circulation, and have been reprinted in England.

Alexander Archipelago, or Alexander Islands, a group of islands on the W. coast of North America,

extending from 54° 40′ N. to 58° 25′ N.; belong to Alaska Territory.

Alexander Jarostowitz Nevski, St., Grand Duke of Vladimir and Prince of Novgorod, born in 1219; a Russian national hero and patron saint of St. Petersburg, where Peter the Great founded in his honor the magnificent monastery and the religious order that bear his name. He died in 1263.

Alexander, John White, American portrait painter, born in Pittsburg, Pa., Oct. 7, 1856; studied at Munich, Paris, and in Italy; became a societaire of the Beaux Arts in Paris; was appointed one of the American jurors on paintings for the Paris Exposition in 1900. Died June 1, 1915.

Alexander of Hales, a noted English philosopher and theologian, born at Hales, Gloucestershire. He died in Paris, 1245.

Alexander Severus, (in full, MARCUS AURELIUS ALEXANDER SEVERUS), a Roman emperor; born in Ace (the modern Acre), Phœnicia, in A. D. 205. Alexander was favorable to Christianity, following the predilections of his mother, Julia Mammæa, and he is said to have placed the statue of Jesus Christ in his private temple, in company with those of Orpheus and Apollonius of Tyana. He was murdered A. D. 235.

Alexander the Great, the 3d King of Macedon bearing the name which he made so famous; born in Pella, 356 B. C.

Alexander first appeared on the stage of universal history in 339 B. C. At the age of 16 the regency of Greece was intrusted to him by Philip when he set out on an expedition against Byzantium; and in that capacity it fell to his lot to lead his first army against an Illyrian rising, to found his first Alexandria in the upper valley of the Strymon, and to receive a deputation of envoys from the King of Persia. In the year after his appoint-ment to the regency Alexander showed eminent military capacity at the battle of Chæronea (338), and, on the murder of Philip, ascended the throne in 336, before he had reached his 20th year.

In the autumn of 336 Alexander marched into Greece, and was con-

firmed in the chief command against Persia by the Amphictyones at Thermopylæ. In 335 he advanced to the Hæmus range (the Balkans), and showed great ability in his campaign against the Thracians, crossing the Danube—apparently out of mere bravado—in the face of the enemy without losing a single man. He had no real friends among the Greek States. The Thebans, hearing a false report of his death, became overt enemies,, proclaimed their independence, and slew some Macedonian officers. Alexander appeared in Bæotia with amazing dispatch, and took Thebes by storm on the third day of the siege.

Leaving Antipater to govern in Europe, he crossed over into Asia in the spring of 334 with 30,000 foot and 5,000 horse. The Persian empire, the conquest of which he undertook, was at least 50 times as large as his own and numbered about 20 times as many inhabitants. It extended from the Hellespont to the Punjab, from Lake Aral to the cataracts of the Nile. But it was a vast congeries of subject provinces having no internal bond, and no principle of cohesion but the will of the king. Alexander entirely subdued Persia, and formed the idea of conquering India. He passed the Indus in 327, and made an alliance with Taxiles, under whose guidance he reached the Hydaspes (modern Jhelum). Here, after a severe struggle, and unsatisfactory victory, he built a fleet, in which he sent part of his army down the river, while the rest proceeded along the banks.

In 323 Alexander arrived at Babylon, where he found numberless envoys from nations near and far, come to pay their homage to the young conqueror. He was engaged in very extensive plans for the future, including the conquest of Arabia and the reorganization of the army, when he fell ill of a fever. He died in 323, after a reign of 12 years and eight months. The day before a rumor had gone abroad that the great general was dead, and that his friends were concealing the truth. The dying king caused his army to defile past his bed, and feebly waved them a last farewell.

Alexandria, a city of Egypt, is most likely, with the greater part founded by Alexander the Great in of its literary treasures, in 391 A. D. 331 B. C. The situation of the city, It was at this time that the destruction.

at the point of junction between the East and West, rendered it the center of the commerce of the world, and raised it to the highest degree of prosperity. In the Middle Ages it suffered reverses, and gradually declined, and when, in 1517, the Turks took the place, the remains of its former splendor wholly vanished, walls and buildings being reduced to ruins. It is now again one of the most important commercial places on the Mediterranean. Recent improvements, to cost \$10,000,000, are expected to make the western harbor one of the best on the Mediterranean.

Of the few remaining objects of antiquity the most prominent is Pompey's Pillar, as it is erroneously called. Of the so-called Cleopatra's Needles—two obelisks of the 16th century B. c., which long stood there—one was taken to England and erected on the Thames Embankment in 1878; and the other was set up in Central Park, New York. Pop. 444,617.

Alexandria, independent city and port of entry of Virginia; on the Potomac river and the Baltimore & Ohio and other railroads; 6 miles S. of Washington; has a good harbor, large shipments of grains, and considerable manufacturing interests; is the seat of the Virginia Theological Seminary (P. E.) and was the headquarters of General Braddock in 1775 Pop. (1930) 24 149

1775. Pop. (1930) 24,149.

Alexandrian Codex, an important manuscript of the sacred Scriptures in Greek, now in the British Museum. It is written on parchment, in finely formed uncial letters, and is without accents, marks of aspiration, or spaces between the words. Its probable date is the middle of the 5th century.

Alexandrian Library, a remarkable collection of books, the largest of the ancient world, was founded by the first Ptolemy. Theodosius the Great permitted all the heathen temples in the Roman empire to be destroyed, the magnificent temple of Jupiter Serapis, containing the library, was not spared. A mob of fanatic Christians, led on by the Archbishop Theophilus, stormed and destroyed the temple, together, it is most likely, with the greater part of its literary treasures, in 391 A. D. It was at this time that the destrue

tion of the Library was begun, and not at the taking of Alexandria by the Arabs, under the Caliph Omar, in 641, when its destruction was merely completed.

Alexius Comnenus, Byzantine Emperor, was born in 1048, and died in 1118. He was a nephew of Isaac the first emperor of the Comneni, and attained the throne in 1081, at a time when the empire was menaced from various sides, especially by the Turks, the Normans and the Crusaders. From these dangers he extricated himself by policy or warlike measures, and maintained his position during a reign of thirty-seven years.

Alfalfa, a prolific forage plant belonging to the Legume family, large-ly grown in the United States, and in parts of Spanish America. Crops are gathered three or four times a season.

Alfieri, Vittorio, Count, an Italian dramatist, born in 1749; died 1803. His style founded a new school in Italian drama.

Alfonso X., surnamed "the Astronomer," "the Philosopher," or "the Wise" (El Sabio), King of Leon and Castile, born in 1226; succeeded his father, Ferdinand III., in 1250 Alfonso was the founder of a Castilian national literature. He died in 1284.

Alfonso XII., King of Spain, the only son of Queen Isabella II. and her cousin, King Francis of Assisi, was born Nov. 28, 1857. He left Spain with his mother when she was driven from the throne by the revolution of 1868. His mother had given up her claims to the throne in 1870 in his favor, and in 1874 Alfonso came forward himself as claimant, and in the end of the year was proclaimed by Gen. Martinez Campos as king. Al-fonso was successful in bringing the Carlist struggle to an end (1876), and henceforth he reigned with little disturbance until his death in 1885. He married first his cousin Maria de las Mercedes, daughter of the Duke de Montpensier; second, Maria Christina, Archduchess of Austria.

Alfonso XIII., King of Spain, son of the late Alphonso XII. and Maria Christina, daughter of the late Karl Ferdinand, Arch-Duke of Austria, born after his father's death. May 17, 1886.

as a male, becoming heir to the throne. During his minority his mother was made Queen Regent and directed his education with great care. He formally ascended the throne May 17, 1902. On May 31, 1906, he married the British Princess Victoria Ena of Battenberg. In the early part of the World War he declared a policy of strict neutrality. Later a number of Spanish vessels were torpedoed and sunk by Teuton submarines. On Apr. 14, 1931, King Alfonso yielded his throne in favor of a Republican form of government. The monarchy which had stood for 1500 years with but one intermission came to an end and the new government installed itself at Madrid.

Alfred the Great, King of England, and one of the most illustrious rulers on record; born in Wantage, in Berkshire, 849 A. D. He defeated the Danes, who were allotted that portion of the E. of England which is now occupied by the modern counties of Norfolk, Suffolk, Cambridge, and Lincoln. Alfred occupied himself with great zeal in literary pursuits and in the advancement of learning. This illustrious prince died, Oct. 28, 901, in the 30th year of his reign.

Algæ, the general name for the sea-weeds and similar plants, mostly growing in salt and fresh water.

Algebra, that department of mathematics which enables one, by the aid of certain symbols, to generalize, and, therefore, to abbreviate, the methods of solving questions relating to numbers. It is now regarded as the most extensive department of mathematics.

Alger, Cyrus, an American inventor, born in West Bridgewater, Mass., Nov. 11, 1781. He learned the iron foundry business, and in 1809 es-tablished himself in South Boston, where he soon made himself widely known by the excellence of the ordnance he manufactured. He supplied the United States Government with a large quantity of cannon-balls during the war of 1812; produced the first gun ever rifled in America, as well as the first perfect bronze cannon; and supervised the casting of a mortar which was the largest gun of cast-iron that had then been made in the United States. Subsequently he made improvements in the construction of time

fuses for bomb-shells and grenades; patented a method of making cast-iron chilled rolls; and was the original designer of the cylinder stove. He died in Boston, Mass., Feb. 4, 1856.

Alger, Horatio, an American writer of juvenile books, born at Revere, Mass., Jan. 13, 1834. He died in Natick, Mass., July 18, 1899.

Alger, Russell Alexander, an American merchant, capitalist, and politician, born in Lafayette, O., Feb. 27, 1836. He served in the Civil War. rising from a captaincy to the rank of brevet Major-General of Volunteers. He acquired a large fortune in Western enterprises, particularly the lumber business. He was Governor of Michigan from 1885 to 1887; a candidate for the Republican presidential nomination in 1888; Commander-in-Chief of the Grand Army of the Republic 1889-90; U.S. Secretary of War 1897-99; published "The Spanish-American War," 1901; became U.S. Senator for Michigan 1902: re-elected 1903; died suddenly Jan. 24, 1907.

Alger, William Rounseville, an American Unitarian clergyman and writer, born at Freetown, Mass., Dec. 30, 1822. His chief works are "His-30, 1822. His chief works are "History of the Doctrine of a Future Life" (1863); "Genius of Solitude" (1865): and "Friendships of Women" (1867). He occupied pulpits in New York, Denver, Boston, and San Francisco. He died Feb. 7, 1905.

of Africa; bounded on the N. by the territory is under military rule. IrriMediterranean, on the E. by Tunis, on the W. by Morocco, and on the S. by French have built ports and roads. the desert of Sahara. The country In 1928 there were 2,716 miles of now Algeria was for many years the railway. Area of Algeria proper, 222, seat of a piratical despotism, tributary to the Sultan of Turkey, but virtually independent. After the Americans had gained independence the Algerians were encouraged by the Reitish to prev on American com-British to prey on American commerce, so that the United States might be prevented from rivalling Great Britain in the Mediterranean. In November, 1795, the United States either side for revenge or gain. After made a humiliating treaty agreeing to pay to the Dey of Algiers a tribute equal to \$22,000 yearly for "protections of the side of the British, the United States Government resolved to send

tion" to American commerce. the War of 1812 broke out the Dey of Algiers ignored the treaty, and at-tacked and plundered American vessels. Promptly upon the conclusion of peace with England the American government proceeded to take vengeance on the Algerians, and a powerful squadron under Captains Decatur and Bainbridge was sent to the Mediterranean. The Algerians had a strong navy, and met the Amerhad a strong navy, and met the Americans with a superior force in vessels and guns. The Mashouda, the Algerian flagship, was captured after a sanguinary struggle. The Dey in terror acceded to all American demands, agreed to forego tribute, and gave up the American captives, who kissed the American flag and wept for joy. In the following year, 1816, the British bombarded Algiers, and forced the Dey to agree to put a ston forced the Dey to agree to put a stop to piracy—an agreement that was not kept. In 1827 the French began the work of conquering Algiers, and after a struggle of about thirty years they completely subdued the country, and made it a peaceful and flourishing colony of France. Algeria is governed by a governor-general, who is assisted by a council appointed by the French government. The settled portion of the country, in the three departments of Algiers, Constantine, and Oran, is treated much as if it were a part of France and each department sends two deputies and one senator to the French chambers. The rest of the Algeria, a French colony in the N. the French chambers. The rest of the of Africa; bounded on the N. by the territory is under military rule. Irri-

Algonkian, or Algonquin, an Indian linguistic stock, originally the most extensive in North America. The constant wars with the English, American merchantmen were captured by the Algerian pirates, and their numbers. They degenerated the crews were ransomed or enslaved.

THE GORGE OF CONSTANTINE—ALGERIA

U. S. NAVY FLYING BOAT, NC-4

The NC-4 was the first aeroplane to cross the Atlantic. The crew from left to right are Lieut. Commander A. C. Read; Lieut. E. F. Stone, pilot; Lieut. W. Hinton, pilot; Ensign C. Rodd, radio operator; E. H. Howard, engineer; Lieut. J. L. Breese, Jr., reserve pilot engineer.

Copyright U. & U.

them as far W. as possible. After 1840, few of them remained E. of the Mississippi. In Canada, they were not removed from their homes, but were limited as to territory. War and disease have thinned their number, until only 37,000 remain in the United States, and 63,000 in Canada. The chief occupations of the Algonkians were hunting, fishing and corn raising. In character they were brave, strong, and intelligent, but lacking in steadfastness. They were not so united as the Iroquois, owing to the multiplicity of their languages.

Alhambra, the famous palace of the Moorish kings of Granada, situated on a hill N. of the town of Granada. In spite of its neglected condition, the Alhambra is the most remarkable and most perfect specimen of Moorish art to be found in Europe.

Alien and Sedition Acts, a series of enactments during the administration of John Adams, the purpose of which was to restrain the activity of those who sympathized with France. The extreme partisan spirit of these acts caused a reaction, which was expressed in the Kentucky and Virginia resolutions.

Alimentary Canal, the alimentary tube; the great tube or duct by which food is conveyed into the stomach, and from which the waste and undigested food is excreted.

Alison, Sir Archibald, a Scottish historian and writer, born at Kenley, Shropshire, Dec. 29 1792. His mangum opus—"The history of Europe from 1789 to 1815" was first issued in 10 volumes in 1833-1842. He subsequently brought down the narrative to 1852, the date of the birth of the second French empire. Died 1867.

Alizarine, a substance contained in the madder root, and largely used in dyeing reds of various shades. Formerly madder root was largely employed as a dye-stuff, but the use of the root has been almost superseded by the employment of alizarine, prepared artificially from one of the constituents of coal-tar. It forms yellowish-red prismatic crystals, nearly insoluble in cold, but dissolved to a small extent by boiling water, and readily soluble in alcohol and ether. It possesses exceedingly strong tinctorial powers.

Alkali, a strong base, capable of neutralizing acids, so that the salts formed are either completely neutral, or, if the acid is weak, give alkaline reactions. It was formerly restricted to the hydrates of potassium, sodium, lithium and ammonium, but now includes the hydrates of alkaline earths (baryta, strontia and lime) and many organic substances. Alkalies are more or less soluble in water. Caustic potash is used in surgery as a cautery.

Alkaloid, a term applied to a class of nitrogenized compounds having certain alkaline properties, found in living plants, and containing their active principles, usually in combination with organic acids. Their alkaline qualities depend upon the nitrogen they contain. Their names generally end in ine, as morphine, quinine, acontine, caffeine, &c. Most alkaloids occur in plants, but some are formed by decomposition. The only property common to all alkaloids is that of combining with acids to form salts, and some exhibit an alkaline reaction with colors. Alkaloids form what is termed the organic bases of plants. Although formed originally within the plant, it has been found possible to prepare several of these alkaloids by purely artificial means.

Allah, compounded of the article al and ilah—i. e., "the god," a word cognate with the Hebrew Eloah), the Arabic name of the supreme god among the heathen Arabs, adopted by Mohammed for the one true God. See MOHAMMED and MOHAMMEDANISM.

Alleghanies, a word used as synonymous with the APPALACHIAN MOUNTAINS (q. v.), sometimes applied only to that portion of the system which extends from Pennsylvania to North Carolina, and which forms the watershed between the Atlantic and the Mississippi.

Allegheny, a former city in Allegheny co., Pa.; at the confluence of the Allegheny and Monongahela rivers, which here form the Ohio; and on several railroads; opposite the city of Pittsburg, the county-seat.

Allegheny was laid out as a town in 1788; created a borough in 1828, and consolidated with Pittsburg in 1907. Pop. (1890) 105,287; (1900) 129,806 See PITTSBURG.

Allegheny River, a river of Pennsylvania and New York; a headstream of the Ohio. Its length is about 400 miles, and it is navigable for about 150 miles above Pittsburg.

Allen, Charles Grant Blairfindie, generally known as Grant Allen, an English author, born 1848, died 1899. His best known and most popular works are on scientific subjects, although he also wrote many novels.

Allen, Charles Herbert, an American diplomatist, born in Lowell, Mass., April 15, 1848; was graduated at Amherst College in 1869; became associated with his father in the lumber business in Lowell; served in both branches of the State Legislature, and in Congress in 1885–1889; was defeated as the Republican candidate for governor of Massachusetts in 1891; and succeeded Theodore Roosevelt as Assistant Secretary of the Navy, in May, 1898. On the passage by Congress of the Porto Rico Tariff and Civil Government bill, in April, 1900, the President appointed him the first civil governor of Porto Rico, an office which he resigned in July, 1901.

Allen, Edward P., an American Roman Catholic clergyman, born in Lowell, Mass., March 17, 1853; now fifth Bishop of Mobile, Ala. D. 1926.

Allen, Elizabeth Akers, an American poet, born (ELIZABETH CHASE) at Strong, Me., Oct. 9, 1832. She was married in 1860 to Paul Akers, the sculptor, who died in 1861, and in 1865 to E. M. Allen, of New York. Died Aug. 7, 1911.

Allen, Ethan, an American Revolutionary hero, born at Litchfield, Conn., Jan. 10, 1737. His services in the War of Independence, as Colonel of the "Green Mountain Boys," capturing Fort Ticonderoga "in the name of the Great Jehovah and the Continental Congress," his attack on Montreal, sufferings as a prisoner in England, skillful diplomacy in behalf of Vermont, etc., are well known. He died near Burlington, Vt., Feb. 12, 1789.

Allen, James Lane, an American novelist, born near Lexington, Ky., in 1850. His fame rests mainly upon his powerful and popular novels of manners and people in the "blue grass' region. Died Feb. 18, 1925.

Allen, Joel Asaph, an American mammalogist, born in Springfield, Mass., July 19, 1838. He went with Agassiz on his expedition to Brazil in 1865; became assistant in ornithology at the Cambridge Museum of Comparative Zoology in 1870, and was appointed curator of the department of vertebrate zoology in the American Museum of Natural History, New York, in 1885.

Allen, Joseph Henry, an American Unitarian minister, educator, historian, and essayist, born at Northboro, Mass., Aug. 21, 1821. He was senior editor of the "History of Unitarianism." He died in 1898.

Allen, Thomas, an American landscape and animal painter, born at St. Louis, Mo., Oct. 19, 1849. After an education in St. Louis, he graduated from the Royal Academy at Düsseldorf, Germany. He studied in France; exhibited his first picture at the Academy of Design in New York, and at the salons at Paris; became vice-president of the Boston Art Students' Association; member of the committee of the School of Drawing and Painting of the Boston Museum of Fine Arts.

Allen, William, an American preacher and miscellaneous writer, born at Pittsfield, Mass., Jan. 2, 1784; died at Northampton, Mass., July 16, 1868.

Allenby, Edmund Henry Hynman, Viscount, (1861) an English soldier, Commander-in-chief of the Egyptian Expeditionary Force. He was High Commissioner of Egypt, also first Governor of Palestine, became field marshal in 1919, raised to peerage as Viscount and given grant of \$250,000.

Allentown, city and capital of Lehigh county, Pa.; on the Lehigh river and canal and several railroads; 60 miles N. W. of Philadelphia. It has large manufacturing interests, including iron, silk, hardware, furniture, shoes, wire, hosiery, and thread; is the seat of Muhlenberg College (Luth.) and Allentown College for Women (Ref.); and has a property valuation exceeding \$35,000,000. Pop. (1930) 92,563.

All-Hallows' Eve, the 31st of October, the evening before All-Hallows (commonly known as Hallow E'en).

Alliance, a city in Stark county, O., on the Mahoning river and the Pennsylvania Co.'s railroad; 57 miles S. E. of Cleveland; has large rolling mills, steel-casting and boiler works, and manufactories of gun-carriages, steam hammers, and electric cranes; seat of Mt. Union College (M. E.). Pop. (1930) 23,047.

Allibone, Samuel Austin, an American bibliographer, born at Philadelphia, April 17, 1816. He was at one time librarian of the Lenox Library, New York. He died at Lucerne, Switzerland, Sept. 2, 1889.

Allison, William Boyd, an American legislator, born in Perry, O., March 2, 1829; was brought up on a farm; and subsequently educated at Allegheny College, Pa., and Western Reserve College, O. He practiced law in his native State till 1857, when he removed to Dubuque, Ia. In the early part of the Civil War he served on the governor's staff, and was actively engaged in raising troops for the Union army. In 1863-1871 he was a representative in Congress; and on March 4, 1873, entered the United States Senate as a Republican, to which he was re-elected in 1878, 1884, 1890, and 1896. He was a delegate to the Republican National Convention in Chicago, in 1860; and several times has been a conspicuous candidate for the presidential nomination of his party. He died Aug. 8, 1908.

Allopathy, a system of medicine the object of which is to produce in the bodily frame another condition of things than that in or from which the disease has originated. Allopathy is opposed to homeopathy, which aims at curing diseases by producing in antagonism to them symptoms similar to those which they produce. Up-to-date doctors practise what they believe to be good in both systems, and the distinction is now largely nominal.

Alloy, a compound or mixture of two or more metals.

All-Saints' Bay, in the State of Bahia, on the coast of Brazil, forms a superb natural harbor, in which the navies of the whole world might ride at anchor. Its length from N. to S. is 37 miles; its breadth from E. to W., 27. The town of Bahia lies just within it.

All-Saints' Day, a festival instituted by Pope Boniface IV., early in the 7th century, on the occasion of his transforming the Roman heathen Pantheon into a Christian temple or church, and consecrating it to the Virgin Mary and all the martyrs.

Allspice, a kind of pepper, consisting of the dried berries of pimenta officinalis, a tree belonging to the order myrtaceæ (myrtle blooms). It is imported almost entirely from Jamaica, and is hence called Jamaica

Allston, Washington, an eminent American painter, poet, and romancer, born at Waccamaw, S. C., Nov. 5, 1779; graduated at Harvard in 1800; studied at the Royal Academy, London, and in Rome, and returned to Boston in 1809. He died in Cambridge, Mass., July 9, 1843.

Alma, a river in the Crimea, Russia, flowing westward into the Bay of Kalamita, about half way between Eupatoria and Sebastopol. On the steep banks of the stream, through the channel of which the British troops waded amid a shower of bullets, a brilliant victory was won on Sept. 20, 1854, by the allied armies of England and France, under Lord Raglan and Marshal St. Arnaud, over the Russian army commanded by Prince Menschikoff. It was the first battle of the Crimean War.

Almaden, a town in Spain, 50 miles S. W. of Ciudad Real, situated in the chain of the Sierra Morena. It is famous for its 12 rich quicksilver mines, employing about 4,000 miners, and yielding an annual output of 2,500,000 pounds.

Almagro, Diego d', a Spanish conquistador, was born in 1464 or 1475, and was a foundling who derived his name from the town near which he was found. After serving in the army, he sailed to seek his fortune in the New World, where he amassed considerable wealth by plunder, and became one of the leading members of the young colony of Darien. In 1522 he formed, with Pizarro, the design of conquering Peru—an undertaking crowned 10 years afterward with marvellous success. Receiving permission from the Spanish court to conquer for himself a special prov-

ince S. of Pizarro's territory, he marched on Chile in 1536, penetrated as far as the Coquimbo, and returned in 1537, just when the Peruvians had flown to arms and shut up the Spaniards in Cuzco and Lima. As these towns lay S. of Pizarro's district, they were claimed by Almagro. He dispersed the Peruvian army before Cuzco. and advanced against Lima, hoping to make himself sole master of the country. But on April 6, 1538, he was defeated in a desperate engagement with the Spaniards under Pizarro near Cuzco; and on the 26th he was strangled in prison, and his corpse beheaded in the market place of Cuzco. His half-caste son, Diego, collecting some hundreds of his father's followers, stormed Pizarro's palace, and slew him (1541); then proclaimed himself captain-general of Peru; but, defeated in the bloody battle of Chu-pas, Sept. 16, 1542, he was executed along with 40 of his companions.

Almanac, an annual compilation, based on the calendar, embracing indays of the year, the seasons, etc., with astronomical calculations and miscellaneous intelligence more or less detailed, according to the special purpose for which it is prepared.

Alma-Tadema, Sir Laurence, distinguished figure painter, born in Friesland, Jan. 8, 1836; educated principally at the Antwerp Academy; elected to the Royal Academy, London, in 1879; officer of the Legion of Honor, 1878; and member of the leading academies of Europe; studio in London. He died June 24, 1912. His daughter, Miss Laurence Alma-Tadema is an author.

Almohades, the name of a Moslem dynasty that ruled in Africa and Spain during the 12th and 13th centuries.

Almond, the fruit of the almond tree, which grows usually to the height of 12 or 14 feet. Its pink flowers, composed of five petals, grow in pairs, and appear very early in spring. The almonds which are consumed in the United States are imported from France, Spain, Italy and the Levant.

son of the priest Morelos, born in and modern, are known, of which

1804. As a boy he took part in the war for independence. He took part in the battles of Buena Vista and Cerro Gordo in 1847. In 1861, when Juarez attained power, he deposed Almonte, who, led by party hatred and ambition, invited the French expedition to Mexico. In the beginning of 1862 he joined the French troops of occupation at Vera Cruz; but, as the Mexicans saw in him only a tool of the French plans, they renounced the idea of making him French dictator, supported by French bayonets. The French general, himself, deprived him of pow-er, but when, on the 10th of June, 1863, he reached the City of Mexico with the French, he was placed by the conquerors at the head of the Regency of the Mexican Empire. The Emperor Maximilian appointed him field-marshal, but, after Maximilian's death, he fled to Europe, and died in Paris, March 22, 1869.

Almquist, Karl Jonas Ludvig, a notable Swedish poet, novelist and miscellaneous writer, born in Stockholm, Nov. 28, 1793. He died in Bremen, Sept. 26, 1866. He died in Bre-

Aloe, any species of the genus described under botany (below), or even of one, such as agave, with a close analogy to it. The American aloe is the agave americana, an amaryllid. The aloe of Scripture is probably the agallochum.

Alopecia, a variety of baldness in which the hair falls off from the beard and eyebrows, as well as the scalp.

Alpaca, the name given to a species of llama, which has for a long time back been domesticated in Peru.

Alpha and Omega, the first and last letters of the Greek alphabet, sometimes used to signify the beginning and the end, or the first and the last of anything; also as a symbol of the Divine Being. They were also formerly the symbol of Christianity, and engraved accordingly on the tombs of the ancient Christians.

Alphabet, so called from alpha and beta, the first two Greek letters, is the name given to a set of graphic signs, called letters, denoting element-France, Spain, Italy and the Levant. ary sounds, by the combination of Almonte, Juan Nepomuceno, a which words can be visibly repre-Mexican general, believed to be the sented. Nearly 200 alphabets, ancient about 50 are now in use. Most of them are developments from the prim-

ALPHABETS.

itive Phœnician alphabet, which was itself ultimately derived from the Egyptian hieroglyphic picture-writing.

Alpine Plants, the name given to those plants whose habitat is in the neighborhood of the snow, on mountains partly covered with it all the year round. As the height of the snow-line varies according to the latitude and local conditions, so also does the height at which these plants grow.

Alps, the highest and most extensive system of mountains in Europe, included between lat. 44° and 48° N., and long. 5° and 18° E., covering the greater part of Northern Italy, several departments of France, nearly the whole of Switzer, and, and a large part of Austria, while its extensive ramif-

cations connect it with nearly all the mountain systems of Europe. The culminating peak is Mont Blanc, 15,-781 feet high, though the true center is the St. Gothard, or the mountain mass where it belongs, from the slopes of which flow, either directly or by affluents, the great rivers of Central Europe, the Danube, Rhine, Rhone, and Po.

Alsace-Lorraine now Haut-Rhin. Formerly imperial territory of German Empire. Since Treaty of Versailles (1919) a province of France. Area, 5,604 square miles, population, (1921) 1,709,749. Cereals, flax, hemp, fruit, wine, sugar-beet are principal crops. Forest covers about a third of grea

wine, sugar-beet are principal crops.
Forest covers about a third of area.
On May 9, 1902, Emperor William
directed that a bill be laid before
the Federal Council abolishing paraune receral Council abolishing paragraph 10 in the imperial constitution, which imposed practically a dictatorship on the reichsland of Alsace-Lorraine. This imperial action was wholly unexpected, and excited the marked gratitude of the people The bill was passed, and affected. resulted in the establishment of a Landtag of two chambers, the upper house consisting of representatives of the churches, universities, and professional classes, and the lower one of 60 members elected by secret ballot.

Alsace-Lorraine was lost to Germany by the Peace of Ryswick in 1697, and France held control till the Peace of Frankfort, after the Franco-Prussian War of 1870, restored the territory to Germany. The French never abandoned the hope and expectation of recovering the territory, and one of their first movements after the opening of the World War resulted in operations (the battle began Aug. 19. 1914) by which a portion of the territory was occupied. In all the early rumors of mutual peace terms, the French insisted that this territory should be wholly restored, while the Germans declared that under no circumstances would they surrender this Reichsland. See APPENDIX: World

Altar, an erection made for the offering of sacrifices for memorial purposes, or for some other object. An altar designed for sacrifice is memtioned in Scripture as early as the

time of Noah (Genesis viii: 20). Abraham, Isaac and Jacob built several altars in places where for a brief or more lengthened period they so-journed. Most of these appear to have been for sacrificial purposes, and one or two seem to have been for memorial ends; but the most unequivocal case of the memorial altar was subsequently. (Josh. xxii: 10-34; Gen. xii: 7, 8; xiii: 4, 18; xxii: 9; xxvi: 25; xxxiii: 20; xxxv: 1, 7.)

Alterative, a kind of medicine

which, when given, appears for a time to have little or no effect, but which ultimately changes, or tends to change, a morbid state into one of health.

Altgeld, John Peter, author, lawyer, and judge, born in Germany, in December, 1847. When but a few months old he was taken to Mansfield, Ohio. He was Judge of the Supreme Court at Chicago, in 1886-1891, and Governor of Illinois in 1893. His pardon of the Anarchists caused much controversy. He died March 12, 1902.

Altitude, in mathematics the perpendicular height of the vertex or apex of a plane figure or solid above In astronomy it is the vertical height of any point or body

roundings; has a costly bridge spanning the Mississippi; contains the Cathedral of Sts. Peter and Paul (R. C.) and several collegiate and charitable institutions; and ships lime,

charitable mstitutions; and ships lime, coal, and stone. Pop. (1930) 30,151.

Altoona, city in Blair county, Pa.; on the Pennsylvania railroad, at the is, base of the Alleghany mountains; 117 miles E. of Pittsburg. It is a mining, manufacturing, lumbering, and farming trade center for Central Pennsylvania; and hesides extensive machine shops. and, besides extensive machine shops of the Pennsylvania railroad, has large car works, rolling and planing mills, and other industrial plants, with annual product valued at over \$15,000,000. Pop. (1930) 82,054.

near Lutzen. Through the Treaty of Altranstädt of Aug. 30, 1707, Charles XII. obtained from the Emperor Johann Joseph I. religious liberty and toleration for the Protestants of Silesia.

Altruism, a term used in psychology and ethics to denote disposition and conduct directed toward the wellbeing of others. It is contrasted with egoism, or self-seeking disposition and conduct.

Alum, the name given to double salts of sulphate of aluminum with sulphates of potassium, sodium, ammonium, or of other monatomic metals, as silver, thallium, cæsium, rubidium. They crystallize in octohedra. Alum has a sweet astringent taste, reddens litmus paper, and dissolves in its own weight of boiling water.

Aluminum, a metal discovered by Wöhler in 1827, as a gray powder, but in 1847 in the form of small, glittering metallic globules. It is a white metal, somewhat resembling silver, but pos-sessing a bluish hue, which reminds one of zinc. It is very malleable and ductile, in tenacity it approaches iron,

and it takes a high polish.

Alton, city in Madison county, Ill.; on the Mississippi river and several trunk line railroads; 3 miles above the mouth of the Missouri, 25 II., was born in 1508, of one of the miles N. of St. Louis, It is built on the Missouri, 25 II., was born in 1508, of one of the mouth of the Missouri, 25 II., was born in 1508, of one of the mouth of the Missouri, 25 II., was born in 1508, of one of the mouth of the Missouri, 25 II., was born in 1508, of one of the mouth of the Missouri, 25 II., was born in 1508, of one of the mouth of the Missouri and Manual Alton, or Alba, Ferdinand Alba, Ferdinand Alton, or Alba, Ferdinand Alba, Fe eral trunk line rairoads; 3 miles armies under Charles V. and Philip above the mouth of the Missouri, 25 II., was born in 1508, of one of the miles N. of St. Louis. It is built on most illustrious families of Spain.

a high bluff, with picturesque sure He entered the army a mere youth, requirings has a costly bridge sure. and fought in the wars of Charles V. in France, Italy, Africa, Hungary, and Germany. He is more specially remembered for his bloody and tyran-nical government of the Netherlands (1567-1573), which had revolted, and which he was commissioned by Philip II. to reduce to entire subjection to Spain. Among his first proceedings was to establish the "Council of Blood," a tribunal which condemned, without discrimination, all whose opinions were suspected, and whose riches were coveted. The present and absent, the living and the dead, were subjected to trial and their property confiscated. Many merchants and mechanics emigrated to England; people Altranstadt, an important village in the Prussian Province of Saxony, taxes were imposed, and trade was

brought completely to a standstill. As a reward for his services to the faith, the Pope presented him with a conse-erated hat and sword, a distinction previously conferred only on princes. Resistance was only quelled for a time, and soon the provinces of Holland and Zealand revolted against his tyranny. A fleet which was fitted out at his command, was annihilated, and he was everywhere met with insuperable courage. Hopeless of finally subduing the country, he asked to be re-called, and, accordingly, in December, 1573, Alva left the country, in which, as he himself boasted, he had executed 18,000 men. He died Jan. 12, 1582.

Alvary, Max, a German tenor, son of the painter, Andreas Achenbach, whose name, however, he never used, born at Düsseldorf, May 1, 1858. He was first a merchant; then an architect in Cologne; studied singing with Lamperti in Milan, and with Stockhausen in Frankfort-on-the-Main; and joined the court opera in Weimar. In 1884 he went to New York, where for five years he distinguished himself as "Tannhäuser,"
"Siegfried," "Tristan," "Loge," "Walter Stolzing," and other Wagnerian characters. In 1890, he returned to Germany and sang at the City Theater in Hamburg. He returned to the United States again in 1896. He died near Grosstabarz, Nov. 7, 1898.

Amadeus, a common name in the house of Savoy. Amadeus I., of Spain, born in 1845, brother of King Victor Emmanuel of Italy, was elected King of Spain in 1870, abdicated in 1873, and died in 1890.

Amalfi, a city and seaport, in the Province of Salerno, Italy; on the Gulf of Salerno; 22 miles S. E. of Naples. It contained a cathedral with bronze doors cast in Constantinople in 1066, and a Capuchin mon-astery, which, in recent years, became a popular hotel. On Dec. 24, 1899, a portion of the rocks and land facing the Gulf suddenly slid into the water, carrying down the ancient monastery building and other structures.

Amalgam, the union or alloy of any metal with quicksilver (mercury). Amana, a communistic German col-

City, founded by the Amanites, who branched out from the so-called "Inspiration Congregation," consisting of seven villages, with over 2,000 inhabitants, which, through agriculture, wool and cotton spinning, have attained great prosperity.

Amanita, a genus of fungi, nearly allied to the mushrooms. Several of

ADULT AMANITA.

the species are edible, notably the delicious orange (A. cæsarea), but the majority are poisonous.

Amarillo, city and capital of Potter county, Tex.; on the Fort Worth & Denver City railroad; 82 miles N. W. of Memphis; is in a stock raising and farming section; and is a shipping point for cattle and horses. Pop. (1930) 43,132.

Amaryllis, a genus of plants, the typical one of the order amaryllidaceæ.

Amati, a family of Cremona, in the 16th and 17th centuries, famous for their violins, which are at the present time valued very highly on account of their tone, which is beautiful and pure, though not very strong. They are sometimes called Cremona violins.

Amaurosis, a disease of the eye, arising from impaired sensibility of the retina.

Amazon, a river of South America, the largest in the world, formed by a great number of sources which rise in ony in Iowa, 28 miles W. of Iowa the Andes; general course N. of E.; length, including windings, between 3,000 and 4,000 miles; area of drainage basin, 2,300,000 square miles.

Amazon, or Amazone (from a = without, and mazos=the breast, from the story that the Amazons cut off their right breast to prevent its interfering with the use of the bow), a nation on the river Thermodon, the modern Termeh in Pontus, in Asia Minor, said to consist entirely of women renowned for their love of manly sports, and as warriors. Men were excluded from their territory, and commerce was held only with strangers, while all male children born among them were killed.

Amber, as a mineral, called also succinite, from Latin succinum=amber. Its color is generally yellow, but sometimes reddish, brownish, or whitish and clouded. It is resinous in luster, always translucent, and sometimes transparent. It is brittle, and yields easily to the knife.

Ambergris, a substance derived from the intestines of the sperm whale, and found floating or on the shore.

Ambos Camarines, a province of Luzon, Philippine Islands, comprising two former provinces, and forming a long peninsula with its main frontage on the Pacific Ocean facing N. E. and E.; area, with dependent islands, 3,161 sq. m.; pop. (1903) 239,405, of whom 5,933 were wild; race, chiefly Vicoles.

Ambrose, St., a celebrated father of the Church; born in 333 or 334 A. B., probably at Treves, where his father was prefect; died in 397. He introduced the Ambrosian chant, and compiled a ritual known by his name.

Ambrosia, in Greek mythology, the food of the gods, as nectar was their drink.

Ambrosian Library, a public liorary in Milan, founded by the Cardinal Archbishop Federigo Borromeo, a relation of St. Charles Borromeo, and opened in 1609; now containing 160,-000 printed books and 8,000 MSS. It was named in honor of St. Ambrose, the patron saint of Milan.

Ambrosius, Johanna, a German poet and story writer, born at Leng-wethen, East Prussia, Aug. 3, 1854. Daughter of an artisan, and married

of Voigt, she led the hard life of a peasant woman till middle age.

Ambulance, a hospital establishment which accompanies an army in its movements in the field for the purpose of providing assistance and surgical treatment to the soldiers wounded in battle. The name is also given to one of the carts or wagons used to transfer the wounded from the spot where they fell to the hospital. Also to the vehicles used in cities to convey the very sick or injured to hospitals.

Shortly after the outbreak of the World War patriotic American citizens fitted up and sent to France a large number of ambulances, organized volunteer units to operate them. and established, as a part of the field service, base and temporary hospitals in close proximity to the firing lines.

Amen, a Hebrew word of asseveration, equivalent to "Yea," "Truly." Amendment, in law, the correction of any mistake discovered in a

writ or process.

In legislative proceedings, a clause, sentence, or paragraph proposed to be substituted for another, or to be in-serted in a bill before Congress, and which, if carried, actually becomes part of the bill itself. As a rule amendments do not overthrow the principle of a bill.

In public meetings, a proposed alteration of the terms of a motion laid before a meeting for acceptance.

A Mensa et Thoro, a legal term used when a wife is divorced from her husband (as far as bed and board are concerned), liability, however, remaining on him for her separate maintenance.

Amenthes, the unseen world of the ancient Egyptians, the Hades of the Greeks, who borrowed their ideas about the lower world from Egypt.

America, or the New World, the largest of the great divisions of the globe except Asia, is washed on the W. by the Pacific, on the E. by the Atlantic, on the N. by the Arctic, and on the S. by the Antarctic Ocean. On the N. W. it approaches at Bering Straits within 48 miles of Asia, and on the N. E. Greenland approaches within 370 miles of the European isin 1874 to a peasant's son by the name land Iceland; but in the S. the disAmerica America

tance between the American mainland and the E. continent is much greater, the shortest distance between its E. coast and the W. coast of Africa being 1,600 miles, and between its W. coast and the E. coasts of Asia and Australia from six to eight times more. The extreme points of America are— The extreme points of America are—N., the point of Boothia Felix, in the Strait of Bellot, lat. 71° 56′ N., lon. 94° 34′ W.; S., Cape Froward, lat. 53° 53′ 45″ S., lon. 71° 18′ 30″ W., or, if the archipelago of Tierra del Fuego is included, Cape Horn, lat. 55° 59′ S., lon. 67° 16′ W.; W., Cape Prince of Wales, lat. 65° 33′ N., lon. 167° 59′ W.; and E., the Point de Guia, lat 7° 26′ S., lon. 34° 47′ W. The entire American continent has a length of about 9,500 miles; a maximum breadth, between Cape Prince of Mules and Cape Charles in North America, of 3,500 miles; a coast-line of 43,200 miles; and a total area, in-cluding the islands, estimated at about

15,896,000 square miles. The climate of America, even in the equatorial regions, is characterized as comparatively cool and humid. This is justly ascribed to the vast extent of territory that may be classed as insular - to the copious waters of the interior, together with the magnificent vegetation produced by them - to the configuration of the surface and the nature of the soil—to the possession of a polar shore—and to the prevailing winds. The rainy zone disproportionately extended in America; and as the continent stretches over all the zones, the vegetation is remarkably diversified, from the lowly moss of the N. to the lord-ly banana of the tropics. The giant ly banana of the tropics. The giant coast chain of the Andes everywhere rises above the snow-line. From the sterile Peruvian coast, burned up by tropical heats, one can look up to summits covered with perpetual snow and ice; and one may climb from the gigantic equatorial vegetation of Quito to heights where only the condor testifies to the existence of organic life, and wings his flight over snow fields and glaciers. In Peru the culture of cereals is carried on at the height of 12,000, and near Quito at 9,000 feet. The N. and S. of America have the same length of day; out

ly on astronomical but on a variety of local causes, the analogy does not hold, and very remarkable discrepancies appear. Thus, for example, the E. coast of Brazil has the rainy season from March to September, while Peru, lying under the very same latitude, has it from November to March. Within the tropics the transition from the rainy to the dry season takes place almost instantaneously; but in receding from the tropics on either side the change of seasons becomes more and more gradual, till at last in the polar zones, nature, bound in icy chains, affords for living existence only a short awakening out of a long winter sleep.

If America, in respect of the development of vegetable life, takes precedence of all other quarters of the globe, it cannot advance the same claim in respect of the animal world, though it must be admitted that here too it has its own peculiar features. The American jaguar and cougar, or puma, have not the majesty of the Asiatic tiger or the African lion; the tapir is only a very humble representative of the elephant or hippopota-mus, and the llama falls far short of the camel. Still, America has many animals which belong only to itself. It has its own species of bears (the grizzly being most formidable), wolf, and deer, the bison and musk ox, with special kinds of squirrels, etc. To it also belong the Virginia stag, the wild sheep of California, the opossum, and raccoon. Characteristic of Central and South America are sloths, ant-eaters, and armadillos, the con-dor among the heights of the Andes, the most beautiful parrots as well as peculiar monkeys in the woods, the humming bird with its rick metallic plumage, the rattlesnake, the alligator or cayman on the banks of the streams, the electrical eel in the tropical waters, swarms of mosquitoes on the wide plains, and sea fowl in such numbers on the W. coast as to have furnished large deposits of guano, to which some of the richest countries of Europe are indebted for the means of extending and largely increasing the product of their agriculture.

The independent States of both North and South America are now in the seasons, which depend not mere- all republican in their form of

government, though it was only in 1889 that Brazil became a republic instead of an empire. The different independent States are as follows: In NORTH AMERICA — 1. The United States; 2. Mexico; 3. Ni-The United States; 2. Mexico; 3. Nicaragua; 4. Honduras; 5. Guatemala; 6. Costa Rica; 7. (San) Salvador. In the West Indies — 8. Cuba; 9. Haiti; 10. San Domingo. In South America — 11. Venezuela; 12. Colombia; 13. Peru; 14. Ecuador; 15. Bolivia; 16. Argentine Republic; 17. Uruguay; 18. Paraguay; 19. Chile; 20. Brazil; 21. Panama. The European colonies in America are: the Dominion of Canada, including the Dominion of Canada, including the provinces of Ontario, Quebec, Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island, and the Northwest Territories, etc.; Newfoundland: and the Bermudes all belonging to Creek Pritain. etc.; Newfoundland: and the Bermudas, all belonging to Great Britain; Greenland, belonging to Denmark; and St. Pierre and Miquelon to France. The West Indian Islands comprise the republics of Haiti, San Domingo, and Cuba; Porto Rico, formerly Spanish, is now a territory of the United States; the British possessions of Jamaica, Trinidad, Barbados, Grenada, St. Vincent, Tobago, St. Lucia, Antigua, Montserrat, St. Christopher, Anguilla, Nevis, Virgin Islands, Dominica, the Bahamas, Turk's Island, etc.; the French possessions of Guadeloupe and dependencies (including St. Bartholomew's), Martinique, the N. part of the island of St. Martin's; the Dutch possessions, the S. side of St. Martin's Curasao and its dependencies; Santa Cruz, St. Thomas and St. John's, known as the Danish West Indies, purchased by the United States for \$25,000,000 in 1917, and renamed the Virgin Islands of the United States. In South America the British possess (besides the Falkland Island) a part of Guiana, the remainder being owned respectively by das, all belonging to Great Britain; Island) a part of Guiana, the re-mainder being owned respectively by

the French and Dutch.

The merit of first unlocking the American continent to modern Europe belongs to the Genoese Christopher Columbus, who, after a voyage of discovery as dangerous as it was fortunate, discovered, in October, 1492, Guanahani, one of the Bahamas, and named it San

Salvador. It is certain, however, that Europeans had in the earlier part of the Middle Ages, and on different occasions, discovered the American coasts. Northmen proceeding from Iceland discovered the N. polar land of Greenland. The Icelander Bjorne Herjulfson in 986, got a glimpse of the coasts of Massachusetts and Rhode Island, which in the year 1000 were visited by Leif the Lucky, and named by him Vinland. In 1388 and 1390 Niccolo and Antonio Zeni undertook voyages to the North Atlantic Ocean, and were wrecked on Frieslanda, probably the Faroe Islands; thereafter they saw a part of the N. E. coast of America, probably Nova Scotia, which they named Drogno. These discoveries, however, had no influence on the enterprise of Columbus, and cannot detract in the least from his merit; they were forgotten, and had never been made known to the inhabitants of the S. of Europe. Though Columbus was the first of his time who set foot on the New World, it has taken its name not from him, but from Amerigo Vespucci. The mainland was first seen in 1497 by Sebastian Cabot, who sailed under the patronage of Henry VII. of England.

American Federation of Labor, a general representative organization of the labor unions and societies of the United States; founded at Columbus, O., in December, 1886, as the successor of a somewhat similar association which dated back to 1866. Its principal objects are to promote the interests and influences of trades unions, to aid in creating new unions, and to advance the general cause of organized labor. It does not undertake, however, to exercise any absolute authority over affiliated societies, as is done by the Knights of Labor. It has been especially active in agitating for "eight-hour" legislation. In 1928, the Federation comprised 107 national and international unions, 4 departments, 49 state branches, 792 city central unions, 29,128 local unions; membership, 2,896,063.

American Indians. See Indians, American.

as it was fortunate, discovered, in October, 1492, Guanahani, one of the Bahamas, and named it San Americanisms, a word defined as a term, phrase, or idiom of the English language as spoken in America

(or in the United States) which either (a) originated in America; or, (c) is peculiar to America; or, The fol-(a) originated in America; or, (b) chiefly employed in America. The fol-lowing is a list of a few of the more noteworthy Americanisms:

Around or round .- About or near. To hang around is to loiter about.

Backwoods.—The partially cleared forest regions in the western states.

Bayou.—In Louisiana, a term given to a small stream. The same as "creek.

Bee.—An assemblage of persons to unite their labors for the benefit of an individual or family or to carry out a joint scheme.

Bogus.— False; counterfeit.
Boss.— An employer or superinten-

dent of laborers; a leader.

Bulldoze, to .- To intimidate.

Bunco.- A game played with special cards, or with three dice. An expression of disbelief.

Buncombe or Bunkum .- A speech made solely to please a constituency; talking for talking's sake, and in an inflated style.

Calculate.-To suppose, to believe,

to think.

Camp-meeting.-A meeting held in the fields or woods for religious purposes, and where the assemblage encamp and remain for several days.

Car .- A coach of a railway train.

An automobile.

Carpet-bagger .- A needy political adventurer who carries all his earthly goods in a carpet-bag; originally applied to politicians from the Northern States who sought offices in the South after the Civil War.

Caucus. - A private meeting of the leading politicians of a party to agree upon the plans to be pursued in an approaching election.

Chunk .- A short, thick piece of

wood or any other material.

Corn.— Maize. In England, wheat

or grain in general.

Corn-husking or Corn-shucking .-An occasion on which a farmer invites his neighbors to assist him in stripping the husks from his corn.

Creek.—A small tributary of a large ver. Used chiefly in the West. Dead-heads.—People who have free river.

admission to entertainments, or who have the use of public conveyances, or the like, free of charge.

Down East.— In or into the New

England States. A down-easter is a New Englander.

Drummer .- A commercial traveler. Dry goods.—A general term for such articles as are sold by linendrapers, haberdashers, hosiers, etc., in England.

Fix, to.—To put in order, to prepare, to adjust. To fix the hair, the table, the fire, is to dress the hair, lay the table, make up the fire.

Fixings .- Arrangements, dress, embellishments, luggage, furniture, garnishments of any kind.

Fork.—Used in the Southwest in a similar sense to "creek."

Freeze out.— To get rid of objec-

tionable persons.

Gerrymander .- To arrange political divisions so that in an election one party may obtain an advantage over its opponent, even though the latter

may possess a majority of votes. Grab .- To gain a privilege without proper payment.

Greenback .- A former kind of pa-

per money. Guess, to .- To believe, to suppose,

to think. Gulch .- A deep, abrupt ravine, caused by the action of water.

Happen in, to .- To happen to come in or call.

Hatchet, to bury or take up the.—
To end or begin war.
Help.—The labor of hired persons collectively; the body of servants belonging to a farm or household or factory.

Hoe-cake.— A cake of corn meal baked on or before the fire.

Hoodlum. - A rough.

How!-Indian abbreviation of "How do you do?"

Jolly, to.— To flatter, to tease, to

poke fun at.

Johnny cake. - A cake made of corn meal mixed with milk or water.

Log-rolling.— The assembly of several parties of wood-cutters to help one of them in rolling their logs to the river after they are felled and trimmed; also employed in politics to signify a like system of mutual cooperation.

Lynch law. - An irregular species of justice executed by the people or a mob, without legal authority or trial.

Mail letters, to.— To post letters. Make tracks, to.— To run away.

Mush .- A kind of hasty-pudding. In the Arctic, to travel a difficult trail. Nickel.—A five-cent coin.

Notions.—A term applied to every

variety of small wares.

One-horse.-A one-horse thing is a thing of no value or importance; a mean or trifling thing.

Oxbow.—The bend in a river or

the land inclosed within such a bend. Peart (in the South).—Equal to

smart or well.

Piazza.—A veranda. Picayune.-A trifle.

Pickaninny .- A negro child.

Pile.—A quantity of money.
Planks.—In politics, the several principles which appertain to a party; platform" is the collection of such principles.

Pull.—A special individual favor. Reckon, to.—To suppose, to think.
Right smart.—Very well.

Roast, to .- To criticise severely. Scab .- A non-union workman.

Scalawag.-A scamp, a scapegrace. Shake.—To leave a person.
Skedaddle, to.—To run away, a

word introduced during the Civil war. Smart.—Used in the sense of considerable, a good deal, as a smart chance; also equal to well, as "right smart," very well.

Stakes, to pull up.—To remove. Stampede.—The sudden flight of a crowd, or of cattle or horses.

Stiff.—In medical schools, a corpse. Store.—Same as shop in Great Store.—Same as shop in Great Britain; as a book store. Save up or preserve.

Strike oil, to .- To come upon petroleum; hence, to make a lucky hit,

especially financially.

Stump speech .- A speech calculated to please the popular ear, such speeches in newly settled districts being often delivered from the stumps of trees.

Ticker .- A watch; also a telegraph

receiver.

Ticket, to vote the straight .- To vote for all the men or measures on the ticket.

Truck .- The small produce of gardens; truck patch, a plot in which the smaller fruits and vegetables are raised.

Turn down, to.—To reject or ignore; used of office seekers especially.

Vamose, to .- To run off.

American Legion, a national organization of American veterans of the World War. All soldiers and sailors who served from April 6, 1917. to Nov. 11, 1918, are eligible. Membership (1923) 643,837.

American Municipal League, an organization with branches in all important American and Canadian cities, founded for the promotion of municipal administration.

American Party, The, the name of three separate organizations which at different times held a prominent place in the political affairs of the United States. The first, organized about 1852, at a time when the Whig Party was near its dissolution was. in fact, a secret society, and was better known in later years as the "Know Nothings," from the assumed ignorance of its members when questioned in regard to the objects and name of the order. Its principal doctrine was opposition to all foreigners and Roman Catholics, and its motto was "Americans must rule America." The "Americans must rule America." first National Convention of the Party was held in February, 1856, at which resolutions were adopted, demanding a lengthening of the residence necessary to naturalization, and condemning President Pierce's administration for the repeal of the Missouri Compromise. A number of the members withdrew because of the refusal to consider a resolution regarding the restriction of slavery. Millard Fillmore, of New York, was nominated for President, and Andrew Jackson Donelson for Vice-President, which nominations were subsequently in-dorsed by a Whig Convention. Fillmore carried but one State, Maryland; his popular vote being about 850,000. The party was successful in carrying the State elections in Rhode Island and Maryland in 1857, but never gained any popularity in the Western States. A second party, bearing the same name, but directly adverse to the first in that it was founded in opposition to secret societies, was organized for political purposes by the National Christian Association, at the adjourn-ment of a convention held by the latter body at Oberlin, O., in 1872. The organization was completed and the name adopted at a convention in Syracuse, N. Y., in 1874. At Pittsburg,

June 9, 1875, a platform was adopted in which were demanded recognition of the Sabbath, the introduction of the Sabbath, the introduction of the Sabbath, the introduction of the Bible into public schools, prohibition of the sale of liquors, the withdrawal of the charters of secret societies, and legislative prohibition of their oaths, arbitration of international disputes, the restriction of land monopolies, resumption of specie payand and all public encouragement and support of sectoring schools. It does not consider the sabbath, the introduction of the United States of America, is irreconcilable with American citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of America, is irreconcilable with American citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of America, is irreconcilable with American citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of America, is irreconcilable with American citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of America, is irreconcilable with American citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of America, is irreconcilable with American citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of the Indiana citizenship;" and it accordingly opposes "the holding of offices in National, State, or Municipal Government of the United States of the Indiana citizenship; and it accordingly opposes "the holding of offices in National Company opposes "the holding of offices in National Com ment, justice to the Indians, and a direct popular vote for President and Vice-President. James B. Walker of Illinois was nominated for President. In 1880, the party again made nominations, and in 1884, S. C. Pomeroy was nominated, but withdrew in favor of John P. St. John, the Prohibition candidate. The third party to be called by the name of American Party was organized at a convention held at Philadelphia, Sept. 16-17, 1887. Its principal aims, as set forth in its platform, were, to oppose the existing system of immigration and naturalization of foreigners; to demand its restrictions and regulation so as to make a 14-years' residence a prerequisite of naturalization; to exclude from the benefits of citizenship all anarchists, and other dangerous characters; to defend free schools; to condemn alien proprietorship; to declare for the permanent separation of Church and State, and in favor of the enforce-ment of the Monroe Doctrine. But

ciety, Philadelphia, began in Frank-lin's famous Junto in 1727. In 1743 the present name was adopted. The originally known as the Queen's Cup, oldest and most distinguished learned society in the United States, Herbert

A.," a secret order organized through-out the United States, with branches in Canada, which has attracted much attention by its aggressive platform and active agitation. Its chief doctrine, as announced in its declaration of principle, is that "subjection to and support of any ecclesiastical power not created and controlled by Amer-ican citizens, and which claims equal, Several of the races were called off

if not greater, sovereignty than the Government of the United States of of sectarian schools. It does not constitute a separate political party, but seeks to control existing parties, and to elect friendly and defeat objectionable candidates, by the concerted action of citizens affiliated with all par-ties. The order was founded March 13, 1887.

American Psychological Association, an organization founded in 1892 for the advancement of psychology as a science.

American Society of Civil Engineers, an association instituted in 1852; headquarters, New York City; membership, 2,200.

American Society of Mechanical Engineers, an organization chartered in 1881; membership unlimited; headquarters, New York City. American System, a term used

by Henry Clay and applied to his plan of protective duties and internal im-provements, as proposed in the dement of the Monroe Doctrine. But bates in Congress which resulted in the tariff law of 1824. At present it is used to denote the policy of protection to home industries by means of duties on imports.

America's Cup, a yachting trophy, offered as a prize to the yachts of all onest and most distinguished learned of the society in the United States, Herbert nations by the Royal Yacht Squadron Hoover is its eighth member to be President of the nation. The society's contest for it was held Aug. 22 of that ball, built in 1787, is in Independence Square.

American Protective Association, popularly known as the "A. P. Yacht club. The subsequent success the society in the Variety of American Protective Association, popularly known as the "A. P. Yacht club. The subsequent success for the variety of the yachts of all prize to the yacht of American yachts in keeping the cup caused it to become known as the "America's" Cup.
In 1903 Sir Thomas Lipton pre-

sented Shamrock III., as challenger for the America's Cup, Reliance, built by the Herreshoffs, being presented as defender of the Cup by an American

on account of the time limit, Reliance being ahead in all of them, as well as in the three races which decided the contest. In 1920 the Resolute-Shamrock IV race was decided only after

THE AMERICA'S CUP.

five contests. In the first, Shamrock IV had a walk over on account of disabling of Resolute. The second race also went to Shamrock IV, but final three races were captured by Resolute.

On May 3, 1929, Sir Thomas Lip-ton's challenge for the America's Cup was accepted by the New York Yacht Club. This marked the fifth attempt by Sir Thomas to bring the trophy to England. His previous challengers were named "Shamrock" and his last "Shamrock V." The racing started on Sept. 13, 1930, the yacht "Enterprise" defending. For the fifth and probably last time the "Shamrock" lost; the lost; the "Enterprise" taking three of four races.

Amerigo Vespucci. See VES-PUCCI.

Gordon, Charles Ames.

3, 1828. He graduated at the Geauga Seminary, Ohio; was ordained in 1849 as a Free Baptist, but later became a Unitarian, and pastor of the Church of the Disciples, Boston. He was ea-itor of the Minnesota "Republican" and the "Christian Register," of Bos-ton. He wrote "George Eliot's Two Marriages." He died April 15, 1912.

Ames, Eleanor Kirk, an American author, born at Warren, R. I., Oct. 7, 1831. Among her many books are "Information for Authors," "Beecher as a Humorist," "The Influence of the Zodiac on Human Life, She died June 24, 1908.

Ames, Fisher, an American orator and statesman, born in Dedham, Mass., April 9, 1758. Admitted to the bar in 1781, he became a member of Congress in 1789, where he gained a national reputation by his oratory. Two of his finest efforts were in sup-port of John Jay's treaty with Great Britain, and a eulogy on Washington before the Massachusetts Legislature. He was elected president of Harvard College in 1804, but declined. A brilliant talker, he was distinguished in conversation for wit and imagination, while his character was spotless. His works consist of orations, essays, and letters (2 vols., 1854). He died in Dedham, July 4, 1808.

Ames, Mary Clemmer, an American author, born in Utica, N. Y., in 1839; was a frequent contributor to the Springfield "Republican," and afterward to the New York "Independent." Married to and divorced from the Rev. Daniel Ames, she became, in 1883, the wife of Edward Huden at Washington Amen har Hudson at Washington. Among her works are a volume of "Poems" (1882); and biographies of Alice and Phoebe Cary. She died in Washington, D. C., Aug. 18, 1884.

Ametabola, a class of wingless insects, which do not undergo metamorphosis. They include bird lice, etc.

Amethyst, a precious stone, a variety of quartz, named by Dana amethystine quartz. The Oriental amethyst is a rare purple variety of sapphire. The best specimens are brought from India, Armenia, and Arabia.

Amharic, or Amarinna, a Se-American clergyman, editor, and lecturer, born in Dorchester, Mass., Oct. of African words; since the 14th century the court and official language of Abyssinia.

Amherst College, an educational institution in Amherst, Mass.; founded in 1821 and incorporated in 1825. There were 727 students in 1928.

Amiel, Henri Frederic, a dis-tinguished Swiss essayist, philosophiringuished Swiss essayist, philosophr-cal critic, and poet, born at Geneva, Sept. 27, 1821. He died in Geneva, March 11, 1881. The name Amiel, which in Hebrew means "friend of God," was also used satirically for Sir. Edward Seymour, Speaker of the House of Commons.

Ammen, Daniel, an American na-May 15, 1820; entered the United States navy, July 7, 1836. He was executive officer of the North Atlantic Blockading Squadron at the outbreak of the Civil War. From 1861 to 1865 he rendered signal service in the at-tacks on Port Royal, Fort Macallister, Fort Fisher, and both the ironclad attacks on Fort Sumter. On June 4, 1878, he was retired with the rank of Rear-admiral. He was the designer of the Ammen life raft and harbor defense ram. Among his works are "The Old Navy and the New," and "Navy in the Civil War" (1883). He died in Washington, D. C., July 11, 1898.

Ammergau, Ober- and Unter, two adjoining villages in Upper Bavaria, in the higher part of the valley of the Ammer, 42 miles S. W. by S. of Munich. Ober-Ammergau is noted for the performance of the "Passion Play," a series of dramatic represen-Play, a series of dramatic representations of the sufferings of Christ, which is produced every tenth year by about 500 performers, in accordance with a vow made at the time of the pestilence of 1634. During the intervening years, the actors give a series of representations of Old Testament legends. The performance generally lasts seven or eight hours, often without intermission, and is partly a religious service and partly a popular festival. In 1889, a theater was built just outside the place, with a stage in Paleozoic and Mesozoic rocks in all and auditorium capable of seating parts of the world. These shells are 6,000 persons. On the height near by is a colossal memorial of "Christ on the Cross, with Mary and John,"

Ammianus Marcellinus, a Roman historian, born of Greek parents at Antioch, in Syria, about 330.

Ammon, the eponymic ancestor of a people, known in Hebrew and Biblical history as the "children of Ammon" or Ammonites; frequently mentioned in the Old Testament. According to the account in Genesis (xix: 38), Ammon was the son of Lot.

Ammon, a god of the ancient Egyptians, worshipped especially in Thebes (No-Ammon), and early rep-resented as a ram with downward branching horns, the symbols of power; as a man with a ram's head; and as a complete man with two high feathers on his head, bearded, sitting on a throne, and holding in his right hand the scepter of the gods, in his left the handled cross, the symbol of divine life. The worship of Ammon spread at an early period to Greece, and afterward to Rome, where he was identified with Zeus and Jupiter.

Ammonia, a colorless, pungent gas, with a strong alkaline reaction. It can be liquefied at the pressure of seven atmospheres at 15°. Ammonia is obtained by the dry distillation of animal or vegetable matter containing animal or vegetable matter containing nitrogen, horns, hoofs, etc., produce large quantities; hence its name of spirits of hartshorn. Guano consists chiefly of urate of ammonia. But ammonia is now obtained from the liquor of gasworks, coal containing about 2 per cent of nitrogen. It is used in medicina as an autorid and used in medicine as an antacid and stimulant; it also increases the secretions. Externally, it is employed as a rubefacient and vesicant. Ammonia is used as an antidote in cases of poisoning by prussic acid, tobacco, and other sedative drugs. Ammonia is soluble in water, liquefiable, and solidifiable by cold and pressure. It is used in certain forms of artificial refrigeration.

Ammonite, a large genus of fossil chambered shells. They are common in Paleozoic and Mesozoic rocks in all covered outside with ribs, knobs, spines, etc., and the under layer is pearly, as in the nautilus. Its shape modeled by Halbing, the gift of King is that of a ram's horn, some being Ludwig II.

Ammonites, a Semitic race of people, living on the edge of the Syrian Desert; according to Gen. xix: 38, the descendants of Lot, and closely akin to the Moabites. They inhabited the country lying to the N. of Moab, between the rivers Arnon and Jabbok. Their chief city was Rabbath-Ammon. The Israelites were often at war with From the name of their princes, it is evident that their language was closely akin to Hebrew. Their chief deity was Moloch.

Amnesty, an act of oblivion passed after an exciting political period. Its object is to encourage those who have compromised themselves by rebellion or otherwise to resume their ordinary occupations, and this it does by giving them a guarantee that they shall never be called upon to answer for their

past offenses.

Amor, the god of love among the Romans, equivalent to the Greek Eros.

Amorites, a powerful tribe of Canaanites, who inhabited the country N. E. of the Jordan, as far as Mount

Hermon.

Amos, one of the so-called minor prophets of the Hebrews, was a herdsman of Tekoa, in the neighborhod of Bethlehem, and also a dresser of sycamore trees. During the reigns of Uzziah in Judah, and Jeroboam II. in Israel (about 800 B. C.), he came forward to denounce the idolatry then prevalent.

Amoy, a seaport town and one of Amoy, a seaport town and one of the treaty ports of China; on a small island of the same name in the Province of Fukien; 325 miles E. by N. E. of Canton, and directly opposite the island of Formosa. During the international military operations in China, in 1900, the city was occupied by the Japanese.

Ampere, the practical unit of electric current strength. It is the measure of the current produced by an electro-motive force of one volt through a resistance of one ohm. In electric quantity it is the rate of one coulomb

per second.

Ampere, Andre Marie, a French mathematician and physicist, was born at Lyons in 1775. He died at Marseilles, June 10, 1836.

which can live indiscriminately on a firm substratum of clay.

land or water, or which at one part of their existence live in water and at another on land.

Amphictyonic Council, a celebrated council of the States of ancient The members of this confed-Greece. eration bound themselves by an oath not to destroy any city of the Amphictyons, nor cut off their streams in war or peace, and to employ all their power in punishing those who did so, or those who pillaged the property of the god, or injured his temple at Delphi.

Amphion, in mythology, the son of Jupiter and Antiope; the eldest of the Grecian musicians. To express the power of his music, and, perhaps, of his eloquence, the poets said, that, at the sound of his lyre, the stones voluntarily formed themselves into walls; that wild beasts, and even trees, rocks, and streams, followed the musician.

Amphipolis, an important city of Thrace or Macedonia; at the mouth of the Strymon river; 33 miles from the Ægean. The site is now occupied by the Turkish town of Yenikeui.

Amphitheater, a double theater. The ancient theaters were nearly semicircular in shape; or, more accurately, they were half ovals, so that an amphitheater, theoretically consisting of two theaters, placed with their with their concavities meeting each other, was, loosely speaking, a nearly circular, or, more precise'v, an oval building. The more precisely, an oval building. Romans built amphitheaters wherever they went. Remains of them are still to be found in various parts of Europe; but the most splendid ruins existing are those of the Coliseum at Rome, which was said to have held 87,000 people.

Amsterdam, a city in Montgomery county, N. Y.; on the Mohawk river and several trunk line railroads; 33 miles N. W. of Albany; is especially noted for its manufactures of knit goods, carpets, steel springs, and paper. (1930) 34.817.

Amsterdam ("dam" or "dike of the Amstel"), the capital of the Netherlands. Almost the whole city, which extends in the shape of a cresarseilles, June 10, 1836.

Amphibia, in zoology, animals 50 feet through soft peat and sand to

The population, which from 217,024 steadily to 718,046, as reported on Dec. 31, 1925, of whom the majority belong to the Dutch Reformed Church. Of the remainder, about 80,000 are Catholics, 30,000 German Jews, and 3,200 Portuguese of these are large constituents of fusel oil. The union of some of these algobals with the compound ethers, ing works, mills for polishing diamonds produce odors resembling pineapple, and other precious stones, dockyards, manufactories of sails, ropes, tobacco, silks, gold and silver plate flavors. The poisonous properties of and jewelry, colors, and chemicals, fusel oil, make such products highly breweries, distilleries, with export houses for corn and colonial produce; legislation botch has been enacted in cotton-spinning, book-printing, and type-founding are also carried on. The present Bank of the Netherlands dates present Bank of the Netherlands dates from 1824, Amsterdam's famous bank Rome, to the Christians of Asia, Minor, of 1609 having been dissolved in 1796.

Amulet, anything hung around the neck, placed like a bracelet on the wrist, or otherwise attached to the person, as an imagined guard against sickness, witchcraft, or other evils.

Amundsen, Roald, a Norwegian explorer; born in Borge, July 16, 1872. Studied medicine, abandoned it to engage in polar research. In 1898-9 he was with the Belgica Antarctic expedition; in 1903-5 he was the first navigator to take a ship from the At-Northwest Passage; and on Dec. 14, sence, they, in 1521, began to preach 1911, he discovered the South Pole. their doctrines at Wittenberg. Laying May 11-12, 1926, he flew by dirigible claim to supernatural powers, they over the North Pole with the Amund-sen-Ellsworth-Nobile expedition, cross-ing from Svalbard (Spitzbergen) to Teller, Alaska, the first to cross from religious events taking place in Cenone hemisphere to the other by way of the North Pole. June 18, 1928 he set out by airplane to find the lost

Amur, a river formed by the junction (about 53° N. lat., and 121° E. long.) of the Shilka and the Argun, which both come from the S. W. the former rising in the foothills of cast in their lot with the insurgent the Yablonoi Mountains. From the peasantry, and became their leaders junction, the river flows first S. E. in battle. After a time the allied and then N. E., and, after a total princes of the empire, led by Philip, course of 3,060 miles, falls into the Landgrave of Hesse, put down the re-Sea of Okhotsk, opposite the island of bellion, and Munzer was defeated, cap-

the S. Above the Ussuri, the Amur

alcohols with the compound ethers, some of the States.

Anabaptists, a name given in re-Cappadocia, Balatea and Cilicia, who held that no baptism was valid but that administered to adults by immersion. They are mentioned by Tertullian and Agrippinus. The sect appeared in 1520. The most eminent of its early leaders were Thomas Munzer, Mark Stubner, and Nicholas Storck. They had been disciples of Luther; but, becoming dissatisfied with the moderate character of his reformation, they cast off his authority, and attempted more sweeping changes than he was presaw visions, uttered prophecies, and made an immense number of prose-lytes. The ferment which the exciting tral Europe had produced in men's minds, had made them impatient of social or political as well as of spir-Nobile expedition to the Arctic, (later found) and was never heard from again.

Amur, a river formed by the junc-pressed by their feudal superiors, rose in arms and commenced a sanguinary religious struggle, partly no doubt, for political emancipation. The Anabaptists Sakhalin. Its main tributaries are tured, put to the torture, and ultimately the Sungari and the Ussuri, both from beheaded. In 1532, some extreme Ana-

baptists from Holland, led by a baker called John Matthias, and a tailor, John Boccoldt, called also, from the place whence he came, John of Ley-den, seized on the city of Munster, in Westphalia, with the view of setting up in it a spiritual kingdom, in which, at least nominally, Christ might reign. The name of Munster was changed to that of Mount Zion, and Matthias became its actual king. Having soon after lost his life in a mad, warlike exploit, the sovereignty devolved on Boccoldt, who, among other fanatical freaks, once promenaded the streets of his capital in a state of absolute nudity. On June 24, 1535, the Bishop of Munster retook the city by force of arms, and Boccoldt was put to death in the most cruel manner that could be devised. The excesses of the Anabaptists were eagerly laid hold of to discredit the Reformation.

Anabasis, the name given by Xenophon to his celebrated work describing the expedition of Cyrus the younger against his brother Artaxerxes Mnemon, King of Persia.

Anaconda, a large serpent of the boa family, common in inter-tropical America. The head is comparatively small, conical, very flat below, and truncated in front. The color is grayish-brown or olive above, with two rows of large black spots running down the back and tail; the sides are adorned with black rings on a yellow ground; the under surface is ochre-yellow with black spots. The anaconda is the largest of living snakes, sometimes reaching a length of over 30 feet. Brazil and Guiana form its chief habitat. It always lives in or in the neighborhood of water; lies in wait for its prey in the water, or stretched on the sand; seldom attacks man; and during the dry season buries itself and becomes torpid.

Anacreon, a renowned lyric poet of Greece, born at Teos in Ionia, 562 (?) B. C. He died 477 B. C.

Anæmia, bloodlessness; a morbid state of the system produced by loss of blood, by deprivation of light and air. The patient is characterized by great paleness, and blood-vessels, easily traceable at other times, become unseen after great hemorrhage, or in cases of anæmia.

Anæsthesia " lack of (Greek, sensation"), a term used to express a loss of sensibility to external impressions, which may involve a part or the whole surface of the body. It may occur naturally as the result of disease, or may be produced artificial-ly by the administration of anæsthetics, such as ether, etc.

The fact that sulphuric ether could The fact that sulphuric ether could produce insensibility was shown by the American physicians, Godwin (1822), Mitchell (1832), Jackson (1833), Wood and Bache (1834); but it was first used to prevent the pain of an operation in 1846, by Dr. Morten a destrict of Pactor.

Morton, a dentist of Boston.

The employment of general anæsthetics in surgery has greatly increased the scope of the surgeon's usefulness, and has been a great boon to suffering humanity. It is, however, fraught with a certain amount of danger. However much care may be taken in its administration, an occasional fatal accident occurs from the action of the anæsthetics employed. In these cases, there is generally disease of the heart. or a hyper-sensitive nervous system, predisposing to sudden sinking, or to shock.

Local anæsthesia, artificially produced, is of great value in minor operations, and, in painful affections of limited areas of the body. It may be induced by the application of cold, or

of medical agents.

Anagram, the letters of any word read backward, or transposed to make a new word or sentence, which has some reference to the original.

Anahuac, a term signifying, in the old Mexican language, "near the water." the original name of the ancient kingdom of Mexico.

Analogy, similitude of relations between one thing and other. The thing to which the other is compared is preceded by to or with. When both are mentioned together they are connected by the word between.

Analysis, in ordinary language, the act of analyzing; the state of being analyzed; the result of such investi-gation. The separation of anything physical, mental, or a mere conception into its constituent elements.

Anam, or Annam, a name given by the Chinese in the 3d century A. D.

B.-4.

to an empire occupying the E. side of the Indo-Chinese peninsula, along the China Sea. It comprised Tonkin in the N.; Cochin-China in the S.; and the territory of the Laos tribes S. W. of Tonkin; with an aggregate area of 196,500 square miles, and a population of 15,000,000. Since the French occupation in 1884 Anam while theoretically still a native monarchy, administratively forms the central division of French Indo-China with an area of 39,758 square miles. The King rules with a council of six members under the supervision of a French resident at Hue. Pop. 5,580,974.

Anarajapura, or Anuradha-poora, a ruined city, the ancient cap-ital of Ceylon, built about 510 Bs C., and said to have covered an area of 200 square miles. The spacious main streets seemed to have been lined with elegant structures. There are still several dagobas in tolerable preservation, but the great object of interest is the remains of the sacred Bo-tree planted over 2,000 years ago, and the oldest historical tree in the world.

Anarchists, a revolutionary sect or body setting forth as the social ideal the extreme form of individual freedom, and holding that all government is injurious and immoral, that the destruction of every social form now existing must be the first step to the creation of a new world. Their recognition as an independent sect may be dated from the secession of Bakunin and his followers from the Social Democrats at the congress of the Hague in 1872, since which they have maintained an active propaganda. The congress at London in 1881 decided that all means were justifiable as against the organized forces of modern society. There have been comparatively few recognized anarchistic outrages in the United States. A number of violent manifestations popularly charged to anarchists were really the out-croppings of labor troubles; but acknowledged anarchists stirred up considerable apprehensions after the United States was drawn into the World War, till the Federal authorities got after them.

Anastasius, the name of four Popes, the first and most eminent of

bacy on the clergy, and was an opponent of the Manichæans and Origen.

Anathema, a word originally signifying some offering or gift to the gods, generally suspended in the temple. It also signifies a thing that has been devoted to destruction (the equivalent of the Hebrew Cherem); and was ultimately used in its strongest sense, implying perdition, as in Rom, ix., 3: Gal, i., 8-9. In the Roman Catholic Church, from the 9th century, a distinction has been made between excommunication and anathematizing; the latter being employed only against obstinate offenders.

Anatomy, in the literal sense, means simply a cutting up, but is now generally applied both to the art of dissecting or artificially separating the different parts of an organized body (vegetable or animal) with a view to discover their situation, structure, and economy; and to the science which treats of the internal structure of organized bodies. The branch which treats of the structure of plants is called vegetable anatomy or phytotomy, and that which treats of the structure of animals animal anatomy or zoötomy, a special branch of the latter being human anatomy or anthropotomy. Comparative anatomy is the science which compares the anatomy of different classes with quadrupeds, or that of quadrupeds with fishes; while special anatomy treats of the construction, form, and structure of parts in a sin-gle animal. The history of anatomy is virtually the history of medicine, the practice of which is based upon the revelations of anatomical study.

Among the ancient writers or authorities on human anatomy may be mentioned Hippocrates the younger (460-377 B.c.), Aristotle (384-322 B.C.), Herophilus and Erasistratus of Alexandria, (about 300 B.C..). Celsus (53 B.C.—37 A.D.), and Galen of Pergamus (140-200), the most celebrated of all the ancient authorities on the science. From his time till the revival of learning in Europe in the 14th century anatomy was checked in its progress. In 1315 Mondino, professor at Bologna, first publicly performed dissection, and published a System of Popes, the first and most eminent of whom held that office for only three years (398-401). He enforced celi- years. In the 16th century Fallopie of

Padua, Eustachi of Venice, Vesalius of Brussels, Varoli of Bologna, and many others, enriched anatomy with new discoveries. In the 17th century Harvey discovered the circulation of the blood, Asellius discovered the manner in which the nutritious part of the food is conveyed into the circulation, while the lymphatic system was detected and described by the Dane T. Bartoline. Among the renowned anatomists of later times we can only mention Malpighi, Boerhaave, William and John Hunter, the younger Meckel, Bichat, Rosenmuller, Quain, Sir A. Cooper, Sir C. Bell, Carus, Joh, Muller, Hæckel, Owen, and Huxley, and the Americans, Jeffries Wyman, Dwight, Leidy, Marsh, and Cope.

Anaxagoras, a famous Greek philosopher of the Ionic school, born about 500 (?) B. C. He explained eclipses and advanced physical science.

Anaximander, a Greek mathematician and philosopher, successor of Thales as head of the physical school of philosophy, was born at Miletus, in 611 B. C. He is said to have discovered the obliquity of the ecliptic, and he certainly taught it. He appears to have applied the gnomon, or style set on a horizontal plane, to determine the solstices and equinoxes. The invention of maps is ascribed to him.

Anaximenes, a philosopher of Miletus, flourished about 556 B. c. Pliny attributes to him the invention of the sun-dial.

Anchoret, Anachoret, or Anchorite, any person who, from religious motives, has renounced the world, and retired into seclusion.

Anchovy, a fish which belongs to the herring family. In general, its length is from 4 to 5 inches; but specimens are found 7½ inches long.

Anchovy Pear, a tree, with large leaves, which grows in the West Indies. The fruit which is eaten, tastes like that of the mango.

Ancus Marcius, the fourth King of Rome was the grandson of King Numa Pompilius. He died in 616 B. C., after reigning 24 years.

Andalusia, a large and fertile region occupying the S. of Spain. Its shores are washed both by the Mediterranean and the Atlantic; and, though it is not now a political division of

Spain, it is more frequently spoken of than the eight modern provinces into which it has been divided. Its breeds of horses and mules have long been celebrated. The mountains yield silver, copper, lead, iron, and coal; and some ores are extensively worked. The Andalusians speak a dialect of Spanish, manifestly tinctured with traces of Arabic. Andalusia is divided into the Provinces of Almeria, Jaen, Malaga, Cadiz, Huelva, Seville, Cordova, and Granada. The chief towns are Seville, Cordova, and Cadiz. Area, 33,663 square miles. Pop. 3,450,209

Andamans, a group of thickly wooded islands toward the E. side of the Bay of Bengal, about 680 miles S. of the Hooghly mouth of the Ganges, with a British convict settlement. In 1872 Lord Mayo, Viceroy of India, was assassinated on Viper Island, by a Mussulman convict. Pop. 18,190.

Andersen, Hans Christian, a Danish novelist, poet, and writer of fairy tales; born in Odense, April 2, 1805. Hans learned to read and write in a charity school. After many struggles he became a successful author, and his fairy tales gained worldwide fame. He died in Rolighed, Aug. 4, 1875. Andersen's tales show humor and tenderness.

Anderson, city and capital of Madison county, Ind.; on a branch of the White river, a notable hydraulic canal, and several railroads; 35 miles N. E. of Indianapolis; is abundantly supplied with natural gas, and manufactures iron, steel, glass, wire, paper, brass, lumber and machinery. Pop. (1930) 39,804.

Anderson, Alexander, an American wood engraver, born in New York city, April 21, 1775; began engraving on copper and type metal when 12 years old, without instruction and with a knowledge of the art gained solely by watching jewelers. He produced the first wood engravings ever made in the United States, and for many years was the only engraver on wood in New York. He made the plates for the fractional paper currency issued by the Federal government, and for the cuts in the first editions of Webster's Spelling Book. He died 1870.

Anderson, Elizabeth Garrett, an English physician, born in London in 1837. From 1876 to 1898 she was Dean of the London Medical School for Women.

Anderson, Martin Brewer, an American educator, born in Brunswick, Me., Feb. 12, 1815; was chosen President of the newly organized University of Rochester (N. Y.), in 1853, holding the post till 1888. He died Feb. 26, 1890.

Anderson, Mary (Mrs. Navarro), an American actress, born in Sacramento, Cal., July 28, 1859. She played for the first time in Louisville, in 1875, in the character of Juliet. Her success was marked and immediate, and during the following years she played with increasing popularity in the principal cities of the United States in various roles. In 1883 she appeared at the Lyceum Theater, in London, and speedily became well known in England. Since her marriage in 1890 to Antonio Navarro de Viana, of New York, she has retired from the stage, but returned in 1915 to help raise war charity funds.

Anderson, Rasmus Bjorn, an American author, born in Albion, Wis., Jan. 12, 1846, of Norwegian parents. He was educated at Norwegian Lutheran College, Decorah, Ia.; becoming Professor of Scandinavian Languages in the University of Wisconsin in 1875-1884, and United States Minister to Denmark in 1885. Since that time engaged in editorial work

Anderson, Robert, an American military officer: born near Louisville, Ky., June 14, 1805; was graduated at the United States Military Academy in 1825, and entered the artillery; was private secretary to the United States minister to Colombia in 1825–1826; instructor at the Military Academy for a while; on ordnance duty in 1828–1835; served in the Black Hawk War in 1832 as colonel of volunteers, taking part in the battle of Bad Axe; and in the Florida War in 1837–1838 on General Scott's staff, and was made assistant adjutant-general on the staff in May of the latter year. He was with General Scott in his campaign in Mexico, taking part in the engagements at Vera Cruz, Certer Gordo, Amozoque, and at Molino del Rey, where he was severely wounded.

He was commissioned major and was placed in command of Charleston harbor, to succeed Colonel Gardiner, with headquarters at Fort Moultrie, in 1860. After arriving at Fourt Moultrie he informed the government of the weakness of the forts in the harbor, and urged the necessity of immediately strengthening them. As the govern-ment did not respond, and he was left to his own resources, he began to strengthen Castle Pinckney and Fort Moultrie. Fearing that Fort Moultrie would be attacked at any moment he applied to the government for instructions. Receiving none he decided to remove with his garrison to Fort Sumter. This he did on the evening of Dec. 26. The Confederates were much surprised the next day on discovering the change, and asked him to explain his conduct in acting without orders, to which he replied that he did it to save the government works. He was attacked and surrendered the fort after heavy bombardment, April 12-13, 1861. In 1861 he was promoted Brigadier-General, U. S. A., and placed in command of the Department of Kentucky and of the Cumberland, but failing health caused him to retire from active service in 1863, when he brevetted Major-General. died in Nice, France, Oct. 26, 1871.

Anderson, Rufus, an American missionary, born in North Yarmouth, Me., Aug. 17, 1796; was graduated at Bowdoin College in 1818, and Andover Theological Seminary in 1822; Assistant Secretary of the American Board of Commissioners for Foreign Missions in 1824-1858; a founder of Mount Holyoke Seminary. He died in Boston, May 30, 1880.

Andersonville, a village in Georgia, noted as having been the seat of a Confederate States military prison. Between Feb. 15, 1864, and April, 1865, 49,485 prisoners were received, of whom 12,926 died in that time of various diseases. What was formerly a hamlet is now a town adorned with gravel walks and trees, and containing several churches. The cemetery is laid out in a neat fashion with tablets that mark the burial places of the dead. The long trenches where the soldiers were buried have since been laid cut as a National cemetery, for the bodies of Northern dead.

Andersson, Carl Jan, an African traveler; born in the province of Wermland, Sweden, in 1827. He died in the land of the Ovampos, in Western Africa, in July, 1867.

Andes, The, or, as they are called by the Spanish in South America, Cordilleras, a range of mountains, of such vast extent and altitude as to render them one of the most remarkable physical features of the globe. It follows the whole of the W. coast of South America, from Cape Horn to the Isthmus of Panama and the Caribbean Sea. Sometimes it is spoken of as a continuation of the Rocky mountains in North America, but there seems to be no other reason for doing this than the continuity of the two divisions of America, and the fact that both ranges lie in the W. of their respective continents. There is a sufficiently marked break between the ridges of the Isthmus of Panama and the range of the Andes of South America, and a still more distinct hiatus between the Sierras of Central America and Mexico and the Rocky mountains.

Andorra, a valley in the Eastern Pyrenees, between the French department of Ariége and the Spanish province of Lerida, part of Catalonia. is inclosed by mountains, through which its river, the Balira, breaks to join the Segre at Urgel; and its inac-cessibility naturally fits it for being the seat of the interesting little republic which here holds a kind of semiindependent position between France and Spain. Area (divided into six communes), 191 square miles. Population (1921) 5,231.

Theological Semi-Andover nary, a noted Congregational institution at Andover, Mass.; founded in 1807.

Andral, Gabriel, a French physician and pathologist, born in Paris, Nov. 6, 1797. He died Feb. 13, 1876.

Andrassy, Julius Count, Hungarian statesman, born March 8, 1823. He was a conspicuous member of the Congress of Berlin in 1878; negotiated the German-Austrian alliance with Bismarck in 1879; and the same year retired from public life. He died Feb. 18, 1890.

André, John, a British military

ed the army in 1771; went to Canada in 1774; and was made prisoner by the Americans in 1775. After his exchange, he was rapidly promoted, and in 1780 was appointed Adjutant-Gen-eral, with the rank of Major. His prospects were of the most flattering kind when the treason of Arnold led to his death. The temporary absence of Washington having been chosen by the traitor as the most proper season for carrying into effect his design of delivering to Sir Henry Clinton the fortification at West Point, then under his command, and refusing to confide to any but Major André the maps and information required by the British general, an interview became necessary, and Sept. 19, 1780, André left New York in the sloop-of-war "Vul-ture," and on the next day arrived at Fort Montgomery, in company with Beverly Robinson, an American residing at the lines, through whom the communications had been carried on. Furnished with passports from Ar-nold, Robinson and André the next day landed and were received by the traitor at the water's edge. Having arranged all the details of the proposed treason, Arnold delivered to André drafts of the works at West Point and memoranda of the forces under his command, and the latter returned to the beach in hopes of being immediately conveyed to the "Vulture." But the ferrymen, who were Americans, refused to carry him, and as Arnold would not interpose his authority, he was compelled to return by land. Unwas compelled to return by land. fortunately for him he persisted, against the advice of Arnold, in retaining the papers, which he concealed in his boot. Accompanied by Smith, an emissary of Arnold, and provided with a passport under his assumed name of Anderson, he set out and reached in safety a spot from which they could see the ground occupied by the English videttes. At Tarrytown he was first stopped, and then arrested, by three Americans. André offered them his money, horse, and a large re-ward, but without avail. They exward, but without avail. They examined his person, and, in his boots, found the fatal papers. He was then conveyed to Colonel Jameson, commander of the American outposts. On the arrival of Washington, Andre officer, born in London in 1751; enter- was conveyed to Tappan and tried by

a board of general officers, among whom were General Greene, the president, Lafayette, and Knox. Every effort was made by Sir Henry Clinton to save him, and there was a strong disposition on the American side to do so. His execution, originally appointed for Sept. 30, did not take place till Oct. 2. If possession could have been obtained of the traitor, the life of André would have been spared. His remains, which were buried on the spot, were afterward removed to London, and now repose in Westminster Abbey.

André, Louis Joseph Nicolas, a French military officer, born in Nuits, Burgundy, March 29, 1838. He was graduated at the Polytechnic School, and in 1865 became captain, serving in that capacity throughout the Franco-Prussian War of 1870-1871. He became Major in 1877, Lieutenant-Colonel in 1885, and Colonel in 1888. He was made General of Brigade in 1893, and placed in charge of the Polytechnic School. He married, in 1875, Mile. Chapuis, a talented singer of the Opera Comique. On May 29, 1900, he was appointed Minister of War by President Loubet, succeeding General the Marquis de Gallifet, who held the office during the exciting period of the Dreyfus revision. Died March 18, 1913.

Andreä, Jakob, a German Protestant theologian, born in Würtemberg, March 25, 1528; died in Tubin-

gen, Jan. 7, 1590.

Andreä, Johann Valentin, a very original thinker and writer, born in 1586, near Tübingen. He studied at Tübingen, became a Protestant pastor, and died in 1654 at Stuttgart, where he was chaplain to the court. Eminently practical in mind, he was grieved to see the principles of Christianity made the subject of mere empty disputations, and devoted his whole life to correct this prevailing tendency of his age.

Andrée, Solomon Auguste, a Swedish aëronaut, born Oct. 18, 1854; educated for a civil engineer. In 1882, he took part in a Swedish meteorological expedition to Spitzbergen. In 1884 he was appointed chief engineer to the patent office, and from 1886 to 1889 he occupied a professor's chair at Stockholm. In 1892 he received

from the Swedish Academy of Sciences a subvention for the purpose of undertaking scientific aërial naviga-tion. From that time Dr. Andrée devoted himself to aërial navigation, and made his first ascent at Stockholm in the summer of 1893. In 1895 he presented to the Academy of Sciences a well-matured project for exploring the regions of the North Pole with the aid of a balloon. The estimated cost amounted to about \$40,000. A national subscription was opened, which was completed in a few days, the King of Sweden contributing the sum of \$8,280. With two companions, Dr. S. SS,280. With two companions, Dr. S. T. Strindberg and Herr Fraenckell, he started from Dane's island, Spitzbergen, July 11, 1897. His balloon was 67½ feet in diameter, with a capacity of 170,000 cubic feet. Its speed was estimated at from 12 to 15 miles an hour, at which rate the Pole should have been reached in six days, provided a favorable and constant wind vided a favorable and constant wind had been blowing. Two days after his departure, a message was received from Dr. Andrée by carrier pigeon, which stated that at noon, July 13, they were in latitude 82.2°, and longitude 15.5° E., and making good progress to the E., 10° southerly. This was the last word received from the explorer.

Andrew, the first disciple, one of the apostles of Jesus. His career after the Master's death is unknown. Tradition tells us that, after preaching the gospel in Scythia, Northern Greece, and Epirus, he suffered martyrdom on the cross at Patræ, in Achaia, 62 or 70 A. D.

Andrew I., King of Hungary, in 1046-1049; compelled his subjects to embrace Christianity; he was killed in

battle in 1058.

Andrew, John Albion, war govenor of Massachusetts. Was born at Windham in 1818, died 1867. His "Letters and Life" was published in 1904.

Andrews, Christopher Columbus, an American diplomat and writer, born at Hillsboro, N. H., Oct. 27, 1829; was brevetted Major-General in the Civil War; United States Minister to Sweden from 1869 to 1877, and Consul-General to Brazil from 1882 to 1885. Died Sept. 21, 1922.

Andrews, Elisha Benjamin, an American educator, born in Hinsdale,

N. H., Jan. 10, 1844; he was grad-uated at Brown University, 1870, and Newton Theological Seminary, 1874; President of Brown University in 1889-1898; became Superintendent of Public Schools in Chicago in 1898, and Chancellor of the University of Nebraska in 1900; resigned in 1908. Died Oct. 30, 1917.

Andrews, Ethan Allen, American educator and lexicographer, born at New Britain, Conn., April 7, 1787. He died in 1858.

Andrews, Jane, an American juvenile story writer, born in Massachusetts in 1833. She died in 1887.

Andrews, John N., an American military officer, born in Delaware, in 1838; was graduated at West Point in 1860; served with listinction through the Civil War; commissioned Colonel of the 12th United States infantry in 1895; and appointed a Brig-adier-General of Volunteers for the

war against Spain in 1898.

Andrews, Lorrin, an American missionary, born in East Windsor, Conn., April 29, 1795; was educated at Jefferson College and Princeton Theological Seminary, and went as a missionary to the Hawaiian Islands in 1827. He founded, in 1831, the La-hainaluna Seminary, which later be-came the Hawaii University, where he served 10 years as a professor. He translated a part of the Bible into the Hawaiian language. In 1845 he became a judge under the Hawaiian Government and Secretary of the Privy Council. He produced several works on the literature and antiquities of Hawaii, and a Hawaiian diction-He died in 1868. ary.

Andrews, Stephen Pearl, an American writer, born at Templeton, Mass., March 22, 1812; was a prominent abolitionist, practiced law in the South, and settled in New York in

1847. He died, May 21, 1886.

Andromache, a daughter of Ætion, King of Thebes in Cilicia, and wife of Hector. After the conquest of Troy she became the prize of Pyrrhus, son of Achilles, who carried her to Epirus and had three sons by her, but afterward left her to Helenus, brother of Hector, to whom she bore a son. Euripides has made her the chief character of a tragedy.

Andromeda, in classical mythology a daughter of Sepheus, King of Ethiopia and Cassiope. It was fabled that she was chained to a rock by order of Jupiter Ammon, and then exposed to the attacks of a monster. Perseus released, and afterward married her. On her death she was changed into the constellation which bears her name.

In astronomy, a constellation, fancifully supposed to resemble a woman

chained.

Andros Islands, a group of islands belonging to the Bahamas.

Andros, Sir Edmund, an Engwas governor of New York in 1637; was governor of New York in 1674-1682, and of New England, with New York included, in 1686-1689. His harsh execution of the orders of the Duke of York caused him to be generally execrated, and, after his attempt to deprive Connecticut of its royal charter, he was seized by the people of Boston and sent to England under charges. He was also Governor of Virginia in 1692-1698, and of the Is-land of Jersey in 1704-1706. He died in 1714.

Anemometer, an instrument designed to measure the velocity of the wind, on which its strength depends.

Anemone, a genus of plants belonging to the crowfoots.

In zoölogy, it is a popular name given to various radiated animals which present a superficial resemb-

lance to the anemone. Anemoscope, an instrument for rendering visible the direction of the wind. In that commonly used there is a vane exposed to the wind acting upon an index moving round a dial-plate on which the 32 points of the compass are engraved.

Aneroid, not containing any liquid: used chiefly in the expression, "aneroid barometer."

Aneurism, a morbid dilation of the aorta, or one of the other great arteries of the body.

Angel, a messenger, one employed to carry a message, a locum tenens, a

man of business.

In a special sense an angel is one of an order of spiritual beings superior to man in power and intelligence, vast in number, holy in character, and thor-oughly devoted to the worship and ser-

vice of God, who employs them as his heavenly messengers. Their existence is made known to us by Scripture, and is recognized also in the Parsee sacred

Angel Fish, a fish of the shark family, the reverse of angelic in its look, but which derived its name from the fact that its extended pectoral fins present the appearance of wings. It is called also monk-fish, fiddle-fish, shark-ray, and kingston.

Angelica, a genus of plants mostly herbaceous and perennial, natives of the temperate and colder regions of the northern hemisphere. Wild angelica (A. sylvestris) is a common plant in moist meadows, by the sides of brooks, and in woods. The garden anbrooks, and in woods. The garden angelica is a biennial plant, becoming perennial when not allowed to ripen its seeds.

Angelico, Fra, the commonest designation of the great friar-painter—in full, "Il beato Fra Giovanni Angelico da Fiesole," "the blessed Brother John the angelic of Fiesole." Born in 1387 at Vicchio, in the Tuscan province of Mugello, in 1407, he entered the Dominican monastery at Fiesole in 1436 he was transferred to Fiesole, in 1436 he was transferred to Florence, and in 1445 was summoned by the Pope to Rome, where thence-forward he chiefly resided till his death in 1455.

Angell, George Thorndike, an marican reformer, born in 1820. He American reformer, born in 1820. He was graduated at Dartmouth, 1846, and admitted to the bar, 1851. He was active in promoting measures for the prevention of crime, cruelties, and the adulteration of food, and founded the American Humane Educational Society. He died in 1909.

Angell, James Burrill, an American educator and diplomatist, born in Scituate, R. I., Jan. 7, 1827; was graduated from Brown University in 1850. He became president of the University of Vermont in 1866 and of the University of Michigan in 1871; was minister to China in 1880-81 and to Turkey in 1897-98; again president of the University of Michigan in 1900-10. He died April 1, 1916.

Angell, James Rowland, educator, psychologist, son of the preceding, born in Burlington, Vt., Mar. 8, 1867. Taught psychology at the University of two lines to one another.

Minnesota and the University of Chicago; acting President of the latter.

1918-19; since 1921, President of Yale.

Angell, Joseph Kinnicut, an American lawyer, born in Providence, R. I., in 1794; best known for his works on "Treatise on the Right of Property in Tide-Waters," and "The Limitation of Actions at Law and in Equity and Admiralty."

Angelo (Michelangelo). See MI-

CHELANGELO BUONABOTTI.

Angelus, in the Roman Catholic Church, a short form of prayer in honor of the incarnation, consisting mainly of versicles and responses. It is also, a bell rung at the hours for saying this prayer. A painting, by Millet, peasants listening to the Angelus.

Angina Pectoris, the name first given by Dr. Heberden in 1768, and since then universally adopted as the designation of a very painful disease, called by him also a disorder of the breast; by some others, spasm of the chest, or heart stroke, and popularly breast pang. It is characterized by intense pain in the præcordial region. attended by a feeling of suffocation and a fearful sense of impending death. These symptoms may continue for a few minutes, half an hour, or even an hour or more. During the paroxysm the pulse is low, with the body cold, and often covered with clammy perspiration. Death does not often result from the first seizure, but the malady tends to return at more or less remote intervals, generally proving fatal at last. There are several varieties of it: an organic and functional form; and again a pure or idiopathic and a complex or sympathetic one have been recognized. Angina is produced by disease of the heart. It especially attacks elderly persons of plethoric habits, men oftener than women, generally coming on when they are walking, and yet more, if they are running up stairs or exerting great effort on ascending a hill. Stimulants should be administered during the continuance of a paroxysm; but it requires a radical improvement of the general health to produce a permanent effect on the disorder.

Angle, the point where two lines meet, or the meeting of two lines in a point. Technically, the inclination of

Angler Fish, a fish called also sea devil, frog, or frog fish. It has an enormous head, on which are placed two elongated appendages or filaments. the first of them broad and flattened at the end. These, being movable, are maneuvered as if they were bait; and when small fishes approach to examine them, the angler, hidden amid mud and sand, which it has stirred up by means of its pectoral and ventral fins, seizes them at once; hence its name.

Angles, a German tribe who ap-

pear to have originally dwelt on the E. side of the Elbe between the mouth of the Saale and Ohre, and to have removed N. from their old abodes to the modern Schleswig, where they dwelt between the Jutes and Saxons. In the 5th century they joined their pow-erful N. neighbors, the Saxons, and took part in the conquest of Britain, which from them derived its future name of England.

Anglesey, or Anglesea, an island and county of England, in North Wales, in the Irish Sea, separated from the mainland by the Menai Strait. It is about 20 miles long and 17 miles broad. The Menai Strait is crossed by a magnificent suspension bridge, 580 feet between the piers and 100 feet above high-water mark, allowing the largest vessels which navigate the strait to sail under it: and also by the great Britannia tubular bridge. for the conveyance of railway trains, Holyhead being the point of departure for the Irish mails.

HOOKS BAITED WITH WORMS.

Anglican Church, The, means collectively that group of autonomous churches which are in communion with, or have sprung from, the mother ongel), baited with worms, small fish,

Church of England. They are the following: The Church of Ireland, the Episcopal Church of Scotland, the Protestant Episcopal Church of the United States of America, the Church of Canada, the Church of Australia, the Indian Church, and the Church of South Africa, which are all autonomous bodies under the jurisdiction of their own metropolitans, and not amenable to the ecclesiastical courts of the Church of England, though they all look to the Archbishop of Canterbury as patriarch. In addition to these autonomous churches in connection with the Anglican communion, there are 12 missionary bishops, representing the English church in various remote regions of Asia, Africa, and America; and three or four represent-ing the Protestant Episcopal Church of America. The Reformed Episcopal Church of America and the Free Church of England are not recognized as authentic branches of the Anglican Church. The American Church, legally the Protestant Episcopal Church, according to the U.S. census of 1923. had 8,324 organizations, 77 dioceses and missionary districts, 6,075 clergy, 1,128,850 communicants, and church property valued at \$125,040,498.

ARTIFICIAL FLIES.

flies, etc. We find occasional allusions to this pursuit among the Greek and Latin classical writers; it is mentioned several times in the Old Testament, and it was practiced by the ancient Egyptians. The oldest work on the subject in English is the "Treatyse of Fyshinge with an Angle," printed by Wynkyn de Worde in 1496, along with treaties on hunting and hawking, the whole being ascribed to Dame Juliana Berners, or Barnes, prioress of a nunnery near St. Alban. Walton's inimitable discourse on angling was first printed in 1653.

Anglo-American Commission, a joint international commission appointed in 1898, by the United States and Great Britain, to negotiate a plan for the settlement of all controversial matters between the United States and Canada. This commission settled the

Alaskan boundary.

Anglo-French Treaty, a diplomatic agreement between England and France, signed April 8, 1904. By this treaty, France gave up her claims to certain sovereign rights on the Newfoundland shore; the rights and privileges of the two nations in Egypt, Morocco, and Africa generally, are set forth, and the position of France in Siam, Madagascar, etc., defined.

Siam, Madagascar, etc., defined.

Anglo-Japanese Alliance, a protective agreement for the mutual defense of interests in eastern Asia and India, effected by treaties in 1902 and 1905, between Great Britain and

Japan.

Anglo-Saxons, the name used, with doubtful propriety, by modern historians to include the Angles, Saxons, and Jutes, who settled in Britain in the 5th and 6th centuries after Christ, and thus became the ancestors of the English people. These tribes came from Germany, where they inhabited the parts about the mouths of the Elbe and Weser, and the first body of them who gained a footing in England are said to have landed in 449, and to have been led by Hengist and Horsa. The Jutes settled chiefly in Kent, the Saxons in the S. and middle of the country, and the Angles in the N. Among the various Anglo-Saxon States that afterwards arose those founded by the Angles first gained the preponderance, and the whole country came in time to be called after them

Engla-land, that is, the land of the Angles.

Angora Cat, Goat, etc., a variety of these common animals, generally supposed to have originated in Angora. They are characterized by the length and silkiness of the hair. In America this is retained by frequent crossings with original stock.

Angora, in Anatolia, capital of the Republic of Turkey. Pop. (1927) 74,789. Also, an ancient province of

that name.

Angostura Bark, the aromatic bitter medicinal bark obtained chiefly from Galipea officinalis, a tree of 10 to 20 feet high, growing in the northern regions of South America; natural order rutacæ. The bark is valuable as a tonic and febrifuge, and is also

used for a kind of bitters.

Angouleme, Louis Antoine de Bourbon, Duc d', the eldest son of Charles X. of France, and Dauphin during his father's reign, born at Versailles Aug. 6, 1775. On the revolution in July, 1830, he signed, with his father, an abdication in favor of his nephew, the Duc de Bordeaux; and when the Chambers declared the family of Charles X. to have forfeited the throne, he accompanied him into exile, to Holyrood, to Prague, and to Gorz. He died, 1844.

Anhalt, former duchy of N. Ger-

Anhalt, former duchy of N. Germany, lying partly in the plains of the Middle Elbe, and partly in the valleys and uplands of the lower Harz, and almost entirely surrounded by Prussia; area 888 square miles. The united free state is now incorporated in the German Republic, and has one vote in the Bundesrath and two in the Reichstag, Pop. (1925) 351,485. The chief towns are Dessau, Bernburg, Kothen, and Zerbst.

Ani, the name given to a division of the Cuculidæ, or cuckoos; the typical anis are found in South America, the West Indies and Florida. They are about the size of our blackbird.

Anichini, Ludwig, a Venetian engraver of great celebrity. On seeing his pieces, Michaelangelo is said to have exclaimed that the art of engraving had reached perfection.

Aniline, an organic substance used as the basis of brilliant and durable dyes. It is found in small quantities in coal-tar, but the aniline of commerce is obtained from benzene or benzole, a constituent of coal-tar, consisting of hydrogen and carbon. It is a colorless oily liquid somewhat heavier than water, with a peculiar vinous smell, and a burning taste. Its name is derived from anil, the Portuguese and Spanish name for indigo, from the dry distillation of which substance it was first obtained by the chemist Unverdorben in 1826. The manufacture of aniline or coal-tar dyes as a branch of industry was introduced in 1856 by Mr. Perkin of London.

Animal, an organized and sentient living being. Life in the earlier periods of natural history was attributed almost exclusively to animals. With the progress of science, however, it was extended to plants. In the case of the higher animals and plants there is no difficulty in assigning the individual to one of the two great kingdoms of organic nature, but in their lowest manifestations, the vegetable and animal kingdoms are brought into such immediate contact that it becomes almost impossible to assign them precise limits, and to say with certainty where the one begins and the other ends. From form no absolute distinction can be fixed between animals and plants. Many animals, such as the sea-shrub, sea-mats, etc., so resemble plants in external appearance that they were, and even yet popularly are, looked upon as such.

Animal Chemistry, the department of organic chemistry which investigates the composition of the fluids and the solids of animals, and the chemical action that takes place in animal bodies.

Animal Magnetism. (See Hyp-NOTISM).

Anise, an umbelliferous plant, cultivated in Malta and Spain for the sake of its aromatic and carminative seeds which form a profitable article of export and commerce. Its scent tends to neutralize other smells.

Anjou or Beague, Battle of, between the English and French; the latter commanded by the Dauphin of France March 22, 1421. The English were defeated; the Duke of Clarence was slain by Sir Allan Swinton, a Scotch knight, and 1,500 men perished on the field; the Earls of Som-

erset, Dorset and Huntingdon were taken prisoners. This was the first battle that turned the tide of success against the English.

Anna Comnena, daughter of Alexius Comnenus I., Byzantine emperor, She was born 1083, and died 1148, After her father's death she endeavored to secure the succession to her husband. Nicephorus Briennius, but was baffled by his want of energy and ambition. She wrote (in Greek) a life of her father Alexius, which, in the midst of much fulsome panegyric, contains some valuable and interesting information. She forms a character in Scott's "Count Robert of Paris."

Anna Ivanovna, Empress of Russia; born in 1693; the daughter of Ivan, the elder half-brother of Peter the Great. Anna died in 1740.

Annals, a history of events in chronological order, each event being recorded under the year in which it occurred. The name is derived from the first records of the Romans, which were called annales pontificum as drawn up by the pontifex maximus (chief pontiff). The name was apputed in later times to historical works in which the matter was treated with special reference to chronological arrangement as to the Annals of Tacitus.

Annapolis, the capital of Maryland, on the Severn, near its mouth, about two miles from Chesapeake Bay. It contains a college (St. John's), a state-house, and the United States naval academy. It has a fine harbor, and is the seat of an extensive oyster industry. Pop. (1930) 12,531.

Annapolis Convention, a convention that met in Annapolis, Md., Sept. 11, 1786, to consider changes in the Articles of Confederation, but effected nothing.

Ann Arbor, city and capital of Washtenaw county, Mich.; on the Huron river; 38 miles W. of Detroit; manufactures farm implements, woolen goods, furniture, carriages, and organs; and is the seat of the State University. Pop. (1930) 26,994.

Annato, or Arnotto, an orangered coloring matter, obtained from a shrub cultivated in Guiana, St. Domingo, and the East Indies. It is sometimes used as a dye for silk and cotton goods, and is much used in medicine for tinting plasters and ointments, and for giving a rich color to cheese and butter.

Anne of Austria, daughter of Philip III. of Spain, was born at Ma-drid in 1602, and in 1615 was married to Louis XIII. of France. Richelieu. fearing the influence of her foreign connections did everything he could to humble her. In 1643 her husband died, and she was left regent, but placed under the control of a council. But the parliament overthrew this arrangement, and intrusted her with full sovereign rights during the minority of her son, Louis XIV. She, how-over, brought upon herself the hatred of the nobles by her boundless confidence in Cardinal Mazarin, and was forced to flee from Paris during the wars of the Fronde. She ultimately quelled all opposition, and was able, in 1661, to transmit to her son, unimpaired, the royal authority. She spent the remainder of her life in retire-ment, and died Jan. 20, 1666. She spent

Anne, Queen of Great Britain and Ireland, was born at Twick-enham, near London, Feb. 6, 1664; the second daughter of James II., then Duke of York, and Anne, his wife, daughter of the Earl of Clarendon. She was educated according to the principles of the English Church. 1683 she was married to Prince George, brother to King Christian V. of Denmark. On the arrival of the Prince of Orange in 1688, Anne wished to remain with her father; but she was prevailed upon by Lord Churchill (afterward Duke of Marlborough) and his wife to join the triumphant party. After the death of William III., in 1702, she ascended the English throne. Her character was essentially weak, and she was governed first by Marl-borough and his wife, and afterward by Mrs. Masham. Most of the principal events of her reign are connected with the War of the Spanish Succes-The only important acquisition that England made by it was Gibraltar, which was captured in 1704. Another very important event of this reign was the union of England and Scotland, under the name of Great Britain, which was accomplished in 1707. She died, July 20, 1714. The The reign of Anne was distinguished not only by the brilliant successes of the

British arms, but also on account of the number of admirable and excellent writers who flourished at this time,

among them Pope, Swift, and Addison. Annealing, a process to which many articles of metal and glass are subjected after making, in order to render them more tenacious, and which. consists in heating them and allowing them to cool slowly.

Annelida, a class of animals belonging to the sub-kingdom articulata. the annulosa of some naturalists. They are sometimes called red blooded worms, being the only invertebrated animals possessing this character.

Annexation, a national acquisi-tion of territory. The term is properly used when adjoining territory is an-nexed, but in a loose way it is applied to the extension of a nation's sov-ereignty over any land.

Annihilationism, the theory of the utter extinction of man's being, both bodily and spiritual, either at death or at some later period. Archbishop Whately says that in the passages in Scripture in which 'death,' 'destruction,' 'eternal death,' are mentioned, the words may be taken as signifying literal death, real destruction, the utter end of things. Of late those who hold to this theory have adopted the term 'conditional immortality.

Anniston, city and county seat of Calhoun Co., Ala. The city is the cen-tre of a region of coal, iron, and timber, and the seat of a large cotton trade. Pop. (1930) 22,345.

Anniversaries, the yearly recurrence of the date upon which any past event, of historical or personal in-terest, has taken place. A number of anniversaries of interest to Americans

Jan. 8, 1815, Battle of New Or-

leans.

Jan. 17, 1706, Benjamin Franklin born. Jan. 17, 1781, Battle of the Cow-

pens, S. C.
Jan. 19, 1807, Robert E. Lee born.
Feb. Mardi Gras, New Orleans,

Feb. 12, 1809, Abraham Lincoln born.

Feb. 15, 1898, battleship "Maine" blown up.

Feb. 22, 1732, George Washington born.

Feb. 22-23, 1847, Battle of Buena

Vista.

March 5, 1770, Boston massacre. March 15, 1767, Andrew Jackson born.

April 9, 1865, Lee surrendered at Appomattox.

April 12, 1861, Fort Sumter fired

upon. April 12, 1777, Henry Clay born.

April 13, 1743, Thomas Jefferson born.

April 14, 1865, Lincoln assassinated. April 19, 1775, Battle of Lexington and Concord.

April 30, 1789, Washington was in-augurated first President. May 1, 1898, Dewey destroyed the Spanish fleet at Manila.

May 13, 1607, first English settlement in America, at Jamestown.

May 13, 1783, the Society of the Cincinnati was organized by officers

of the Revolutionary army.

May 20, 1775, Mecklenburg, N. C. Declaration of Independence.

May 20-21, 1927 Lindbergh made non-stop, solo flight, New York-Paris. May 24, 1819, Queen Victoria born. June 14, 1777, American flag adopted by Congress.

June 17, 1775, Battle of Bunker Hill. June 18, 1815, Battle of Waterloo, June 28, 1776, Battle of Fort Moultrie, Charleston, S. C.

July 1, Dominion Day in Canada. July 1-2, 1898, general assault on Santiago de Cuba. July 1-3, 1863, Battle of Gettys-

burg. July 3,

July 3, 1898, Cervera's fleet destroyed off Santiago. July 4, 1776, Declaration of In-

ton, N. J.

Anno Domini, A. D., the year of our Lord, in Latin. The Christian era began Jan. 1, in the middle of the fourth year of the 194th Olympiad, the 753rd year of the building of Rome, and in 4714 of the Julian period. This era was invented by a monk, Dionysius Exiguus, about 532. It was introduced into Italy in the 6th century, and ordered to be used by bishops by the Council of Chelsea, in 816, but was not generally employed for several centuries. Charles III. of Germany was the first who added "in the year of our Lord" to his reign, in 879.

Annuity, a fixed sum of money paid yearly. In the United States the granting of annuities is conducted by private companies or corporations. The purchase of annuities, as a system, has never gained much foothold -the endowment plan of life insurance, by which, after the lapse of a term of years, the insured receives a sum in bulk, being preferred.

Annunciation, the declaration of the angel Gabriel to the Virgin Mary informing her that she was to become the mother of our Lord. Annunciation or Lady Day is a feast in honor of the Annunciation, celebrated on the 25th of March.

Anode, the name given by Faraday to what is called by Daniell the zincode, and by various other writers the positive pole of an electric bat-tery; or, more precisely, the "way" or path by which the electric current passes out and enters the electrolyte on its way to the other pole.

Anodyne, a medicine which alleviates pain, though, if given in too large doses, it induces stupor.

Anointing, rubbing the body or some part of it with oil, often perfumed. From time immemorial the nations of the East have been in the habit of anointing themselves for the sake of health and beauty. In the Mosaic law a sacred character was attached to the anointing of the garments of the priests and things belonging to the ceremonial of worship. The custom of anointing still exists in the Roman Catholic Church in the ordination of priests and the confirmation of believers and the sac-rament of extreme unction. The ceremony is also frequently a part of the coronation of kings.

Anomalure, a genus of rodent animals inhabitating the W. coast of Africa, resembling the flying-squirrels, but having the under surface of the tail "furnished for some distance from the roots with a series of large horny scales, which, when pressed against the trunk of a tree, may subserve the same purpose as those instruments with which a man climbs up a telegraph pole to set the wires."

Anonymous, literally "without ame," applied to anything which is name, the work of a person whose name is unknown or who keeps his name secret. Pseudonym is a term used for an assumed name.

Anoplotherium, an extinct genus of the ungulata or hoofed quadrupeds, forming the type of a distinct family, which were in many respects lish geologist, born 1814; died 1880. Intermediate between the swine and the true ruminants. These animals Anstey, F., pseudonym of Thomas were pig-like in form, but possessed Anstry Guthrie, an English humorlong tails, and had a cleft hoof, with two rudimentary toes. Some of them uated from Cambridge in 1875, was

were as small as a guinea-pig, others as large as an ass.

Anosmia, a disease consisting in a diminution or destruction of the power of smelling, sometimes constitutional, but most frequently caused by strong and repeated stimulants, as snuff, applied to the olfactory nerves.

Anquetil-Duperron, Abraham Hyacinthe, a French orientalist, born in 1731. He died in 1805.

Anselm of Canterbury, a Christian philosopher and theologian; regarded by some as the founder of scholasticism; born in Aosta, Piedmont, between April 21, 1033, and April 21, 1034. In 1092 he went to England. In the following war has In the following year he England. was nominated by William Rufus Archbishop of Canterbury, and was consecrated on Dec. 4, 1093. He died in Canterbury, April 21, 1109; was canonized in 1494.

Ansgar, or Anshar, called the Apostle of the North, was born in 801 in Picardy, and he took the monastic vows in boyhood. In the midst of many difficulties he labored as a missionary in Denmark and Sweden; dying in 864 or 865, with the reputation of having undertaken, if not the first, the most successful, attempts for the propagation of Christianity in the North.

Anson, George, Lord, a celebrated English navigator, born in 1697; entered the navy at an early age and became a commander in 1722, and captain in 1724. He was for a long time on the South Carolina station. His victory over the French admiral, Jonquiere, near Cape Finisterre in 1747, raised him to the peerage. He died in 1762.

Ansonia, a city in New Haven county, Conn.; on the Naugatuck river and the New York, New Haven & Hartford railroad; 10 miles W. of New Haven; is widely noted for its extensive manufactures of clocks, and brass, copper, and woolen goods. Pop. (1930) 19,898.

called to the bar in 1880, and joined "Punch" staff in 1887.

Ant, the name that is commonly applied to various genera of hymenopterous or membranous-winged insects. Most of the species live in large companies or societies, composed of three sorts of individuals—males, females, and neuters. The males and females have long wings, which are not so much veined as in other insects of the same section, and are only temporary; the neuters, which are simply females with imperfectly developed organs, are smaller than the males and females, and are destitute of wings. The neuters perform all the labors of the anthill; they excavate the galleries, pro-cure food, and wait upon the larvæ till they are fit to leave their cells, appearing always industrious and solicitous.

Male and female ants survive, at most, till autumn, or to the commencement of cool weather, though a very large proportion of them cease to exist long previous to that time. The neuters pass the winter in a state of torpor, and of course require no food. The zoological characters of the ant family, which includes the familiar ants, are found in the females being of larger size than the males; in the sexes being winged, while the neuters are wingless; and in the antennæ possessing a long basal joint.

Antacid, an alkali, or any remedy for acidity in the stomach. Dyspepsia and diarrhœa are the diseases in which antacids are chiefly employed. The principal antacids in use are magnesia, lime, and their carbonates, and the carbonates of potash and soda.

Antananarivo, the capital of Madagascar, situated in the central Province of Imerina; of late years almost entirely rebuilt, its old timber houses having been replaced by brick. It has manufactures of metal work, cutlery, silk, etc. Pop. about 65,500. See MADAGASCAR.

Antarctic, relating to the southern pole or to the region near it. The Antarctic Circle is a circle parallel to the equator and distant from the south pole 23° 28', marking the area within which the sun does not set when on nant ungulata or hoofed mammalia, the tropic of Capricorn. The Antarc-closely resembling the deer in general

it being the average limit of the packice; but the name is often extended to embrace a much wider area. The southpolar region is much colder than the northern, temperatures of 100° having been frequently noted by the Discovery Expedition (1902-1904). The mammals in the south polar region are seals and cetaceans. Lieutenant Shackleton, in command of a British expedition, reached a point 111 m. from the South Pole in 1908, and discovered the south magnetic meridian. Somewhat later, Captain Robert F. Scott reached a point still further, and returned to England to prepare a second expedition. Meanwhile, early in 1909, the Norwegian, Roald Amundsen, sailed in the Fram and was lost sight of until late in 1911. At that time he was in the Antarctic Seas, not far from the point previously reached by Capt. Scott and Sir Ernest Shackleton. Not long after, he reached the South Pole (Dec. 14, 1911) and hoisted his country's flag. It was not will be southed by the state of th until March that he could communicate the news to the world. Capt. Scott, a month later, reached the Pole, only to find Amundsen's flag. He died on his trip out. In the autumn of 1928 Commander Byrd headed an expedition of four ships and four airplanes for extensive exploration of the Antarctic. See SOUTH POLAR EXPLORATIONS.

Ant-eater, a genus of mammalia, belonging to the order Edentata. This peculiar group of animals is exclusively found in the S. part of the American continent, where they aid in diminishing the numbers of immense hordes of ants, which desolate the country in the vicinity of their dwellings.

Antediluvian, before the flood or deluge of Noah's time; relating to what happened before the deluge. In geology the term has been applied to organisms, traces of which are found in a fossil state in formations preceding the diluvial, particularly to extinct animals such as the paleotherium, the mastodon, etc.

Antelope, the name given to the members of a large family of rumitic Circle has been arbitrarily fixed on appearance, but essentially different in as the limits of the Antarctic Ocean, nature from the latter animals. Well known species are the chamois (European), the gazelle, the addax, the eland, the koodoo, the gnu, the springbok, the sasin or Indian antelope, and the prongbuck of America.

Antennæ, the name given to the movable jointed organs of touch and hearing attached to the heads of insects, myriapods, etc., and commonly called horns or feelers. They present

a very great variety of forms.

Antenna, Wireless, the aerial wires used for wireless communication.

Anthelion, a luminous ring, or rings, seen by an observer, especially in Alpine and polar regions, around the shadow of his head projected on a cloud or fog bank, or on grass covered with dew, 50 or 60 yards distant, and opposite the sun when rising or setting. It is due to the refraction of light.

Anthem, orginally a hymn sung in alternate parts; in modern use, a sacred tune or piece of music set to words taken from the Psalms or other parts of the Scriptures.

Anthemius, a Greek mathematician and architect of Lydia; designed the Church of St. Sophia at Constantinople, and is credited with the invention of the dome; died A. D. 544.

Anther, an organized body constituting part of a stamen, and attached to the apex of the filament.

Anthology, a collection of poems or other literary forms contributed by a variety of authors and usually contained in a single volume.

Anthon, Charles, an American classical scholar, born in New York city, Nov. 19, 1797. He was for many years Professor of Ancient Languages at Columbia College. A beautiful edition of Horace first made him famous among scholars. His best known work was an edition of Lempriere's "Classical Dictionary" (1841). He was also the editor of over 50 classical text-books. He died July 29, 1867.

Anthony, Henry Brown, an 'American legislator, born in 1815; was graduated at Brown University in 1833; became editor and publisher in 1833; became editor and publisher illegal voting, and fined, but the fine of the "Journal," in Providence, R. I.; elected Governor of Rhode Island in 1849 and 1850; United States Sentator from 1859 till his death; and en, in London, England, in 1899. In

was elected President pro tem. of the United States Senate in 1863, 1871, and 1884. He died in 1884.

Anthony, St., the founder of monastic institutions, born near Heraclea, in Upper Egypt, A. D. 251; died 356. His day, the 17th of Jan., is a popular celebration in the Church.

Anthony's Fire, so called from him, a disease of the Middle Ages that dried up and blackened every limb it attacked, as if it were burnt.

Anthony, St., Falls of, a noted fall in the Mississippi river, now within the city limits of Minneapolis, Minn. The perpendicular fall is 17 feet, with a rapid below of 58 feet. An island divides the river into two parts. The entire descent of the stream for three-quarters of a mile is 65 feet. The falls and surrounding scenery, especially during the spring floods, are exceedingly picturesque.

Anthony, Susan Brownell, an American reformer, born in South Adams, Mass., Feb. 15, 1820; was of Quaker parentage; educated at a Friends' school in Philadelphia, and taught school in New York in 1835-1850. In 1847 she first spoke in public, taking part in the temperance movement and organizing societies. In 1852 she assisted in organizing the Woman's New York State Temperance Society; in 1854-1855 she held con-ventions, in each county in New York, in behalf of female suffrage. In 1857 she became a leader in the anti-slavery movement, and in 1858 advocated the coëducation of the sexes. She was influential in securing the passage by the New York Legislature, in 1860, of the act giving married women the possession of their earnings, and guardianship of their children. In 1868, with Mrs. E. C. Stanton and Parker Pillsbury, she began the publication of the "Revolutionist," a paper devoted to the emancipation of woman. In 1872 she cast ballots at the State and Congressional election in Rochester, N. Y., to test the application of the 14th and 15th Amendments of the United States Constitution. She was indicted for illegal voting, and fined, but the fine was never exacted. Her last public

1900 her birthday was celebrated by an affecting popular demonstration in Washington, D. C., and she retired from the presidency of the National American Woman Suffrage Association. She died March 13, 1906.

Anthracene, a substance obtained

in the distillation of coal-tar.

Anthracite, glance, or blind coal, a non-bituminous coal of a shining luster, approaching to metallic, and which burns without smoke, with a weak or no flame, and with intense heat. It is found in large quantities in the United States, chiefly in Pennsylvania.

Anthrax, a fatal disease to which cattle, horses, sheep, and other animals are subject, always associated with the presence of an extremely minute micro-organism (Bacillus anthracis) in the blood. It is also called splenic fever, and is communicable to man, appearing as carbuncle, malignant pustule, or wool-sorter's disease. In recent years the disease has become quite prevalent in the United States, especially among furriers and people wearing fur coats and collars.

Anthropoid, resembling man; a term applied especially to the apes, which approach the human species.

Anthropology, the science of man in the widest sense of the term.

Anthropometry, the measurement of the human body to discover its exact dimensions and the proportions of its parts, for comparison with its dimensions at different periods, or in different races or classes.

Anti-Christ, anyone who denies the Father and the Son; or who will not confess that Jesus Christ is come in the flesh, or who, leaving the Church, pretends to be the Christ (or Messiah), and thus becomes a rival and enemy of Jesus, the true Christ.

Anticosti, an island in the Gulf of St. Lawrence, which it divides into two channels, with lighthouses at different parts of the coast. It is about 140 miles long, and 30 miles broad in the center. Pop. (1900) 250.

Antidote, a medicine to counteract the effects of poison. For Arsenic, use tablespoonful of "dialized iron," four doses in two hours, followed by castor oil; Phosphorus, Matches, "Rough on Rats," large amounts of gum arabic, emetics and epsom salts; CARBOLIC ACID, use epsom salts, sweet oil, white of eggs; CHOLORAL, ipecac in water, 25-35 grains, hypodermic injection of 20th part of grain of strychnine, friction, warmth and artificial respiration; OPIUM, MORPHINE, empty the stomach, inhale ammonia, and give half grain permanganate of potash once an hour. Keep the patient from sleep, and give frequent doses of 30 grains tincture of belladona, to keep up circulation.

Antietam, a small river in Pennsylvania and Maryland which empties into the Potomac six miles N. of Harper's Ferry. On Sept. 17, 1862, a battle was fought on its banks near Sharpsburg, between a Federal army of 87,164 men, under General McClelan, and a Confederate army variously reported at from 40,000 to 97,000 men, under General Lee. The Federal casualties aggregated 12, 469, and the Confederate, from 12,000 to 25,000. General Lee recrossed the Potomac on the following day, and the general consensus is that the battle was a Federal victory.

Antifebrin, a neutral chemical product derived from acetate of aniline at an elevated temperature by a dialytic action in which water is set free.

Anti-Federalists, members of a political party, in the United States, which opposed the adoption and ratification of the constitution, and failing in this, strongly favored the strict construction of that instrument. Thomas Jefferson was its leader, but he partially abandoned the principles of the party when he sanctioned the Louisiana Purchase.

Antigua, one of the British West Indies, the most important of the Leeward group; 28 miles long, 20 broad; area, 108 square miles; discovered by Columbus, 1493. Pop., including Barbuda and Redonda (1921) 32,500.

Antilles, another name for the West Indian Islands. Subdivided into Greater Antilles and Lesser Antilles.

Antigone, in Greek mythology the daughter of Œdipus and Jocasta, celebrated for her devotion to her father and to her brother Polynices, for burying whom against the decree of King Creon she suffered death.

E.-5.

Antimachus, a Greek epic and elegiac poet; flourished about 400 B. C.

Anti-Masonic Party, a political organization in opposition to Freemasonry. In 1828 this party polled 23,000 in New York State; in 1829, about 70,000; and in 1830, about 128,000.

Anti-Mission Baptists, a sect in the United States who also called themselves "Old School Baptists," founded about 1835. They do not believe in Sunday schools, colleges or theological seminaries, holding that the salvation of men does not depend upon human instrumentalities, but upon divine grace only.

Antimony, in chemistry, a triad metallic element, but in some less staple compounds it appears to be pentad.

Antinomianism (Greek, anti, "against," and nomos, "law"), the doctrine or opinion that Christians are freed from obligation to keep the law of God. It is generally regarded, by advocates of the doctrine of justification by faith, as a monstrous abuse and perversion of that doctrine, upon which it usually professes to be based.

Antinous, a young Bithynian whom the extravagant love of Adrian has immortalized. He drowned himself in the Nile in 122 A.D. Adrian set no bounds to his grief for his loss. He gave his name to a newly-discovered star, erected temples in his honor, called a city after him, and caused him to be adored as a god throughout the empire.

Antioch (ancient, Antiochia), capital of the Greek kings of Syria; on the Orontes; about 21 miles from the sea. It was founded by Seleucus Nicator, in 300 B. C., and was named after his father Antiochus. Famous in ancient times, and the place where the disciples of Christ were first called Christians, it is now a poor place with about 20,000 inhabitants.

Antiochus III., surnamed the Great, born B. C. 242, succeeded in B. C. 223. The Romans defeated him by sea and land, and he was finally overthrown by Scipio at Mount Sipylus, in Asia Minor, B. C. 190, and very severe terms were imposed upon him. He was killed while plundering a temple in Elymais to procure money to pay the Romans.

Antiochus IV., called Epiphanes, youngest son of the above, is chiefly remarkable for his attempt to extirpate the Jewish religion, and to establish in its place the polytheism of the Greeks. This led to the insurrection of the Maccabees, by which the Jews ultimately recovered their independence. He died B. C. 164.

Antipædobaptist, one who is opposed to the doctrine of infant baptism.

Antiparos, one of the Cyclades (islands), in the Grecian Archipelago, containing a famous stalactitic grotto or cave.

Antipater, a general and friend of Philip of Macedon, father of Alexander the Great. He died in B. c. 317, at an advanced age.

Antipater, procurator of Judea for the Romans from 47 to 43 B. C. He received the appointment from Julius Cæsar; and died from poison in the last mentioned year. He was the father of Herod the Great.

Antipathy, a special dislike exhibited by individuals to particular objects or persons, usually resulting from physical or nervous organization.

Antiperiodics, medicines which prevent or relieve the paroxysms of certain diseases which exhibit a periodic character.

Antiphlogistic, a term applied to medicines or methods of treatment that are intended to counteract inflammation, such as blood letting, purgatives, diaphoretics, etc.

Antiphony, opposition or contrariety of sound; also the alternate chanting or singing in a cathedral, or similar service by the choir, divided into two parts for the purpose, and usually sitting upon opposite sides.

Antipodes, the name given relatively to the people or places on opposite sides of the earth, so situated that a line drawn from one to the other passes through the center of the earth and forms a true diameter. The longitudes of two such places differ by 180°. The difference in their time is about 12 hours, and their seasons are reversed.

Antipope, a pontiff elected in opposition to one canonically chosen.

Antipyretics, medicines which reduce the temperature in fever.

Antipyrine, an alkaloid extensively used in medicine as an antipyretic, and possessing the valuable property of materially reducing the temperature of the body without the production of any distressing bodily symptoms. Hence, it is much resorted to in fevers, pneumonia, acute rheumatism, phthisis, and erysipelas. To produce a more rapid action the drug is often injected hypodermically.

Antiquaries, those devoted to the study of ancient times through their relics, as old places of sepulcher, remains of ancient habitations; early monuments, implements or weapons, statues, coins, medals, paintings, inscriptions, books, and manuscripts, with the view of arriving at a knowledge of the relations, modes of living, habits, and general condition of the people who created or employed them. The American Antiquarian Society was organized in 1812, and has its headquarters in Worcester, Mass.

Antique, a province of Panay, Philippine Islands, on the W. coast; area, with dependent islands, 1,340 square miles; pop. (1903) 131,245, of whom 2,921 were wild; chief native race, Visayan; is rich in minerals.

Anti-Rent Party, a party which gained some political influence in New York, and which had its origin in the refusal of tenants, who were dissatisfied with the patroon system to pay rent. The matter was settled by compromise in 1850. The patroons were early Dutch settlers who received vast tracts of land in what is now New York, on conditions which made them virtually feudal lords of the soil. The tenants rebelled against these conditions, and popular sympathy being with them, the heirs of the patroons were brought to terms by legislation inimical to the system under which they held their lands, while at the same time the rights of property were sustained.

Antiscorbutics, remedies against scurvy. Lemon juice, ripe fruit, milk, salts of potash, green vegetables, potatoes, fresh meat, and raw or lightip boiled eggs, are some of the principal antiscorbutics.

Anti-Semites, the modern opponents of the Jews in Russia, Rumania, Hungary, and Eastern Germany. In France the second trial of Capt. Alfred Dreyfus, in 1899, aroused an intense anti-Semitic feeling. The cruel massacre of Jews in Kishineff, Russia, by an anti-Semitic mob, in 1903, excited indignation throughout the civilized world.

Antisepsis, the exclusion of microbes or bacteria from wounds, etc., by the use of antiseptics or other means in order to prevent putrefaction, infection, or blood-poisoning.

Antiseptic, a substance which has the effect of counteracting the tendency to putrefaction. Garrod makes disinfectants and antiseptics the second order of his Division III. Chemical agents used for other than their medicinal properties. Antiseptics prevent chemical change by destroying the putrefactive microbes or bacteria, the chemical composition of the body still in many cases remaining the same; while disinfectants decompose and remove the infectious matter itself. Antiseptics are called also colytics. Among them may be named carbolic acid, alcohol, sulphurous acid, chloride of sodium (common salt), etc.

Antiseptic Surgery, treatment to kill germs in accidental wounds, and surgical operations.

Antispasmodics, medicines which are used to prevent or allay spasms. In all spasmodic diseases, cold baths or sponging, sun-baths, moderate exercise, and a plain but nutritious diet should be employed; late hours, a close atmosphere, exhausting emotions, or excessive mental or bodily work should be ayoided.

Antisthenes, a Greek philosopher and the founder of the school of Cynies, born at Athens about B. c. 444. He held virtue to consist in complete self denial and disregard of riches, honor, or pleasure of every kind. He himself lived as a beggar. He died in Athens at an advanced age.

Antithesis, a sharp opposition or contrast between word and word, clause and clause, sentence and sentence, or sentiment and sentiment, especially designed to impress the listener or reader.

Antitoxine, the name given to a new remedy for diphtheria. The de-crease of deaths from this disease since the introduction of this remedy is remarkable, and in most large cities it is provided free to all unable to pay for the medicine.

Anti-Trade, a name given to any of the upper tropical winds which move northward or southward in the same manner as the trade-winds which blow beneath them in the opposite direction.

Antitrinitarians, all who do not eceive the doctrine of the Divine frinity, or the existence of three persons in the Godhead; especially applied to those who oppose such a doctrine on philosophical grounds, as contrasted with Unitarians, who reject the doctrine as not warranted by Scrip-

Antlers, bony outgrowths from the frontal bones of almost all the members of the deer family. Except in the reindeer, they are restricted to the males.

Ant Lion, the larva of an insect, of the order of neuroptera, remarkable for its ingenious methods of capturing ants and other insects, on which it feeds, by making pitfalls in the sand. Some species are common in North America.

Antoinette, Marie (MARIE AN-TOINETTE JOSEPH JEANNE DE LOR-RAINE), Archduchess of Austria and Queen of France; the youngest daughter of the Emperor Francis I. and of Maria Theresa; born in Vienna, Nov. 2, 1755. She became wife of the dauphin, afterward Louis XVI. of France, and perished with him in the Revolution. Louis was executed on Jan. 21, 1793. The dauphin, their son, who afterward perished miserably in confinement, was next separated from the queen, and on Aug. 2, 1793, Marie Antoinette was transferred to the Conciergerie to be brought before the Revolutionary tribunal. The act of accusation was completed on Oct. 14. She was condemned at 4 A. M. on Oct. 16, 1793, and at 11 A. M. was led from the Conciergerie to the place of execution. She died with the firmness that became her character.

Seminary of Rome, where he attracted the attention of Pope Gregory XVI., who appointed him to several important offices. On the accession of Pius IX., in 1846, Antonelli was raised to the dignity of cardinal-deacon; two years later he became president and minister of foreign affairs, and, in 1850, was appointed Secretary of State. During the sitting of the Ecumenical Council (1869-1870) he was a prominent champion of the papal interest. He strongly opposed the assumption of the united Italian crown by Victor Emmanuel. He died in 1876.

Antoninus, Wall of, a barrier erected by the Romans in Britain, across the isthmus between the Forth and the Clyde, in the reign of Antoninus Pius.

Antoninus Pius (TITUS AURE-LIUS FULVUS), Roman emperor, of a family originally from Nemausus (now Nimes), in Gaul; was born in Lavinium, in the neighborhood of Rome, A. D. 86. He died A. D. 161. His remains were deposited in the tomb of Hadrian. His adopted sons built a pillost his measure to foos built a pillar to his memory, the frag-ments of which were found at Rome in 1705.

Antonius, Marcus (Mark Antony), Roman triumvir, born 83 B. C., was connected with the family of Cæsar by his mother. When war broke out between Cæsar and Pompey. Antony led reinforcements to Cæsar in Greece, and, in the battle of Pharsalia he commanded the left wing. He afterward returned to Rome with the appointment of master of the horse and governor of Italy (47). In B. C. 44 he became Cæsar's colleague in the consulship. In the struggle for the empire of Rome which followed the murder of Cæsar, Antony was overcome by Octavianus (afterward called Augustus), Cæsar's nephew and heir. His passion for Cleopatra, Queen of Egypt, enthralled his faculties, and Egypt, enthralled his faculties, and made him an easy prey to his great political rival. Antony lost, in the naval battle at Actium (B. C. 31), the dominion of the world. He followed Cleopatra to Alexandria, and, on the arrival of Octavianus his floot and expalse deserted arral his irfleet and cavalry deserted, and his in-Antonelli, Giacomo, Cardinal, fantry was defeated. Plutarch says born 1806; was educated at the Grand that Antony commanded his slave

Eros to slay him, but the slave killed himself instead. Moved by this exhibition of heroic affection and deceived by a false report which Cleopatra had disseminated of her death, he fell upon his own sword (B. c. 30). On being told that Cleopatra was still alive, he caused himself to be carried into her presence, that he might die in her arms.

Ant Thrush, a name given to certain passerine or perching birds having resemblances to the thrushes and supposed to feed largely on ants.

Antwerp, the chief port of Belgium, and the capital of a province of the same name, on the Scheldt, about 50 miles from the open sea. It is strongly fortified, being completely surrounded on the land side by a semicircular inner line of fortifications, the defenses being completed by an outer The catheline of forts and outworks. dral, with a spire 400 feet high, is one of the largest and most beautiful specimens of Gothic architecture in Belgium. There are numerous and varied industries. Pop. (1926) 300,175.

After the German invasion of Belgium at the outbreak of the World War, this beautiful city became an early victim of Teutonic ruthlessness. It was occupied by the invaders on Oct. 9, 1914, after its most magnificent buildings had been wrecked or damaged by shell-fire. See APPENDIX:

World War.

Anus, the opening at the lower or posterior extremity of the alimentary canal through which the excrement or waste products of digestion are expelled.

Aorta, the great arterial trunk. which rises from the left ventricle of the heart, and with its branches, extends throughout the whole body. blood travels through the aorta at the rate of 300 to 500 millimetres a second.

Aoudad, a remarkable species of sheep, with certain affinities to the goats. It inhabits mountainous regions in Abyssinia and Barbary.

Apaches, a tribe of North Amerinumerous, living in portions of Texas, New Mexico, and Arizona, and belonging to the Athabascan family. They can Indians, formerly very fierce and numerous, living in portions of Texas,

were long the scourge of the frontiers. and resisted obstinately every attempt to civilize them. Long after the annexation of their territory by the United States they continued their raids in spite of severe defeats. An attempt made by the United States Government to confine the Apaches within a reserved territory in Arizona led to bloodshed in 1871. The number of the Apaches within the United States may be put at nearly 7,000.

Apartment House, a structure

built to accommodate a number of families each in its own set of rooms, which form a separate dwelling with an entrance of its own. The term is chiefly used in the United States, where such dwellings are of comparatively recent introduction; but houses of this kind have long been built in Europe. Nearly every large American city now has many such buildings, some costing over \$10,000,000 each and containing suites of rooms from two to twenty-five each in number, with yearly rentals as high as \$100,000.

Modern apartment buildings are of steel and concrete construction, with ventilating system, mechanical refrigeration, elevator service, walls insulated against heat, cold, and noise. While apartment buildings were usually erected on residence streets, the zoning system in force in many cities keeps them off certain streets where individual homes exist, and also re-strict height, and specify the amount of air space allowed and other health and safety regulations. The size of the modern city has caused the build-ing of apartment buildings at the edge of business sections in New York, Chicago, and other of the larger cities. In buildings that are twenty to forty stories in height, the upper floors are set back in eschalon, or are in towers. The pent-house, formerly a small shed on the roof, is now frequently a bungalow, and the choicest residence in the building.

The word "tenement" is used to designate a poor grade apartment hous-ing many families, and usually in a poor neighborhood, although, in its legal sense this word means a house sheltering several separate families.

Ape, a common name of a number of quadrumanous animals, inhabiting the Old World (Asia and the Asiatic islands, and Africa), and including a variety of species. The word ape was formerly applied indiscriminately to all quadrumanous mammals; but it is now limited to the anthropoid or manlike monkeys. The family includes the chimpanzee, gorilla, orang-outang, etc.

Apelles, the most famous of the painters of ancient Greece and of antiquity, was born in the 4th century B. C., probably at Colophon. His renown was at its height about B. C. 330, and he died about the end of the century.

Apennines, a prolongation of the Alps, forming the "backbone of Italy." On the S. slopes volcanic masses are not uncommon. Mount Vesuvius, the only active volcano on the continent of Europe, is an instance. The lower slopes are well clothed with vegetation, the summits are sterile and bare.

Apepi, in heathen mythology, the Great Serpent or Typhon, the embodiment of evil.

Aperient, a medicine which, in moderate doses, gently but completely opens the bowels; examples, castor-oil, Epsom salts, senna, etc.

Aphasia, in pathology, a symptom of certain morbid conditions of the nervous system, in which the patient loses the power of expressing ideas by means of words, or loses the appropriate use of words, the vocal organs the while remaining intact and the intelli-gence sound. There is sometimes an entire loss of words as connected with ideas, and sometimes only the loss of a few. In one form of the disease, called aphemia, the patient can think and write, but cannot speak; in another, called agraphia, he can think and speak, but cannot express his ideas in writing. In a great majority of cases, where post mortem examinations have been made, morbid changes have been found in the left frontal convolution of the brain.

Aphelion, that part of the orbit of the earth or any other planet in which it is at the point remotest from the sun.

Aphis, a genus of insects, the typical one of the family aphidæ. The species of aphides are very numerous, and are generally called after the plants on which they feed.

Aphonia, in pathology, the greater or less impairment, or the complete loss of the power of emitting vocal sound.

Aphrodite, one of the chief divinities of the Greeks, the goddess of love and beauty, so called because she was sprung from the foam (aphros) of the sea. Aphrodite has had the most important place in the history of art as the Greek ideal of feminine grace and beauty.

Apia, the principal town and commercial emporium of the Samoan Islands in the South Pacific Ocean; on the N. coast of the island of Upolu, about midway between the E. and W. extremities of the island. It has a small harbor, which is usually a safe one. In 1889, during a hurricane, sev-

eral United States' and German warvessels were wrecked here, a British

man-of-war alone escaping. Apis, a bull to which divine honors were paid by the ancient Egyptians, who regarded him as a symbol of Osiris. At Memphis he had a splendid residence, containing extensive walks and courts for his entertainment, and he was waited upon by a large train of priests, who looked upon his every movement as oracular. He was not suffered to live beyond twenty-five years, being secretly killed by the priests and thrown into a sacred well. Another bull, characterized by certain marks, as a black color, a triangle of white on the forehead, a white crescent-shaped spot on the right side, &c., was selected in his place. His birth-

day was annually celebrated.

Apocalypse, the name frequently given to the last book of the New Testament, in the English version called the Revelation of St. John the Divine.

Apocalyptic Number, the mystic number 666 found in Rev. xiii. 18. As early as the 2d century ecclesiastical writers found that the name Antichrist was indicated by the Greek characters expressive of this number.

Apocalyptic Writings, writings such as, like the prophecies of Daniel, their prototype, set forth in a figura-

tive and pictorial manner the future progress and completion of the world's history, especially in its religious aspects. The two apocalyptic books received into the canon of Scripture are the books of Daniel and the Apocalypse especially so-called, the Revelation of St. John.

Apocrypha, in the early Christian Church, (1) books published anonymously; (2) those suitable for private rather than public reading; (3) books deemed unauthentic though purporting to be written by sacred authors; (4) dangerous books written by heretics.

Apodal Fishes, the name applied to such malacopterous fishes as want ventral fins. They constitute a small natural family, of which the common eel is an example.

Apogee, that point in the orbit of the moon or a planet where it is at its greatest distance from the earth; properly this particular part of the moon's orbit.

Apollinarians, a sect of Christians who maintained the doctrine that the Logos (the Word) holds in Christ the place of the rational soul, and consequently that God was united in him with the human body and the sensitive soul. Apollinaris, the author of this opinion, was, from A. D. 362 till at least A. D. 382, Bishop of Laodicea, in Syria.

Apollo, son of Zeus (Jupiter) and Leto (Latona). From being the god of light and purity in a physical sense he gradually became the god of moral and spiritual light and purity, the source of all intellectual, social, and political progress.

Apollodorus, a famous Athenian painter, about B. C. 408.

Apollodorus, born in Damascus, and lived in the reigns of Trajan and Hadrian. His fame as an architect caused the former to employ him in building a great stone bridge over the Danube, and other works. Apollodorus subsequently falling into disgrace with the Emperor Hadrian, was put to death by his command.

Apollonius, a Pythagorean philosopher, born at Tyana, about the beginning of the Christian era. He died at Ephesus about A. D. 97.

Apollonius of Perga, Greek mathematician, called the "Great Geometer," flourished about 240 B. C., and was the author of many works, only one of which, a treatise on "Conic Sections," partly in Greek and partly in an Arabic translation, is now extant.

Apollonius of Rhodes, a Greek poet, born in Egypt, but long residing at Rhodes, where he founded a school of rhetoric. He afterward became keeper of the famous library of Alexandria, B. C. 149.

Apollonius of Tyre, the hero of a Greek metrical romance, very popular in the Middle Ages.

Apollos, a Jew of Alexandria, who learned the doctrines of Christianity at Ephesus from Aquila and Priscilla, became a preacher of the gospel in Achaia and Corinth, and an assistant of Paul in his missionary work. Some have regarded him as the author of the Epistle to the Hebrews.

Apollyon, a name used in Rev. ix: 11 for the angel of the bottomless pit.

Apologetics, the department of theology which treats of the establishment of the evidences and defense of the doctrines of a faith. Christian apologetics, generally called simply apologetics, treats of the evidences of Christianity, and seeks to establish the truth of the Bible and the doctrines educed from it.

Apologue, a story or relation of fictitious events intended to convey some useful truths. It differs from a parable in that the latter is drawn from events that pass among mankind, whereas the apologue may be founded on supposed actions of brutes or inanimate things. Æsop's fables are good examples of apologues.

Apology, a term at one time applied to a defense of one who is accused, or of certain doctrines called in question.

Apoplexy, a serious malady, coming on so suddenly and so violently that anciently anyone affected by it was said to be attonitus (thunderstruck), or sideratus (planetstruck). When a stroke of apoplexy takes place, there is a loss of sensation, voluntary motion, and intellect or thought, while respiration and the action of the heart and general vascular system still con-

tinue. The disease now described is properly called cerebral apoplexy, the brain being the part chiefly affected.

Apostate, literally designates anyone who changes his religion, what-ever may be his motive; but, by custom, the word is always used in an injurious sense, as equivalent to one who, in changing his creed, is actuated by unworthy motives.

Apostle, one who is sent off or away from; one sent on some important mission; a messenger; a missionary. The name given, in the Christian Church, to the 12 men whom Jesus selected from His disciples as the best instructed in His doctrines, and the fittest instruments for the propagation of His religion. Their names were as follows: Simon Peter, Andrew, his brother; James the greater, and John, his brother, who were sons of Zebedee; Philip of Bethsaida, Bartholomew, Thomas, Matthew; James, the son of Alpheus, commonly called James the less; Lebbeus, his brother, who was surnamed Thaddeus, and was called Judas, or Jude; Simon the Canaanite, and Judas Iscariot. Of this number, Simon Peter, John, James the greater, and Andrew were fishermen; and Matthew, a publican or tax-gatherer. When the apostles were reduced to 11 by the suicide of were reduced to 11 by the suicide of Judas, who had betrayed Christ, they chose Matthias by lot, on the proposition of St. Peter. Soon after, their number became 13, by the miraculous vocation of Saul, who, under the name of Paul became one of the most zealous propagators of the Christian faith.

Islands, Apostles' or Twelve Apostles, a group of 27 islands in Lake Superior. They belong to Wisconsin. They were first settled in 1680 by the French.

Apostolic, or Apostolical, pertaining or relating to the apostles.

Apostolic Church.—The Church in

the time of the apostles, constituted according to their design. The name is also given to the four churches of Rome, Alexandria, Antioch, and Jerusalem, and is claimed by the Roman Catholic Church, and occasionally by the Episcopalians.

Apostolic Constitutions and Canons. - A collection of regulations attrib-

uted to the apostles, but generally supposed to be spurious. They appeared in the 4th century; are divided into eight books, and consist of rules and precepts relating to the duty of Christians, and particularly to the cere-monies and discipline of the Church.

Apostolic Delegate.—A permanent representative of the Pope in a foreign country. It is sometimes confounded with the word ablegate, the latter meaning a temporary represen-tative of the Pope for some special

function.

Apostolic Fathers.—The Christian writers who, during any part of their lives, were contemporary with the apostles. There are five—Clement, Barnabas, Hermas, Ignatius, Poly-

Apostolic King.—A title granted by the Pope to the Kings of Hungary, first conferred on St. Stephen, the founder of the royal line of Hungary, on account of what he accomplished in the spread of Christianity.

Apostolic See .- The see of the Popes or Bishops of Rome; so called because the Popes profess themselves the successors of St. Peter, its

founder.

Apostolic Succession.—The uninter-rupted succession of bishops, and, through them, of priests and deacons (these three orders of ministers being called the apostolical orders), in the Church by regular ordination from the first apostles down to the present day. All Episcopal churches hold theoretically, and the Roman Catholic Church and many members of the Eng. lish Church strictly, that such succession is essential to the officiating priest, in order that grace may be communicated through his administrations.

Apostrophe. In rhetoric, a figure of speech by which, according to Quintilian, a speaker turns from the rest of his audience to one person, and addresses him singly.

In grammar, the substitution of a mark like this (') for one or more letters omitted from a word, as the' for though, 'twas for it was, king's for

The mark indicating such substitution, especially in the case of the possessive.

Apothecary, the name formerly given to members of an auxiliary branch of the medical profession.

In the United States, state laws generally require that apothecaries shall be duly examined and licensed.

Apotheosis, a deification; the placing of a prince or other distinguished person among the heathen deities.

Appalachian Mountains, also called Alleghanies, a vast mountain range in North America, extending for 1,300 miles from Cape Gaspe, on the Gulf of St. Lawrence, S. W. to Alabama. The highest peaks rise over 6,600 feet (not one at all approaching the snow level), but the mean height is about 2,500 feet. Lake Champlain is the only lake of great importance in the system, but numerous rivers of considerable size take their rise here. Magnetite, hematite, and other iron ores occur in great abundance, and the coal measures are among the most extensive in the world. Gold, silver, lead, and copper are also found, but not in paying quantities, while marble, lime-stone, fire clay, gypsum, and salt abound. The forests covering many of the ranges yield large quantities of valuable timber, such as sugar maple, white birch, beech, ash, oak, cherry tree, white poplar, white and yellow pine, etc., while they form the haunts of large numbers of bears, panthers, wild cats, and wolves.

Appanage, properly, lands assigned as portions to the younger sons, or sometimes the brothers of the French king, who in general took their titles from the appanages which they held.

Apparition, according to a belief held by some, a disembodied spirit manifesting itself to mortal sight; according to the common theory an illusion involuntarily generated, by means of which figures or forms, not present to the actual sense, are nevertheless depictured with a vividness and intensity sufficient to create a temporary belief of their reality. Such illusions are now generally held to result from an overexcited brain, a strong imagination, or some bodily malady.

Appeal. The distinction between army, he persuaded M. Claudius, his appeal, which originated in the client, to gain possession of her, under civil law, and a writ of error, the pretense that she was the daughter

which is of common law origin, is that the former carries the whole case for review by the higher court, including both the facts and the law; while the latter removes only questions of law.

Appendicitis, a disease caused by inflammation, suppuration, and consequent gangrene in the tissue of the vermiform appendix, usually due to insufficient circulation of blood in the part itself.

Appendicitis usually occurs between the ages of 10 and 50 years. It is rare above or below those ages. It is more frequent among males than females, the exact proportion being unknown. The probable cause of this difference is of very recent discovery and is not even known generally among the medical profession. Dr. Clado, a French surgeon and investigator, sought an explanation of the comparative immunity of the female sex from the malady and discovered that the appendix in woman has an extra blood vessel (a small branch of the ovarian artery) that does not exist in man. This discovery was not only a bit of new knowledge of great value, but was an additional proof of the theory that disease of the appendix is often due in part to its want of vital resistance.

Appiani, Andrea, a painter, born at Milan in 1754. Napoleon appointed him court painter, and portraits of almost the whole of the imperial family were painted by him. He died in 1817.

Appian Way, the great Roman highway constructed by the belowmentioned Appius Claudius, from Rome to Capua, and afterward extended to Brundusium, and finished B. c. 312. It was built of stones four or five feet long, carefully joined to each other, covered with gravel, furnished with stones for mounting and descending from horseback, with milestones, and with houses at which to lodge.

Appius, Claudius Crassinus, a Roman decemvir (451 to 449 B. C.). Being passionately in love with Virginia, daughter of Virginius, a respectable plebeian absent with the army, he persuaded M. Claudius, his client, to gain possession of her, under the pretures that she was the daughter.

of one of his slaves. Virginius, hurriedly recalled from the army by his friends, appeared and claimed his daughter; but, after a mock trial, she was adjudged to be the property of was adjudged to be the property of Marcus Claudius. To save his daugh-ter from dishonor, the unhappy father seized a knife and slew her. The popwas headed by the senators Valerius and Horatius, who hated the decemvirate. The army returned to Rome with Virginius, who had carried the news to them, and the decemviri were deposed. Appius Claudius died in prison, by his own hand (as Livy states), or was strangled by order of the tribunes.

Apple, the fruit of the pyrus malus, a species of the genus pyrus. All the different kinds of apple trees now in cultivation are usually regarded as mere varieties of the one species which, in its wild state, is known as the crab-tree. The uses of the apple for culinary and conserving processes are sufficiently well known. Cider, the fermented juice of the apple, is a favorite drink in some places of the United States.

Apple of Discord, in Greek mythology, the golden apple thrown into an assembly of the gods by the god-dess of discord (Eris), bearing the in-scription "For the fairest." Aphrodite (Venus), Hera (Juno), and Pallas (Minerva) became competitors for it, and its adjudication to the first by Paris so inflamed the jealousy and hatred of Hera to all of the Trojan race (to which Paris belonged) that she did not cease her machinations till Troy was destroyed.

Apple of Sodom, a fruit described by old writers as externally of fair appearance, but turning to ashes when plucked; probably the fruit of solanum sodomeum.

Appleton, city and capital of Outagamie county, Wis.; on the Fox river and railroads; 100 miles N. W. of Milwaukee; is in a farming and has excellent lumbering section; water power for manufacturing and large industrial and mercantile interests; and is the seat of Lawrence University. Pop. (1930) 25,267.

graduated at Brown University in 1863; was instructor in chemistry there in 1863-1868; and in the last year became professor of that department.

Appleton, Nathan and Samuel. American merchants and philanthropists, brothers, born in 1779 and 1766 respectively; engaged in the manufacture of cotton goods; were founders of the city of Lowell, Mass.; and widely known for their active benevolence. Nathan set up the first power loom ever used in the United States, in his Waltham mill. Nathan died in 1861; Samuel in 1853.

Appomattox Court House, a village in Appomattox county, Va., 20 miles E. of Lynchburg. Here, on April 9, 1865, General Lee surrendered to General Grant, and thus virtually concluded the Civil War.

Apportionment Bill, a bill adopted by the United States Congress every 10 years, and directly after the completion of the Federal century which describes the completion of the Federal century which describes the constant of the completion of the Federal century which describes the constant of the constant of the complete of the constant of the cons sus, which determines the number of members that each State is entitled to send to the National House of Representatives, and provides for the necessary reorganization of the Congressional electoral districts. The apportionment based on the enumeration of 1910 was one representative to 212.-407 population.

Apprenticeship, in law, a contract by which a person who under-stands some art, trade, or business, and called master, undertakes to teach the same to another person, commonly a minor, and called the apprentice, who, on his part, is bound to serve the master, during a definite period of time, in such art, trade, or business.

Appropriation, a specific sum set apart by the legislative power for a designated purpose. In the United States all bills for appropriating money originate in the House of Representatives; but may be amended in the Senate. The same procedure is observed in the several States.

Approximation, a term used in mathematics to signify a continual approach to a quantity required, when no process is known for arriving at it Appleton, John Howard, an exactly. Although, by such an approx-American chemist, born in 1844; was imation, the exact value of a quantity

cannot be discovered, yet, in practice, it may be found sufficiently correct.

Apraxin, Feodor Mateievitch, a Russian admiral, born in 1671. He may be considered as the creator of the Russian navy, and was the most powerful and influential person at the court of Peter the Great, who made him chief-admiral. He died in 1724.

Apricot, a fruit, that of the prunus armeniaca; also the tree on which it grows. It is wild in Africa and in the Caucasus, where the mountains in many places are covered with it; it is found also in China and some other countries. It is esteemed only second to the peach.

April, the fourth month of the year.

April-fools' Day.— The first day of April, so called from the old custom of sending any one, on this day, upon a bootless errand. This strange custom of April-fools' day exists throughout Europe, and in those parts of the United States where the traditions of the mother-country prevail. One of the explanations of the custom is as follows: In the Middle Ages, scenes from Biblical history were often represented by way of diversion, without any feeling of impropriety. The scene in the life of Jesus, where He is sent from Pilate to Herod, and back again from Herod to Pilate, was represented in April, and may have given occasion to the custom of sending on fruitless errands, and other tricks practiced at this season.

ZPTERYX OR KIWIKIWI.

Apteryx, a genus of birds, the typical one of the family apterygidæ. tians in the two species are known—the A. australis and A. mantelli, both from New Lord's Supper.

Zealand. The natives call the former, and probably also the latter, Kiwikiwi, which is an imitation of their peculiar cry. The A. australis is somewhat less in size than an ordinary goose. It runs when pursued, shelters itself in holes, and defends itself with its long bill; but unable as it is to fly, its fate, it is to be feared, will soon be that of the dodo—it is now almost extinct.

Apulia, formerly a part of Sapygia (so called from Sapyx, son of Dædalus), including the modern Italian provinces of Capitanata, Terra di Bari, Terra d'Otranto, etc. Area 7,376 square miles; pop. (1921) 2.240,000.

Apure, a navigable river of Venezuela, formed by the junction of several streams which rise in the Andes of Colombia; it falls into the Orinoco.

Apurimac, a river of South America, which rises in the Andes of Peru; and being augmented by the Vilcamayu and other streams forms the Ucayale, one of the principal headwaters of the Amazon.

Aqua, a word much used in pharmacy and old chemistry. Aqua fortis (= strong water), a weak and impure nitric acid. It has the power of eating into steel and copper, and hence is used by engravers, etchers, etc. Aqua marina, a fine variety of beryl. Aqua regia, or aqua regalis, a mixture of nitric and hydrochloric acids, with the power of dissolving gold and other noble metals. Aqua Tofana, a poisonous fluid made about the middle of the 17th century by an Italian woman, Tofana or Toffania, who is said to have procured the death of no fewer than 600 individuals by means of it. It consisted chiefly, it is supposed, of a solution of crystallized arsenic. Aqua vitæ (= water of life), or simply aqua, a name familiarly applied to whisky, corresponding in meaning with the usquebaugh of Ireland, the eau-devie (brandy) of the French.

Aquamarine, a name given to some of the finest varieties of beryl of a sen-green or blue color. Varieties of topaz are also so called.

Aquarians, or Aquarii, Christians in the primitive Church who used water instead of wine in the Lord's Supper.

Aquarium, an artificial tank, pond, or vessel, filled with salt or fresh water, and used, in the former case chiefly for the purpose of keeping alive marine animals in circumstances which render it easy to study their habits, and in the latter for cultivating aquatic plants.

Aquarius, in astronomy (1) the 11th of the 12 ancient zodiacal constellations, now generally called signs of the Zodiac. It is generally quoted as "Aquarius, the Water bearer."

Aquatic Animals, animals living in or about water.

Aquatic Plants, plants growing in or belonging to water.

Aqueduct, an artificial channel or conduit for the conveyance of water from one place to another; more particularly applied to structures for conveying water from distant sources for

the supply of large cities.

There are a number of important aqueducts in America. For 125 years, the city of Otumba, in Mexico, rethe city of Otumba, in Mexico, received its supply of water through the aqueduct of Zempoala, which, however, has not been used since 1700, though the aqueduct is said to be in almost perfect condition. It is 27 miles long. New York is supplied with water from Croton river, which falls into the Hudson above Sing Sing. The first aqueduct was constructed. The first aqueduct was constructed between the years 1837 and 1842, is 88 miles long, with a general declivity of 13¼ inches to the mile, and is 8 feet 5 inches in height, and 7 feet 8 inches in greatest breadth. brick, and cement are used for the en-When the conduit casing masonry. reaches the Harlem river, the water is conveyed in iron pipes over a splendid bridge, 150 feet above the river.

An aqueduct for supplying Boston with water was first built in 1846-1848, and exactly 30 years later a new aqueduct was built from the Sud-bury river to Boston, and was carried across the Charles river and Waban valley by two fine bridges. As the supply of water did not prove sufficient for the growth of the city, a large reservoir was built, taking a large part of the town of Boylston, Mass., so that it was supposed the supply of water, when the valley was mathematical figures, etc.; the whole

Aqueous Humor, the limpid watery fluid which fills the space between the cornea and the crystalline lens.

Aqueous Rocks, mechanically formed rocks, composed of matter de-Called also sediposited by water. mentary or stratified rocks.

Aquifoliaceae, a natural order of plants; the holly tribe. The species consists of trees and shrubs, and the order includes the common holly and the Paraguayan tea tree.

Aquila, a native of Pontus, cele-brated for his close translation of the

Hebrew Scriptures into Greek.

Aquila, Kaspar, a German Protestant theologian, born in Bavaria, Aug. 7, 1488; assisted Luther in the translation of the Old Testament; became pastor at Saalfeld in 1527; was outlawed by Charles V. in 1548; fled the country; and after 1552 returned to Saalfeld, where he died Nov. 15, 1560.

Aquinas, Thomas, or Thomas of Aquino, was of the family of the Counts of Aquino, and was born about 1226, in the castle of Rocca Secca, near Aquino, a small town half-way between Rome and Naples. He treated Christian morals according to an arrangement of his own, and with a comprehensiveness that procured him the title of the "Father of Moral Philosophy." He died at the Cistercian abbey of Fossa-Nuova, March 7, 1274. Aquinas was canonized by John XXII. in 1323, and proclaimed a "Doctor of the Church," by Pius V. 1567.

Aquitania, later Aquitaine, a Roman province in Gaul, which comprehended the countries on the coast from the Garonne to the Pyrenees, and from the sea to Toulouse. It was brought into connection with England by the marriage of Henry II. with Eleanor, daughter of the last Duke of Aquitaine. The title to the province was for long disputed by England and France, but it was finally secured by the latter (1453).

Arabesque, a style of ornamentation in which are represented men, animals (the latter consisting of mythic as well as actual forms); plants, with leaves, flowers, and fruit; filled would suffice for many years. | put together in a whimsical way, so

that, for instance, the animals not merely rest upon the plants, but grow out of them like blossoms.

ARABESQUE ARCHWAY.

Arabia, the extreme S. W. part Arabia, the extreme S. W. part of Asia, called by the natives Jeziret el Arab, that is, the Peninsula of the Arabs; and by the Turks and Persians, Arabistan. Arabia is encompassed on three sides by the sea, namely, on the N. E. by the Persian Gulf, on the S. E. by the Indian Ocean and on the S. E. by the Indian Ocean, and on the S. W. by the Red Sea. Arabia includes also the peninsula of Sinai, between the Gulf of Suez and that of Akabah. The whole area of the vast country is about 1,200,000 square miles, nearly one half of which is desert. Population is 5,000,000.

The Arabs present, as a nation and as individuals, much that is peculiar in their mental and physical development. They are of middle stature, of a powerful make, and have a skin of brownish color. Their features ex-press dignity and pride; they are naturally active, intelligent, and courte-ous; and their character is marked by temperance, bravery, and hospitality, along with a strong propensity for poetry. On the other hand, they are revengeful in their disposition and predatory in their habits. The women have the entire education of the children in their early years.

The mode of life of the Arabs is either nomadic or settled, or in other words, they either live in tents and derive their subsistence from the reardies from a great variety of substances. ing of cattle, wherever sufficient pas- It is often distilled from fermented

ture is obtainable, and from the transport of caravans through the desert; or from the pursuits of agriculture and commerce. The nomadic tribes in Arabia are termed Bedouins, Beduins, Arabia are termed Bedouins, Beduins, or Bedawins; those following settled occupations, Hadji and Fellahs. A considerable trade, partly overland, partly maritime, is carried on, chiefly in coffee, dates, figs, spices, and aromatic substances of various kinds, the substances of various kinds, though the present amount of traffic is scarcely a shadow of what it is in the times previous to the discovery of the passage by the Cape of Good Hope. Commerce is partly in the hands of foreigners, chiefly Jews and Banian Hindus. Food supplies and textile are imported and trade is mostly with India, southern Europe, and some trade with the United States. The chief exports are dates, wheat, barlow hides wool, camels, horses, barley, hides, wool, camels, horses, donkeys, sheep, and coffee, although Mocha, once a flourishing coffee port, no longer counts. In 1916 the Arabs declared their independence. In 1924 Arabia was divided into the Kingdom of Hejaz, the Emirate of Transjorda-nia, Nejd and Hasa, Jebel Shammar, Asir, Sultinate of Kuweit and Oman.

Arabian Nights' Entertainments, or "The Thousand and One Nights," a celebrated collection of Oriental tales, which have, since their introduction their introduction to the civilized world, become the delight of all who peruse them. This collection, which had long been famous throughout the East, was brought to the notice of Europeans by the translation of Antoine Galland, a great French Orientalist, in 1704. It speedily became translated into the other principal European languages, fixed popular admiration, and to this day retains its place in popular literature.

Aracari, the name given in Brazil to several scansorial birds. They have smaller bills than the toucans proper, and are of brighter colors, being generally green, with red or yellow on their breasts.

Arachnida, the class of animals which contains spiders, scorpions, and mites.

rice, or it may be distilled from the juice of the cocoanut and other palms.

Arafat, or Jebel er Rahmeh, a hill in Arabia, about 200 feet high, with stone steps reaching to the sum-mit, 15 miles S. E. of Mecca; one of the principal objects of pilgrimage among Mohammedans, who say that it was the place where Adam first received his wife, Eve, after they had been expelled from Paradise and separated from each other 120 years. A sermon delivered on the mount constitutes the main ceremony of the Hadj or pilgrimage to Mecca, and entitles the hearer to the name and privileges of a Hadji or pilgrim.

Arago, Dominique Francois, an eminent French astronomer and physicist; born near Perpignan, Feb. 26, 1786. He died in 1853. As Minister of War and Marine after the fall of Louis Philippe he was instrumental in abolishing negro slavery in the French

colonies.

Arago, Etienne Vincent, French poet, journalist, and play-wright, born at Perpignan, Feb. 9,

1802. He died in 1892.

Aragon, once a kingdom, now divided into the three provinces of Sara-gossa, Huesca, and Teruel, in the N. E. of Spain; greatest length from N. to S. 190 miles; breadth, 130; area, 17,980 square miles; pop. (1910) 950,633. It is bounded on the N. by the Pyrenees, and borders on Navarre, the Castiles, Valencia, and Catalonia.

Araguay, or Araguaya, a large river of Brazil, which rises in about 19° S. lat., near the Parana, flowing to about 6° S. lat., where it joins the Tocantins. The united stream, after a course of 1,000 miles, falls into the delta of the Amazon in S. lat. 1° 40'. Many tribes of warlike Indians dwell on its banks.

Aral Lake, separated by the plateau of Ust-Urt from the Caspian Sea, is the largest lake in the steppes of Asia. It lies wholly within the limits of Russian Central Asia, embracing an area of about 24,000 square miles.

borough. About 1745 a shoemaker of that place, Daniel Clarke, was suddenly missing under suspicious cir-cumstances; and no light was thrown on the matter till 13 years afterward, when an expression dropped by one Richard Houseman respecting the discovery of a skeleton supposed to be Clarke's, caused him to be taken into custody. From his confession an order was issued for the apprehension of Aram, who had long quitted York-shire, and was at the time acting as usher at the grammar school at Lynn. He was brought to trial on Aug. 3, 1759, at York, where, notwithstanding an able and eloquent defense which he made before the court, he was convicted of the murder of Clarke, sentenced to death, and executed.

Aramæan, or Aramaic, a Semitic language nearly allied to the Hebrew and Phonician, anciently spoken in Syria and Palestine and eastward to the Euphrates and Tigris. being the official language of this region under the Persian domination.

Arapahoes, a tribe of American Indians located near the head-waters of the Arkansas and Platte rivers.

Arapaima, a genus of tropical fishes, including the largest known fresh water forms. They are found in the rivers of South America, and are sometimes taken in the Rio Negro, 15 feet in length, and 400 pounds in weight. They are shot with arrows or harpooned, and are highly esteemed as food.

Ararat, a celebrated mountain in Armenia, forming the point of contact of Russia with Turkey and Persia, to all of which it belongs. It rises, an isolated cone, on the S. border of the plain of the Aras of Araxes. The summit of the Great Ararat rises 16,-964 feet above the sea-level. It is covered with perpetual snow and ice for about 3 miles from its summit downward in an oblique direction. Mount Ararat was the resting place of the ark when the flood abated.

Araucania, the country of the Aram, Eugene, a self-taught scholar whose unhappy fate has been made the subject of a ballad by Hood and a romance by Lord Lytton, born in Yorkshire, England, in 1704. In 1734 he opened a school at Knares1875, with an area of 2,446 square miles, and a population of 59,237. A large part of the territory in Arauco and the more southerly province of Valdivia, is occupied by Indians, who have of late mostly submitted to Chilean authority.

Arbitration, an adjudication by private persons, called arbitrators, appointed to decide a matter or matters in controversy, either by written or oral submission, by agreement of the disputants. It differs from a reference which is made by the order of a court of law. The proceeding generally is called a submission to arbitration; the parties appointed to decide are termed arbitrators, not referees: and their adjudication is called an award. This mode of settling disputes has been approved by some legislatures, and there are statutes in a number of States regulating the proceedings.

It cannot be said that the legal requirements have helped to any great extent in the settlement of disputes bebetween labor and capital. Either or both sides claim that an injustice has been done, and while a modus vivendi may be determined, it is only that matters may be arranged for a more successful outcome of the next difficulty. The settlement of the great coal strike of 1902 by the arbitrators selected by President Roosevelt, ended the conflict for the time being, but did not satisfy either party to the dispute.

The first general treaty of arbitration ever drawn between nations was signed Jan. 11, 1897, in Washington, by Richard Olney, Secretary of State for the United States, and Sir Julian Pauncefote, Ambassador of Great Britain to the United States, for Great Britain. This treaty was placed before the United State Senate, Jan. 11, 1897 accompanied by a special message from President Cleveland, but the Senate refused to ratify it. Since then similar treaties have been made and ratified between Italy and the Argentine Republic and Uruguay. The International Peace Convention at The Hague, in 1899, established an International Court of Arbitration which has been ratified by the United States and other signatory powers. In 1903, Holland accepted Mr. Carnegie's offer of \$1,500,000

for a Temple of Peace and International Law Library at The Hague, for the sessions of the Court.

Arbor Day, a day set apart to encourage the voluntary planting of trees by the people. The custom was inaugurated by the Nebraska State Board of Agriculture in 1874, which recommended that the second Wednesday in April annually be designated as Arbor Day, and that all public school children should be urged to observe it by setting out young trees. The custom has since been extended, till now nearly every State and Territory in the country has set apart one day by legislative enactment or otherwise, for this purpose; several of the States making the day a legal holiday, others making it a school holiday.

Arbor Vitae (lit. 'tree of life'), the name of several coniferous trees of the genus Thuja, allied to the cypress, with flattened branchlets, and small imbricated or scale-like leaves. The common Arbor Vitæ (Thuja occidentalis) is a native of North America, where it grows to the height of 40 or 50 feet. The young twigs have an agreeable balsamic smell.

Arbutus, a genus of plants belonging to the order of ericaceæ (heath worts). Trailing arbutus is a creeping or trailing plant; with rose colored blossoms, found chiefly in New England in the spring. Commonly called Mayflower. In the Southern States it is known as Ground Laurel.

Arc, in geometry, a portion of the circumference of a circle, cut off by two lines which meet or intersect it. Its magnitude is stated in degrees, minutes, and seconds, which are equal to those of the angle which it subtends,

In mathematical geography, an arc of the earth's meridian, or a meridianal arc, is an arc partly measured on the surface of the earth from N. to S., partly calculated by trigonometry. It was by these measurements that the earth was discovered to be an oblate spheroid.

In electricity, a voltaic arc is a luminous arc, which extends from one pencil of charcoal to another, when these are fixed to the terminals of a battery in such a position that their extremities are one-tenth of an inch apart.

Arcade, a series of arches of any form, supported on pillars, either inclosing a space before a wall, or any building which is covered in and paved; or, when used as an architectural feature for ornamenting the towers and walls of churches entirely closed up with masonry. The cloisters of the old monasteries and religious houses were, strictly speaking, arcades. The term is also applied to a covered passage having stores on either side of it.

Arcadia, the classical name of Middle Peloponnesus, now forming the modern province of Arkadia, in the Morea, Greece.

Arcesilaus, a Greek philosopher, founder of the New Academy, was born at Pitane in Æolia, Asia Minor, 316 B. C. He died B. C. 241.

Arch, in architecture, a series of wedge-shaped stones or bricks, so arranged over a door or window in an edifice for habitation, or between the piers of a bridge, as to support each other, and even bear a great superin-The curved arch incumbent weight. was known to the Assyrians and the Old Egyptians.

There is no mention of the genuine arch in Scripture, the term "arches," in Ezek. xl: 16, being a mistranslation.

The arch was brought into extensive use by the Romans, and everywhere prevailed till the 12th century A. D. when the arcl pointed at the apex, and called in consequence the pointed arch the one so frequently seen in Gothic architecture — appeared in Europe as its rival. The forms of both curved and pointed arches may be varied indefinitely.

Arch, Triumphal, a structure raised by the Romans to celebrate a victory, or some great historical event; or to add an additional luster to the commemoration of the military exploits of a victorious general. The ploits of a victorious general. practice has been adopted by some of the modern nations of which France is the foremost.

Arch, Joseph, an English reformer, born in Barford, Warwickshire, in 1826, and, while still a farm laborer, became a Primitive Methodist preach-er. In 1872 he founded the National Agricultural Laborers' Union, and thereby, according to Justin M'Carthy, Flourished about 440 B. C.

"began the emancipation of the rural laborers." He afterward visited Can-He afterward visited Canada to inquire into the labor and emigration questions; and, in 1885-1886. he represented in Parliament the northwest division of Norfolk, which again returned him in 1892 and 1895.

Archæology, the science which makes us acquainted with the antiquities of nations that have lived and died, and the remains of various kinds which throw a light upon the history of those now existing. Every country owns, in a greater or less degree, relics of antiquity highly interesting to the archæologist. In Mexico and Cen-tral America, evidences have been found of the existence of a clever and ingenious people who had died before the discovery of America.

Archaeopteryx, a unique fossil bird from the oolitic limestone of Solenhofen, of the size of a rook, and differing from all known birds in having two free claws representing the thumb and forefinger projecting from the wing, and about twenty tail vertebræ free and prolonged as in mammals.

Archangel, a seaport, capital of the Russian government of same name, on the right bank of the northeastern Dwina, about 20 miles above its mouth in the White Sea. Below the town the river divides into several branches and forms a number of islands, on one of which, called Sollenbole, is the harbor. The port is closed for six months by ice. Archangel, was long the only port which Russia possessed. Pop. 20,-993.

Archdeacon, an ecclesiastical dignitary next in rank below a bishop. who has jurisdiction either over a part of or over the whole diocese. He is usually appointed by the bishop, under whom he performs various duties, and he holds a court which decides cases subject to an appeal to the bishop.

Archduke, a duke whose authority and power is superior to that of other dukes. In the present day, this title is not assumed by any excepting the princes of the imperial House of Austria.

Archelaus, a Greek philosopher, the disciple and successor of Anaxagoras. Archelaus is said to have had Socrates for his pupil at Athens. Archelaus, son of Herod the Great. His reign is described as most tyrannical and bloody. The people at length accused him before Augustus (Judea being then dependent upon Rome). The Emperor, after hearing his defense, banished him to Vienne, in Gaul. To avoid the fury of this monster, 7 A. D., Joseph and Mary retired to Nazareth.

Archer, Branch T., a Texan patriot, born 1790; died 1856. In 1831 he left Virginia where he had practiced medicine, and settled in Texas where he took an active part in all the troubles that preceded the independence of the territory. He was one of the commissioners who asked aid from the United States government, and was speaker of the Texas House of Representatives, and Secretary of War for the new Republic.

Archer, William, a Scottish critic, born at Perth, Sept. 23, 1856. He graduated at Edinburgh University, 1876, and was called to the bar, 1883. He has long been dramatic critic for

various London papers.

Archer Fish, the toxotes aculator, which shoots water at its prey. It is found in the East Indian and Polynesian Seas.

Archery, the art of shooting with a bow and arrow. This art, either as a means of offense in war, or as subsistence and amusement in time of peace, may be traced in the history of almost every nation. It always, howtime, which introduces weapons more to be depended on, and not so easily exhausted as a bundle of arrows. With the ancients, the sagitarii, or archers, were an important class of troops. The English archers were famous in the Middle Ages, and turned the side in important battles.

Archilochus, a Greek poet, flour-ished in the 7th century B. C. Of his life, nothing is definitely known. He was classed by the ancients with the greatest poets, Homer, Pindar, Sophocles: but of his works only a few fragments have come down to us.

Archimedes, the most famous of ancient mathematicians, was a native of Syracuse. He possessed equal knowledge of the sciences of astrono-He possessed equal my, geometry, hydrostatics, mechanics,

and optics. Among his inventions were the combination of pulleys for lifting heavy weights, the revolving screw, and a spherical representation of the motion of the heavenly bodies. His inventive genius was especially exemplified in the defense of Syracuse when besieged by Marcellus. It is said that on this occasion he devised a burning-glass, formed of reflecting mirrors of such power that by it he set fire to the enemy's fleet. This well fire to the enemy's fleet. This well known story is, however, believed to be equally an invention. Upon the city being taken by storm, Archimedes, then in his 74th year, was among those who lost their lives, B. C. 212.

Archimedes, Principle of, a

well known principle in hydrostatics, the discovery of which is attributed to the celebrated philosopher whose name it bears. This important theorem may be thus defined: When a solid is immersed in a fluid, it loses a portion of its weight, and this portion is equal to the weight of the fluid which it displaces, that is, to the weight of its

own bulk of the fluid.

Archimedian Screw, or Spiral Pump, a machine invented by Archimedes, the celebrated Syracusan philosopher, while studying in Egypt. Observing the difficulty of raising water from the Nile to places above the reach of the flood tides, he is said to have designed this screw as a means of overcoming the obstacle. It consists of a pipe twisted in a spiral form around a cylinder, which, when at work, is supported in an inclined position. The lower end of the pipe is immersed in water, and when the cylinder is made to revolve on its own axis, the water is raised from bend to bend in the spiral pipe until it flows out at the top. The Archimedian screw is still used in Holland for raising water, and draining low grounds.

Archipelago, a term applied to such tracts of sea as are interspersed with many islands. It is more especially applied to the numerous islands of the Ægean Sea, or that part of the Mediterranean lying between

Asia Minor and Greece.

Architecture, the art of building, especially with a view to beauty or magnificence. It is an art which is ever advancing as the needs of civilized man change and increase. Some

B.-5.

of the architectural work of the ancients has never been surpassed in later ages in massiveness and in beauty, and the grand architectural monuments of the Middle Ages are the chief redeeming features of that period of intellectual gloom. The architecture of the twentieth century bids fair to keep abreast of the marvellous progress of other arts, and nowhere is it achieving more signal triumphs than in the United States, with its mighty office-buildings, its magnificent public structures, and its residences including every comfort and improvement.

Archives, the place in which records are kept; also the records and papers which are preserved, as evidence of facts.

Archons, the chief magistrates of ancient Athens, chosen to superintend civil and religious concerns.

Archytas, an ancient Greek mathematician, statesman, and general, who flourished about 400 B. C., and belonged to Tarentum, in Southern Italy.
The invention of the analytic method in mathematics is ascribed to him, as well as the solution of many geometrical and mechanical problems.

Arc Light, that species of the electric light in which the illuminating source is the current of electricity passing between two sticks of carbon kept a short distance apart, one of them being in connection with the positive, the other with the negative terminal of a battery or dynamo.

Arcon, Jean Claude Lemi-ceaud d', a French engineer, born in 1733. He distinguished himself by the invention of the famous floating batteries used at the siege of Gibraltar, in 1782. He died in 1800.

Arctic Circle, a small circle of the globe, 23° 28' distant from the North Pole, which is its center. It is opposed to the Antarctic circle, which is at the same distance from the South Pole.

Arctic Expeditions, expeditions projected to explore the regions surrounding the North Pole. The object with which these enterprises were commenced by the English was to obtain a passage by way of the polar regions to India, Egypt being in Mohammedan hands, and fear, which now 1876. Payer 83° 07'

seems absolutely ludicrous, being felt that the Portuguese would successfully debar daring English seamen from using the route by the Cape of Good Hope. When the utter hopelessness of finding either a northwestern or a northeastern passage to India through the polar regions became apparent, it was felt that Arctic expeditions might still profitably be sent out for purely scientific exploration, one main object now being to make as near an approach as possible to the Pole. They have continued at intervals to our own times, and are not likely ever to cease. Two of the most notable events in their history which have hitherto the northwest passage by Captain Mc-Clure, of the "Investigator," on Oct. 26, 1850, and the tragic deaths of Sir John Franklin and his crew, about the year 1848, the catastrophe being rendered all the more impressive to the public mind by the uncertainty which long hung over the gallant explorers' fate.

In September, 1895, Lieut. Robert E. Peary, of the United States navy, returned from an Arctic expedition, after an absence of two years. did not get so far north as some of his predecessors, but in scientific results his expedition surpassed all others of recent years. His surveys and maps extend our knowledge of the coast northward 2°. He started on another expedition in 1897. On Aug. 13, 1896, Dr. Fridtjof Nansen, of Norway, returned from an Arctic expedition, after an absence of more than three years. The most northerly point reached by him was 86° 14' N. latitude, or 200 miles nearer the Pole than ever reached before. He found no indications of land N. of 82° N. latitude, and in the higher latitudes no open sea, only narrow cracks in the ice.

The following are the farthest points of N. latitude reached by Arctic explorers, up to present date:

1909.	April 6. Peary		.The	Pole

In 1902 Lieutenant Peary attained lat. 84° 17′, 404 statute miles from the Pole. He pushed the advance on the American side 30 miles beyond his own best record in 1901. In 1906 he came within 200.36 miles of his goal. when he was forced back by insurmountable obstacles. The Baldwin (1902) and the Fiala (1905) expeditions, which proceeded by way of Franz Josef Land, did not reach such high altitudes. On Sept. 1, 1909, Dr. Frederick A. Cook telegraphed that he had discovered the Pole on April 21, 1908, and five days later Peary announced that he had reached it on April 6, 1909. A scientific investigation of their records resulted in crediting the achievement to Peary.

For airship Arctic flights see Aero-

NAUTICS.

Arctic Ocean, in its widest sense, that portion of the ocean which extends from the Arctic circle (lat. 66° 32' N.) to the North Pole, or more restrictedly from about lat. 70° N. Assuming the former limit, the Arctic Ocean is found entering deeply, in the form of gulfs, bays, etc., into the N. parts of the continents of Europe, Asia, and America. The water of the Asia, and America. The water of the Arctic Ocean is extremely pure, shells being distinctly visible at a great depth; it also presents rapid transitions of color, chiefly from ultramarine to olive-green, the latter variations of color being produced by myriads of minute animals belonging for the most part, to the Celenterata and Mollusca.

Regions, the regions Arctic round the North Pole, and extending from the pole on all sides to the Arctic circle in lat. 66° 32' N. The Arctic or North Polar circle just touches the N. headlands of Iceland; cuts off the a S. and narrowest portion of Green-w land; crosses Fox Strait N. of Hudson see bay, whence it goes over the American continent to Bering Strait. Thence it runs to Obdorsk at the mouth of the (1930) 15,741. Obi; then, crossing Northern Russia, the White Sea, and the Scandinavian peninsula, returns to Iceland. Recent or 1,076.44 square feet.

scientific expeditions, notably those under Donald B. Macmillan, have increased knowledge of plant and animal life, and weather influences in the Arctic.

Arcturus, in astronomy, a fixed star of the first magnitude, called also Alpha Bootis. It is one of the very brightest stars in the northern heav-

Ardahan, a village of about 300 houses, in the portion of Turkish Armenia, ceded in 1878 to Russia, 35 miles N. W. of Kars. Its position gives it strategic importance. Its fortress was dismantled by the Russians in the war of 1854-1856; in 1878 the Berlin Congress sanctioned the cession to Russia of Ardahan, which had been captured early in the war. On account of the severity of the climate, the houses of Ardahan are mainly constructed underground.

Ardennes, an extensive hill-country and forest, occupying the S. E. corner of Belgium, between the Moselle and the Meuse, but extending also into France and Rhenish Prussia. It consists of a broken mass of hills, for the most part of no great elevation, which gradually slope toward the plains of Flanders. The enormous supplies of coal found in the north, are a very important element in Belgium's wealth.

Arditi, Luigi, an Italian musician and composer, born in Piedmont, July 16, 1822; studied music at the Conservatoire of Milan. Famous first as a violinist, then as a conductor, he conducted Italian opera and concerts in places as remote from one another as New York and Constantinople. He died in May, 1903.

Ardmore, city and capital of Carter county, Okla.; in what was the Chickasaw Nation, Ind. Terr.; on the Santa Fe and other railroads; 100 miles S. of Oklahoma City; is in a cotton-growing, natural gas, petro-leum, coal, and asphalt section; has a Carnegie library, two colleges, water, electric light, and telephone services, and cotton compressers and oil mill; and is chiefly engaged in the cotton industry. Pop. (1920) 14,181;

Arena, the inclosed space in the central part of the Roman amphitheaters, in which took place the combats of gladiators or wild beasts. It was usually covered with sand or saw dust to prevent the gladiators from slipping, and to absorb the blood.

Arecibo, city, seaport, and capital of department of same name, Porto Rico; on the Arecibo river, 40 miles W. of San Juan; settled in 1616; greatly damaged by hurricane in 1899; has a roadstead available only by small vessels. Pop. (1920) 10,000.

Areolar Tissue, a tissue widely diffused through the body, and composed of white and yellow fibers, the former imparting to it strength, and the latter elasticity.

Areometer, an instrument designed to measure the specific gravity of liquids.

Areopagus, the name of a hill or rocky eminence lying to the W. of the Acropolis at Athens, which was the meeting-place of the chief court of judicature of that city; hence called the Council of Areopagus. It was of very high antiquity, and existed as a criminal tribunal long before the time of Solon. Solon enlarged its sphere of jurisdiction, and gave it extensive powers of a censorial and political na-Some say that the Apostle Paul was taken before this council; but the Scripture does not bear out this idea. It would seem, rather, that the Athenians had taken him to the hill in order to hear him expound his new doctrines.

Arequipa, a city of Peru, capital of the Department of the same name; 40 miles from the Pacific Ocean, on the Chile river; altitude, 7.850 feet above sea level. Gold and silver are mined in the vicinity. A great earthquake occurred, Aug. 13 and 14, 1868, which destroyed more than \$12,000,000 worth of property, and the lives of more than 500 persons. Its public buildings and dwellings are one or two stories high and constructed of stone. Near at hand Harvard University has an observatory, at an altitude of over 8,000 feet. Pop. (1920) 55,000.

Ares, the Greek god of war, or having its calyx prickly, it is often more particularly of its horror and tumult. He is represented in Greek a more powerful narcotic than opium.

poetry as a most sanguinary divinity delighting in war for its own sake.

Aretæus, a Greek physician of Cappadocia, who flourished about 100 A. D. He is considered to rank next to Hippocrates in the skill with which he treated diseases; was eclectic in his method; and in the diagnosis of disease is superior to most of the ancient physicians.

Aretino, Pietro, an Italian poet and dramatist, born at Arezzo, April 20, 1492. His "Letters" are a valuable contribution to the history of the times. He died in Venice, Oct. 21, 1556.

Argali, the name for some species of the genus ovis, or sheep, which inhabits the mountains and steppes of Northern Asia. They are very keensighted, quick of hearing, and possess a delicate sense of smell. They attach themselves closely to one locality, and are noted for their great powers of leaping, even from heights of 20 or 30 feet. The Big-horn sheep of the Rocky Mountains are sometimes called American argali.

Argall, Sir Samuel, an early English adventurer in Virginia, born about 1572; planned and executed the abduction of Pocahontas, the daughter of the Indian chief Powhatan, in order to secure the ransom of English prisoners. He was Deputy Governor of Virginia (1617-1619), and was accused of many acts of rapacity and tyranny. By carrying on trade in violation of the law he managed to acquire a fortune, and was shielded from justice by the Earl of Warwick. He died in 1639.

Argand Lamp, a lamp named after its inventor, Aimé Argand, a Swiss chemist and physician (born 1755, died 1803), the distinctive feature of which is a burner forming a ring or hollow cylinder covered by a chimney, so that the flame receives a current of air both on the inside and on the outside.

Argemone, a genus of plants belonging to the poppy-worts. It has three sepals and six petals. The A. Mexicana, believed, as its name imports, to have come from Mexico, has conspicuous yellow flowers. From having its calyx prickly, it is often called Mexican thistle. The seeds are a more powerful narcotic than opium.

MONUMENT OF JOSE DE SAN MARTIN—BUENOS AIRES

Argent, in coats or arms, the heraldic term expressing silver; represented in engraving by a plain white surface.

Argenta, a town in Pulaski county, Ark.; on the Arkansas river, and the Choctaw, Oklahoma & Gulf and other railroads; nearly opposite Little Rock; chiefly engaged in the live-stock and cotton industries. Pop. (1920) 14.048.

Argentina, formerly called the United Provinces of La Plata, a vast country of South America; extreme length, 2,100 miles; average breadth a little over 500 miles; total area, 1,153,119 square miles. It is bounded on the N. by Bolivia; on the E. by Paraguay, Brazil, Uruguay, and the Atlantic; on the S. by the Antarctic Ocean; and on the W. by the Andes. With the exception of the N. W.

where lateral branches of the Andes run into the plain for 150 or 200 miles, and the province of Entre Rios, which is hilly, the characteristic feature of the country is the great monotonous and level plains called pampas. In the N., these plains are partly forest-covered, but all the central and S. parts present vast treeless tracts, which af-ford pasture to immense herds of horses, oxen, and sheep, and are varied in some places by brackish swamps, in

others by salt steppes.

European grains and fruits, including the vine, have been successfully introduced, and are cultivated in most parts of the republic, countless herds of cattle and horses and flocks of sheep are pastured on the pampas, and multiply there very rapidly. Gold, siver, nickel, copper, tin, lead, and iron, besides marble, jasper, precious stones, and bitumen, are found in the mountainous districts of the northwest, while petroleum wells have been dis-covered on the Rio Vermejo; but the development of this mineral wealth has hitherto been greatly retarded by the want of proper means of transport. As a whole, there are not extensive forests in the country, except in the region of the Gran Chaco (which extends also into Bolivia), where there is known to be 60,000 square miles of timber. Thousands of square miles are covered with thistles, which grow to a great height in their season. Cacti also form great thickets. Peach and

apple trees are abundant in some districts. The native fauna includes the puma, the jaguar, the tapir, the llama. the alpaca, the vicuna, armadilos, the rhea or nandu, a species of ostrich, etc. The climate is agreeable and healthful, 97° being about the highest temperature experienced. The native Indians, few in number, give little trouble to white settlers, although some of the Gran Chaco tribes are warlike and have killed foreign travellers. Some tribes, still in a savage state, inhabit less known districts and live by hunt-ing and fishing. The typical inhabitants of the pampas are the Gauchos, a race of half-breed cattle-rearers and horsebreakers, almost continually in saddle, galloping the plains.

A. is divided into 14 provinces and 10 territories. Buenos Aires, the capital, is connected with other large towns including Rosario, La Plata, Tucuman, Cordoba, Santa Fé, Men-doza, Paraná, etc., by extensive and modern lines of railroads and tele-Industries and commerce graphs. have increased with the arrival of large numbers of immigrants, averaging about 160,000 yearly. In 1927 the imports aggregated \$826,628,650, and the exports \$973,892,735. The chief foreign trade, in order of importance, was with Great Britain, the United States, Italy, France, and Brazil, and was largely affected by the World War.

The government is republican, similar to that of the United States, and the President is elected for six years. 10e population, official est. 1926: 10,300,000. Buenos Aires 1928 census, 2,042,294. The constitution bears date of May 15, 1853, with amendments in 1866 and 1898.

Argillaceous Rocks. Rocks in-

cluding slate, in which clay prevails. Argol, a salt deposited by wine on the inside of bottles and barrels. It may be purified in hot water, and clarified by adding clay, and recrystallizing. In repeating the process it becomes white and is called cream of tartar.

Argon, a constituent gaseous element discovered in our atmosphere by Lord Rayleigh and Prof. Ramsay, in 1894. There is still much doubt concerning its true status.

Argonaut, one of the heroes who accompanied when he sailed on his mythic voyage in quest of the golden fleece (generally used in the plural). The tales describing the return of the Ar-

gonauts differ very essentially.

The word is also applied to a genus of cephalopod mollusks, the typical one of the family argonautide. The best of the family argonautidæ. known species is the argonaut, or paper sailor. The shell is thin and translucent. Aristotle supposed that it floated with the concave side up, the animal holding out its arms, after the manner of sails, to catch the breeze. Poets have since repeated the fable.

Argonne, a rocky, forest-clad plateau, extending along the borders of Lorraine, Germany, and Champagne, France, watered by the Meuse, Marne, and Aisne rivers; noted as the scene of Dumouriez's campaign against the Prussians in 1792, of military move-ments preceding the battle of Sedan in 1870, and of struggles for the possession of Alsace-Lorraine in the World War.

Argos, a town of Greece, in the N. E. of the Peloponnesus, between the gulfs of Ægina and Nauplia or Argos. This town and the surrounding territory of Argolis were famous from the legendary period of Greek history onward, the territory containing, besides Argos, Mycenæ, where Agamemnon ruled, with a kind of sovereignty, over all the Peloponnesus.

Argosy, a poetical name for a large merchant vessel; derived from Ragusa, a port which was formerly more celebrated than now, and whose vessels did a considerable trade with

England.

Argot, the jargon, slang or peculiar phraseology of a class or profession; originally the conventional slang of thieves and vagabonds, invented for the purpose of disguise and conceal-

Argument, a term sometimes used as synonymous with the subject of a discourse, but more frequently appropriated to any kind of method employed for the purpose of confuting or at least silencing an opponent.

Argus. (1) In classical mythology, a son of Arestor, said to have had

one time, the several pairs doing so in succession. When killed by Mercury, his eyes were put into the tail of the peacock, by direction of Juno, to whom this bird was sacred. Argus was deemed a highly appropriate name to give to a vigilant watch dog.

(2) In zoology, a genus of birds. It contains the argus, or argus pheasant. The male measures between five and six feet from the tip of the bill to the extremity of the tail, and is an eminently beautiful bird, the quill-feathers of the wings, which often exceed three feet in length, being ornamented all along by a series of ocellated spots.

about 80,000 in number.

Argyle, Campbells of, a historic Scottish family, raised to the peerage in the person of Sir Duncan Campbell Lochow, in 1445. John, second Duke and Duke of Greenwich, son of Archibald, born 1678, died 1743; served under Marlborough at the battles of Ramilies, Oudenarde, and Malplaquet, and assisted at the sieges of Lisle and Ghent. He incurred considerable odium in his own country for his ef-He incurred considerable forts in promoting the union with England.

Ariadne, a daughter of Minos, King of Crete, who, falling in love with Theseus, then shut up by her father in the labyrinth, gave him a clue by which he threaded his way out.

Arian, a follower of Arius, Presbyter of Alexandria in the 4th century A. D., or one holding the system of doctrine associated with his name. In the year 317, Alexander, Bishop of Alexandria, having publicly expressed his opinion that the Son of God is not only of the same dignity as the Father, but of the same essence (in Greek, ousia), Arius, one of the Presbyters, considered this view Presbyters, considered this view too much to Sabelas leaning lianism, and, rushing to the other extreme, he declared that the Son of God was only the first and noblest of created beings, and though the universe had been brought into existence through His instrumentality by the Eternal Father, yet to that Eternal Father He was inferior, not merely in dignity, but in essence. The views of Arius commended themselves to multi-Argus. (1) In classical mythology, a son of Arestor, said to have had 100 eyes, of which only two slept at ing them broke out, and the whole

Christian world was soon compelled to take sides. It would occupy too much space to detail the vicissitudes of a highly checkered struggle; suffice it to say that the Arians greatly weakened themselves by splitting into sects, and the doctrines regarding the relation of the three Divine Personages authoritatively proclaimed at Nice were at last all but universally adopted. They may be found detailed in what are popularly termed the Nicene and the Athanasian Creeds. were held almost without a dissentient voice through the Middle Ages, and were cordially accepted by the leading reformers.

Ariel, the name of several personages mentioned in the Old Testament: in the demonology of the later Jews a spirit of the waters. In Shakespeare's "Tempest," Ariel was the "tricksy spirit" whom Prospero had in his ser-

vice.

Aries, in astronomy, the constellation Aries, or the Ram, one of the ancient zodiacal constellations, and generally called the first sign of the zodiac; also the portion of the eclip-tic between 0° and 30° longitude, which the sun enters on March 21st (the vernal equinox).

Ahriman, Arimanes, or Ahriman, the principle of evil in the Persian theology, which perpetually counteracts the designs of Ormuzd or Oromazdes, who denotes the principle of good.

Arimathæa, a town of Palestine, identified with the modern Ramleh, 22 miles W. N. W. of Jerusalem.

Arion, an ancient Greek poet and musician, born at Methymna, in Lesbos, flourished about B. C. 625. He is said to have been rescued from drowning by a dolphin, which attracted by his music, bore him to land. A fragment of a hymn to Poseidon, ascribed to Arion, is extant.

Ariosto, Ludovico, an Italian poet, born at Reggio, Sept. 8, 1474. Was one of the three great epic poets of Italy, and styled "The Divine" by his countrymen. He died in Ferrara,

entered the army, in which he at-tained to the rank of major-general. In a contest for the throne, he was

He served with distinction in the war against the United States, was, in 1848, appointed Minister of War, and, in 1850, President of the Republic. He was succeeded as President in 1852, by Don Juan Cebellos. He died in 1855.

Aristarchus, a Greek grammar-ian, who criticised Homer's poems

with the greatest severity.

Aristarchus of Samos, a famous astronomer, born 267 B. C. First asserted the revolution of the earth about the sun. His work on the magnitude, and distance of the sun and moon, is still extant. He is also regarded as the inventor of the sun-dial.

Aristides, a statesman of ancient Greece, for his strict integrity surnamed "The Just." He died at an advanced age about B. C. 468, so poor that he was buried at the public expense. It was customary in Athens for citizens to vote by a ballot of shells—hence called ostracism from the Greek word for shell - for the exile of any citizen who might be unpopular, without any specific charge being made against him. Aristides was, on one occasion the victim of ostracism, and a citizen who voted against him gave as a reason, that he was tired of hearing him called "The Just."

Aristippus, a disciple of Socrates, and founder of a philosophical school among the Greeks, which was called the Cyrenaic, from his native city Cy-rene, in Africa; flourished in 380 B. C. His moral philosophy differed widely from that of Socrates, and was a science of refined voluptuousness. His writings are lost.

Aristobulus, name of several royal personages of Judea: Aristobulus I., son of John Hyrcanus, high priest of the Jews; from 105-104 B. C. King of Judea. He is supposed to have been the first of the Hasmoneans to take the title of king. In the single year of his reign he conquered portions of Iturea and Trachonitis, and his countrymen. He died in Ferrara,
June 6, 1533.

Arista, Don Mariano, a Mexander Jannenus, was named as high
ican statesman, born in 1803. Of
priest by his mother, Queen Regent
Spanish descent, he at an early age Alexandra, while to Hyrcanus II., his nean family.

Aristobulus. Alexandrian an Jew and peripatetic philosopher, who lived about 170 B. C., was considered by the early fathers as the founder of the Jewish philosophy in Alexandria.

Aristocracy, a form of government by which the wealthy and noble, or any small privileged class, rules over the rest of the citizens; now mostly applied to the nobility or chief persons in a State.

Aristophanes, the greatest of the Greek writers of comedy (B. C. 448?-380?), born at Athens.

Aristotle, the most renowned of Greek philosophers, born at Stagira, Macedonia, 384 B. C.; was for 20 years a student of philosophy in the school of Plato at Athens, but at the same time a teacher, in the meantime mastering and digesting all the accessible results of philosophical and scientific; research and speculation in his time. After Plato's death, he opened a school of Philosophy at the court of Hermias, King of Atarnous, in Mysia, who had been his fellow student in Plato's Academy, and whose adopted daughter he afterward married. At the invitation of Philip of Macedon, he undertook the education of his son, Alexander. When Alexander succeeded to the throne, the philosopher returned to Athens and opened a school in the Lyceum, so called from the neighboring temple of the Lycian Apollo. He taught in the Lyceum for 13 years, and to that period we owe the composition of most of his numerous writings. The number of his separate treatises is given by Diogenes Laer-tius as 146; only 46 separate works bearing the name of the philosopher

Arithmetic, in its broadest sense, of \$50,000,000, the leading industry the science and art which treat of the being the smelting and refining of properties of numbers. This definition of the properties of numbers. This definition of the properties of numbers. The governor is elected for two

defeated by Pompey in 63 B. C., and carried captive to Rome. He died about 48 B. C. Ari Thorgilsson, the father of Icelandic literature (1067-1148).

Arizona, a State in the Mountain Division of the North American Union; bounded by Nevada, Utah, New Mexico, California and the Mexican State of Sonora; gross area, 113,956 square miles; organized as a Territory Feb. 14, 1863; admitted into the Union as a State, Feb. 14, 1912. Number of counties, 14; pop. (1920) (1930) 435,573; capital. 334,162; Phoenix.

A. abounds with mineral wealth including coal, iron, gold, silver, copper, lead, platinum, quicksilver, tin, etc.; mining, ranching and lumbering are the chief industries.

Of the total area, embracing over 72,500,000 acres, 11,065,291 acres is farming land. The rainfall is so small that irrigation is depended upon to make agriculture profitable. The construction of irrigating canals and water storage reservoirs is being steadily promoted and over 500,000 acres are now productive thereby. In the calendar year 1929 farm crops had a value of \$50,700,000 and live stock amounted to \$57,658,000. The pine timber land covers an area of nearly 4,000,000 acres, giving the Territory resources for timber and building material unsurpassed anywhere in the country.

The State is rich in mineral resources, largely copper, coal, iron, gold, silver, lead, quicksilver, and precious stones. The value of all productions in 1926 was \$115,047,987, copper yielding \$101,261,447. In 1921 the manufacturhave come down to our time. He died ing industries had a combined output at Chalcis, Eubea, in 322 B. C. valued at \$120,769,112 on a capital

years. Legislature meets biennially: Senate, 19 members, House, 35. One Representative-at-Large in Congress. State officials and Legislature Democratic in 1924.

Ark, a chest or coffer for the safekeeping of any valuable thing; a de-pository. The large floating vessel in which Noah and his family were preserved during the deluge.

The Ark of the Covenant, in the synagogue of the Jews, was the chest or vessel in which the tables of the law were preserved.

Arkansas, a State in the West South Central Division of the North American Union; bounded by Missouri, Tennessee, Mississippi, Louisiana, Texas and Oklahoma; gross area, 53.850 square miles; admitted into the 53.850 square miles; admitted into the Union, June 15, 1836; seceded, March 4, 1861; readmitted June 22, 1868; number of counties, 75; pop. (1928 Est.) 1.944,000; capital, Little Rock, pop. (1927 Est.) 77,500.

The State contains semi-anthracite, and state contains semi-anthracite.

cannel, and bituminous coal; iron and zinc ores; galena, frequently bearing silver; manganese; gypsum, oil-stone of superior quality; marble; alabaster; rock crystal; copper; granite; kaolin; marl; mineral ochers, and salt. In 1921 the value of all mineral productions was \$100,000,000.

The soil varies with the geological characteristics and surface conditions already described. Agriculturally, the most valuable soil is found in the river bottom-lands, and as the surface rises from these bottoms the soil becomes less productive. There are large submerged tracts that only require proper drainage to make them valuable to the farmer. The uplands generally are well timbered and well watered. The various crops of 1927 had a value of \$193,500,000, cotton leading with \$98,980,000.

In 1925 there were 1,257 manufacturing establishments reported, employing \$77,162,000 capital and 43,977 persons; paying \$37,538,492 for wages and \$44,907,000 for materials; and having a combined output valued at \$195,208,015. The principal articles were lumber, sawed and worked; flour and grist; cotton-seed oil and cake; foundry and machine shop products; and brick and tile.

maintained and attended by about 500,000 pupils. The principal univer-500,000 pupils. The principal universities and colleges are Arkansas College (opened 1872, Presb.); University of Arkansas (1872, non-sect.); Philander Smith College (1877, Meth. Epis.); Hendrix College (1884, Meth. Epis. S.); Ouachita College (1886, Bapt.); Galloway College (1888, Meth. Epis. S.); Little Rock College (1908, Cath.); Arkansas Polytechnic College (1909); Central College (1892, Women, Bapt.); and Mountain Home College (1893, Bapt.), a junior college. college.

In 1916 the net State revenue was \$3,810,994; net expenditure, \$4,010,-281; the assessed valuation of all taxable property, \$447,020,270; the tax levy, \$3,577,503; and the net debt, \$2,-183,538. There were over 5,400 miles of steam railroad in operation. Under the National Banking Act of 1913, the State is included in Federal Reserve

District No. 8.

The Governor is elected for a term of two years and receives a salary of \$5,000 per annum. Legislative sessions are held biennially, and are limited to 60 days each. The Legislature has 35 members in the Senate and 100 in the House. There are 7 Representatives in Congress. In 1924 the State was Democratic. Hot Springs, a city of Arkansas, is famous as a winter resort and for its medicinal waters and baths. It is the location of several sanitariums for the treatment of nervous diseases. Various forms of recreation are offered such as golf. polo, etc.

Arkansas Post, a village in Arkansas county, Ark.; on the Arkansas River; 117 miles S. E. of Little Rock. Its elevated location gave it considerable military importance during the Civil War. The Confederates established strong works here, which were reduced by a combined assault of a portion of the United States army, under General McClernand, and a naval command under Admiral Porter.

on Jan. 11, 1863.

Arkansas, University of, a coeducational institution organized in 1872, with academic and technical departments in Fayetteville, law and medical departments in Little Rock, and normal school for colored students The public schools are liberally in Pine Bluff. Total students, 2,235.

Armenia, together with Kurdistan, forms a part of the Turkish Empire in Asia. The total area is about 71,900 square miles, and the population was recently estimated at about 2,000,000, but a serious plan of extermination was steadily pursued by Turkey throughout 1915-16, before which

there was a much larger population.

Tradition assigns the cradle of the human race to Armenia. In 1916 the country was divided into three vilayets or governments—Erzerum, Mamuret ul Aziz, and Diarbekir, with the districts of Bitlis and Van. The inhabitants are of the Christian faith, most of them belonging to the Gregorian Church, which greatly re-sembles the Greek Church in doctrine and ritual. There are many, however, who acknowledge the authority of Rome, although retaining their own distinctive ritual. Sheep, cattle, and wool are largely exported, and there is a growing silk industry in Diarbekir.

Armenia was at one time subdivided into First, Second and Third Armenia, to which a Fourth was afterward added; but the division by which it was almost universally known was into Armenia Major and Armenia Minor, or the Greater and the Less Armenia. It would seem to have stretched from the Caspian Sea and the Persian province of Azerbijan on the E. to Asia Minor on the W., and from the Kur or Cyrus river on the N. to Kurdistan and Mesopotamia on the S. Armenia Major comprised the larger and E. portion of this area, extending W. as far as the Euphrates and the Anti-Taurus, and having an area of about 84,000 square miles. Armenia Minor extended from the Euphrates to Asia Minor, and its area may be stated at about 53,000 square miles. The Euphrates thus intersects Armenia almost centrally, and forms the natural boundary between the two divisions now described. The territory of this kingdom became partitioned among Turkey, Persia, and Russia, Turkey possessing the largest

The inhabitants are chiefly of the genuine Armenian stock; but besides them, in consequence of the repeated subjugation of the country, various other races have obtained a footing. Of these the principal are the Turco-

mans, who still maintain their nomadic habits, and from whom country has received the name of Turcomadia. In the S. portion are the predatory Kurds and the Turks; on the Tchorak, Georgians; and throughout the whole country, Greeks, Jews, and Gypsies. Armenians are scattered over various countries, and being strongly addicted to commerce, play an important part as merchants. They are found over all Western Asia; about 200,000 are in Constantinople and its vicinity; numbers are in Russia, Hungary, and Italy; some in Africa and the United States, and many in India, chiefly in the great marts, Bombay, Madras, and Calcutta.

The Armenians received Christianity as early as the 3d century. During the Monophysitic disputes, being dissatisfied with the decisions of the Council of Chalcedon (451), they separated from the Greek Church in the year 536. The Popes have at different times attempted to gain them over to the Roman Catholic faith, but have not been able to unite them permanently and generally with the Roman Church. There are, however, small numbers here and there of United Armenians, who acknowledge the spiritual supremacy of the Pope, agree in their doctrines with the Catholics, but retain their peculiar ceremonies and discipline. At different times force has been used to make them conform to the religion of Mohammed; but the far greater part are yet Monophysites, and have remained faithful to their old religion and worship. They have suffered the usual fate of Christian populations subject to Turkey, and the massacres of Armenians in 1895, 1896, and 1915-16, excited the horror of the civilized world.

In the early part of the World War, while the British Expeditionary Force was fighting under adverse conditions in Mesopotamia, the Russian army in the Caucasus, after a long period of apparent inactivity, was striking hard blows at the Turks in the mountain-ous region of Armenia. It helped to form the Transcaucasian Republic in 1918 but soon declared its independence and was recognized by the Allies in 1920. It became a Soviet Republic in 1921. See APPENDIX: World War, for

other detailed matter.

Armenian Literature. Previous to the introduction of Christianity by Gregory (A. D. 300), the Armenians had adhered to the Assyrian or Medo-Persian system of culture; but excepting a few old songs or ballads, no remains of that early period exist. After their conversion to Christianity, the Greek language and its literature soon became favorite objects of study, and many Greek authors were translated into Armenian. The Armenian language has an alphabet of its own, consisting of 36 letters, introduced by Meisrob in 406. The most flourishing period of Armenian Literature extends from the 4th to the 14th century. The numerous Armenian theological writers and chroniclers of this era supply materials for a history of the East during the Middle Ages which have hitherto been too much neglected.
These Armenian writers generally copied the style of the later Greek and Byzantine authors; but in adherence to facts and good taste, they are superior to the general order of Oriental historians. In the 14th century literature began to decline, and few remarkable works were afterwards produced, but since the time of their dispersion, the Armenians have preserved recollections of their national literature; and wherever they are found—in Amsterdam, Lemberg, Leghorn, Venice, Astrakan, Moscow, Constantinople, Smyrna, Ispahan, Madras, or Calcutta -the printing-office is always a feature in their colonies. The most interesting Armenian settlement is that of the Mechitarists on the island of San Lazaro, near Venice.

The Bible translated into Armenian (the Old Testament from the text of the Septuagint) by Meisrob and his scholars is esteemed the highest model of classic style. Translations of several Greek authors, made about the same time, have been partly preserved, and contain some writings of which the originals have been lost-namely, the Chronicle of Eusebius; the Discourses of Philo; Homilies by St. Chrysostom, Severianus, Basil the Great, and Ephraim Syrus. Several old geographical and historical works have been preserved. Among philosophical and theological writers may be mentioned: David, the translator and commenta-tor of Aristotle, Esnik, and Joannes

Ozniensis. The "Lives of Armenian Saints, 12 vols. Ven. 1814," contains many notices of the history of Armenia. In poetry and fiction Armenian Literature is poor. Somal, in his work entitled "Quadro della Storia Litteraria di Armenia" (Venice, 1829), gives a general view of the contents of Armenian Literature. The Armenian belongs to the Indo-Germanic group of languages, but has many peculiarities of structure. It is harsh and disagreeable to the ear. The old Armenian, the language of literature, is no longer a living tongue; while the new Armenian, split up into four dialects, contains many Turkish words and grammatical constructions.

Armida, one of the most prominent female characters in Tasso's "Jerusa-lem Delivered." As the poet tells us. when the Crusaders arrived at the Holy City, Satan held a council to devise some means of disturbing the plans of the Christian warriors, and Armida, a very beautiful sorceress, was employed to seduce Rinaldo and other Crusaders. Rinaldo was conducted by Armida to a remote island, where, in her splendid palace, surrounded by delightful gardens and pleasure-grounds, he utterly forgot his vows, and the great object to which he had devoted his life. To liberate him from his voluptuous bondage, two messengers from the Christian army-Carlo and Ubaldo-came to the island, bringing a talisman so powerful that the witchery of Armida was destroyed. Rinaldo escaped, but was followed by the sorceress, who was defeated by Rinaldo, who persuaded her to become a Christian. The story of Armida has been made the subject of an opera by Gluck and by Rossini.

Arminianism, the doctrine of Arminius, a Protestant divine, who maintained that God had predestinated the salvation or condemnation of individuals only from having foreseen who would and who would not accept

of offered mercy.

Arminius, Jacobus, a Protestant divine, born at Oudewater, Holland, 1560, founder of the sect of the Arminians. A life of perpetual labor and vexation of mind at last brought on a sickness, of which he died, 1609.

Armistice, the term given to a truce or suspension of hostilities between two armies or nations at war, by mutual consent.

Armitage, Edward, an English historical and mural painter, born in London, May 20, 1817.

Armitage, Thomas, an American clergyman; born at Pontefract, England, Aug. 2, 1819; was an important influence in the Baptist Church in New York city, and the prime mover in the establishment of the American Bible Union in 1850. He was president of that body from 1856 to 1875. Died, Yonkers, N. Y., Jan. 21, 1896.

Armor, a word formerly applied to all such contrivances as served to defend the body from wounds or to defend the body from wounds or to annoy the enemy. Hence it was di-vided into two kinds, defensive and offensive. A complete suit of defen-sive armor anciently consisted of a casque or helm, a gorget, cuirass, gauntlets, tasses, brassets, cuishes and covers for the legs, to which the spurs were fastened. This was called armor, cap-a-pie, and was worn by cavaliers and men-at-arms. The infantry had only part of it, viz., a pot or headpiece, a cuirass and tasses. The horses had armor which covered the head and neck. In the World War trench fighters on both sides were provided with metal helmets and German infantry were said to wear a metallic covering for the chest and stomach. The word is also applied to the protection given to warships, war motors, etc., usually plates of steel.

Armored Train, one of the modern instruments of war that received severe tests in the American opera-tions against Filipino insurgents in 1898-1899, and in those of the British against the Boers in 1899-1900.

Armor-Piercing Shells, projec-tiles so constructed as to bore through the metallic plates with which modern ships of war are coated.

Armor Plates, slabs of metal with which the sides of war vessels are covered to render them shot-proof.

Armour, Philip Danforth, an American philanthropist, born in Stockbridge, N. Y., May 16, 1832; received a common school education; was a miner in California in 1852-1856; in the commission business in Milwaukee in 1856-1863; and later became the head of a large meat-pack- English physician, born in Ireland

ing concern in Chicago. He founded the Armour Mission and the Armour Institute of Technology, both in Chicago; the former at a cost of about \$250,000, and the latter with an endowment of \$1,500,000, subsequently increased. He died Jan. 6, 1901.

Arms, a term applied to weapons of offense, which are divisible into two distinct sections - firearms, and arms used without gunpowder or other explosive substance.

ARMOR-PIERCING SHELLS.

Arms, Coat of, or Armorial Bearings, a collective name for the devices borne on shields, banners, etc., as marks of dignity and distinction and, in the case of family and feudal arms, descending from father to son. They were first employed by the crusaders, and became hereditary in families at the close of the 12th century. They took their rise from the knights painting their banners or shields each with a figure or figures proper to himself, to enable him to be distinguished in battle when clad in armor.

Arms, Stand of, the set of arms necessary for the equipment of a single soldier.

Armstrong, Sir Alexander, an

about 1820; was educated at Trinity College, Dublin, and at the University of Edinburgh; and became widely known as an explorer. He died July 5, 1899.

of the Revolution on the staff of General Gates; was United States Minister to France, 1804–1810, afterward to Spain; and Secretary of War, 1813–1814. Armstrong, William George, Lord, an English inventor, born in 1810 at Newcastle, where his father was a merchant. During the Crimean of enormous number, devouring al-

most every green thing it meets. It is about 1½ inches long, greenish in color, with black stripes, and is found in various parts of the world, but is particularly destructive in North America.

Arnaud, Henri, the pastor and military leader of the Vaudois of Piedmont; born in 1641. At the head of his people he successfully withstood the united forces of France and Savoy, and afterward did good service against France in the War of the Spanish Succession. He had to retire from his country, and was followed by a number of his people, to whom he discharged the duties of pastor till his death, which occurred in 1721.

Arnaud, Jacques Achille Leroy De Saint, Marshal of France; born in Bordeaux, Aug. 20, 1796. In March, 1854, he was appointed to the command of the French army which was engaged in the war against Russia. He died Sept. 29 following.

Arndt, Ernst Moritz, a German writer and patriot, born at Schoritz, Isle of Rugen, Dec. 29, 1769. He died in Bonn, Jan. 29, 1860.

Arndt, Johann, a German Lutheran clergyman, born at Ballenstedt, Anhalt, in 1555. His "True Christianity" was translated into most European languages, and is yet popular in Germany. Its object is edification. He died at Celle, Hanover, in 1621.

Arne, Thomas Augustine, an English musical composer, born in London, March 12, 1710. He wrote the music for the revival of Milton's "Masque of Comus," in which first appeared the song of "Rule Britannia," since acknowledged as the national air of England. He died in 1778.

Arnee, one of the numerous Indian varieties of the buffalo, remarkable as being the largest animal of the ox kind known. It measured about 7 feet high at the shoulders, and from 9 to 10½ feet long from the muzzle to the root of the tail. It is found chiefly in the forests at the base of the Himalayas.

Arneth, Alfred von, an Austrian historian, born in Vienna, July 10, 1819. He died in Vienna, July 81, 1897.

Arnica, a genus of plants belonging to the order asteraceæ, or composites; also the English name of plants. As an outward application, arnica is in constant use as a remedy for sores, wounds, bruises, and ailments of a similar kind. It is also employed as an internal medicine.

Arnim, Achim von, a German poet and novelist, born in Berlin, Jan. 26, 1781. He died at Wiepersdorf, Jan. 31, 1831.

Arnim, Elizabeth von, better known as Bettina, wife of the German novelist Louis Achim von Arnim, and sister of the poet Clemens Brentano; born in Frankfort-on-the-Main, April 4, 1785. She died in Berlin, Jan. 20, 1859.

Arnim, Harry, Graf von, a German diplomatist, born in Pomerania, in 1824; from 1864 to 1870, was Prussian ambassador at Rome, where he supported the anti-infalliblists during the Vatican Council. He was rewarded with the title of Graf, but, as German ambassador to France (1872-1874), he fell into Prince Bismarck's disfavor, and, on a charge of purloining State documents, was sentenced to three months', to six months', and to five years' imprisonment. He had, however, retired into exile, and died at Nice, May 19, 1881.

Arno, a river of Italy, which rises in the Etruscan Apennines, makes a sweep to the South and then trends westward, divides Florence into two parts, washes Pisa, and falls, 4 miles below it, into the Tuscan Sea, after a course of 130 miles.

Arnold, Abraham Kerns, an American military officet, born in 1837; was graduated at the United States Military Academy in 1859; entered the cavalry branch of the army; served through the Civil War and received a Congressional medal of honor for gallantry in action; and after the war served against the Indians on the frontier. In 1898, he was commissioned a Brigadier-General and served in the field during the war with Spain; and in 1899 became commander of the 2d Division, 7th Army Corps, in Cuba. He died Nov. 23, 1901.

Arnold, Sir Arthur, an English statesman and author, born in 1833. He acted as assistant commissioner to administer the Public Works Act dur-

ing the cotton famine, 1863-1866; knighted in June, 1895.

Arnold, Benedict, an American military officer, born in Norwich, Conn., Jan. 14, 1741. He was settled in extensive business at New Haven when the War of Independence broke out. After the news of the battle of Lexington, he raised a body of volunteers, and received a colonel's commission. After commanding, for a short time, a small fleet upon Lake Champlain, he was with General Montgomery, charged with the diffi-cult duty of leading a force of 1,100 men across the wilds of the country to Quebec, to stir up rebellion there, and displace the British garrison. In this unsuccessful attempt Montgomery was killed and Arnold severely wounded. After this, we find him in various important commands, but as often involved in quarrels with Congress and his fellow-officers. It would be of little interest now to enter into a detail of his grievances. He seems to have been a singularly brave, but reck-less and unprincipled, man. Washing-ton valued him for his acts of daring, and would gladly have overlooked his faults; but Congress and his brotherofficers regarded him with dislike, and sought every possible means to humble and annoy him. After many disputes about the honor that was due to him for his services, he was invested with the government of Philadelphia. There his imprudence was most marked; indeed, it would be difficult to clear him from the charge of actual dishonesty. He was brought before a courtmartial; four charges were urged against him; two of these were found proven, and he was sentenced to be reprimanded by the commander-inchief. Arnold could not bear the affront, nor longer endure the difficul-ties into which he had brought himself. He, accordingly, formed the disgraceful design of deserting to the ranks of the enemy, and put himself in communication with Sir Henry Clinton, the British commander. Major Andre was sent by Sir Henry to negotiate with Arnold, and they had an interview near West Point, which fortress Arnold had offered to surrender to the enemy. On his way to the British camp, however, the reformers prior to the Reformation, a

young officer fell into the hands of the Americans, and the whole plot was of Americans, and the whole plot was of course discovered. The news of Andre's capture reached Arnold just in time to enable him to make his escape and reach the British camp in safety. There he retained his rank of brigadier-general, and fought with as much daring against the cause of American independence as he had before fought against the royal forces. He took command in an expedition against Virginia, and again in an incursion into his native State. Afterward he served in Nova Scotia and the West Indies, and at last settled in London, England, where he died. June 14, 1801.

Arnold, Sir Edwin, an English poet and journalist, born in Rochester, June 10, 1832. He graduated from Oxford in 1854; taught for a while in Birmingham; and became principal of the Sanskrit College at Poona, in the Bombay Presidency, where he rendered important service to the government during the great rebellion in India. Returning to London in 1861, he joined the editorial staff of the "Daily Telegraph." He has twice visited the United States. He died March, 1904.

Arnold, Edwin Lester, an English author, son of Sir Edwin Arnold.

Arnold, George, an American poet, born in New York, June 24, 1834; died at Strawberry Farms, N. J., Nov. 3, 1865.

Arnold, Arnold, Hans, pseudonym of Bertha von Bulow, a German story writer, born at Warmbrunn, Silesia, Sept. 30, 1850.

Arnold, Isaac Newton, an American lawyer, politician, and author, born at Hartwick, N. Y., Nov. 30, 1815; was a member of Congress from 1861 to 1865. He died in Chicago, Ill., April 24, 1884.

Arnold, Matthew, an English poet, critic, and essayist, born at Laleham, Dec. 24, 1822; graduated at Oxford in 1844, and was Professor of Poetry there from 1857 to 1867. Arnold first became known as a poet of classical taste by the volume of poems and selections issued under his name in 1854. He died in Liverpool, April 15, 1888.

disciple of Abelard of Paris, and of Berengarius. As early as the middle of the 12th century, his bold spirit, his scriptural knowledge, and his eloquence, had succeeded in arousing France and Italy against the abuses of the Roman Church. Driven by the clergy from Italy, he sought refuge in Zurich, where he made many converts. At length, through the instigation of St. Bernard of Clairvaux, he was charged with heresy, and excommunicated by Pope Innocent II. At this juncture, serious popular tumults occurred at Rome, and Arnold, hastening thither, was received with great cordiality, and soon vested with su-preme power. In 1155, however, Ad-rian IV. interdicted and expelled him from the city. For a time he lived in Campagna, but was seized, and taken back to Rome, where he was executed, and his ashes thrown into the Tiber. **Arnold of Winkelried**, a Swiss hero, who, at the battle of Sempach,

in 1386, sacrificed himself to insure victory to his countrymen. The Austrian knights, dismounted, had formed themselves into a phalanx, which the Swiss vainly strove to pierce; when Arnold, rushing on the spear points of the enemy, and burying several in his breast, thus opened a gap in the fence of steel. The Swiss rushed in through the opening, and routed the Austrians with great slaughter.

Arnold, Thomas, an English clergyman and historian, born in Cowes, Isle of Wight, June 13, 1795. English He entered Oxford University in 1811, and was elected a fellow of Oriel Col-lege in 1815. While in this place he was the friend and contemporary of the poet Keble, of Copleston, and of Archbishop Whately. In 1828, Arnold was elected to the head-mastership of Rugby School, which office he held until his death, and raised it to the highest rank among the great public schools of England, He was de-picted in Thomas Hughes' book "Tom Brown at Rugby." He died June 12, 1842.

Arnold, Thomas, an English writer on literature, and editor of old Thomas, texts, son of Dr. Arnold, of Rugby, and brother of Matthew Arnold, born at Laleham, Nov. 30, 1823. He pub-lished a manual of English literature that is widely used. He was one of trated, for distilled spirits.

those engaged in the Tractarian movement, and was closely connected with Cardinal Newman. He died in 1900.

Arnolfi, di Cambio, or di Lapo, an Italian architect and sculptor, born in Florence, in 1232. He died in 1300.

Arnott, Neil, a Scottish physicist, born in Aberdeen, in 1788. He died in 1874.

Arnotto, the waxy-looking pulp which envelops the seeds in the ar-notto-tree. This is detached by throwing the seed into water, after which it is dried partially, and made up first into soft pellets, rolled in leaves, in which state it is called flag, or roll arnotto. Afterward, becoming quite dry, it is formed into cakes, and becomes cake arnotto. The South and becomes cake arnotto. The South American Indians color their bodies red with it; farmers here and elsewhere use it to stain cheese, and some dairymen also use it to color butter; the Spaniards put it in their chocolate and soups; dyers use it to produce a reddish color, and varnish makers, to impart an orange tint to some varnishes.

Aroostook, an American river; rises in Piscataquis county, Me.; flows more than 120 miles in a circuitous course, receiving many important tributaries; and enters the St. John River in New Brunswick. It was an important factor in the settlement of the long-pending dispute concerning the boundary between the United States and British America.

Arpad, the conqueror of Hungary, and founder of the Arpad dynasty, which reigned till 1301, was born in the second half of the 9th century. He died in 907.

Arpent, formerly a French measure for land, equal to five-sixths of an English acre; but it varied in different parts of France.

Arquebus, a hand-gun; a species of firearm resembling a musket, anciently used. It was fired from a forked rest, and sometimes cocked by a wheel, and carried a ball that weighed nearly two ounces. A larger kind used in fortresses carried a heavier shot.

Arrack, a term used in the countries to which the Arabs have peneArras, a city of France; capital of the Department of Pas-de-Calais; 27 miles S. W. of Lille, 60 miles S. E. of Calais, 100 miles N. N. E. of Paris, at the junction of the Scarpe and Crinchon rivers; pop. (1901) 25,813. It was a noted place before the Christian era; was strongly fortified by Vauban; and has been the seat of many historic conflicts, most recently giving its name to a great series of battles between the Allies and the Teuton forces early in 1917. See APPENDIX: World War.

Arrow, a missile weapon, designed to be propelled by the impulse communicated by the snapping of the string of a bow, temporarily bent into an angular form, back to its normal state of rest in a straight line. It is one of the most ancient of weapons.

Arrow Lake, an expansion of the Columbia river, in British Columbia, Canada; about 95 miles long from N. to S.; often regarded as forming two lakes—Upper and Lower Arrow Lake.

Arrowroot. In botany, the English name of the botanical genus maranta. The root is a fleshy corm, which, when washed, grated, strained through a sieve, and again repeatedly washed, furnishes the substance so much prized as food for invalids.

Arrowsmith, Aaron, an English cartographer, born in 1750, died in 1823. He raised the execution of maps to a perfection it had never before attained.

Arru Islands, a group of over 80 islands in the Dutch East Indies, lying W. of New Guinea, with a united area of about 2,650 square miles and a population of some 15,000. The inhabitants resemble the Melanesians of New Guinea.

Arsaces, founder of the Parthian monarchy. He induced his countrymen to rise against the Macedonian yoke, 250 B. C., on which they raised him to the throne. Arsaces was slain in battle, after a reign of 38 years. He was the first of a long line of monarchs of the same name, the last of whom was put to death about 226 A. D.

Arsenal, a place appointed for the making, repairing, keeping and issuing of military stores of all kinds.

The principal manufacturing arsenals of the United States in 1929 include Augusta, Augusta, Ga.; Benicia, Benicia, Cal.; Frankford, Frankford, Pa.; Picatinny, Dover, N. J.; Raritan, Metuchen, N. J.; Rock Island, Rock Island, Ill.; San Antonio, San Antonio, Tex.; Springfield Armory, Springfield, Mass.; U. S. Nitrate Plant No. 1, Sheffield, Ala.; U. S. Nitrate Plant No. 2; Nitrate Plant, Ala.; Watertown, Watertown, Mass.; Watervliet, Watervliet, N. Y.; Edgewood Arsenal, Edgewood, Md.

Arsenic, (symbol As, atomic weight) 75), a metallic element of very common occurrence, being found in combination with many of the metals in a variety of minerals. It is of a darkgray color, and readily tarnishes on exposure to the air, first changing to yellow, and finally to black. In hardness it equals copper; it is extremely brittle, and very volatile, beginning to sublime before it melts. It burns with a blue flame, and emits a smell of garlic. Its specific gravity is 5.76. It forms alloys with most of the metals. Combined with sulphur it forms orpiment and realgar, which are the yellow and red sulphides of arsenic. It is usually seen in white, glassy, translu-cent masses, and is obtained by sublimation from several ores containing arsenic in combination with metals, particularly from arsenical pyrites. Of all substances arsenic is that which has most frequently occasioned death by poisoning, both by accident and design. The remedies are hydrated sesquioxide of iron with copious draughts of gummy liquids.

Arsinoë, a city of ancient Egypt on Lake Mæris, said to have been founded about B. C. 2300, but renamed after Arsinoë, wife and sister of Ptolemy II. of Egypt, and called also Crocodilopolis, from the sacred crocodiles kept at it.

Arson, the malicious and willful burning of a dwelling-house or outhouse belonging to another person by directly setting fire to it, or even by igniting some edifice of one's own in its immediate vicinity. It is a penal offense, whether successful or not.

Art, the power of doing something not taught by nature or instinct; as,

to walk is natural, to dance is an art;
—power or skill in the use of knowledge; the practical application of the rules, or principles of science. A system of rules to facilitate the performance of certain actions; contrivance; dexterity; address; adroitness.

Art, Metropolitan Museum of, a spacious edifice in Central Park, New York, erected by the city for the purpose to which it is devoted. It was incorporated in 1870, and possesses an art collection amounting in value to many millions of dollars.

Artaxerxes I., surnamed Longimanus, was the third son of Xerxes, King of Persia, and, having murdered his brother Darius, ascended the throne 465 B. C. He died in 424 B. C. and was succeeded by his only son, Xerxes. This prince is generally supposed to have been the Ahasuerus of Scripture, who married Esther, and by whose permission Ezra restored the Jewish religion at Jerusalem. Some modern authors, nevertheless, identify Ahasuerus with Xerxes.

Artemis, an ancient Greek divinity, identified with the Roman Diana. She is variously represented as a huntress, with bow and arrows; as a goddess of the nymphs, in a chariot drawn by four stags; and as the moon goddess, with the crescent of the moon above her forehead.

Artemisia, wormwood; named after Artemis, the Greek goddess, corresponding to the Roman Diana. Several species, locally known as sage brush, are found on the table-lands of the Rocky mountains and on the Western plains of the United States.

Arteritis, an inflammation occurring in the arteries. It may be acute or chronic.

Artery. The largest arteries which leave the heart are the aorta and the pulmonary artery; both spring from the base of the heart in front. They branch and anastomose to a large extent. The contractility of the arteries forces the blood to the extremities from the heart, the valves of which prevent its return. The prominent difference between blood drawn from the arteries and that from the veins is to be found in the bright scarlet color of the former and the dark red, Amost black, of the latter.

Artesian Wells, deep wells bored through impervious rock strata to a porous water bearing rock strat-um whence the water flows to the surface and is discharged from the bore. It is also applied, though less correctly, to deep wells where the waters rise to within a short distance of the surface even if no real flow is establish-ed. The principal condition of an artesian well is a pervious stratum pro-tected above and below by a watertight bed. These layers come to the surface in some elevated regions where they get their rain flow, then pitch downward to a considerable depth and then rise again, thus forming a great basin which retains the water. Rain water and surface water fill the porous stratum to the brim. If it be tapped any, the water will rise in the bore and be discharged as long as the supply equals the demand.

Arteveld. or Artevelde. name of two men distinguished in the history of the Low Countries. JACOB VAN, a brewer of Ghent, born about 1300; was selected by his fel-low townsmen to lead them in their struggles against Count Louis of Flanders. A proposal to make the Black Prince, son of Edward III. of England, governor of Flanders, led to an insurrection, in which Arteveld lost his life (1345). (2) PHILIP, son of the former, at the head of the forces of Ghent, gained a great victory over the Count of Flanders, Louis II., and for a time assumed the state of a sovereign prince. His reign proved short-lived The Count of Flanders re-turned with a large French force, fully disciplined and skillfully commanded. Arteveld was rash enough to meet them in the open field at Roosebeke, between Courtrai and Ghent, in 1382, and fell with 25,000 Flemings.

Arthralgia, pain in a joint. The term is more particularly applied to articular pain in the absence of objective disease.

Arthritis, any inflammatory distemper that affects the joints, particularly chronic rheumatism or gout.

Arthur, a prince of the Silures, and King of Britain in the time of the Saxon invasions in the 5th and 6th centuries. The existence and exploits of Arthur and of his paladins, the

Knights of the Round Table, whether they have any real foundation or are but a mere historical fable, have been for ages the theme of minstrels and poets, even down to the present day; examples of which are the famous romaunt of the "Mort d'Arthur" and the "Idylls of the King."

Arthur, Chester Alan, 21st President of the United States, born in Fairfield, Vt., Oct. 15, 1830, his father being pastor of Baptist churches in Vermont and New York. He chose law as a profession, and practiced in New York. He became an active leader in the Republican party. During the Civil War he was energetic as quartermaster-general of New York in getting troops raised and equipped. He was afterward collector of customs for the port of New York. In 1880 he was elected Vice-President, succeeding as President on the death of James A. Garfield, in 1881, and in this office he gave general satisfaction. He in New York city, Nov. 18, 1886. He died

Arthur, Joseph Charles, an American botanist, born in 1850; was graduated at the Iowa Agricultural College in 1872; took advance courses at Johns Hopkins, Harvard, and Bonn Universities; was instructor in botany at the Universities of Minnesota and Wisconsin, and for several years bo-tanist to the Agricultural Experiment Station, Geneva, N. Y., subsequently becoming Professor at Purdue University, and botanist to the Indiana Experiment Station. Profesor emeritus at Purdue since 1915.

Arthur, Timothy Shay, an American author, born in Newburg, N. Y., in 1809. He died in Philadelphia, Pa., March 6, 1885.

Artichoke, a well-known plant cultivated chiefly for culinary pur-poses. The so-called Jerusalem artichoke is a species of sunflower which grows wild in parts of South America and yields roots or tubers resembling those of the potato and used as food.

Article, in grammar, a part of speech used before nouns to limit or define their application.

Articles of Confederation, the title of the compact which was made by the 13 original States of the United States of America. It was adopted 1781, and remained as the supreme law, until the first Wednesday of March, 1789.

Articles of War, a code of laws for the regulation of the military forces of a country. In the United States the articles of war form an elaborate code, thoroughly revised in 1880, but subject at all times to the legislation of Congress.

Articles, The Six, in English ecclesiastical history, articles imposed by a statute (often called the Bloody Statute) passed in 1541, the 33d year of the reign of Henry VIII. They decreed the acknowledgment of transsubstantiation, the sufficiency of communion in one kind, the obligation of vows of chastity, the propriety of private masses, celibacy of the clergy, and auricular confession. Acceptance of these doctrines was made obligatory on all persons under the severest penalties; the act, however, was relaxed in 1544, and repealed in 1549.

Articles, The Thirty-nine, of the Church of England, a statement of the particular points of doctrine, 39 in number, maintained by the English Church; first promulgated by a convocation held in London in 1562-1563, and confirmed by royal authority; founded on and superseding an older code issued in the reign of Edward VI. The five first articles contain a profession of faith in the Tripity: the profession of faith in the Trinity; the incarnation of Jesus Christ, His descent to Hell, and His resurrection; the divinity of the Holy Ghost. The three following relate to the canon of the Scripture. The eighth article dethe Scripture. The eighth article de-clares a belief in the Apostles', Ni-cene, and Athanasian creeds. The ninth and following articles contain the doctrine of original sin, of justification by faith alone, of predestina-tion, etc. The 19th, 20th, and 21st detion, etc. The 19th, 20th, and 21st de-clare the Church to be the assembly of the faithful; that it can decide nothing except by the Scriptures. The 22d rejects the doctrine of purgatory, indulgences, the adoration of images, and the invocation of saints. The 23d decides that only those lawfully called shall preach or administer the sacra-ments. The 24th requires the liturgy to be in English. The 25th and 26th declare the sacraments effectual signs of grace (though administered by evil and carried into force on March 1, men), by which God excites and confirms our faith. They are two: baptism and the Lord's Supper. Baptism, according to the 27th article, is a sign of regeneration, the seal of our adop-tion, by which faith is confirmed and grace increased. In the Lord's Supper, according to article 28th, the bread is the communion of the Body of Christ, the wine the communion of His Blood, but only through faith (article 29); and the communion must be administered in both kinds (article 30). The 28th article condemns the doctrine of transubstantiation, and the elevation and adoration of the Host; the 31st rejects the sacrifice of the mass as blasphemous; the 32d permits the marriage of the clergy; the 33d maintains the efficacy of excommunication. The remaining articles relate to the supremacy of the king, the condemnation of Anabaptists, etc. They were ratified anew in 1604 and 1628.

Artillery, all sorts of great guns, cannon, or ordnance, mortars, howitzers, machine-guns, etc., together with all the apparatus and stores thereto belonging, which are taken into the field, or used for besieging and defending fortified places. It is often divided into (1) horse artillery; (2) field artillery; and (3) garrison artillery.

Artiliery, The Ancient and Honorable, of Boston, Mass., was formed in 1637, and was the first regularly organized military company in America.

Arundelian Marbles, a series of ancient sculptured marbles discovered by William Petty, who explored the ruins of Greece at the expense of and for Thomas Howard, Earl of Arundel, who lived in the time of James I. and Charles I., and was a liberal patron of scholarship and art. After the Restoration they were presented by the grandson of the collector to the University of Oxford. Among them is the "Parian Chronicle," a chronological account of the principal events in Grecian, and particularly in Athenian, history, during a period of 1318 years.

Arundel Society, a society instituted in London in 1848 for promoting the knowledge of art by the publication of fac-similes and photographs.

Aruspices, or Haruspices, a class of priests in ancient Rome, of Etrurian origin, whose business was to inspect the entrails of victims killed in sacrifice, and by them to foretell future events.

Aryan Languages, a great family of languages, sometimes, though rarely, and not quite accurately, called Japhetic; more frequently designated as the Indo-European or Indo-Germanic family of tongues. They have reached a higher development than those of the second great family, the Semitic, better described as the Syro-Arabian family, and are far in advance of the next one—that comprising the Turanian tongues. Like the Syro-Arabian forms of speech, they are inflectional; while those of Turanian origin are only agglutinate.

Aryan Race, a designation, since about 1845, of the ethnological division of mankind otherwise called Indo-European or Indo-Germanic. That division consists of two branches geographically separated, an eastern and western. The western branch comprehends the inhabitants of Europe, with the exception of the Turks, the Magyars of Hungary, the Basques of the Pyrenees, and the Finns of Lapland; the eastern comprehends the inhabitants of Armenia, of Persia, of Afghanistan, and of Northern Hindustan. The evidence on which a family relation has been established among these nations is that of language, and from a multitude of details it has been proven that the original mother tongue of all these peoples was the same. It is supposed that the Aryan nations were at first located somewhere in Central Asia, probably E. of the Caspian, and N. of the Hindu Kush and Paropamisan Mountains. From this center successive migrations took place toward the N. W. The first swarm formed the Celts, who at one time occupied a great part of Europe; at a considerably later epoch came the ancestors of the Italians, the Greeks and the Teutonic people. The stream that formed the Slavonic nations is thought to have taken the route by the N. of the Caspian. At a later period the remnant of the primitive stock would seem to have broken up. Part passed southward and became the dominant race in the valley of the Ganges, while the rest settled in Persia and became the Medes and Persians of history. It is from these eastern members that the whole family takes its name. In the most ancient Sanskrit writings (the Veda), the Hindus style them-selves Aryas, the word signifying "ex-cellent," "honorable," originally "lord of the soil."

Asa, son of Abijah, and third King of Judah, conspicuous for his earnestness in supporting the worship of God and rooting out idolatry, and for the vigor and wisdom of his government. He reigned from 955 to 914 B. C.

Asafetida, Asafœtida, or Assafcetida, the English name of two, if not more, plants growing in Persia and the East Indies. The extract is a useful medicine in hysteria, asthma, tympanites, dyspnæa, pertussis, and worms; it is sometimes given also as a clyster.

Asama, an active volcano of Ja-pan, about 50 miles N. W. of Tokio, 8,260 feet high.

Asbestos, a variety of hornblende, which itself is classed by Dana as a synonym or subdivision of emphibole.

Asbury, Francis, the first Methodist bishop consecrated in America, born at Handsworth, Staffordshire, Aug. 20, 1745. When 16 years old he became an itinerant Wesleyan preacher, and in 1771 he was sent as a missionary to America, where he was consecrated in 1784. During a long life of almost incessant labor it is estimated by his biographer that he traveled about 270,000 miles (mostly on horseback), preached about 16,500 sermons, and ordained more than 4,000 preachers. He died in Richmond, Va., March 31, 1816.

Asbury Park, a city and popular summer resort in Monmouth counts, N. J.; on the Atlantic Ocean and the Pennsylvania and Central of New Jersey railroads; 6 miles S. of Long Branch, Wesley Lake separates it Branch. from Ocean Grove. Population (1930)

14,981, summer pop. 22,000.

Ascalon, Ashkelon, or Askelon, one of the five cities of the Philistines, on the Mediterranean, W. S. W. of Jerusalem, on the main road from Egypt through Gaza to Central Palestine.

Ascension (discovered on Ascension Day), an island of volcanic origin belonging to Great Britain, near the middle of the South Atlantic Ocean, lying about lat. 7° 55′ S.; long. 15° 25′ W.; 800 miles N. W. of St. Helena; area, about 36 square miles; pop. 165. It is retained by Great Britain mainly as a station at which ships may touch for stores.

Ascension, in astronomy, right ascension is the distance of a heavenly body from the first point of Aries (the ram), measured upon the equator.

Ascension Day, the day on which our Saviour's ascension is commemorated - the Thursday but one before Whitsuntide, sometimes called Holy Thursday.

Asceticism, the condition or practice of ascetics.

Ascetics, a name given in ancient times to those Christians who devoted themselves to severe exercises of piety and strove to distinguish themselves from the world by abstinence from sensual enjoyments and by voluntary penances.

Ascham, scholar and author, born at Kirby Wiske, near Northallerton, in 1515; graduated at Cambridge, and struggled with poverty until patrons came to his relief. He was famous for his general knowledge and acquirements in Greek and Latin, and is classed with Spenser, Sir Thomas More, and Sir Philip Sidney. His death, in London, Dec. 30, 1568, was occasioned by his tecchia. by his too close application to the composition of a poem, which he intended to present to the queen on the anniversary of her accession.

Asclepiad, a kind of verse used by Horace and other writers.

Asclepiades, the descendants of the god of medicine, Æsculapius, by his sons Podalirius and Machaon, spread, together with the worship of the god, through Greece and Asia Minor. They formed an order of priests, which preserved the results of the medical experience acquired in the temples as an hereditary secret, and were thus, at the same time, physicians, prophets, and priests.

Asclepiades, a Greek physician, born at Prusa, Bithynia, who flourished during the early part of the 1st

century B. C. He is said to have been the first who distinguished between acute and chronic diseases, and the invention of laryngotomy is also ascribed to him; but his knowledge of

cribed to him; but his knowledge of anatomy was apparently very slight. **Asclepias**, a genus of plants. The species are found chiefly along the eastern portion of North America, in Bermuda, etc. Though all more or less poisonous, they are used medicipally

Ascot Heath, a race-course in Berkshire, England, 29 miles W. S. W. of London, and 6 miles S. W. of

Asdood, or Asdoud, a small seaport of Palestine, on the Mediterra-nean, 35 miles W. of Jerusalem. It was the Ashdod of Scripture, one of the five confederate cities of the Philistines, and one of the seats of the worship of Dagon (1 Sam. v: 5).

Asgard, the Heaven of Scandinavian mythology.

Ash, a genus of deciduous trees, having imperfect flowers and a seed vessel prolonged into a thin wing at the apex (called a samara). There are a good many species, chiefly indigenous to North America and Europe.

Ashanti, formerly an independent Kingdom on the Gold Coast of West Africa; constituted a British protectorate Aug. 27, 1896; definitely annexed by Great Britain Sept. 26, 1901; capital Coomassie; area, 24,560 square miles; pop. (1926) 406,594. It is in great part hilly, well watered, and covered with dense tropical vegetation. The chief town is Coomassie, which, before being burned down in 1874. 1874, was well and regularly built with wide streets, and had from 30,-000 to 50,000 inhabitants. Horrible human sacrifices were a feature of Ashanti worship when the country was independent. In 1896 a British expedition, from the Gold Coast, forced the submission of the King, who, with his principal chiefs, was sent to Sierra Leone. A railway has traffic established, to the improvement of commerce. Modern agriculure is rapidly extending.

and the plural Ashtaroth indicate probably different modifications of the divinity herself. Ashtoreth is the As-

Ashburton Treaty, a treaty signed at Washington in 1842, by Lord Ashburton for Great Britain,

Lord Ashburton for Great Britain, and Daniel Webster for the United States; defined the boundaries between the United States and Canada.

Asheville, city and capital of Buncombe county, N. C.; at junction of the Swananoa and French Broad rivers, and on the Southern railroad; 275 miles W. of Raleigh. It is on

the Blue Ridge Mountains, 2,350 feet above the sea; is a noted winter and summer resort; and has several colleges, and normal and industrial schools. Nearby is George Vanderbilt's famous estate of Biltmore. Pop.

(1920) 28,504; (1930) 50,193.

Ashland, city, port of entry, and capital of Ashland county, Wis.; on Lake Superior and several trunk line resilvents. railroads; 315 miles N. of Milwaukee. Ashland has a magnificent harbor fringed with enormous ore docks; is a notable shipping point for the ore of the great Gogebic iron range; and besides iron ore has a large lake traffic in lumber and brownstone. The noted Apostle Islands are nearby. Pop. (1930) 10,622.

Ashmun, Jehudi, an American Ashmun, Jehudi, an American missionary, born at Champlain, N. Y., in April, 1794; became a professor in the Bangor Theological Seminary. On June 19, 1822, he sailed for Liberia, and there founded a colony, which when he left, six years later, had increased to 1,200 inhabitants. had increased to 1,200 He died Aug. 25, 1828.

Ashtabula, a city in Ashtabula county, O.; on the Ashtabula river and the Lake Shore & Michigan Southern railroad; 3 miles S. of Lake Erie, 54 miles N. E. of Cleveland; is a port of entry, with a fine harbor and extensive trade in iron ore and excels recorded to the supplies of the sup coal; manufactures leather and woolen goods, farm implements, machinery, gas fixtures, stoves and furnaces. Pop. (1920) 22,082. (1930) 23,301.

Ashtaroth, or Astaroth, plural of Ashtoreth and Astarte, a godbeen built from the modern port of dess worshipped by the Jews in times Sekondi to Coomassie, (Kumasi) tele-graph and telephone lines installed, female divinity of the Phænicians, as good roads made, and steamer river Baal was the principal male divinity;

PHOTOGRAPH OF AN AIR BATTLE

The French aeroplane at the top is maneuvering for position preparatory to swooping down on its German adversary. This rare photo was made by an observer in another French battleplane.

tarté of the Greeks and Romans, and is identified by ancient writers with the goddess Venus (Aphrodite). She is probably the same as the Isis of the Egyptians, and closely connected with the Asherah of Scripture.

Ashwanipi, or Hamilton, the great river of Labrador, has its source near the head waters of the E. branch of the Moisic, and after a course of 600 miles, enters the Atlantic through Esquimaux Bay, or Hamilton Inlet. About 100 miles up occur the falls, one of the grandest spectacles in the world.

Ash Wednesday, the first day of Lent, so called from a custom in the Western Church of sprinkling ashes that day on the heads of penitents, then admitted to penance.

Asia, the largest of the land divisions of the world, occupies the northern portion of the Eastern Hemisphere in the form of a massive continent, which extends beyond the Arctic circle, and by its southern peninsulas nearly reaches the equator. The origin of its name remains unknown. Europe and Asia constitute but one continent, extending from W. to E., continent, extending from W. to E., and having the shape of an immense triangle, the angles of which are Spain in the W., the peninsula of the Tchuktchis in the N. E., and that of Malacca in the S. E. The Arctic Ocean in the N., the Pacific in the E., and the Indian Ocean, continued by its narrow gulf, the Red Sea, which nearly reaches the Mediterranean. nearly reaches the Mediterranean, inclose the continent of Asia. The area covered by Asia and its islands is 17,-255,890 square miles; that is, almost exactly one-third of the land surface of the globe (32 per cent). It is oneseventh larger than the surface of both Americas together, by one-half larger than that of Africa, and more than four times larger than Europe. Geographically speaking, Europe is a mere appendix to Asia, and no exact geographical delimitation of the two continents is possible. The line of sep-aration from Africa is better defined by the narrow Red Sea; but Arabia participates so largely in the physical features of Africa that it is in a sense intermediate between the two conti-

largest rivers of Asia, the Yenisei and the Yang-tse-kiang, both as to length and drainage areas; but owing to the scarcity of rain over large parts of Asia, the amount of water carried down by the largest rivers is, as a rule, disproportionately small as compared with American or European rivers. The predominant feature of Asia's hydrography is the existence of very wide areas having no outlet to the sea. On the great plateau of Eastern Asia, the region which has no outlet from the plateau, and whose water does not reach even Lake Aral or the Caspian, covers a surface larger than that of Spain, France, and Germany together. It is watered only by the Tarim, which supplies some irrigation works in its upper parts, and enters the rapidly drying marshes of Lob-nor. This area is steadily increasing, and since 1862 we have had to add to it the drainage area (as large as England and Wales) of the Kerulen, which empties into Dalainor, but no longer reaches the Arguñ, a tributary of the Amur. The Ulyasu-tai River and the Tchagantogoi now no longer reach Lake Balkash; and the Urungu, which obviously joined the Upper Irtysh at no very remote date, empties into a lake separated from the Black Irtysh by a low isthmus not 5 miles wide. If we add to this the drainage basins of Lake Balkash with its tributaries, the Ili and other smaller rivers; the great Lake Aral, with the Syr-daria (Jaxartes) and Amudaria (Oxus), as also the numerous rivers which flow toward it or its tributaries, but are desiccated by evaporation before reaching them, and finally the Caspian with its tribu-Terek, we find an immense surface of more than 4,000,000 square miles; that is, much larger than Europe, which has no outlet to the ocean. The plateaus of Iran and Armenia, two separate areas in Arabia, and one in Asia Minor, represent a surface of 5,-567,000 square miles.

A succession of great lakes or in-land seas are situated all along the northern slope of the high plateaus of Western and Eastern Asia, their levnents.
Only four rivers, the Mississippi, farther E. The Caspian, 800 miles
Amazon, Kongo, and Nile, surpass the long and 270 wide, is an immense sea,

even larger than the Black Sea, but wide as the Ægean Sea, has its level of the ocean; Lake Aral, nearly as wide as the AEgean Sea, has its level 157 feet above the ocean; farther E. we have Lake Balkash (780 feet), Zaison (1,200 feet), and Lake Baikal (1,550 feet). Many large lakes appear on the plateaus of Tibet (Tengrinor, Bakha), and on the high plateau of the Selenga and Vitim (Ubsa-nor, Ikhe-aral, Kosogol, Oron); and smaller lakes and ponds are numerous also in the plateau of the Deccan, Armenia, and Asia Minor. Three large lakes, Urmia, Van, and Goktcha, and many smaller ones, lie on the highest part of the Armenian plateau. On the Pacific slope of the great plateau, the great rivers of China and the Amur, with its tributaries, have along their lower courses some large and very many small lakes. The highest mountain in the world is Mount Everest, 29,141 ft.

More than 120 active volcanoes are known in Asia, chiefly in the islands of the S. E., the Philippines, Japan, the Kurile, and Kamchatka, and also in a few islands of the Seas of Bengal and Arabia, and in Western Asia. Numerous traces of volcanic eruptions are found in Eastern Tian-shan in the northwestern border ridges of the high Siberian plateau, and in the S. W. of

Aigun, in Manchuria.

There are gold mines of great wealth in the Urals, the Altai, and Eastern Siberia; and auriferous sands are found in Korea, Sumatra, Japan, and in the Caucasus Mountains. Silver is extracted in Siberia; platina, in the Urals; copper, in Japan, India, and Siberia; tin, in Banca; mercury, in Japan. Iron ore is found in nearly all of the mountainous regions, especially in Asia Minor, Persia, Turkestan, India, China, Japan, and Siberia; but iron mining is still at a rudimentary stage. Immense coal-beds are spread over China and the islands of the Pacific (Hainan, Japanese Archipelago, Sakhalin), Eastern Siberia, Turkestan, India, Persia, and Asia Minor. They cover no less than 500,000 square miles in China alone;

India, the sapphires of Ceylon, the rubies of Burma and Turkestan, the topazes, beryls, etc., of the Urals and Nertchinsk, have a wide repute. Layers of rock-salt are widely spread, and still more so the salt lakes and springs. The petroleum wells of the Caspian shores already rival those of the United States. A variety of mineral springs, some of them equal to the best variety of Western Charles best waters of Western Europe, are

widely spread over Asia.

The aggregate population of Asia is estimated at 920,000,000, being thus more than one-half of the entire population of the globe. This population, however, is small, giving only an average of 49 inhabitants per square mile. It is unequally distributed, and reaches 557 per square mile in some provinces of China, denser than in Belgium (539 per square mile), and 520 in some parts of Northwestern India. It is greatest in those parts of Asia which are most favored by rains. Seven-tenths have scarcely more than from 3 to 20 inhabitants per square mile; and nearly one-tenth is quite uninhabited. The inhabitants of Asia belong to five different groups; the so-called Caucasian (fair type) in Western Asia and India; the Mongolian in Central and Eastern Asia, as also in the Indo-Chinese Peninsula; the Malay in Malacca and the Indian Archipelago; the Dravidas in South-eastern India and Ceylon; and the Negritos and Papuas in the virgin forests of the Philippine Islands and Celebes; also a sixth great division comprising the stems which inhabit Northeastern Asia, the Hyperboreans, whose affini-ties are not yet well known. The Mongolian race alone embraces nearly seven-tenths of the population of Asia; the Malay, about two-tenths, and the Caucasian about one-tenth. The Europeans reckon about 6,000,000 (Russians) in Caucasus, Turkestan and Siberia; some 176,000 (English) in India; and 45,000 in the Dutch Indies.

Asia has been the birthplace of religions; the Jewish, Buddhist, Christian and Mohammedan having their origin in Asia, where they grew up under the influence of still older rebut the extraction of coal is as yet ligions, the Babylonian and that of very limited. Graphite of very high Zoroaster, both also of Asiatic origin. quality is found in the sayans and At present the inhabitants of Asia benorthern Siberia. The diamonds of long chiefly to the Buddhist religion,

which has 530,000,000 to 560,000,000 of followers, i. e., nearly one-third of mankind. The old faith of Hinduism has 187,000,000 of followers in India. Most of the inhabitants of Western Asia, as also of part of Central Asia, follow the religion of Islam; they may number about 90,000,000. The Christians number about 20,000,000 in Armenia, Caucasus, Siberia and Turke-Jews are scattered mostly in Western and Central Asia. A few fire-worshippers, Guebres or Parsi of India and Persia, are the sole remnant of the religion of Zoroaster; while vestiges of Sabæism are found amidst the Gesides and Sabians on the Tigris.

Asia Minor (Asia the Less, as distinguished from Asia in the widest extent), is the name usually given to the western peninsular projection of Asia, forming part of Turkey in Asia.

The inhabitants, some 10,500,000 in number, consist of the most various races. The dominant race are the Osmanli Turks, who number about 1,200,-000, and are spread over the whole country; allied to these are the Turkomans and Yuruks, speaking a dialect of the same language. The latter are found chiefly on the tableland, leading a nomadic life; there are also hordes of nomadic Kurds. Among the mountains E. of Trebizond are the robber tribes of the Lazes.

The Greeks and Armenians are the most progressive elements in the population, and have most of the trade.

Ask, in Scandinavian mythology, the name of the first man created. According to the legend, one day three gods, Odin, Hæner and Loder, found two trees by the seaside, an ash and an elm. From these trees they created the first man and first woman, Ask and Embla, and gave them the earth as their dwelling place.

Askew, Anne, a victim of religious persecution, born in 1521; was a daughter of Sir William Askew of Lincolnshire, and was married to a wealthy neighbor named Kyme, who, irritated by her Protestantism, drove her from his house. In London, whither she went, probably to procure a divorce, she spoke against the dogmas of the old faith, and, being tried, was

put to the rack to extort a confession concerning those with whom she corresponded, she continued firm, and was then taken to Smithfield, chained to a stake, and burned, in 1546.

Askja, a volcano near the center of Iceland, first brought into notice by an eruption in 1875. Its crater is 17 miles in circumference, surrounded by a mountain-ring from 500 to 1.000 feet high, the height of the mountain itself being between 4,000 and 5,000 feet.

Asmodai, or Asmodeus, an evil spirit, who, as related in the book of Tobit, slew seven husbands of Sara, daughter of Raguel, but was driven away into the uttermost parts of Egypt by the young Tobias under the direction of the angel Raphael. Asmodai signifies a desolator, a destroying angel. He is represented in the Talmud as the prince of demons who drove King Solomon from his kingdom.

Asp, a species of viper found in Egypt, resembling the cobra da capello. and having a very venomous bite. When approached or disturbed it elevates its head and body, swells out its neck, and appears to stand erect to attack the aggressor. Hence the ancient Egyptians believed that the asps were guardians of the spots they inhabited, and the figure of this reptile was adopted as an emblem of the protecting genius of the world. Cleopatra is said to have committed suicide by means of an asp's bite, but the inci-dent is generally associated with the horned viper.

Asparagus, a plant of the order liliaceæ, the young shoots of which, cut as they are emerging from the ground, are a favorite culinary vegetable.

Aspasia, a celebrated Grecian, belonging to a family of some note in Miletus, and was early distinguished for her graces of mind and person. She went to Athens after the Persian War, and, by her beauty and accomplishments soon attracted the attention of the leading men of that city. She engaged the affections of Pericles. who is said to have divorced his former wife in order to marry her. Their union was harmonious throughout; he preserved for her to the end of his condemned to death as a heretic. Being life the same tenderness; she re-

mained the confidant of the statesman's schemes, and the sharer of his struggles. She survived Pericles some years, and is reported to have married an obscure Athenian, Lysicles, whom she raised by her example and pre-cept to be one of the leaders of the republic.

Aspen, a tree, the trembling poplar. The tremulous movement of the leaves which exists in all the poplars, but culminates in the aspen, mainly arises from the length and slender character of the petiole or leaf-stalk, and from its being much and laterally

compressed.

Aspern, a small village of Austria, on the Danube, about 2 miles from Vienna. Here, and in the neighboring village of Esslingen, were fought the tremendous battles of the 21st and 22d of May, 1809, between the French grand army, commanded by Napoleon, and the Austrians under the Archduke Charles. The French, after this continuous fighting, with vast loss to both sides, were obliged to retreat, and occupy the island of Lobau.

Asphalt, or Asphaltum, the most common variety of bitumen; also called mineral pitch. Asphalt is a compact, glassy, brittle, black brown mineral, which breaks with a polished fracture, melts easily with a strong pitchy odor when heated, and when pure burns without leaving any ashes. It is found in the earth in many parts of Asia, Europe and the United States, and in a soft or liquid state on the surface of the Dead Sea, which, from its circumference, was called Asphaltites. It is of organic origin, the asphalt of the great Pitch Lake of Trinidad being derived from bituminous shales, containing vegeta-ble remains in the process of trans-formation. Asphalt is produced artificially in making coal gas. During the process, much tarry matter is evolved and collected in retorts. If this be distilled, naphtha and other volatile matters escape, and asphalt is left behind.

What is known as asphalt rock is a limestone impregnated with bitumen, found in large quantities in the United States and in Switzerland, France, Alsace, Hanover, Holstein,

purest forms taking the names of elaterite, gilsonite, albertite, maltha, brea, etc. In the trade there is wide dis-tinction between these and the sandstones, and limestones impregnated with bitumen, which are known as bituminous or asphaltic limestone, sand-stone, etc. The latter are usually shipped without being previously treated or refined, and are used principally in street paving. This class ripany in street paving. This class is known as bituminous rock. The production of all kinds of asphalt in the United States in 1927 was 839,040 short tons, valued at \$5,605,850. Exports of petroleum asphalt in 1927 were \$8,325,000.

Asphodel, (Asphodelus), a genus of plants, order Liliacem, consisting of perennials, with fasciculated fleshy roots, flowers arranged in racemes, six stamens inserted at the base of the perianth, a sessile almost spherical ovary with two cells, each containing two ovules; fruit a capsule with three cells, in each of which there are, as a rule, two seeds. They are fine garden-plants, native of Southern Europe. The king's spear, A. luteus, has yellow flowers blossoming in June. Asphodel-us ramosus, which attains a height of 5 feet, is cultivated in Algeria and elsewhere, its tubercles yielding a very pure alcohol, and the residue, together with the stalks and leaves, are used in making pasteboard and paper. The asphodel was a favorite plant among the ancients, who were in the habit of planting it round their tombs.

Asphyxia, suspended animation; an interruption of the arterialization of the blood, causing the suspension of sensation and voluntary motion. It may be produced by breathing some gas incapable of furnishing oxygen, by submersion under water, by suffoca-tion, from an impediment to breathing applied to the mouth and nostrils, by strangulation, or by great pressure, external or internal, upon the lungs. If asphyxia continues unrelieved for a short period, it is necessarily followed by death.

Aspinwall. (See Colon).

Aspinwall, William, an American physician, born in Brookline, Mass., May 23, 1743; was graduated at Harvard University in 1764; stud-Sicily, and other parts of Europe, the | ied medicine in Philadelphia; was a

volunteer in the fight at Lexington; and afterward became surgeon in the Revolutionary army, having partial charge of the military hospital at Jamaica Plains. After the war, he became deeply interested in the subject of vaccination, and, building a small-pox hospital at Brookline, established that remedy in American practice. He died April 16, 1823.

Aspinwall, William H., an American merchant, born in New York city, Dec. 16, 1807; was trained to commercial business by his uncles, and became a member of the firm of Howland & Aspinwall in 1837. He is best remembered as the chief promoter of the Panama railroad, and of the Pacific Mail Steamship Company. The eastern terminus of the railroad was named in his honor, but has since officially been given the name of Colon. He died in New York city, Jan. 18, 1875.

Asquith, Herbert Henry, an English lawyer, born in Morley. Sept. 12, 1852; was educated at Oxford University, became a barrister at Lincoln's Inn in 1876; was appointed Secretary of State for the Home Department; Ecclesiastical Commissioner in 1882-1885; became Q. C. in 1890, and P. C. in 1892; was elected to Parliament from East Fife in 1896 on the Liberal ticket; and became Prime Minister; created Earl of Oxford and Asquith in 1925. D. 1928.

Ass (asinus), a genus closely related to the horse. It differs from the latter in having short hair at the root of the tail and a long tuft at the end, in the absence of warts on the hind legs, and in the persistence of stripes, except in albinos. The upright mane, the long ears, the cross stripe on the shoulders, and the dark bands on the back, are also characteristic. The stupidity for which the animal has for long been proverbially reproached seems largely the result of human influence. The female carries her foal 11 months. The mule is a hybrid bred between mare and male ass; while the hinny is the rare result of hybridism between horse and female ass.

Assam, a province at the N. E. extremity of British India, with an area of 53,015 square miles. In 1874 it was formed into a separate adminis-

tration (including Cachar) under a chief commissioner; in 1905 it was united with Eastern Bengal to form a lieutenant-governorship; and in 1912 it was again made a separate province; capital, Shillong; pop. (1921) 7,606,230.

Assassination, the act of taking the life of anyone by surprise or treacherous violence, either by a hired emissary, by one devoted to the deed, or by one who has taken the task upon himself. Generally, the term is applied to the murder of a public personage.

History abounds in records of political assassinations from that of Julius Cæsar on March 15, B. c. 44. The following are the most notable ones since 1800, including the many royal victims:

Czar Paul, Russia..... March 24, 1801 Duc de Berri, France.....Feb. 14, 1820 Duke Charles III., Parma, March 27, 1854 * President Lincoln April 15, 1865 Prince Michael, Servia... June 10, 1868

* Marshal Prim, Spain... Dec. 28, 1870
Archbishop Darboy, France May 24, 1871 Archbishop Darboy, France. May 24, 1871
Earl Mayo, India. Feb. 8, 1872
Sultan Abdul Aziz, Turkey. June 4, 1876
Czar Alexander, Russia. March 13, 1881
President Garfield Sept. 19, 1881
Lord Cavendish, Ireland. May 6, 1882
President Carnot, France. June 24, 1894
Premier Stambouloff,
Bulgaria. July 18, 1895 Bulgaria July 18, 1895 Shah Nasr-ed-Din, Persia ... May 1, 1896 Premier Canovas del Castillo, President Barrios, Guatemala Feb. 18, 1898 Empress Elizabeth, Austria. Sept. 10, 1898 President Heureuax, Santo Domingo ... July 26, 1809
Governor Goebel, Kentucky Jan. 30, 1900
King Humbert Italy July 29, 1900
President McKinley ... Sept. 14, 1901
King and Queen, Servia ... June 11, 1903
Gov.-Gen, Bobrikoff, Finland June 16, 1904
Von Plehve, Russia July 28, 1904
Premier Delyannis, Greece June 13, 1905
Gr. Duke Sergius, Russia Feb. 17, 1905
King and Crown Prince, Portugal Feb. 1, 1908
Prince Ito, Japan Oct. 26, 1909

President Caceres, Santo Domingo ... Nov. 11, 1911
Premier Canaleias, Spain... Nov. 12, 1912
Nazin Pasha, Turkey... Jan. 23, 1913
Premier Araujo, Salvador... Feb. 4, 1913
President Madero, Mexico. Feb. 23, 1913

^{*} Date of death.

Vice-Pres. Suarez, Mexico. Feb. 23, 1913 King George, Greece.... March 18, 1913 Archduke Francis and wife, Austria-Hungary..... June 28, 1914 Czar Nicholas II and whole

Assassins, or Ismaili, a sect of religious fanatics who existed in the 11th and 12 centuries. They derived their name of assassins originally from their immoderate use of hasheesh, which produces an intense cerebral excitement, often amounting to fury. Their founder and law giver was Hassan-ben-Sabah, to whom the Orientals gave the name of Sheikh-el-Jobelz, but who was better known in Europe as the "Old Man of the Mountain." They believed assassination to be meritorious when sanctioned by his command, and courted danger and death in the execution of his orders. In the time of the crusades, they mustered to the number of 50,000.

Assay Offices, in the United States, government establishments in which citizens may deposit gold and which citizens may deposit gold and silver bullion, receiving in return its value, less charges. The offices are in New York city; Boise City, Ida.; Helena, Mont.; Denver, Col.; Seattle, Wash.; San Francisco, Cal.; Charlotte, N. C.; Deadwood, S. D.; Salt Lake City, Utah; Carson City, Nev.; and New Orleans, La.

Assembly, General, official name of the supreme ecclesiastical court of the Established Church of Scotland, of the Free Church of Scotland, of the Presbyterian Church in Ireland. and of the two Presbyterian Churches in the United States. The term is also used in the United States to designate the dual legislative body of the several States, the branches being commonly spoken of as the Senate and the House (of Representatives).

Assembly, National, a body set up in France on the eve of the Revo-lution. The members bound themselves by oath not to separate until they had furnished France with a constitution, and the court was compelled to give its assent. In the 3,250 decrees passed by the Assembly were laid the foundations of a new epoch, and having accomplished this task, it dissolved itself, Sept. 30, 1791. The term is also applied to a joint meeting of the Sen-

ate and Corps Legislatif, for the purpose of electing a chief magistrate or the transaction of other extraordinary business.

Assets (French, assez, enough), property or goods available for the payment of a bankrupt or deceased person's obligations. Assets are personal or real, the former comprising all goods, chattels, etc., devolving upon the executor as salable to discharge debts and legacies. In commerce and bankruptcy the term is often used as the antithesis of liabilities, to designate the stock in trade and entire property of an individual or an association.

Assideans, Chasideans, or Chasidim, one of the two great sects into which, after the Babylonish captivity, the Jews were divided with regard to the observance of the lawthe Chasidim accepting it in its later developments, the Zadikim professing adherence only to the law as given by Moses. From the Chasidim sprang the Pharisees, Talmudists, Rabbinists, Cabbalists, etc.

Assignates, the name of the national paper currency in the time of the French Revolution.

Assignee, a person appointed by another to transact some business, or exercise some particular privilege or power. Formerly the persons appointed under a commission of bankruptcy, to manage the estate of the bankrupt on behalf of the creditors, were so called, but now trustees, or receivers.

Assignment, in law and com-merce, the act of signing over to another, rights or property which have hitherto belonged to one's self. An assignment of estate is a transfer, or making over to another, of the right a person has in any estate. In general, assignments should be recorded in the office prescribed by law, or are void as against those claiming under subsequent assignments.

Assiniboia, the smallest of the four districts into which a portion of the Northwest Territories of Canada was divided in 1881 and Sept. 1, 1905, merged into the provinces of Alberta and Saskatchewan. Its area was 89,535 square miles and pop. 67,385. Coal mines are worked and irrigation is improving the district.

Assouan (also Eswan; the ancient Syene), is the southernmost city of Egypt proper, on the right bank of the Nile, and beside the first or lowest cataract. Near are the islands of Phile and Elephantine, but both submerged almost completely by the great Nile dam. On the left bank are catacombs. There are some remains of the ancient city, as granite columns and part of a temple. In the neighborhood are the famous granite quarries from which so many of the huge obelisks and colossal statues were cut to adorn the temples and palaces of ancient Egypt. From Syene, this kind of granite came to be known as syenite. Pop. about 4,000.

Assumpsit, a verbal promise made by anyone, or which he may in justice be held to have more or less directly made.

Assyria, an ancient Semitic kingdom of Asia, the native name of which was Ashur or Asshur, and thus also called by the Hebrews. The area was fluctuating—at first small, but, though it gradually increased, it probably never exceeded about 200,000 square miles.

The Assyrians were far advanced in art and industry, and in civiliza-tion. They constructed large buildings, especially palaces, of an imposing character, the materials being burned or sun-dried brick, stone, alabaster, slabs for lining and adorning the walls internally and externally, and timber for pillars and roof. The Assyrians understood and applied the arch; constructed tunnels, aqueducts, and drains; used the pulley, the lever, and the roller; engraved gems in a highly artistic way; understood the arts of inlaying, enameling, and overlaying with metals; manufactured porcelain, transparent and colored glass, and were acquainted with the lens; and possessed vases, jars, and other dishes, bronze and ivory orna-ments, bells, gold earrings and brace-lets of excellent design and workman-ship. They had also silver ornamental work. Their household furniture gives a high idea of their skill.

Asten, Friedrich Emil von, a German astronomer, born at Köln, 1842. His investigations have related mostly to comets.

Aster, a genus of plants, so called because the expanded flowers resemble stars. In the United States these asters grow wild in the meadows and on the prairies.

Aster, Ernst Ludwig von, a German military engineer, born in Dresden, Oct. 5, 1778. He died in Berlin, Feb. 10, 1855.

Asthma, a chronic shortness of breath, from whatever cause it may arise. Till a comparatively recent period good medical writers used the term in this wide sense, and non-professional writers and the public do so still. Asthma, or spasmodic asthma, is "a difficulty of breathing, recurring in paroxysms, after intervals of comparatively good health, and usually accompanied by fever." It is most common in persons possessing the nervous temperament.

Aston, William George, an English author, born near Londonderry, in 1841; is a standard author-

ity on Japanese subjects.

Astor, John Jacob, an American merchant, born in Waldorf, Germany, July 17, 1763. In 1783 he came to the United States intending to engage in the selling of musical instruments; but while on the voyage was induced by a fellow passenger to engage in buying furs from the Indians and selling them to dealers. On reaching New York he entered the employ of a Quaker furrier, with whom he learned the details of the trade, and then began business on his own account. Soon afterward he became American agent for a London fur house, and, while arranging for his supplies, he opened the first wareroom for the sale of musical instruments in the United States. His success in the fur business led him to become the owner of a number of vessels, in which he shipped furs to London and brought merchandise therefrom. In furtherance of a scheme for becoming independent of the Hudson Bay Company and establishing a thoroughly American system of fur trading, he sent out expeditions to open up intercourse with the Indians on the Pacific coast, by which the present city of Astoria at the mouth of the Columbia river in Oregon was planted in 1811. An interesting outline of his projects in this connection

left a fortune estimated at \$20,000,-000, and the sum of \$400,000, with which to found a public library in New York city. He died March 29, 1848. See New York Public Li-BRARY.

Astor, John Jacob, an Ameri-Astor, John Jacob, an American capitalist, born in Rhinebeck, N. Y., July 13, 1864; son of William, grandson of John Jacob, and cousin of William Waldorf Astor; was Colonel on the staff of Gov. Morton; was commissioned a Lieutenant-Colonel of Volunteers in May, 1898, and served on inspection and staff duty in served on inspection and staff duty in served on inspection and stair duty in the United States and Cuba till the surrender of Santiago. He presented the United States Government with a completely equipped mountain bat-tery which cost over \$75,000, and which rendered the government valuwhich rendered the government value able services during the war with Spain. He published "A journey to Other Worlds; a Romance of the Future" (1894). He was lost on the "Titanic," April 15, 1912.

Astor, Waldorf, 2d Viscount, born May 10 1879 son of William with Ages, spirits dwelling in the born May 10 1879 son of William with the world ages, and the belief in

other Parliamentary omices. His wife, Nancy Langhorne, of Greenwood, Va., was the first woman to sit in the British Parliament. Elected, 1919.

Astor, William Backhouse, an American capitalist, born in New York city, Sept. 19, 1792; eldest son of John Jacob Astor; was associated with his father in husiness D. 1875. with his father in business. D. 1875.

Astor, William Vincent, head of the Astor family in the United States, was born in New York city, Nov. 15, 1891; educated at Harvard; succeeded to a vast estate in money and property at the drowning of his father, John Jacob Astor, in the "Titanic" disaster; married Helen D. Huntington, April 30, 1914; and with his wife engaged in patriotic relief work

Astor, William Waldorf, capitalist, born in New York city, March 31, 1848; admitted to the bar 1875.

He was elected to the New York Astor, William Waldorf, capitalist, born in New York Astor, William Waldorf, capitalist, born in New York Astorogy, originally a discourse concerning the stars; subsequently the

is given in Washington Irving's "As-toria." Mr. Astor acquired large to Italy in 1882-1885. On the death wealth, invested heavily in real estate in New York city; and at his death became head of the Astor family, and became head of the Astor family, and inherited a fortune of \$100,000,000. He removed to England in 1890; became the owner of the "Pall Mall Gazette" and "Pall Mall Magazine;" was naturalized a British subject on July 1, 1899; created a baron, 1915, created viscount 1917, died 1919. He published "Valentino" (1885) and "Sforza" (1889).

Astrakhan, a Russian city, capital of the government of the same name, on an elevated island in the Volga, about 30 miles above its mouth in the Caspian, communicating with opposite banks of the river by numerous bridges. It is the chief port of the Caspian, and has regular steam communication with the principal towns on its shores. Pop. (1921) 160,000, composed of various races.

Astrakhan, a name given to sheep-skins with a curled wooly sur-

born May 19, 1879, son of William Waldorf Astor. Secretary to the Prime Minister, 1918, and has held other Parliamentary offices. His wife, Nancy Langhorne, of Greenwood Ve ject, systematized the strange fancies of that wild period; and astral spirits were made to occupy the first rank among evil or demoniacal spirits.

> Astringents, substances which produce contraction and condensation of the muscular fiber: for instance, when applied to a bleeding wound they so contract the tissues as to stop the hemorrhage. Astringents are useful in various diseases.

> Astrolabe, in its etymological sense, any instrument for taking the altitude of a star or other heavenly body, a definition which would include not merely the astrolabe properly so called, but also the sextant, the quad-

sembly in 1871, and to the Senate in true science of astronomy; now the

pseudo science which pretends to foretell future events by studying the position of the stars, and ascertaining their alleged influence upon human destiny.

Astronomy, the science that treats of all the heavenly bodies, including the earth, as related to them. It is the oldest of the sciences, and the mother of those generally called exact as mathematics, geodesy and physics.

Asymptote, in geometry, a line which is continually approaching a curve, but never meets it, however far either of them may be prolonged. This may be conceived as a tangent to a curve at an infinite distance.

Atacama, the name formerly, of two provinces, (1) Chilian and (2) Bolivian; most of the latter was transferred to Chile in 1884. (1) A northern Province of Chile, with an area of 30,720 square miles, and a population (1895) of 59,713 About 1,000 silver and 250 copper mines are worked, and gold is also found in considerable quantities.

Atahualpa, the last of the Incas, succeeded his father in 1529 on the throne of Quito, whilst his brother Huascar obtained the Kingdom of Peru. They soon made war against each other, when the latter was defeated, and his kingdom fell into the hands of Atahualpa. The Spaniards. taking advantage of these internal disturbances, with Pizarro at their head, invaded Peru, and advanced to Atahualpa's camp. Here, while Pizarro's priest was telling the Incas how the Pope had given Peru to the Spaniards, fire was opened on the unsuspecting Peruvians, Atahualpa was captured, and, despite the payment of a vast ransom in gold, was executed (1533).

Atalanta, in the Greek mythology, a famous huntress of Arcadia. She was to be obtained in marriage only by him who could outstrip her in a race, the consequence of failure being death. One of her suitors obtained from Aphrodite (Venus) three golden apples, which he threw behind him, one after another, as he ran. Atalanta stopped to pick them up, and was not unwillingly defeated. There was another Atalanta belonging to Bæotia, who cannot very well be distinguished, the same stories being told about both.

Atavism, in biology, the tendency to reproduce the ancestral type in animals or plants which have become considerably modified by breeding or cultivation; the reversion of a descendant to some peculiarity of a more or less remote ancestor.

Ataxy, Ataxia, in medicine, irregularity in the animal functions, or in the symptoms of a disease. (See Lo-

COMOTOR ATAXY).

Atcheen (also ACHIN or ATCHIN; called by the Dutch ATJEH), until 1873 an independent State in the N. W. part of Sumatra, now a Province of the Dutch Indies, with an area of 20,471 sq. mi.; pop. (1921 Est.) 700,000.

During the earlier half of the 17th century Atcheen was a powerful sultanate, but under the Dutch native resistance lasted till 1906, 200 years.

Atchison, city and capital of Atchison county, Kan.; on the Missouri river and several railroads; 50 miles N. of Kansas City; has an immense trade in livestock and grains; contains large grain elevators, flour mills, and many factories; and is the seat of the State Soldiers' Orphans' Home and Midland (Luth.) and St. Benedict's colleges. Pop. (1920) 12,630; (1930) 13,024.

Atchison, David Rice, an American legislator, born in Frogtown, Ky., Aug. 11, 1807; was educated for the bar, and began practicing in Missouri, in 1830. In 1843, while Judge of Circuit Court, he was appointed United States Senator to fill a vacancy. He was twice elected to the last office, and during several sessions was President pro tem. of the Senate. During Sunday, March 4, 1849, he was the legal President of the United States. as Gen. Taylor, the President-elect, was not sworn into office until the following day. The city of Atchison, Kan., was named after him. He died in Clinton county, Mo., June 26, 1886.

Ate, in Greek mythology, the goddess of hate, injustice, crime and retribution. Ate is seldom personified.

Ateles, a genus of South American monkeys, of the division with long prehensile tails, to which the name Sapajou is sometimes applied.

Atelier, in French, a workshop; a studio; more especially applied to an artist's work-room. Ateliers Nation-

or National Workshops. Since 1845, it has been the custom in France, during severe winters, or in times of distress caused by stagnation of trade, to open temporary workshops, in orto open temporary workshops, in order to give employment to mechanics who were out of work. These workshops were called Ateliers de Charité, shops were called Ateliers de Charité, and died about 878 B. C. She was a died about 878 B. C. She was a charit. until 1848, when the Provisional Gov-ernment of the Republic reopened a vast number of these establishments under the name of Ateliers Nationaux. They were under the control of a department called "The Committee of the Government for the Workmen; of the Government for the workmen; they were all, however, badly organized, and failed calamitously. The principle on which they were conducted was, that every workman should have a living provided for him on a fixed scale. The result was, that workmen soon left private employers, and entered the national workshops. and entered the national work-shops. The numbers who flocked in soon became alarming. More than 100,000 men enrolled themselves, and insubordination soon began to show itself. Danger was imminent, and the Na-tional Assembly ordered the dissolution of the ateliers nationaux, an act which became the pretext for the terrible insurrection whe Paris in June, 1848. which ensanguined

Athabasca, a river, lake and district of Canada. The Athabasca river rises on the E. slopes of the Rocky Mountains in the district of Alberta, flows in a N. E. direction through the district of the same name, and falls into Lake Athabasca after a course of about 600 miles. Lake Athabasca, or Lake of the Hills, is about 190 miles S. S. E. of the Great Slave Lake, with which it is connected by means of the Slave river, a continua-tion of the Peace. It is about 200 miles in length from E. to W., and about 35 miles wide at the broadest part, but gradually narrows to a point at either extremity. The district of Athabasca, formed 1882, on Sept. 1, 1905, was merged in the provinces of Alberta and Saskatchewan. It is intersected by the Athabasca and Peace rivers and, as yet, has a scanty population. The name is also given to a family of Indians. The area of the district was about 251,300 sq. m.

tending from British North America and Alaska to Mexico, who derive their name from Lake Athabasca in British North America.

woman of abandoned character, and fond of power; who, after the death of her son Ahaziah, opened her way to the throne by the murder of every prince of the royal blood. She reign-ed six years: in the seventh, the high-priest Jehoiada placed Joash, the young son of Ahaziah, on the throne of his father, and Athaliah was put to death.

Athanasian Creed, a formulary or confession of faith, said to have been drawn up by Athanasius, Bishop of Alexandria, in the 4th century, to justify himself against the calumnies of his Arian enemies. That it was really composed by this father seems more than doubtful; and modern divines generally concur in the opinion of Dr. Waterland, that it was written by Hilary, Bishop of Arles, in the 5th century. It is certainly very ancient; for it had become so famous in the 6th century as to be commented upon, together with the Lord's Prayer and Apostles' Creed, by Venantius Fortu-natus, Bishop of Poitiers. It was not, however, then styled the Athanasian Creed, but simply the Catholic Faith. It is supposed to have received the name of Athanasius on account of its agreeing with his doctrines, and being an excellent summary of the subjects of controversy between him and the Arians. The true key to the Athanasian Creed lies in the knowledge of the errors to which it was opposed. The Sabellians considered the Father, Son and Holy Spirit as one in per-son; this was "confounding the persons:" the Arians considered them as differing in essence; this was "divid-ing the substance;" and against these framed. This creed was used in France about the year 850; was received in Spain about 100 years later, and in Germany about the same time. mily of Indians. The area of the strict was about 251,300 sq. m.

Athabascan Indians, a linguistic monly used in Italy at the expiration stock of North American Indians, ex- of that century, and at Rome a little

later. This creed is appointed to be read in the Church of England.

Athanasius, St., one of the fathers of the Christian Church, born at Alexandria about 296 A. D. He became Patriarch of Alexandria in 328, being afterward deposed and reinstated five times. He died in Alexandria, May 2, 373.

Atheism, literally, disbelief in a God, if such an attainment is possible; or, more loosely, doubt of the ex-

God, it such an attainment is possible; or, more loosely, doubt of the existence of a God; practically, a denial that anything can be known about the supernatural, supposing it to exist.

Athel, or Æthel, an Old English word meaning noble in blood, descent, or mind; frequently a part of Anglo-

Saxon proper names.

Athenaeum, or Atheneum, a public place frequented by professors of the liberal arts, and where rhetoricians declaimed, and the poets read aloud their works. At Athens these assemblies first took place in the temple of Minerva, whence the name.

Athens, city and capital of Clarke county, Ga.; on the Oconee river and several railroads; 67 miles E. of Atlanta; is principally engaged in cotton-growing, trade, and manufacturing; and is the seat of the State University, State College of Agriculture, State Normal School, and Lucy Cobb and Knox institutes. Pop. (1920) 16,748; (1926 Est.) 16,400.

Athens, anciently the capital of Attica and center of Greek culture, now the capital of the Kingdom of Greece. It is situated in the central plain of Attica, about 4 miles from the Saronic Gulf or Gulf of Ægina, an arm of the Ægean Sea running in between the mainland and the Peloponnesus. It is said to have been founded about 1550 B. c. by Cecrops, the mythical Pelasgian hero, and to have borne the name Cecropia until under Erechtheus it received the name of Athens in honor of Athene. It disputed with Sparta the supremacy of Greece, which was then virtually the civilized world, and was beaten in the struggle. It remained, however, the centre of art and culture until long after the rise of Rome, to which with the rest of Greece it became subject.

The modern city mostly lies north-lamong the rewards of success. In

B.-6.

ward and eastward from the Acropolis, and consists mainly of straight and well built streets. Among the principal buildings are the royal palace, a stately building with a façade of Pentelic marble (completed in 1843), the university, the academy, public library, theater, and observatory. The university was opened in 1836, and has 1,400 students. There are valuable museums, in particular the National Museum, and that in the Polytechnic School, which embraces the Schliemann collection, etc. These are constantly being added to by excavations. There are four foreign archæological schools or institutes, the French, German, American, and British. Tramways have been made in the principal streets, and the city is connected by railway with its port, the Piræus. From the beginning of the World War the city was almost constantly in a state of turmoil because of revolutionary demonstrations or the actions of the Allies, as King Constantine, though professing strict neutrality was popularly believed to be leaning toward the side of his wife's brother, the German emperor. Pop. (1921) 300,700; (1924 Est.) 325,026. See Appendix: World War.

Atherton, George William, an American educator, born in Boxford, Mass., June 20, 1837; was Professor of Political Economy and Constitutional Law in Rutgers College, N. J., in 1869–1882; and became President of the Pennsylvania State College in 1882. He died July 24, 1906.

Atherton, Gertrude Franklin, an American author, born in San Francisco, Cal.; daughter of Thomas L. Horn and Gertrude Franklin, and great-grandniece of Benjamin Franklin; was educated in California and Kentucky, and married the late George H. B. Atherton. She began her literary work while living in San Francisco, in 1878, and has made a specialty of describing Spanish life in California as it was previous to 1846.

Athletes, combatants who took part in the public games of Greece. The profession was an honorable one; tests of birth, position, and character were imposed, and crowns, statues, special privileges, and pensions were awards the rewards of success In

1896, the ancient Olympic games were revived at Athens (the 776th Olympiad) under the personal patronage of the King of Greece; in 1900 they were held at the Paris Exposition; in 1904 at the St. Louis Exposition; in 1906 at Athens; in 1908 at London; in 1924 at Paris; in 1928 at

Amsterdam.

Athos, Mount, or Hagion-Oros, or Monte-Santo, a famous mountain of Turkey in Europe, on a peninsula projecting into the Ægean Sea, between the Gulfs of Contesa and Monte-Santo. In modern times, Athos has been occupied for an extended period by a number of monks of the Greek Church, who live in a sort of fortified monasteries, in number about 20, in different degrees of magnitude and importance. These, with the farms or metochis attached to them, occupy the whole peninsula; hence it has derived its modern name of Monte-Santo.

Atkinson, Edward, an American political economist, born in Brook-line, Mass., Feb. 10, 1827; was educated in private schools and at Dartmouth College. He has become widely known by his papers and pamphlets on trade competition, banking, railroading, fire prevention, the money question, etc. He died Dec. 11, 1905.

Atkinson, George Francis, an

American botanist, born in Raisinville, Mich., Jan. 26, 1854; was graduated at Cornell University in 1885; Associate Professor of Entomology and General Zoology in the University of North Carolina, in 1886-1888; Professor of Zoology and Botany in the University of South Carolina; and Botanist of the State Experiment Station in 1888-1889; Professor of Biology in the Alabama Polytechnic Institute, and Biologist of the Experiment Station in 1889-1892; became Professor of Botany in Cornell University, and Botanist of the Experiment Station there in 1896. He is a member of numerous scientific societies, and author of "Biology of Ferns," "Elementary Botany," etc.

Atlanta, city and capital of the State of Georgia and of Fulton county; on the Atlanta and West Point, rent, Cape Horn current, Rennel the Central of Georgia, the Georgia, the Seaboard Air Line, the Southern, and the Western and Atlantic railoft the Western and Atlantic railoft the Western and Toads; 171 miles N. by W. of Augusta.

The city is not only the largest in the State, but, commercially and historically, is one of the most important in the South. In 1914 it became the central reserve city of the Sixth Federal Reserve Banking District under the act of Congress of 1913.

After being besieged by the Federal army, under General Sherman, and bombarded for 40 days, it was cap-tured Sept. 2, 1864. General Sherman, before starting on his march to the sea, burned the city. After the war, the city recuperated more rapidly than any other in the South. In 1881 an exposition of the Cotton States and in 1895 a great Cotton States and International Exposition were held here, the last in Piedmont Park, in which the United States and many of the North-States, besides European and ern South American countries, took part. Pop. (1920) 200,616; pop. (1930) Pop. 270,367.

Atlantic City, a city and widely noted health and pleasure resort, in Atlantic county, N. J.; on Absecon Beach island; 60 miles S. E. of Philadelphia. City of hotels, shops, and cottages, with superior railroad facilities and has the largest patrongraph of any special property in the course of the age of any seaside resort in the country. Its famous board-walk is over 5 miles long. Permanent population (1930) 66,198, transient 600,000 to

800,000. Atlantic Ocean, the name given to the vast expanse of sea lying between the W. coasts of Europe and Africa, and the E. coasts of North and South America, and extending from South America, and extending from the Arctic to the Antarctic Seas. Its greatest breadth is between the W. coast of Northern Africa and the E. coast of Florida, 4,150 miles. Its least breadth, between Norway and Greenland, is about 930 miles.

The great currents of the Atlantic are the Gulf Stream, the equatorial current—which may be divided into the main equatorial current, the N. equatorial current, and the S. equatorial currents, the North African and Guinea current, the South connecting current, the Southern Atlantic current, Cape Horn current, Rennel current, and the Arctic current. The Gulf Stream is a continuation

both W. drift currents produced by the trade winds. The former passes across the Atlantic to the American coast, upon which it strikes from Cape St. Roque to the Antilles. On being turned by the coast it runs along it at a rate of 30 to 50 miles per day, and sometimes at a higher speed, till it enters the Gulf of Mexico, from which having previously received part of the waters of the N. equatorial current, it issues between Florida and Cuba under the name of the Gulf stream. It afterward flows nearly parallel to the coast of the United States, separated from it by a belt of cold water. Off Cape Hatteras it spreads into an expanding channel, reaching a breadth of 167 miles, and consisting of three warm sections with two cold belts interposed. On passing Sandy Hook it turns E. and continues to be recognizable, partly by a blue color derived from the silt of the Mississippi, till about lon. 30° W., where, with a greatly diminished temperature, it is found flowing nearly due E.

Atlantic Telegraph, lines laid on the bed of the Atlantic Ocean. The union of the Old and New Worlds by means of the electric telegraph, probably the boldest feat of electric engineering ever projected, was first suggested by Prof. Morse in 1843. When Lieut. Maury of the United States navy discovered that between Ireland and Newfoundland the bed of the ocean was nearly level and covered with soft ooze, and Cyrus W. Field and others had thoroughly discussed the practical methods, a company was formed for the purpose, in 1856, to which the Governments of Great Britain and the United States gave liberal guarantees. This company, after a fruitless attempt to lay an electric cable in 1857, finally succeeded in 1857.

The result was not encouraging. The current obtained through the wire was so weak that a congratulatory message from the Queen to the Presirent, consisting of 90 words, took 67 minutes to transmit. After a few more messages, the cable became useless. In consequence of this failure, it was not until 1865 that capital was found to make another attempt. The paying-out journey was commenced at Valentia, but when the vessel was 1,064 miles from that port, Sept. 6, 1878.

the cable broke from an accidental strain. After a fruitless effort to fish up the broken cable from the bottom, it was abandoned for the season. In 1866 another line, so modified in construction as to be both lighter and stronger than the previous one, was successfully laid by the "Great Eastern." The 1865 cable was then, by means of the same vessel, grappled for, and brought up from a depth of two miles, spliced, and completed to Trinity Bay.

ity Bay.

The practicability of laying an electric wire across the Atlantic being thus demonstrated, many lines have been projected, and several of them carried out. Marconi's wireless telegraph system has introduced a new era in transatlantic telegraphy, as has radio developments but they have not interfered with the business of cable companies.

Atlantides, a name given to the Pleiades, which were fabled to be the seven daughters of Atlas or of his brother Hesperus.

Atlantis, or Atlantica, an island, said by Plato and others to have once existed in the ocean immediately beyond the Straits of Gades; that is, in what is now called the Atlantic Ocean, a short distance W. of the Straits of Gibraltar. Atlantis is represented as having ultimately sunk beneath the waves, leaving only isolated rocks and shoals in its place. Geologists have discovered that the coast-line of Western Europe did once run farther in the direction of America than now; but its submergence seems to have taken place long before historic times.

Atlas, in Greek mythology, the name of a Titan whom Zeus condemned to bear the vault of heaven. The same name is given to a collection of maps and charts, and was first used by Gerard Mercator in the 16th century, the figure of Atlas bearing the globe being given on the title-pages of such works.

Atlee, Washington Lemuel, an American surgeon, born in Lancaster, Pa., Feb. 22, 1808; became noted as a pioneer in ovariotomy and the removal of uterine fibroid tumors. He died Sept. 6, 1878.

Atmometer, an instrument invented by Sir John Leslie for measuring the quantity of moisture exhaled in a given time from any humid surface.

Atmosphere, literally, the air surrounding our planet, and which, as the etymology implies, is, speaking broadly, a "sphere" (not, of course, a solid, but a hollow one). With strict accuracy, it is a hollow spheroid. Its exact height is unknown. At 2.7 miles above the surface of the earth, half its density is gone, and the remainder is again halved for every further rise of 2.7 miles. Some small density Some small density would remain at 45 miles high. At 80 miles, this would have all but disappeared. But from sundry observa-tions, made at Rio Janeiro and else-where, on the twilight are, M. Liais infers that the extreme limit of the atmosphere is between 198 and 212 miles. In the lower strata of the atmosphere, the temperature falls at least a degree for every 352 feet of ascent; hence, even in the tropics, mountains of any considerable elevation are snow-capped. The atmosphere appears to us blue, because, absorbing the red and yellow solar rays, it reflects the blue ones. It revolves with the earth, but being extremely mobile, winds are generated in it, so that it is rarely long at rest. Evaporation, continually at work, sends into it quantities of water in a gaseous state; clouds are formed, and in due time descend in rain. The atmosphere always contains free electricity, sometimes positive and sometimes negative. appears to be no atmosphere around the moon; but the case seems different with the sun, Venus, Mars, Jupiter, and Saturn.

Atmospheric Pressure, the pressure exerted by the atmosphere, not merely downward, but in every direction. It amounts to 14.7 pounds of weight on each square inch, which is often called in round numbers 15. On a square foot it is =2,160 pounds, or nearly a ton. It would act upon our bodies with crushing effect were it not that the pressure, operating in all directions, produces an equilibrium. If any gas or liquid press upon a surface with a force of 15 pounds on a square falls by several mouths, interrupted inch, it is generally described as having a pressure of one atmosphere; if is navigable by steamers for fully 250

60 pounds, of four atmospheres; if 120 pounds, of eight atmospheres, and so on.

Atmospheric Railway. PNEUMATIC DISPATCH).

Atomic Theory, a theory as to the existence and properties of atoms; especially, in chemistry, the theory accounting for the fact that in compound bodies the elements combine in certain constant proportions, by assuming that all bodies are composed of ultimate atoms, the weight of which is different in different kinds of matter. It is associated with the name of Dalton, who systematized and extended the imperfect results of his predecessors. On its practical side the atomic theory asserts three Laws of Combining Pro-portions: (1) The Law of Constant or Definite Proportions, teaching that in every chemical compound the na-ture and proportion of the constituent elements are definite and invariable: (2) The Law of Combination in Multiple Proportions, according to which the several proportions in which one element unites with another, invariably bear towards each other a simple relation; (3) The Law of Combination in Reciprocal Proportions, that the proportions in which two elements combine with a third also represent the proportions in which, or in some simple multiple of which, they will them-selves combine. Without expressly adopting the atomic theory, chemists have followed Dalton in the use of the terms atom and atomic weight, yet in using the word atom it should be held in mind that it merely denotes the proportions in which elements unite.

Atonement, in theology, the sacrificial offering made by Christ is expiation of the sins, according to the Calvinists, of the elect only; according to the Arminians, of the whole human race.

Atrato, a river of Colombia, interesting because it has repeatedly been made to bear a part in schemes for a ship-canal across the Isthmus of Panama. Rising on the Western Cordillera at an altitude of 10,560 feet, above sea-level, it runs 305 miles northward through low, swampy country, and miles, being 750 to 1,000 feet wide, and 8 to 70 feet deep. A route, surveyed by the United States Government in 1871, proposed to connect the Atrato and the Jurador, flowing into the Pacific, by a canal 48 miles long. At the Paris International Congress (1879), for deciding the best route for the interoceanic canal, that route was, with various others, discussed and rejected in favor of De Lesseps' line from Limon to Panama. Gold-dust is found in and about the Atrato.

Atrium, in ancient times, the hall or principal room in an ancient Ro-In a large house the man house. rooms opened into it from all sides,

and were lighted from it.

Atrophy, a wasting of the flesh due to some interference with the nutritive processes. It may arise from a variety of causes, such as permanent, oppressive and exhausting passions, organic disease, a want of proper food or of pure air, suppurations in important organs, copious evacuations of blood, saliva, semen, etc., and it is also sometimes produced by poisons, for example, arsenic, mercury, lead, in miners, painters, gilders, etc.

Atropin, or Atropine, a crystalline alkaloid obtained from the deadly nightshade (atropa belladonna). It is very poisonous and produces persistent dilation of the pupil.

Attaché, a military, naval or subordinate member of the diplomatic service attached to an embassy or legation.

Attachment, in law, the taking into the custody of the law the person or property of one already before the court, or of one whom it is sought to bring before it.

Attack, the opening act of hostility by a force seeking to dislodge an

enemy from its position.

Attainder, the legal consequences of a sentence of death or outlawry pronounced against a person for treason or felony, the person being said

to be attainted.

In the United States, the Federal Constitution declares that "No bill of attainder shall be passed, and no attainder of treason, in consequence of a judicial sentence, shall work corrup-tion of blood or forfeiture except during the life of the person attainted.'

Attar, Ferid eddin, a celebrated Persian poet, born near Nishapur in 1119; died about 1229 (?).

Attar, or Otto, of Roses (oil of roses), an essential oil obtained from the petals of three species of roses, viz.: rosa centifolia, moschata and damascena.

Atterbury, Francis, an English prelate, born March 6, 1662, and educated at Westminster and Oxford. He died Feb. 15, 1732, and his body was interred in Westminster Abbey.

Attic, pertaining to Attica or to Athens. Pure; elegant; classical; poignant; characterized by keenness of intellect, delicacy of wit, purity of elegance, soundness of judgment and most expressive brevity; as, the Attic Muse. Attic dialect is that dialect of the Greek language which was spoken in Attica. It was the most refined and polished of all the dialects of ancient Greece.

Attica, a State of ancient Greece, the capital of which, Athens, was once the first city in the world.

Atticus, Titus Pomponius, a noble Roman, the contemporary of Cicero and Cæsar.

Attila, the famous leader of the Huns, was the son of Mundzuk, and the successor, in conjunction with his brother Bleda, of his uncle Rhuas. The rule of the two leaders extended over a great part of Northern Asia and Europe, and they threatened the Eastern Empire, and twice compelled the weak Theodosius II. to purchase an inglorious peace. Attila caused his brother Bleda to be murdered (444), and in a short time extended his dominion over all the peoples of Germany and exacted tribute from the Eastern and Western emperors. He invaded Italy and conquered and destroyed Aquileia, Padua, Vicenza, Verona, and Bergamo, laid waste the plains of Lombardy, and was marching on Rome when Pope Leo I. went with the Roman ambassadors to his camp and succeeded in obtaining a peace. Attila went back to Hungary, and died on the night of his marriage with Hilda or Ildico (453), either from the bursting of a blood vessel or by her hand.

Attock, a town and fort of the Punjab, on the left or E. bank of the

The great railway bridge across the Indus here was opened in 1883. It has five arches 130 feet high, and renders continuous the railway connection between Calcutta and Peshawur (1,600 miles).

Attorney, a person appointed to do something for and in the stead and name of another. An attorney at law is a person qualified to appear for another before a court of law to prose-

Attorney-General. In the United States the Department of Justice is presided over by the Attorney-General, whose duty it is to furnish all legal advice needed by Federal authorities, and conduct all litigation in which the States is concerned. The United States have similar officers.

Attraction, in natural philosophy, a force in virtue of which the material particles of all bodies tend necessarily

to approach each other.

Capillary attraction, meaning the attraction excited by a hair-like tube on a liquid within it, is, properly speaking, a variety of adhesion.

In magnetism, the power excited by a magnet or loadstone of drawing and

attaching iron to itself.

In electricity, the power possessed by an electrified body of drawing certain other bodies to itself.

Atwater, Lyman Hotchkiss, an American theologian, born in Hampden, Conn., Feb. 23, 1813; died in Princeton, N. J., Feb. 17, 1883.

Atwater, Wilber Olin, an American chemist, born in Johnsburg, N. Y., May 3, 1844; was graduated at Wesleyan University in 1865; made a special study of chemistry in the Sheffield Scientific School of Yale and the Universities of Leipsic and Berlin; became Professor of Chemistry in East Tennessee University in 1873; was director of the Connecticut Agricultural Experiment Station in 1875-1877, and was appointed director of the Storrs (Conn.) Experiment Station in 1887. He was connected for several years with the United States Department of Agriculture; published many papers on chemical and allied subjects; and, after 1894, gave much attention to nutrition investigations. He died in 1907. Atwill, Edward Robert, an American clergyman, born in Red Hook, N. Y., Feb. 18, 1840; was graduated at Columbia College in 1862, and at the General Theological Semantal Columbia College in Proceedings of the College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General Theological Semantal College in 1862, and at the General College in 1862, and inary 1864; consecrated the first Protestant Episcopal bishop of West Missouri, Oct. 14, 1890. D. Jan. 24, 1911.

Atwood, Isaac Morgan, American educator, born in Pembroke, N. Y., March 24, 1838; was ordained cute or defend any action on behalf of in the Universalist Church in 1861; his client. Christian Leader "1867-1873; became an associate editor of the "Universal-ist Leader;" and was chosen president of the Canton (N. Y.) Theological

Seminary in 1879.

Atwood, Melville, an Anglo-American geologist, born in Prescott Hall, England, July 31, 1812; studied lithology, microscopy, and geology early in life, and engaged in gold and diamond mining in Brazil. In 1843 he made a discovery that greatly enhanced the value of zinc ore. After coming to the United States, in 1852, he invented the blanket system of amalgamation. He also established the value of the famous Comstock silver lode, by an assay of minerals in that region. He died in Berkeley, Cal., April 25, 1898.

Auber, Daniel François Esprit, a French operatic composer, born Jan. 29, 1782, at Caen, in Normandy; was originally intended for a mercantile career, but devoted himself to music, studying under Cherubini. He died in Paris, May 13, 1871.

Auberlen, Karl August, a German Protestant theologian, born at Fellbach, Würtemberg, Nov. 19, 1824; died at Basel, May 2, 1864.

Aubert, Joachim Marie Jean Jacques Alexandre Jules, French general and military writer; born in 1804; prominent in several campaigns, and was made commander of the Legion of Honor in 1860. He is best known to the public as a jour-nalist and historical writer. He died in 1890.

Aubertin, Charles, a French scholar, born in St. Didier, Dec. 24, 1825.

Aublet, Albert, a French painter, born in Paris; studied historical painting under Gerome; won a firstclass medal in the Paris Exposition of 1889, and the Legion of Honor in 1890.

Aubry de Montdidier, a French soldier, supposed to have been murdered by his comrade, Richard de Macaire, in 1371. His dog peristed in pursuing and harassing Macaire, and this coming to the ears of King Charles V., he ordered a fight between them. The dog was victorious, and has since been famous in story as the "Dog of Montargis;" from the place of the fight.

Auburn, city and capital of Androscoggin county, Me.; on the Androscoggin river and the Maine Central railroad; 35 miles N. of Portland; is chiefly engaged in the manufacture of boots, shoes, cotton goods, furniture, and farm implements; has many points of local interest, including a 60-foot fall of the river. Pop. (1920) 16,985; (1930) 18,571.

Auburn, city and capital of Cay-uga county, N. Y.; on Central & Hudson River and the Lehigh Valley railroads. It contains a State armory, Auburn Theological Seminary (Presb.), a State prison on the "silent" system, a State Insane asylum, a statue of William H. Seward, and important industrial plants. Pop. (1930) 36,652.

Auchmuty, Richard Tylden, an American philanthropist, born in New York city in 1831; practiced architecture for many years; with his wife founded the New York Trade Schools, at a cost of \$250,000. J. Pierpont Morgan, in 1892, gave it an endowment of \$500,000. Died 1893.

Auckland, a town in New Zealand. in the North Island, founded in 1840, and situated on Waitemata harbor, one of the finest harbors of New Zealand, where the island is only 6 miles across, there being another harbor (Manukau) on the opposite side of the isthmus. It was formerly the capital of the colony. Pop. (1926), including suburbs, 192,176.

Auckland Islands, a group lying in the Pacific Ocean to the S. of New Zealand. The largest of these islands is about 30 miles long by 15 broad, and is covered with dense vegetation. They are almost entirely uninhabited, belong to the British and are a station for whaling ships.

goods to the highest bidder.

Audion, an amplifier also a detector of sound. Invented by Lee De Forest in 1907. Used by telephone companies for long distance service. See also RADIO.

Andiphone, an invention to assist the hearing of deaf persons in whom the auditory nerve is partially de-

stroyed.

Audit, an examination into accounts or dealings with money or property, along with vouchers or other documents connected therewith, especially by proper officers, or persons appointed for the purpose.

Audsley, George Ashdown, a Scottish-American architect, born in Elgin, Scotland, Sept. 6, 1838; estab-lished himself in the United States in

1892, and subsequently became prominent both as an architect and author. Audubon, John James, American naturalist of French extraction, born near New Orleans, May 4, 1780; was educated in France, and studied painting under David. In 1798 he settled in Pennsylvania, but, hav-ing a great love for ornithology, he set out in 1810 with his wife and child, descended the Ohio, and for many years roamed the forests in every direction, drawing the birds which he shot. In 1826 he went to England, exhibited his drawings in Liverpool, Manchester and Edinburgh, and fi-nally published them in an unrivaled work of double-folio size, with 435 work of double-folio size, with 435 colored plates of birds the size of life ("The Birds of America," 4 vols., 1827-1839), with an accompanying text ("Ornithological Biography," 5 vols., 8 vo., partly written by Prof. Macgillivray). On his final return to the United States he labored with Dr. Pocharacter will be size that the labored with Dr. Bachman on an illustrated work entitled "The Quadrupeds of America" (1843–1850, 3 vols.). He died in New York city, June 27, 1851.

Auer, Leopold, violinist, com-poser born in Veszprim, Hungary, June 9, 1845; pupil of Joachim; taught at Imperial Conservatory, Petrograd, Imperial Conservatory, Petrograd, 1887-1892. In New York since 1918. His pupils include Elman, Zimbalist, Heifetz, Macmillan, Rosen.

Auerbach, Berthold, a German chlong to the British and are a standard whaling ships.

Auction, the public disposal of Cannes, France, Feb. 8, 1882.

Auerspherg, Anton Alexander, Graf von, a German poet, born at Laibach, April 11, 1806. He died at Gratz, Sept. 12, 1876. His poems are

very popular in Germany.

Auerstadt, a village in the Prussian Province of Saxony, 10 miles W. of Naumburg. It is famous for the great battle which took place there Oct. 14, 1806, between the French un-der Dayoust, and the Prussian army under Duke Charles of Brunswick, which ended in a great victory for the former. Napoleon, who had, on the same day, defeated the main army of Frederick William III. at Jena, made Davoust Duke of Auerstadt.

Augeas, a fabulous king of Elis,

in Greece, whose stable contained 3,000 oxen, and had not been cleaned for 30 years. Hercules undertook to clear away the filth in one day in return for a 10th part of the cattle, and executed the tack by turning the river Alpheus through it. Augeas, having broken the bargain, was deposed and

slain by Hercules.

Augsburg, Confession of, name given to the celebrated declaration of faith, compiled by Melanchthon, revised by Luther and other reformers, and read before the Diet of Augsburg, June 25, 1530. It consisted of 28 articles, seven of which refuted Roman Catholic errors, and the remaining 21 set forth the Lutheran creed. Soon after its promulgation, the last hope of reforming the Roman Catholic Church was abandoned, and complete severance followed. An answer by the Roman Catholics was read Aug. 3, 1530; when the Diet declared that it had been refuted. Melanchthon then drew up another confession. The first is called the unaltered, and the second, the altered form.

Augsburg, Diet of, the most celebrated of the numerous diets held at Augsburg. Pope Clement VII. refusing to call a general council for the settlement of all religious disputes, the Emperor Charles V. summoned one to meet at Augsburg, June 20, 1530. On the 25th the famous "Confession" was read; later an answer was made by the Catholics, whereupon the Protestants were ordered to conform in all points to the Church of Rome, Charles V. giving them till

April 15, 1531, to reunite with the Mother Church. On Nov. 22, the emperor announced his intention to execute the edict of Worms, made severe enactments against the Protestants, and reconstituted the Imperial Chamber. The Protestants put in a counter declaration, and the Diet closed.

Augsburg, League of, a league concluded at Augsburg, July 9, 1686, for the maintenance of the treaties of Münster and Nimeguen, and the truce of Ratisbon, and to resist the en-croachments of France. The contracting parties were the Emperor Leopold I., the Kings of Spain and Sweden, the Electors of Saxony and Bavaria, and the circles of Suabia, Franconia,

Upper Saxony and Bavaria.

Augur, Christopher Colon, an American military officer; born in New York, July 10, 1821; was graduated at the United States Military Academy in 1843; became Major of the 13th United States Infantry in 1861; Colonal of the 13th United States Infantry in 1861; Colonel of the 12th Infantry in 1866; Brigadier-General, United States army, March 4, 1869; Major-General in the volunteer service in 1862; mustered out of that service in 1866; and was retired in the regular army, July 16, 1885. He commanded a division in the battle of Cedar Mountain, being severely wounded. He died in Washington, D. C., Jan. 16, 1898.

Augurs, a college of diviners in ancient Rome, who predicted future events and read the will of the gods from the occurrence of certain signs, connected with thunder and lightning; the flight and cries of birds; the feeding of the sacred chickens; the action of certain quadrupeds or serpents; accidents, such as spilling the salt, etc. The answers of the augurs and the signs were called auguries; bird-predictions were auspices. Nothing was undertaken without the augurs, and by the words "alio die" ("meet on another day"), they could dissolve the assembly of the people and annul decrees passed at the meeting.

August, the eighth month of our year, named by the Roman Emperor Augustus, after himself, being asso-ciated with several of his victories and other fortunate events. Before this it was called Sextilis or the sixth month

(counting from March). July had been named for Julius Cæsar and the Senate to please Augustus decreed that August should have equal length, taking a day from February.

Augusta, city and capital of Richmond county, Ga., on the Savannah river and the Southern and other railroads; 120 miles N. W. of Savannah. The city is noted for its diversified manufactures, which had in 1914 a value of over \$12,000,000, and its

value of over \$12,000,000, and its large trade in cotton, lumber, fruit, and vegetables. Pop. (1930) 60,342.

Augusta, city and capital of the State of Maine and of Kennebec county; on the Kennebec river and the Maine Central railroad; 63 miles N. E. of Portland. The city has abundant water power for numerous factories, and besides several State buildings, has a National Arsenal and (4 miles out) a National Soldiers' Home. Pop. (1930) 17,198. Augusta, Victoria, Duchess of

Schleswig - Holstein - Sonderburg-Augustenburg, born Oct. 22, 1858; gustenburg. daughter of the late Duke Friedrich; married Prince Friedrich Wilhelm, afterward Wilhelm II., Feb. 27, 1881; became Empress of Germany and Queen of Prussia on the accession of her husband to the throne. Died, 1921.

Augustine, or Austin, St., the Apostle of the English, flourished at the close of the 6th century.

Augustulus, Romulus, the last of the Western Roman emperors; reigned for one year (475-476), when he was overthrown by Odoacer and banished.

Augustus, Caius Julius Cæsar Octavianus, originally called CAIUS OCTAVIUS, the celebrated Roman emperor, was the son of Caius Octavius and Atia, a daughter of Julia, the sister of Julius Casar. He was born 63 B. C., and died A. D. 14. He was the first emperor of Rome in the full sense of exercising imperial power as a recognized monarch, and he was also one of the greatest, if not the greatest of the emperors, a liberal patron of art, and broad and sagacious in the exercise of his authority. He is said to have "found Rome of brick and left it of marble."

Auk, the name given to several sea

tle auk. The great auk is from two to two and a half feet high, with short wings almost useless for flight. In the water, however, it makes way with astonishing rapidity. It is essentially a northern bird. It seems to be rapidly verging to extinction.

Aulic, an epithet given to a council (the Reichshofrath) in the old German Empire, one of the two supreme courts of the German Empire, the other being the court of the imperial chamber (Reichskammergericht) It head not enter the court of the imperial chamber (Reichskammergericht) richt). It had not only concurrent jurisdiction with the latter court, but in many cases exclusive jurisdiction, in all feudal processes, and in criminal affairs, over the immediate feudatories of the emperor and in affairs which concerned the Imperial Govern-The title is now applied in ment. Germany in a general sense to the chief council of any department, political, administrative, judicial or military.

Aurelian. Lucius Domitius Aurelianus, an Emperor of Rome, distinguished for his military abilities and stern severity of character; was the son of a peasant of Illyricum. He was born about 212 A. D., and lost his life, A. p. 275, by assassination, the result of a conspiracy excited by a secretary whom he intended to call to account for peculation.

Aureola, or Aureole, in paintings, an illumination surrounding a holy person, as Christ, a saint, or a martyr, intended to represent a luminous cloud or haze emanating from

Aureus, the first gold coin which was coined at Rome, 207 B. C. Its value varied at different times, from about \$3 to \$6.

Auricles of the Heart, those two of the four cavities of the heart which are much smaller than the others, and each of which, moreover, has falling down upon its external face a flattened appendage, like the ear of a dog, from which the name of the whole structure is derived.

Auricula, a beautiful garden flower. It is a native of the Alpine districts of Italy, Switzerland, and Germany, and occurs also in Astrakhan.

Aurifaber, the Latinized name of birds, especially the great and the lit- JOHANN GOLDSCHMIDT, one of Luther's companions, born in 1519, became pastor at Erfurt in 1566; died there in 1579. He collected the unpublished manuscripts of Luther.

Auriga, in astronomy, the Wag-oner, a constellation of the northern hemisphere containing 68 stars, including Capella of the first magnitude.

Auringer, Obadiah Cyrus, an American poet, born at Glens Falls, N. Y., June 4, 1849.

Aurora, a city in Kane county, Ill.; on the Fox river and the Chicago & Northwestern and other railroads; 38 miles W. of Chicago; is the farming and manufacturing center of Kane and adjoining counties; has large cotton and woolen mills and locomotive and car works; and claims the first electric lighting system in the United States. Pop. (1920) 36,397; (1930) 46.589.

Aurora Borealis, a luminous meteoric phenomenon appearing in the N. most frequently in high latitudes, the corresponding phenomenon in the southern hemisphere being called au-rora australis, and both being also

called polar light, streamers, etc.

Aurungzebe, known as the Great Mogul, or Emperor of Hindustan, born Oct. 22, 1618. He was the son of Shah Jehan, and properly named Mohammed, but received from his grandfather that of Aurungzebe (Ornament of the Throne), by which he is known to history. Aurungzebe died at Ahmednagar, in the Deccan, Feb. 21, 1707, master of 21 provinces, and of a revenue of about \$200,000,000.

Auscultation, the art of discovering diseases within the body by means of the sense of hearing. Being carried out most efficiently by means of an instrument called a stethoscope, it is often called mediate auscultation.

Auspices, among the Romans, omens, especially those drawn from the flight or other movements of birds, or, less properly, from the occurrence of lightning or thunder in particular parts of the sky. These were sup-posed to be indications of the will of heaven, and to reveal futurity.

Austen, Jane, an English novelist, author of "Pride and Prejudice," 1812, "Sense and Sensibility." 1813, "Emma," 1816, "Persuasion," 1818, was born at Steventon, Hampshire, Dec. 16, 1775; died, July 18, 1817.

Austerlitz, a small town of Moravia, on the Littawa, 13 miles S. E. In the vicinity, on Dec. 2, of Brünn. 1805, was fought the famous battle that bears its name, between the French army of 80,000 men, com-manded by Napoleon, and the combined Russian and Austrian armies. numbering 84,000, under their respective Emperors; in which the former achieved a signal victory.

Austin, capital of the State of Texas, and county-seat of Travis co.; on the Colorado river; 230 miles N. W. of Galveston. It derives large power for manufacturing from the river. Besides the State Capitol, the city contains the main building of the State University, four State asylums, the State Confederate Home. The Capitol, which cost \$3,000,000, is in a square of 10 acres. The recent construction of a dam in the river has given the city a large and beautiful stretch of water, known as Lake Mc-Donald. The city was originally known as Waterloo; was named after Stephen F. Austin; became the capital of the Republic of Texas in 1839; and the capital of the State in 1872. Pop. (1920) 34,876; (1930) 53,120.

Austin, Alfred, an English poet, critic, and journalist, born at Headingly, near Leeds, May 30, 1835. He graduated from the University of London in 1853, was called to the bar in 1857, and was editor of the "National Review," 1883-1893. He was ap-pointed poet laureate of England in 1896. He died June 2, 1913.

Austin, George Lowell, an American physician and writer, born in Massachusetts in 1849; died in 1893.

Austin, Henry, an American lawyer and legal writer, born in Boston, Mass., Dec. 21, 1858; wrote several valuable law books.

Austin, Jane Goodwin, an American novelist, born in Worcester, Mass., Feb. 25, 1831; was educated and thenceforth lived in Boston. She died in Boston, March 30, 1894.

Austin, John, an English writer on jurisprudence, born in Creeling Mill, Suffolk, March 3, 1790. From 1826 to 1835 he filled the chair of Jurisprudence at London University. Died in Weybridge, Surrey, in Decem-

FIRE TRAIN

FIREMEN IN ACTION

ber, 1859. His wife, SARAH, one of the Taylors of Norwich, born in 1793, produced translations of German works, and other books bearing on Germany or its literature. She died in Weybridge, Surrey, Aug. 8, 1867. Her daughter, LADY DUFF GORDON, translated several German works.

Austin, Stephen Fuller, American pioneer, born in Austinville, Va., Nov. 31, 1793; a son of Moses Austin, the real founder of the State of Texas, who, about 1820, obtained permission from the Mexican Government to establish an American colony in Texas, but died before his plans were accomplished. Stephen took up the work unfinished by his father, and located a thrifty colony on the site of the present city of Austin, in 1821. Subsequently he was a commissioner to urge the admission of Texas into the Mexican Union; was imprisoned there for several months; and, in 1835 was a commissioner to the United States Government to secure the recognition of Texas as an independent State. He died in Columbia, Tex., Dec. 25, 1836.

Australasia, a division of the globe usually regarded as comprehending the islands of Australia, Tasmania, New Zealand, New Caledonia, the New Hebrides, the Solomon Islands, New Ireland, New Britain, the Admiralty Islands, New Guinea, and the Arru Islands, besides numerous other islands and island groups; area, 3,259 199 square miles, pop. about five millions. It forms one of three portions into which some geographers have divided Oceania, the other two being Malaysia and Polynesia.

Australia. Commonwealth of. a British possession which includes the island continent of Australia proper (the largest island in the world) and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366

square miles.

It is bounded on the W. and E. by

including Tasmania, 43° 39' S. On its north are the Timor and Arafura seas and Torres Strait; on its south the Southern Ocean and Bass Strait. The continent is a large plateau, fringed by a low-lying, well-watered coast, particularly on the eastern side. No less than 1,149,320 square miles belong to the tropical zone, and 1,020,-720 to the temperate zone.

The area and population (exclusive of aborigines) of the different states composing the Commonwealth were reported as follows on Dec. 31, 1921.

States and Territories	Area So M	Pop.
New South Wales	309.460	2,099,703
Victoria	87,884	1,531,529
Queensland	670,500	757,634
South Australia	380,070	495,336
Western Australia	975,920	332,213
Tasmania	26,215	213,877
Northern Territory	523,620	3,870
Federal Territory	912	2,572
Total	4,455,005	5,496,794

The government is based on the Constitution Act of 1900. A gover-nor-general represents the Crown. The Senate consists of thirty-six members, six for each Original State, directly chosen by the people of the State for a term of six years. The House of Representatives consists of seventy-five members, directly elected for three years. A Referendum is provided. State governors are appointed by the Crown, and State Parliaments retain legislative authority in regard to all matters not transferred to the

Federal Parliament.

The executive power is vested in the governor-general, with an Executive Council of seven Ministers; the judicial in Federal Supreme Court, called the High Court of Australia, and other courts vested with Federal jurisdiction. Trade, commerce, and intercourse among the States is absolutely free. The Commonwealth makes uniform customs and excise duties.

The revenue for 1926–27, including railway receipts, was \$497,289,000; the expenditures amounted to \$499,067,800; the public debt was \$3,042,921,600. In June 1927, the Commonwealth agreed to take co the Indian and Pacific Oceans respectively; lies between long. 113° 9′ E. and 153° 39′ E., while its northern and southern limits are the parallels of lat. 10° 41′ S. and 39° 8′ S., or, certain fixed payments made in 192627 to the States, while the States agreed to pay the balance of interest and both the Commonwealth and States set up sinking funds to extinguish the debt in 50-60 years.

Production and industry in the calendar year 1926-27 yielded the following values:

Agricultural	£ 98,295,000
Pastoral	112,000,000
Dairying, Poultry, etc	46,980,000
Forestry and Fisheries	13,000,000
Mining	24,007,000
Manufacturing	24,007,000 153,325,000

Total£447,607,000

The returns for 1926–27 show 17,772,000 acres under cultivation. The wheat production was 160,761,866 bushels; oats, 12,571,203 bushels; barley, 6,931,053 bushels; maize, 6,970,273 bushels. 3,487,352 tons of hay, 3,155,916 tons of sugar cane, and 379,849 tons of potatoes were raised. A Dried Fruit Export Control Board has been formed to increase sale of Australian dried fruits, 63,362,000 pounds of which were dried in 1926-27, while fresh fruit totaled 75,759,800 pounds. Mineral output to Jan. 1, 1927 totaled £1,129,000,000. Wool production in 1927–28 was 865,000,000 pounds, and was the chief export, Australia growing some of the finest merino wool in the world.

Commercial relations in 1927–28 showed: imports of merchandise, specie, and bullion, £148,116.549; exports, £141,595,159. The principal exports were wool, wheat, skins, hides, butter, copper and zinc, mutton and lamb, flour, coal, and beef. During the World War the government controlled the export of the principal food-stuffs. The Commonwealth government owns a line of steamships, operated in trade only.

Internal communication is afforded by 25,523 miles of railway, besides 3,-144 miles of private lines, 4,624 telegraph offices and 27 newspapers having a combined circulation of over 1,000,000.

Invalid and old-age pensions are granted to a maximum annual amount of £84. 10s per annum, and maternity allowances of \$25 on the birth of each child are granted.

Between Sydney and Melbourne a Federal Capital Territory of 940 square miles was set up and a new capital city, Canberra, was laid out from plans made by an American architect W. B. Griffin. The first session of the Commonwealth Parliament was held in the new city on May 9, 1927.

The principal cities and towns, with their population, 1927, are Sydney (N. S. W.), 1,101,000; Melbourne (Vic.), 975,160; Adelaide (S. A.), 327,700; Brisbane (A), 295,430; Perth (W. A.), 191,800; Newcastle (N. S. W.), 84,360; Ballarat (Vic.), 34,672; Bendigo (Vic.) 25,682; Hobart (Tas.), 56,200; Broken Hill (N. S. W.), 26,337; Geelong (Vic.), 14,818.

At the outbreak of the World War Australia responded promptly and effectively to the call of the mother country furnishing a well trained, armed land and naval force. See APPENDIX: World War.

Australia, South, one of the original States in the Commonwealth of Australia; occupies the middle of Australia, and stretches from sea to sea. At first as the colony of South Australia it extended between lon. 132° and 141° E., and from the Southern Ocean to lat. 26° N. It now has an area of about 380,070. Pop. (1921) 495.836.

Australia, Western, one of the original States in the Commonwealth of Australia; embraces all that portion of Australia W. of lon. 129° E., bounded E. by South Australia, and N., W., and S. by the Indian Ocean; area, 975,920 square miles; capital, Perth. The coast-line measures about 3,000 miles. From 1850 to 1868 it was a place for the transportation of convicts. In 1890 the State received autonomous government. On Oct. 16, 1906, the Legislature adopted a motion to secede from the commonwealth, the union being detrimental to the developing interests of the State. Pop. (1921) 332,919.

Australian Federation, a political union of all the Australian colonies, the agitation for which began in 1852. Feb., 1899, a unanimous agreement was reached by the colonial premiers in conference at Melbourne, regarding the unsettled questions re-

ferred to them by the colonial Legislatures, thus insuring the success of the federation project. In 1900, a bill making Federation effective was introduced into Parliament, at London, and passed, the only amendment offered having reference to the royal prerogative. Later in that year the Earl of Hopetoun was appointed by the Queen first Governor-General. He resigned in May, 1902.

Austria, or Austria-Hungary, The Austria of today is a small fragment of the once great and powerful Austria-Hungary Empire. No nation in the Central Powers suffered so much in loss of territory. It not only lost in area and population but also immensely in national wealth. The former empire extended from about lat. 42° to 51° N., or, exclusive of Dalmatia and the narrower part of Croatia, from about lat. 44° 30′ to 51° N., and from lon. 8° 30′ to 26° 30′ E., the total area in round numbers is 240,000 square miles. Its greatest length from E. to W. is about 860 miles; its greatest breadth from N. to S., with the exclusion above stated, is about 400 miles; bounded S. by Turkey, the Adriatic Sea, and the kingdom of Italy; W. by Switzerland, Bavaria, and Saxony; N. by Prussia and Russian Poland; and E. by Russia and Roumania. On the shores of the Adriatic, along the coasts of Dalmatia, Croatia, Istria, etc., lay formerly its only sea frontage.

Austria was proclaimed a Republic on Nov. 12, 1918, a day after the Armistice. On Feb. 16, 1919, the National Constitutional Assembly was elected by vote of all men and women over 21 years of age. A Constitution was adopted Oct. 1, 1920, which provides for a Parliament of two Houses, a Bundesrath of 46 members chosen indirectly and a national rat elected for four years by a direct vote. These two Houses elect a President who serves four years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses elect a President who serves for years by a direct vote. These two Houses, and Blakowina, and Northern Hungary, and half the population of Silesia and Bukowina. This preponderance, however, is only apparent, as none of the other races are split up greatly from each other in language, religion, civilization, manners, and solve the Ruthenians and Poles, and the South Slavic Slovenians, and the South Slavic Slovenians, and the South Slavic Slovenians,

the country was established. The budget for 1929 provides for revenues of 1,777,000,000 schillings and an expenditure of 1,742,000,000 schillings. The Austrian Republic has an area of 32,396 sq. m. and population (1923)

of 6,526,661. None of the European States, with the exception of Russia, exhibited such a diversity of race and language as did this former Empire. In Austria alone the following ethical elements on the basis of language were developed in the census of 1910: German 9,950,266 Bohemian Moravian Slovak 6,435,983 Polish 4,967,984 Ruthenian 3,518,854 Slovene 1,252,940 }..... Servian 783,334 Croatian Italian **}.....** 768,422 Ladin 275,115 Rumanian Magyar 10,974 In Hungary the corresponding elements were: Magyar, 10,050,575; German, 2,037,435; Slovak, 1,967,970; Rumanian, 2,949,032; Ruthenian, 472,587; Croatian, 1,883,162; Servian, 1,106,471; all others, 469,555. 255. Hence in the entire Empire the linguistic elements were: German, 11,987,701; Bohemian, Moravian, and 11,987,701; Bonemian, Moravian, and Slovak, 9,656,893; Polish, 4,967,984; Ruthenian, 3,991,441; Servian and Croatian, 3,772,967; Italian and Ladin, 768,422; Rumanian, 3,224,147; Magyar, 10,061,549; all others, 469,-255. The Slavs, who amount to above 19,000,000, or 45 per cent. of the total population are the chief of the company of t population, are the chief of the component nationalities of the monarchy in point of numbers, forming the great mass of the population of Bohemia, Moravia, Carniola, Galicia, Dalmatia, Croatia and Slavonia, and Northern Hungary, and half the population of Silesia and Bukowina. This preponderance, however, is only apparent, as none of the other races are split up into so many branches differing so greatly from each other in language, religion, civilization, manners, and customs. These branches are the

Croats, Serbs, and Bulgarians. The Germans are scattered over the whole republic, and form almost the sole population of the archduchy of Aus-tria, Salzburg, the greatest portion of Styria and Carinthia, almost the whole of Tyrol and Vorarlberg, considerable portions of Bohemia and Moravia, the whole of the W. of Silesia, etc.; and they are also numerous in Hungary and Transylvania. The Mag-yars or Hungarians form the great bulk of the inhabitants of Hungary and of the E. portion of Transylvania. To the Italic or Western Romanic stock belong the inhabitants of South Tyrol and parts of the coast lands and Dalmatia. A considerable portion of the S. E. of the republic is occupied by members of the Rumanian (or East-ern Romanic) stock, who form more than half the population of Transylvania, besides being spread over the S. E. parts of Hungary, Bukowina, and part of Croatia and Slavonia. The number of Jews is also very considerable, especially in Galicia, Hungary, Bohemia, and Moravia. There are also several other races whose numbers are small, such as the Gypsies, who are most numerous in Hungary and Transylvania, and the Albanians in Dalmatia and neighboring regions. The population is thickest in Lower Austria, Bohemia, Silesia,

and Moravia; thinnest in Salzburg
The State religion of Austria is the Roman Catholic, and next in numbers is the Greek Church. Calvinism and Lutheranism are also professed by a large body of the people; the former mostly in Hungary and Transylvania, the latter in the German provinces and in Galicia. The civil power exercises supreme control in all ecclesiastical matters. The percentage of Catholics in the republic is estimated at about

95 per cent. ompulsory military service was abolished by the Treaty of St. Germain and the army limited to 30,000. The military budget for 1927 was 79,700,000 schillings. Austria maintains no navy.

Vienna, the principal city and capiof Austria, has a population

of (1923) 1,863,739.

The history of Austria-Hungary in the last few years has been most

any previous hint, the annexation of the Turkish provinces of Bosnia and Herzegovina and the sanjak of Novi Bazar was proclaimed. Turkey vain-ly protested against the act, as a violation of the provisions of the Treaty of Berlin. On June 28, 1914, the of Berlin. On June 28, 1914, the Austrian Archduke Francis Ferdinand, heir to the throne, and his wife, the Duchess of Hohenberg, were assassinated while on a visit to Sarajevo, Bosnia, by an alleged Servian. This incident was made the immediate pretext for the greatest war in history. The venerable Emperor, Francis Joseph, died Nov. 21, 1916, and was succeeded by his grand nephew, the Archduke Charles Francis Joseph, as Charles I. Austria was proclaimed a republic on Nov. 12, 1918, a day after the armistice. See APPENDIX: World War.

Author's Guild, American, an organization founded in New York city, in 1892, and incorporated, in 1895, has for its objects the promotion, tion of a professional spirit among authors and a better understanding between authors and their publishers, and, in general, the protection of literary property and the advancement of the interests of American authors and literature. The guild has a pension fund for members who become needy.

Autocracy, a word signifying that form of government in which the sovereign unites in himself the legislative and the executive powers of the State, and thus rules uncontrolled. Such a sovereign is, therefore, called an autocrat. Nearly all Eastern governments are of this form. Among European rulers, the Emperor of Russia alone bears the title of Autocrat, the name indicating his freedom from constitutional restraint of every kind.

Automobiles, a term under which are comprised horseless carriages, motor vans, motor omnibus, and all the motor traction vehicles adapted for use on ordinary roads having no rails. Electricity, steam and gasoline or naphtha are the three main sources of power that do the bidding of the man behind the lever. Other sources of power, such as compressed air, liquid air, carbonic acid gas and alcohol, have been experimented with; but are regarded as impracticable by experts. The modern automobile, which was eventful. On Oct. 7, 1909, without led up to by the bicycle with its rub-

ber tires, found its first great devel-

opment in France.

The output of automobiles in the United States during 1930 was over 2,000,000 less than in 1929. Total factory sales were 3,354,870 compared with 5,358,420 in 1929.

World production of automobiles in 1930 fell 34.6% below 1929 and world exports were 51.2% lower than in 1929. Total cars produced for 1930 was 4,109,231 as compared with 6,277,451 in 1929. Of the former the United States produced 85.3% in 1930 and of the latter 89.5%. The foremost markets for American made cars in 1930 were Canada and Belgium.

With an indicated decrease of about 15,000,000 miles in motor-vehicle mileage in 1930 as compared with 1929, automobile accidents in the former year increased 12%, death increased 4% totaling 32,000. Gasoline consumption for motor cars in 1930 reached 12,600,000,000 gallons.

Autonomy, the arrangement by

which the citizens of a State manage their own legislation and government; and this evidently may, with certain restrictions, be the case also within limited bodies of the same people, such as corporations, religious sects, etc.

Autopsy, eye-witnessing, a direct observation; generally applied to a post mortem examination, or the dis-

section of a dead body.

Autumn, the season of the year which follows summer and precedes winter. Astronomically, it is considered to extend from the autumnal equi-nox, Sept. 23, in which the sun enters Libra, to the winter solstice, Dec. 22, in which he enters Capricorn. Popularly, it is believed to embrace the months of September, October and November.

Auvergne, a province of Central France, now merged into the Departments of Cantal and Puy-de-Dôme, and an arrondissement of Haute-Loire. It contains the Auvergne Mountains, the highest in France.

Auxetophone, a device which greatly increases the sound produced by the graphophone (q. v.).

Auxout, Adrian, a French mathematician; inventor of the micrometer,

omers to measure the apparent diameter of celestial bodies. He was the first who thought of applying the telescope to the astronomical quadrant. He died in 1691.

Ava, Arva, Yava, or Kava, a plant possessing narcotic proprieties. Until recently it was ranked in the genus piper (pepper). It is a native of many of the South Sea islands, where the inhabitants intoxicate themselves with a fermented liquor pre-pared from the upper portion of the root and the base of the stem.

Avalanches, masses of snow or ice that slide or roll down the declivities of high mountains, and often occasion great devastation. They are most common in July, August and September. Sudden avalanches, larger or smaller, constitute one of the special dangers of Alpine climbing.

Avars, a people, probably of Turanian origin, who at an early period may have migrated from the region E. of the Tobol in Siberia to that about the Don, the Caspian Sea, and the Volga. A part advanced to the Danube in 555 A. D., and settled in Dacia.

They served in Justinian's army, aided the Lombards in destroying the kingdom of the Gepidæ, and in the 6th century conquered under their khan, Bajan, the region of Pannonia. They then won Dalmatia, pressed into Thuringia and Italy against the Franks and Lombards, and subdued the Slave dwelling set the Day of the slave dwelling set. the Slavs dwelling on the Danube, as well as the Bulgarians on the Black But they were ultimately lim-Sea. ited to Pannonia, where they were overcome by Charlemagne, and nearly extirpated by the Slavs of Moravia. After 827 they disappear from history. Traces of their fortified settlements are found, and known as Avarian rings.

Avatar, more properly Avatara, in Hindu mythology, an incarnation of the Deity. Of the innumerable avatars the chief are the 10 incarna-tions of Vishnu, who appeared successively as a fish, a tortoise, a boar.

Avdyeyev, Michael Vassilyevich, a Russian novelist (1821-1876).

Avebury, a village of England, in Wiltshire, occupying the site of a socalled Druidical temple, which origiwhich is still in use among astron- nally consisted of a large outer circle

of 100 stones, from 15 to 17 feet in height, and about 40 feet in circumference, surrounded by a broad ditch and lofty rampart, and inclosing two smaller circles.

Avebury, Lord. See LUBBOCK.

Avellaneda, Nicholas, an Argentine statesman, born in Tucuman, Oct. 1, 1836; Minister of Public instruction in 1868–1874, and President of the Republic in 1874–1886; published several historical and economical works. He died Dec. 26, 1885.

Avellaneda y Arteaga, Ger-trudis Gomez de, a distinguished Spanish poet, dramatist and novelist, born in Puerto Principe, Cuba, March 23, 1814. She died in Madrid, Feb. 2, 1873.

Ave Maria ("Hail, Mary"), the first two words of the angel Gabriel's salutation (Luke i: 28), and the beginning of the very common Latin prayer to the Virgin in the Roman Catholic Church.

Average, formerly the apportion-ment of losses by sea or elsewhere in just proportions among different individuals; now the medium or mean proportion between certain given quantities. It is ascertained by ad-ding all the quantities together and dividing their sum by the number of

Averell, William Woods, an American military officer, born in Cameron, N. Y., Nov. 5, 1832; was graduated at the United States Military Academy in 1855; served on the frontier and in several Indian campaignetial the beginning of the Civil paigns till the beginning of the Civil War, when he was appointed Colonel of the 3d Pennsylvania Cavalry, and assigned to the command of the cavalry defenses of Washington. During the war he distinguished himself on numerous occasions as a cavalry raider and commander, and at its close was brevetted Major-General of volun-He was retired in 1888. He was United States Consul-general at Montreal in 1866-1869. He died in Bath, N. Y., Feb. 3, 1900.

Avernus, or Averno, a lake in the neighborhood of Naples, about 2½ miles N. W. of Puzzuoli, and near the coast of Baiæ, the waters of which were so unwholesome and putrid that Rhone, 76 miles N. N. W. of Martine and putrid that Rhone, 76 miles N. N. W. of Martine and putrid that Rhone, 76 miles N. N. W. of Martine and putrid that Rhone, 76 miles N. N. W. of Martine and putrid that Rhone, 76 miles N. N. W. of Martine and Putrid Rhone, 76 miles N. N. W. of Martine and Putrid Rhone, 76 miles N. N. W. of Martine and Putrid Rhone, 76 miles N. N. W. of Martine and Putrid Rhone an

ancients made it the entrance of hell, by which Ulysses and Æneas descended into the lower regions.

Averrhoa, a genus of plants. consists of two species, both of which form small trees in the East Indies. One has fruit resembling a small cucumber. The latter is intensely acid and cannot be eaten raw. It is pickled or candied, or a syrup is obtained from it by boiling with sugar, and its juice is found an excellent agent for removing iron mold or other spots from linen. To the Malays it answers the same purposes as the citron, the gooseberry, the caper and the cucumber of Europe.

Avery, Benjamin Parke, an American journalist and diplomatist, born in New York city in 1829. From 1874 to 1875 he was United States Minister to China. He died in Pekin, China, Nov. 8, 1875.

Putnam, an born in New Avery, Samuel American merchant, born in New York city, March 17, 1822; became a copper-plate and wood engraver, and subsequently an art publisher and dealer, and retired from business in 1888. In 1891, with his wife, he created and endowed the Avery Architectural Library, in Columbia University, as a memorial of his deceased son; and in May, 1900, he presented to the trustees of the New York Public Library a collection of etchings, lithographs and photographs, numbering more than 17,500 pieces, with many volumes similarly illustrated. Died Aug. 12, 1904.

Aviary, a building for birds.

Aviation. See AERONAUTICS.
Avicennia, or White Mangrove, a genus which consists of trees or large shrubs resembling mangroves, and, like them, growing in tidal estuaries and salt marshes.

Avienus, Rufus Festus, a Latin descriptive poet, who flourished about the end of the 4th century after Christ, and wrote "Descriptio Orbis Terræ," a general description of the earth; "Ora Maritima," an account of the Mediterranean coasts, etc.

no birds ever visited its banks. The seilles, on the railway to Paris. In

1309, Clement V. transferred thither the abode of the Popes, who continued to reside here till 1377, when they returned to Rome; but two schismatical Popes, or Popes elected by the French cardinals, resided at Avignon till 1409. Avignon and its territory remained the property of the Holy See until 1797, when it was incorporated with France.

Aviona, the principal seaport on the coast of Albania, on the gulf of the same name, supposed to be the ancient Avion of the Greeks, fifty-eight miles across the Strait of Otranto from Italy. For its share in the great war, see APPENDIX: World War.

Avocado, a West Indian fruit, called also avocado pear, alligator pear, avigato, and sabacca.

Avoirdupois, a system of weights used for all goods except precious metals, gems, and medicines, and in which a pound contains 16 ounces, or 7,000 grains, while a pound troy contains 12 ounces, or 5,760 grains. A hundredweight contains 112 pounds avoirdupois.

Avon, the name of several English and Scottish rivers, the best known of which is that Avon which rises in Northamptonshire, and flows into the Severn at Tewkesbury, after a course of 100 miles. On its banks is Stratford-on-Avon, the birthplace and abode of Shakespeare, who has hence been styled the Bard of Avon.

Axayacat, or Axayacatl, a Mexican fly, the eggs of which, deposited abundantly on rushes and flags, are collected and sold as a species of caviare.

Axim, an important station and port on the African Gold Coast, a little to the E. of the mouth of the Ancobrah river. Inland from Axim, in the basin of that river, and in the district between it and the Prah, gold mining operations have been carried on on a large scale.

Axinomancy, a mode of divination much practiced by the ancient Greeks, particularly with the view of discovering the perpetrators of great crimes. An ax was poised upon a stake, and was supposed to move so as to indicate the guilty person; or the names of suspected persons being pro-

nounced, the motion of the ax at a particular name was accepted as a sign of guilt.

Axiom, a Greek word meaning a decision or assumption, is commonly used to signify a general proposition which the understanding recognizes as true, as soon as the import of the words conveying it is apprehended.

Axis, a straight line, real or imaginary, passing through a body, and around which that body revolves, or at least may revolve; also, the imaginary line connecting the poles of a planet, and around which the planet rotates.

Axis, a species of deer found in India, called by Anglo-Indian sportsmen hog deer.

Axminster, a market town in England, in the county Devon, on the Axe, at one time celebrated for its woolen cloth and carpet manufactures, and giving name to an expensive variety of carpet having a thick, soft pile, and also to a cheaper variety.

Axolotl, a curious Mexican amphibian, not unlike a newt, from 8 to 10 inches in length, with gills formed of three long, ramified or branch-like processes floating on each side of the neck. It reproduces by laying eggs, and was for some time regarded as a perfect animal with permanent gills. It is said, however, that they frequently lose their gills like the other members of the genus, though some authorities maintain that the true axolotl never loses its gills. The axolotl is esteemed a luxury by the Mexicans. There are a number of species in North America.

Ayacucho, formerly Huamanga or Guamanga, a town in the Peruvian department of the same name, 220 miles E. S. E. of Lima. Here, on Dec. 9, 1824, the combined forces of Peru and Colombia—the latter then comprising Ecuador, New Granada, and Venezuela—totally defeated the last Spanish army that ever set foot on the continent.

Aye-aye, an animal of Madagascar, so called from its cry, now referred to the lemur family. It is about the size of a hare, has large, flat ears and a bushy tail.

Ayeshah, also Aysha, or Aisha, the favorite wife of Mohammed, and

daughter of Abu-Bekr, was born at Medina about 610 A.D.; and was only nine years of age when the Prophet married her. She was the only one of Mohammed's wives who accompanied him in his campaigns. Although Ayeshah bore no children to Mohammed, she was tenderly beloved by him. She died at Medina (677 A.D.), highly venerated by all true Mussulmans, and named the Prophetess and the Mother of Believers.

Aylmer, Matthew, a Canadian military officer, born in Melbourne, P. Q., March 28, 1842; became Adjutant-General of the Dominion militia, the highest military office in Canada next to that of the Major-General commanding, in 1896; baron in 1901.

AYE-AYE.

Ayr, a town of Scotland, a royal and parliamentary borough and capital of Ayrshire, at the mouth of the river Ayr. The house in which the poet Burns was born stands within 1½ miles of the town, between it and the Church of Alloway ("Alloway's auld haunted kirk"), and a monument to him stands on a height between the kirk and the bridge over the Doon.

Ayrer, Jacob, a German dramatist; next to Hans Sachs the most prolific dramatist of Germany in the 16th century. He died in Nuremberg, March 26, 1605.

Ayres, Anne, an American au-

thor, born in England in 1816; was the first member of an American sisterhood in the Protestant Episcopal Church. She died in February, 1896.

Ayrton, William Edward, an English electrician and inventor, born in London, in 1847; was graduated at University College, London, in 1867; entered the Indian telegraph service, having studied electrical engineering with Prof. William Thomson; became electrical superintendent and introduced throughout India the system of determining the position of a fault by electrically testing one end of a line. He has been a voluminous writer and is widely known for his "Practical Electricity." He died Nov. 8, 1908.

Aytoun, Sir Robert, poet, born in Fifeshire, Scotland, in 1570; died in 1638.

Aytoun, William Edmondstoune, poet and prose writer, born at Edinburgh, Scotland, in 1813. In 1848 he published a collection of ballads entitled "Lays of the Scottish Cavaliers," which has proved the most popular of all his works. He died at Blackhills, Elgin, 1865.

Ayuntamiento, the name given in Spain to the councils or governing bodies of towns.

Ayuthia, the ancient capital of Siam, on the Menam, 50 miles N. of Bangkok. Some magnificent buildings still remain, now crumbling into ruins and overgrown with luxuriant vegetation; notable among them are Buddhist temples, especially the Golden Mount, 400 feet high.

Azalea, a genus of plants belonging to the heathworts. Several foreign azaleas are cultivated in gardens and greenhouses on account of the abundance of their fine flowers, and, in some cases, their fragrant smell.

Azeglio, Massimo Taparelli, Marquis d', an Italian author, artist, diplomatist, and statesman, born at Turin, in 1801. He died Jan. 15, 1866.

Azores, or Western Islands, a Portuguese archipelago, in the mid-Atlantic, between 36° 55′ and 39° 55′ N. lat. and between 25° 10′ and 31° 16′ W. long., stretching over a distance of 400 miles.

The total area of the group is 922

square miles, and the pop. (1921) 260,000. The coast is generally steep and rugged; the interior abounds in ravines and mountains. Perhaps the greatest want of the group is a good harbor. The Azores are regarded as a province, not a colony, of Portugal.

Azov, Sea of, is a large gulf of the Black Sea, formed by the Crimean peninsula, or rather an inland lake connected with the Black Sea by the Strait of Yenikale or Kertch (ancient Bosporus Cimmerius), 28 miles long, and barely 4 wide at the narrowest. The whole sea is shallow, from 3 to 52 feet deep; and measuring 235 by 110 miles, it occupies an area of 14,-500 square miles.

Azrael, the name given to the angel of death by the Mohammedans.

Aztecs, a race of people who settled in Mexico early in the 14th cen- minnow; called also blue roach.

tury, ultimately extended their dominion over a large territory, and were still extending their supremacy at the time of the arrival of the Spaniards, by whom they were speedily subjugated. See MEXICO.

Azuline, or Azurine, blue dyes belonging to the coal-tar class.

Azuni, Domenico Alberto, an Italian jurist, born in Sassari, Sardinia, in 1749. He became judge of the Tribunal of Commerce at Nice, and in 1795 published a work in which he endeavored to reduce maritime laws to fixed principles. He died Jan. 23, 1827.

Azure, the heraldic term for the color blue, represented in engraving by horizontal lines.

Azurine, a fresh water fish of the same genus as the roach, chub and

mutes and labials, and as all

labials are easy to be pronounced, b is one of the first letters which children learn to speak, after a, ba or pa generally being the first syllable.

Baal, the chief male divinity among the Phonicians, as Ashtoreth was the leading female one. The Carthaginians, who sprang from the Phænicians, carried with them his worship to their new settlements, as is proved, among other evidence, by the names of some of their world-renowned heroes; thus Hannibal, written in Punic inscriptions, Hannibaal, signifies the grace of Baal; and Hasdrubal, or Asdrubal, Azrubaal = "Help of Baal." The worship of Baal early existed among the Canaanites and the Moabites, whence it spread to the Israelites, becoming at last for a time completely dominant among the 10 tribes, and to a certain extent even among the two. Perhaps the Babylonian Bel was only Baal with a dialectic difference of spelling, though Prof. Rawlinson spelling, though Prof. Rawlinson thinks differently (Isa. xlvi: 1). There was an affinity between Baal and Moloch. The Beltein or Beltane fires, lit in early summer in Scotland and Ireland, seem to be a survival of Baal's worship.

Baalbek (ancient HELIOPOLIS, city of the sun), a place in Syria, in a fertile valley at the foot of Antilibanus, 40 miles from Damascus, fa-mous for its magnificent ruins. Of Of these, the chief is the temple of the Sun, built either by Antoninus Pius blocks used in its construction are 60 chusetts Charitable Mechanics'

b, the second letter in all umns, of which 6 are still standing, European alphabets, in Hebrew, and most other languages. It belongs to the ter, of smaller size, though still larger than the Parthenon at Athens, and there are other structures of an elaborately ornate type. Originally a center of the sun-worship, it became a Roman colony under Julius Cæsar, was garrisoned by Augustus, and acquired increasing renown under Trajan as the seat of an oracle. Under Constantine its temples became churches, but after being sacked by the Arabs in 748, and more completely pillaged by Tamerlane in 1401, it sank into hopeless decay. The work of destruction was completed by an earthquake in 1759.

Baba, a Turkish word, signifying father, originating, like our word papa, in the first efforts of children to speak. In Persia and Turkey it is prefixed as a title of honor to the names of ecclesiastics of distinction, especially of such as devote themselves to an ascetic life; it is often affixed in courtesy, also, to the names of other persons, as Ali-Baba.

Babbage, Charles, an English mathematician and inventor of a calculating machine; born near Teignmouth, England, Dec. 26, 1792. He died in London, Oct. 18, 1871.

Babbitt, Isaac, an American inventor, born in Taunton, Mass., July 26, 1799; learned the goldsmith's trade; early became interested in the production of alloys; and in 1824 manufactured the first britannia ware in the United States. In 1839, he discovered the well known anti-friction metal which bears his name, Babbitt or by Septimius Severus. Some of the metal For this discovery, the Massafeet long by 12 thick; and its 54 col- ciation awarded him a gold medal in

1841, and subsequently Congress voted him \$20,000. He died in Somerville, Mass., May 26, 1862.

Babbitt Metal, a soft metal resulting from alloying together certain proportions of copper, tin, and zinc, or antimony, used with the view of as far as possible obviating friction in the bearings of journals, cranks, axles, etc. Invented by Isaac Babbitt.

Babcock, Earle Jay, an American educator; born in St. Charles, Minn., June 11, 1865; was graduated at the University of Minnesota in 1899; worked extensively with the United States Geological Survey; and in 1902 was director of the State School of Mines of North Dakota, and Professor of Chemistry and Geology in the State University.

Babcock, Orville E., an American military officer, born in Franklin, Vt., Dec. 25, 1835; served with distinction in the Civil War, and was a member of Gen. Grant's staff. When the latter was elected President, Babcock became his secretary, and the superintending engineer of several important public works. He was indicted in 1876 for taking part in revenue frauds, but on his trial was acquitted. He died in Florida, June 2, 1884.

Babcock, Stephen Moulton, an American educator; born in Bridge-water, N. Y., Oct. 22, 1843. He was instructor of chemistry at Cornell University in 1875-1876; Professor of Agricultural Chemistry at the University of Wisconsin; and chemist to the New York State Experimental Station. He died July 2, 1931.

Babel, a place or circumstances in which confusion of sounds - as, for instance, by several people speaking at once — is the predominating char-The reference is to the acteristic. confusion of tongues divinely sent in consequence of the building of the Tower of Babel (Gen. xi: 1-9). The magnificent temple of Belus, asserted to have been originally this tower, is said to have had lofty spires, and many statues of gold, one of them 40 feet high. In the upper part of this tem-ple was the tomb of the founder, Belus (the Nimrod of the sacred Scriptures), who was deified after death. The Tower of Babel is most frequent- the mercantile class.

ly identified with the enormous ruin at Birs, 2,000 ft. in base circumference, 156 ft. high, and two hours west of Hillah on the site of the ancient biblical city of Babylon.

Bab-el-Mandeb (i. e., the gate of tears), the name of the strait between Arabia and the continent of Africa, by which the Red Sea is connected with the Gulf of Aden and the Indian Ocean.

Bâbi, the name of a modern Persian sect, derived from the title, Babed-Din (gate of the faith), assumed by its founder, Mirza Ali Mohammed, a native of Shiraz, who, in 1843, after a pilgrimage to Mecca, undertook to form a new religion from a mixture of Mohammedan, Christian, Jewish, and Parsee elements. Babism enjoins few prayers, and those only on fixed occasions; encourages hospitality and charity; prohibits polygamy, concu-binage, and divorce; discourages asceticism and mendicancy; and directs women to discard the veil, and share as equals in the intercourse of social life.

Babington, Anthony, a Roman Catholic gentleman of Derbyshire, who associated with others of his own persuasion to assassinate Queen Elizabeth, and deliver Mary, Queen of Scots. The plot being discovered, the conspirators were executed in 1586.

Babiroussa (a Malay word signifying stag hog), a species of wild hog, sometimes called the horned or stag hog, from the great length and curvature of its upper tusks or canines, which curl upward and backward somewhat like the horns of Ruminantia, the lower canines being also very prominent. It is nearly of the size of a common hog, but rather longer, and with more slender limbs. The babiroussa is very numerous in Celebes, the Moluccas, and Java. It is hunted with dogs, and when taken makes little resistance; sometimes when pressed it endeavors to reach the sea, and eludes its pursuer by its dexterity in diving and swimming.

Baboo, or Babu, a Hindu title of respect equivalent to sir or master. usually given to wealthy and educated native gentlemen, especially when of

Baboon, a common name applied to a genus of monkeys, natives of Africa. They make a very obstinate re-sistance to dogs, and only retreat be-fore men when armed with guns. They feed exclusively on fruits, seeds, and other vegetable matter, and display a great deal of cunning and audacity when engaged in their marauding ex-peditions. This animal has the repeditions. This animal has the re-markable instinctive power of being able to detect the presence of water. and in South Africa is often employed for this purpose when the ordinary water supply fails. The baboon can never be called tamed, however long his confinement may have endured.

Madjicosima Babuyanes, or Islands, a number of islands lying about 30 miles N. of Luzon, and generally considered the most northern of the Philippines. They are subject to the Loo-Choo Islands; aggregate pop.

about 12,000.

Babylon, the capital of Babylonia, on both sides of the Euphrates, one of the largest and most splendid cities of the ancient world, now a scene of ruins, and earth-mounds containing Babylon was a royal city 1600 years before the Christian era; but the old city was almost entirely destroyed in 683 B. C. A new city was built by Nebuchadnezzar nearly a century later. This was in the form of a square, each side 15 miles long, with walls of such immense height and thickness as to constitute one of the wonders of the world. It contained splendid edifices, large gardens and pleasure-grounds, especially the hanging-gardens, a sort of lofty terraced structure supporting earth enough for trees to grow, and the celebrated tower of Babel, or temple of Belus, rising 1640; a member of the family of muby stages to the height of 625 feet. sicians; son of Johannes Bach, the (See Babel.) After the city was great uncle of Johann Sebastian Bach. taken by Cyrus in 538 B. C., and Babylonia made a Persian province, it began to decline, and had suffered severely by the time of Alexander the Great. He intended to restore it, but was prevented by his death, which took place here in 323 B. C., from

which time its decay was rapid.

The great city of Babylon, or Babel,
was the capital of Babylonia, which
was called by the Hebrews Shinar.

anciently supported a dense population. The chief cities, besides Babylon, were Ur, Calneh, Erech, and Sippara. Babylonia and Assyria were often spoken of together as Assyria.

Babylonish Captivity, a term usually applied to the deportation of the two tribes of the kingdom of Ju-dah to Babylon by Nebuchadnezzar, 585 B. C. The duration of this captivity is usually reckoned 70 years, though strictly speaking, it lasted only 56 years. A great part of the 10 tribes of Israel had been previously taken captive to Assyria.

Baccarat, or Baccara, a game played with the ordinary playing cards. It acquired notoriety owing to a fraud alleged to have been perpetrated by one of the persons present in a game at which the Prince of Wales, later King Edward, was "banker," some years ago.

Bacchus (in Greek generally Dionysos), the god of wine.

Bach, Alexander von, an Austrian statesman, born in Loosdorf, Jan. 4, 1813; was Minister of Justice in 1848, of the Interior in 1849-1859; and, subsequently, ambassador to Rome. In 1855, he negotiated the Concordat with the Papacy which brought Austria into submission to the Roman Church. He died Nov. 15,

Bach, Heinrich, a German musician, born Sept. 16, 1615; member of the celebrated family of musicians, father of Johann Christoph and Johann Michael Bach; was organist at Arnstadt, where he died July 10, 1691.

Bach, Johann Christian, a German musician, born in Erfurt, in He died in Erfurt, in 1682.

Bach, Johann Christian, German musician, born in Leipsic, in 1735; a son of Johann Sebastian Bach; died in London, in 1782.

Bach. Johann Christoph Friedrich, a German musician, born in Leipsic, in 1732; a son of Johann Sebastian Bach; died in Bückeburg, in 1795.

The country was, as it still is, exceedingly fertile, and must have man composer and instrument maker,

born in 1648; a son of Heinrich Bach; father-in-law of Johann Sebastian Bach. He died in Arnstadt, in 1694.

Bach, Johann Sebastian, a celebrated musician, born at Eisenach, Upper Saxony, March 21, 1685. When he was 10 years old his father, who was a musician at Eisenach, died, and Bach sought the protection of an elder brother, who, dying soon after, he was again left destitute, and, to earn a livelihood, entered the choir of St. Michael's, Luneberg, as a soprano singer. In 1703 he became court musician at Weimar, the following year organist at Arnstadt, and in 1708 court organist at Weimar. While holding this office he labored to make himself master of every branch of music. In 1717 he was made Director of Concerts, and six years afterward Director of Music and Cantor to St. Thomas' School, Leipsic, an appointment which he held to his death. Bach's close studies affected his eyes, and an operation left him totally blind and hastened his death, in Leipsic, July 28, 1750. With the exception of Handel, Bach had no rival as an organist.

Bach, Karl Philipp Emanuel, a German musician, born in Weimar, March 14, 1714; son of Johann Sebastian Bach; was court musician in the service of Frederick the Great in 1740-1767. He died in Hamburg. Dec. 14, 1788.

Bache, Alexander Dallas, an American scientist, born in Philadelphia, Pa., July 19, 1806; was graduated at the United States Military Academy, at the head of his class, in 1825; became Professor of Natural Philosophy and Chemistry at the University of Pennsylvania in 1828; was the organizer and first President of Girard College, 1836; and was appointed superintendent of the United States Coast Survey, in 1843. In the last office he performed services of lasting and invaluable character. He was regent of the Smithsonian Institution in 1846–1867; an active member of the United States Sanitary Commission during the Civil War; and President of the National Academy of Sciences in 1863. He died in Newport, R. I., Feb. 17, 1867.

Bache, Hartman, an American military engineer, born in Philadelphia, Pa., Sept. 3, 1798; was graduated at the United States Military Academy, in 1818. His most notable achievements were the building of the Delaware Breakwater and the application of iron-screw piles for the foundation of lighthouses upon sandy shoals and coral reefs. He died in Philadelphia, Oct. 8, 1872.

Bache, Sarah, an American philanthropist, born in Philadelphia, Pa., Sept. 11, 1744; was the only daughter of Benjamin Franklin, and the wife of Richard Bache. During the Revolutionary War she organized and became chief of a band of patriotic ladies who made clothing for the soldiers, and in other ways relieved their sufferings, especially during the severe winter of 1780. At one time she had nearly 2,500 women engaged under her direction in sewing for the army. She personally collected large sums of money to provide the material for this work, and also for the purchase of medicines and delicacies for the soldiers in the hospitals, where she also personally acted as nurse. She died Oct. 5, 1808.

Bacheller, Irving, an American novelist, born in Pierpont, N. Y., Sept. 26, 1859. He was graduated at St. Lawrence University in 1879 and became a reporter of the Brooklyn "Times." Subsequently he established a newspaper syndicate. He has written several novels, notable for originality, and for fresh, and fascinating pen pictures of American life.

Bachelor, a term applied anciently to a person in the first or probationary stage of knighthood who had not yet raised his standard in the field. It also denotes a person who has taken the first degree in the liberal arts and sciences, or in divinity, law, or medicine, at a college or university; or a man of any age who has not been married. A knight bachelor is one who has been raised to the dignity of a knight without being made a member of any of the orders of chivalry such as the Garter or the Thistle.

Bachelor's Buttons, the double flowering buttercup with white or yellow blossoms, common in gardens.

Bachman, John, an American clergyman and naturalist, born in Duchess county, N. Y., Feb. 4, 1790; became pastor of a Lutheran church in Charleston, S. C. He is best known by reason of his association with Audubon in the making of the "Quadrupeds of North America," he writing the principal part of the text, which Audubon and his sons illustrations of the text, ed. He died in Charleston, S. C., Feb. 25, 1874.

Bacillus, a name given to certain filiform bacteria, which have assumed much importance of late, principally because of their constant presence in the blood and tissues in splenic fever and malignant pustule. See BACTERIA.

Back, Sir George, an English explorer, born in Stockport, Nov. 6, 1796. He died in London, June 23, 1878, after visiting both polar regions.

Backgammon, a favorite game of calculation. It is played by two persons, with two boxes, and two dice, upon a quadrangular table, or board, on which are figured 24 points, or fleches, of two colors, placed alter-nately. The board is divided into four compartments, two inner and two outer ones, each containing six of the 24 points (alternate colors). The players are each furnished with 15 men, or counters, black and white.

Backhuysen, Ludolf, a cele-brated painter of the Dutch school, particularly in sea pieces, born in 1631. He died in 1709.

Backus, Truman Jay, an American educator, born in Milan, N. Y., Feb. 11, 1842; was graduated at the University of Rochester in 1864; and became President of the Packer Collegiate Institute in Brooklyn, N. Y. After going to Brooklyn he served on several State commissions. Died 1908.

Bacolor, a town in the Island of Luzon, Philippine Islands; 10 miles N. W. of Manila.

Bacon, a word applied to the sides of a pig which have been cured or preserved by salting with salt and saltpeter, and afterward drying with or without wood smoke.

privately and took the Harvard examinations in 1881; taught at the Hampton Normal and Agricultural Institute in 1883-1888, and in Tokio, Japan, in 1888-1889; returned to the Hampton Institute in 1889, and founded the Dixie Hospital for training colored nurses in 1890.

Bacon, Benjamin Wismer, an American educator, born in Litchfield, Conn., Jan. 15, 1860; in 1896 became Professor of New Testament Criticism and Exegesis in Yale University.

Munroe, Bacon, Edwin American editor and author of many historical works relating to Boston and New England; also of "Direct Election and Law Making by Popular Vote;" born in Providence, R. I., Oct. 20, 1844.

Bacon, Francis, Viscount St. Albans, one of the most remarkable men of whom any age can boast; a reformer of philosophy, by founding it on the observation of nature, after it had consisted, for many centuries, of scholastic subtleties and barren dialectics; born in London, Jan. 22, 1561, his father being Sir Nicholas Bacon, lord keeper of the great seal. contracted an advantageous marriage; was made solicitor-general and then attorney-general; in 1617 became lord keeper of the seals; in 1618 was made lord high chancellor and created Baron of Verulam, and in 1621 Viscount St. Albans. He might have lived with splendor without degrading his character by those acts which stained his reputation. He was accused before the House of Lords of having received money for grants of offices and privileges under the seal of State. He was unable to justify himself, and, desiring to avoid the mortification of a trial, confessed his crimes and threw himself on the mercy of the peers, beseeching them to limit his punishment to the loss of the high office which he had dishonored. The lords sentenced him to pay a fine of £40,000, and to be imprisoned in the Tower during the pleasure of the king. He was also declared forever incapable of place or employment, and forbidden to sit in Bacon, Alice Mabel, an Ameri-can educator, born in New Haven, Conn., Feb. 26, 1858; was educated fall only a few years, and died in Highgate, April 9, 1626. Efforts have been made to prove him the real author of the works of Shakespeare, and the controversy still goes on.

Bacon, Henry, an American painter, born in Haverhill, Mass., in 1839. He served in the Civil War, studied art in Paris under Cabanel and Edward Frere, and painted, among others, "Boston Boys and Gen. Gage" "Paying the Scot;" etc.

Bacon, John, an English sculptor, born in London, Nov. 24, 1740. He died Aug. 4, 1799.

Bacon, John Mosby, an American military officer, born in Kentucky, April 17, 1844; served in the Union army, through the Civil War; was appointed Captain in the 9th United States Cavalry, in 1866, and Colonel of the 8th Cavalry, in 1897. On May 4, 1898, he was appointed Brigadier-General of Volunteers and placed in command of the Department of Dakota. In October of that year he put down the outbreak of the Pillager band of the Chippewa Indians in Cass county, Minn. Subsequently, he was assigned to duty in Cuba, with headquarters at Neuvitas, till May 8, 1899, when he was retired. D. Mch. 19, 1913.

down the outbreak of the Pillager band of the Chippewa Indians in Cass county, Minn. Subsequently, he was assigned to duty in Cuba, with headquarters at Neuvitas, till May 8, 1899, when he was retired. D. Mch. 19, 1913.

Bacon, Leonard, an American clergyman, born in Detroit, Mich., Feb. 19, 1802; graduated at Yale in 1820, after which he studied theology at Andover, Mass. In 1825 he became pastor of the First Congregational church in New Haven, Conn., where he died Dec. 24, 1881. He was jointeditor of the "Independent" for 16 years and from 1866–1871 was Prof. of Didactic Theology at Yale.

Bacon, Nathaniel, an Anglo-American lawyer, born in Suffolk, England, Jan. 2, 1642; became the leader in Bacon's Resettion (q. v.) in Virginia, and died Oct. 29, 1676.

Bacon, Robert, American statesman, b. Cape Cod, Mass., 1858; was graduated at Harvard in 1880; member of the banking firm of J. Pierrepont Morgan & Co., in 1894–1903; U. S. Assistant Secretary of State in 1905–9; Ambassador to France in 1909–12. Died, 1919.

Bacon, Roger, an English monk, and one of the most profound and original thinkers of his day, was born about 1214, near Ilchester, Somersetshire. He died in Oxford, in 1294.

Baconian Philosophy, the inductive philosophy of which it is sometimes said that Lord Bacon was the founder. This, however, is an exaggerated statement. What Lord Bacon did for this mode of ratiocination was to elucidate and systematize it; to point out its great value, and to bring it prominently before men's notice; lending it the support of his great name at a time when most of his contemporaries were satisfied with the barren logic of the schools. The great triumphs of modern science have arisen from a resolute adherence on the part of its votaries to the Baconian method of inquiry.

Bacon's Rebellion, a popular uprising of the Virginian colonists, headed by Nathaniel Bacon, in protest against certain government abuses, which prevailed under the administration of Sir William Berkeley. Bacon compelled Berkeley to take refuge on a warship, and burned all the public buildings at Jamestown. He died at the most critical moment, and the rebellion came to an end.

Bacteria, a class of very minute microscopic organisms or microbes which are regarded as of vegetable nature, and as being the cause of accompaniment of various diseases, as well as of putrefaction, fermentation, and certain other phenomena. Some of the better known of these organisms are so exceedingly minute, that under the highest power of improved microscopes they appear no larger than the periods of ordinary type. Various classifications have been proposed for them, for they differ largely in size, form, and mode of multiplication.

Bacteriology, that branch of biology which treats of bacteria. The study of these microscopic organisms has developed into one of the most important branches of modern biological science. Their importance to mankind rests chiefly in the fact that their nourishment consists of albuminous substances, which they convert into complex chemical compounds, many of which are highly poisonous.

Bactria, a province of the ancient Persian empire, lying N. of the Paropamisus (Hindu Kush) Mountains, on the Upper Oxus. It corre-

sponded pretty nearly with the modern Balkh. Here many scholars locate the original home of the Aryan or the original home of the Aryan or Indo-European family of nations. Its Republic of Baden; pop. (1925) capital, Bactra, or Zariaspa, was also 25,444. It is chiefly celebrated for the cradle of the Zoroastrian religion.

Baczko, Ludwig von, a German historian and scholar, born in Lick, Prussia, June 8, 1756; died March 27, 1823.

Badajoz, the fortified capital of the Spanish province of Badajoz, on the left bank of the Guadiana. It was besieged by Wellington on March 16, and taken April 6, 1812, by one of the most bloody assaults in history, the British charging over the dead bodies of their comrades.

Badakshan, a territory of Central Asia, tributary to the Ameer of Afghanistan. The inhabitants profess Mohammedanism. Pop. 100,000.

Badeau, Adam, an American military officer, born in New York city, Dec. 29, 1831; educated at private schools. He served with gallantry in the Union army during the Civil War; was on the staff of General Sherman in 1862-1863, and secretary to General Grant in 1864-1869; and in the latter year was retired with the rank Brevet Brigadier-General of Volunteers, and was appointed Secretary of Legation in London. He was Consul-General in London, 1870-1881, and during this period was given leave of absence to accompany General Grant on his tour around the world (1877-1878). In 1882-1884 he was Consul-General in Havana. After the death of General Grant he brought suit against his heirs for payment of services which he asserted had been rendered in the preparation of General Grant's "Memoirs," but lost his case. He died in Ridgewood, N. J., March 19, 1895.

Baden. Republic of and one of the more important States of the German republic, situated in the S. W. of Germany, to the W. of Würtemberg. It is divided into four districts, Con-Freiburg, Karlsruhe, and stance. Mannheim; has an area of 5,819 square miles; pop. (1925) 2,312,462. Baden sends three members to the German Bundesrath, or Federal Council, and 14 deputies to the Diet. Two- afterward known as a member of the

thirds of the population are Roman Catholics, the rest Protestants.

its medicinal springs, which were known at the time of the Romans. Its gaming tables, the most renowned in Europe, were closed with the rest of the licensed German gaming houses in 1872.

Baden-Powell, Robert Stevenson Smyth, a British military offi-cer; born in London, Feb. 22, 1857. In the war in South Africa in 1899-1902, he signally distinguished himself by his defense of Mafeking, Cape Colony. In recognition of his heroism, the queen promoted him a Major-General; later Knighted. See Boy Scouts.

Badeni, Count Cassimir Felix, an Austrian statesman; born in Poland, Oct. 14, 1846; Prime Minister of Austria-Hungary, 1895; died, 1909.

Badge, a distinctive device, emblem, mark, honorary decoration, or special cognizance, used originally to identify a knight or distinguish his followers, now worn as a sign of office or licensed employment, as a token of membership in some society, or genof Captain in the regular army and of erally as a mark showing the relation of the wearer to any person, occupation, or order.

Badger, a plantigrade, carnivorous mammal, allied both to the bears and to the weasels, of a clumsy make, with short, thick legs, and long claws on the fore feet. The species known are the American and European. The American badger is only found in the remote W. sections of the United States and in some parts of the British possessions in North America. It is more carnivorous than the European badger. The weight of the American species is from 14 to 18 pounds.

Badger, George Edmund, an American statesman, born in Newbern, N. C., April 13, 1795; was graduated at Yale College in 1813, and was a judge and U. S. Senator. He served in the State Convention called to pear on the superior of server. called to pass on the question of secession, although oposed to that measure, and after making a strong speech in defense of the Union, was

Conservative Party. He died in Raleigh, N. C., April 13, 1866.

Badger, Oscar L., an American naval officer, born in Windham, Conn., Aug. 12, 1823; entered the United States navy, Sept. 9, 1841; became Lieutenant-Commander, July 16, 1862; Commander, July 25, 1866; Captain, Nov. 25, 1872; Commodore, Nov. 15, 1881; and was retired Aug. 12, 1885. He served on the steamer "Mississippi" during the Mexican War, taking part in the attack on Alvarado, in 1846; led the party that attacked and destroyed the village of Vutia, Fiji Islands, while on the sloop "John Adams," in 1855–1856; and in the Civil War commanded the ironclads "Patapsco" and "Montauk," in the operations in Charleston harbor in 1863; and was Acting Fleet Captain on the flag ship "Weehawken" in the attack on Fort Sumter, Sept. 1, 1863. He died in Concord, Mass., June 20, 1899.

Badgley, Sidney Rose, a Canadian architect, born near Kingston, Ont., May 28, 1850. He has planned and erected churches in almost all parts of Canada and the United States.

Badham, Charles, an English educator, born in Ludlow, July 18, 1813: died in Sydney, Australia, Feb. 26, 1884.

Badlam, Stephen, an American military officer, born in Milton, Mass., March 25, 1748; entered the Revolutionary army in 1775; became commander of the artillery, in the Department of Canada. On the announcement of the adoption of the Declaration of Independence, he took possession of the heights opposite Ticonderoga, and named the place Mt. Independence. Subsequently he rendered good service at Fort Stanwix, and in 1799 was made Brigadier-General. He died in Dorchester, Mass., Aug. 24, 1815.

Bad Lands, tracts of land in the N. W. part of the United States. The absence of vegetation enables the rains to wash clean the old lake beds, and in many instances to disclose remarkable fossils of extinct animals. They were first called Bad Lands (mauvaises terres) by the French explorers in the region of the Black Hills in South Dakota.

Badminton, a popular game, closely resembling lawn tennis, played with battledore and shuttlecock on a rectangular portion of a lawn.

Badrinath, a peak of the main Himalayan range, in Garhwal district, Northwestern Provinces, India; 23,210 feet above the sea. On one of its shoulders, at an elevation of 10,400 feet, stands a celebrated temple of Vishnu, which some years attracts as many as 50,000 pilgrims.

Baedeker, Karl, a German publisher, born in 1801; originator of a celebrated series of guide-books for travelers. He died in 1859.

Baeyer, Adolf von, a German chemist, born in Berlin, Oct. 31, 1835; son of Johann Jakob Baeyer; became Professor of Chemistry at Strasburg in 1872, and at Munich, in 1875, succeeding Liebig at the latter. He made many important discoveries in organic chemistry, especially cerulein, eosin, and indol. Died Sept. 5, 1917.

Baeyer, Johann Jakob, a Prussian geometrician, born in Müggelsheim, Nov. 5, 1794; died in Berlin, Sept. 10, 1885.

Baez, Buenaventura, a Dominican statesman, born in Azua, Haiti, about 1810; aided in the establishment of the Dominican Republic; was its President in 1849-1853; was then expelled by Santa Ana and went to New York city; was recalled in 1856, on the expulsion of Santa Ana, and again elected President; and was relected President in 1865 and 1868. During his last term, he signed treaties with the United States (Nov. 29, 1869), for the annexation of Santo Domingo to the United States, and for the cession of Santana Bay. The treaties failed of ratification in the United States Senate and caused the downfall of Baez. He died in Porto Rico, March 21, 1884.

Baffin, William, an English navigator and discoverer, believed to have been born in London about 1584. In 1615 he took service as pilot of the "Discovery," in search of a northwest passage, and made a careful examination of Hudson Strait. His recorded latitudes and notes of the tides are in remarkable agreement with those of a later date. In the following year, with Capt. By-

Smith Sound, and several others, and explored the large inlet now associated with his name. His last voyages, 1616-1621, were to the East. At the siege of Ormuz, which the English were helping the Shah of Persia to recover from the Portuguese, he was kided, Jan. 23, 1622.

Baffin Land, a Canadian island, crossed by the Arctic Circle; area,

236,000 square miles.

Baffin Sea (erroneously styled a Bay), a large expanse of water in North America, between Greenland and the lands or islands N. of Hudson Bay. This sea was discovered by the English navigator, Baffin, in 1616, born in Korsör, Zealand, Feb. 15, while in search of a passage to the 1764; died in Hamburg, Oct. 3, 1826. Pacific Ocean.

Bagamoyo, a town of German East Africa, on the coast opposite the island of Zanzibar; pop. (1899), about 13,000. It is an important trading station for ivory, gum and caoutchouc.

Bagasse, the sugar cane in its dry, crushed state, after the juice has been expressed, Formerly waste, now utilized for wallboard. In 1928 over 100,000 tons of bagasse were made into insulating lumber.

Bagatelle, a game played on a long, flat board, covered with cloth like a billiard-table, with spherical balls and a cue, or mace.

Bagby, George William, an American physician and humorist, born in Buckingham co., Va., Aug. 13, 1828; died in Richmond, Va., Nov. 29, 1883.

Bagdad, capital of the Turkish vilayet and city of the same name, in the southern part of Mesopotamia (now Irak Arabi). Bagdad was founded in 762, by the Caliph Almansur, and raised to a high degree of splendor, in the 9th century, by Haroun Al Raschid. It is the scene of a number of the tales of the "Arabian Nights." In the 13th century it was stormed by Hulaku, grandson of Genghis-Khan, who caused the reigning caliph to be

lot, he discovered, charted, and named a concession for the construction of a railway which would extend the Anatolian line from Konia to Adana, Mosul, Bagdad, and Bassa, with many branch lines, but the great war inter-rupted the work. See APPENDIX: World War.

> Bagehot, Walter, an English economist, born in Somersetshire, Feb. 3, 1826; died March 24, 1877.

Baggage, a term supposed to be derived from the old French word bague, meaning bundle. As ordinarily used, it includes trunks, valises, portmanteaus, etc., which a traveler carries with him on a journey.

Baggesen, Jens, a Danish poet; born in Korsör, Zealand, Feb. 15,

Bagirmi, or Baghermi, a country in Central Africa, bounded on the W. by Bornu and a portion of Lake Tchad, and with the powerful Sultanate of Wadai to the N. E. Its area is estimated at nearly 71,000 square miles. The country was first visited by Barth in 1852. Most of it was recognized as in the German sphere by the Anglo-German agreement of 1893; but it came under French control in 1900.

Bagley, Worth, an American naval officer, born in Raleigh, N. C., April 6, 1874; was graduated at the United States Naval Academy in 1895; promoted to Ensign, July 1, 1897. 1897, and was detailed as inspector to the new torpedo-boat "Winslow" in November following. This boat went into commission the next month, and he was appointed her executive officer. In April, 1898, the "Winslow" was assigned to the American fleet off the coast of Cuba, and on May 9, while on blockading duty at the harbor of Cardenas, with the "Wilmington" and "Hudson," drew the fire of several Spanish coast-guard vessels. All the American vessels escaped untouched. Two days afterward, the three vessels undertook to force an entrance into the harber, when they were fired on by Spanish gunboats. The "Wins-low" was disabled, and with difficulty slain, and destroyed the caliphate. The was drawn out of range of the envilaget has an area of 54,540 square emy's guns. The "Wilmington" then miles, and an estimated population of silenced the Spanish fire, and as the 900,000, and the city in 1925 a pop- action closed, Ensign Bagley and four ulation of 170,000. Germany had sailors on the "Winslow" were instantly killed by a shell, he being the first American naval officer to fall in the war with Spain.

Bagpipe, a musical wind instrument of very great antiquity, having been used among the ancient Greeks for many ages, and is the favorite musical instrument of the Scottish Highlanders.

Bagration, Peter Ivanovich, Prince, a Russian general, descended from the royal family of the Bagratidæ of Georgia and Armenia, born in 1765. In the campaign of 1812, he commanded the Second Russian Army of the West. He was mortally wounded in the battle of Borodino, and died Oct. 7, 1812.

Bahama Channel, Old and New, two American channels; the former separates the Great Bahama Bank and Cuba; the latter, also called the Gulf of Florida, is between the Great and Little Bahama Banks and Florida, and forms a part of the channel of the great Gulf Stream, which flows here at the rate of from 2 to 5 miles an hour.

Bahama Islands, or Lucayos, a group of islands in the West Indies, forming a colony belonging to Great Britain, lying N. E. of Cuba and S. E. of the coast of Florica, the Gulf Stream passing between them and the mainland. They extend a distance of upward of 600 miles, and are said to be 29 in number, besides keys and rocks innumerable. Of the whole group about 20 are inhabited, the most populous being New Providence, which contains the capital, Nassau, the largest being Andros, 100 miles long, 20 to 40 broad. They are low and flat, and have in many parts extensive forests. Total area, 4,404 square miles. Pop. (1921) 53,031; 1924 (est.) 54,886.

Bahia, formerly San Salvador, a city of Brazil, on the Bay of All Saints, in the State of Bahia. The harbor is one of the best in South America; and the trade, chiefly in sugar, cotton, coffee, tobacco, hides, piassava, and tapioca, is extensive. Pop. (1926) 320,000. The State, area, 164,649 square miles; pop. about 2,-118,000, has much fertile land, both along the coast and in the interior.

Bahia Honda, a seaport of Cuba, on the coast of the Gulf of Mexico, and lying on a small bay, bearing the same name. The town and bay are about 50 miles W. of Havana, being commanded by a small fort.

Bahr, Johann Christian Felix, a German philologist, born at Darmstadt, June 13, 1798; died Nov. 29, 1872.

Bahrein Islands, a group of islands in the Persian Gulf, in an indentation on the Arabian coast are a British possession chiefly noted for their pearl-fisheries, which were known to the ancients, and which employ in the season from 2,000 to 3,000 boats with from 8 to 20 men each. Total pop., est. at 110,000.

Bahr-el-Ghazal, the name of the old Egyptian province which incloses the district watered by the southern tributaries of Bahr-el-Arab and Bahr-el-Ghazal, since the overthrow of the Khalifa in 1899 known as the Anglogyptian Sudan. Slatin Pasha has drawn attention both to the fertility of the province and to its strategical importance. To the W. of it lies the Ubangi district of French Kongo; and it was thence that Major Marchand made his way through the Bahr-el-Ghazal to Fashoda in the summer of 1898.

Bahr Yusuf, or Bahr el Yusuf, an artificial irrigation channel from the left bank of the Nile below Sint. to the Fayum; 270 miles long. According to Koptic traditions it was constructed during Joseph's administration.

Baikal, an extensive lake of Eastern Siberia; crescent-shaped, and surrounded by high and wild mountains rising 3,000 to 4,000 feet above its surface. Length. S. W. to N. E., 370 miles; breadth. 20 to 70 miles; altitude, about 1,400 feet; greatest ascertained depth, 4,500 feet; average depth of its southern part, about 800 feet.

Bail. (1) Of persons: Those who stand security for the appearance of an accused person. The word is a collective one, and not used in the plural. They were so called because formerly the person summoned was baillé, that is, given into the custody of those who were security for his appearance.

(2) Pecuniary security given by re- presented by the officers of the fleet sponsible persons that an individual charged with an offense against the Subsequently, he was promoted to full

law will, if temporarily released, surlaw will, if temporarily released, surrender when required to take his trial.

Bailey, Gamaliel, an American
journalist, born in Mount Holly, N.
J., Dec. 3, 1807; with J. G. Birney,
founded the anti-slavery journal, the
"Cincinnati Philanthropist" (1836),
"Cincinnati Philanthropist" (1836), South Haven, Mich., March 15, 1858;
South Haven, Mich., March 15, 1858;
Bailey, Liberty Hyde, an American horticulturist and editor, born in
South Haven, Mich., March 15, 1858;
Became, chairman, of the Recented the office of which was destroyed by a mob, though it continued to be published till 1847. He established the well-known newspaper, the Washington "National Era" (1847), in ton "National Era" (1847), in which the famous novel, "Uncle Tom's Cabin," appeared first. He died at sea, June 5, 1859.

Bailey, Jacob Whitman, an American scientist, born in Auburn, Mass., April 29, 1811; was graduated at the United States Military Academy, in 1832; and from 1834 till his death was Professor of Chemistry, "The Trumpeter Swan," 1920, etc. death was Professor of Chemistry, Mineralogy and Geology at the Mili-tary Academy. He was the inventor of the Bailey indicator and of many improvements in the microscope, in the use of which he achieved high distinction; and he is regarded as the pioneer in microscopic investigation. He was President of the American Association for the Advancement of Science in 1857; held membership in the principal scientific associations of the world; and was the author of numerours papers on the results of his researches. He died in West Point, N. Y., Feb. 26, 1857.

Bailey, James Montgomery, an American author, born in Albany, N. Y., Sept. 25, 1841; died in Danbury, Conn., March 4, 1894.

Bailey, Joseph, an American military officer, born in Salem, O., April 28, 1827; entered the Union army as a private in 1861, and signally distinguished himself in the Red River campaign under Gen. N. P. Banks, in 1864, by building a dam and deepening the water in the channel, which enabled Admiral Porter's Mississippi flotilla to pass the Red River rapids in safety, and so escape a perilous sit-uation. For this engineering feat, Bailey, who, before entering the army was a plain farmer, was breveted Brigadier-General, promoted Colonel, voted the thanks of Congress, and with a sword and purse of \$3,000.

became chairman of the Roosevelt Commission on Country Life in 1908. Dean, College of Agriculture, Cornell, 1903-13; since then engaged in writing.

Bailey, Philip James, an English poet, born in Nottinghamshire, April

22, 1816; died Sept. 6, 1902.

Bailey, Samuel, an English political and mental philosopher, born in Sheffield, in 1791; died in 1870.

Bailey, Theodorus, an American naval officer, born in Chateaugay, N. Y., April 12, 1805; entered the navy in 1818; served on the W. coast of Mexico during the Mexican War; commanded frigate "Colorado," of commanded frigate "Colorado," of the Western Gulf Blockading Squad-ron, in 1861-1862; and in the last year commanded the right column of Admiral Farragut's squadron in the passage of Forts St. Philip and Jackson, and led the fleet at the capture of the Chalmette batteries and the city of New Orleans. Commissioned Rear-Ad-

New Orients. Commissioned Rear-Aumiral and retired in 1866. Died, 1877.

Bailey, Vernon, an American scientist, born in Manchester, Mich., June 21, 1863; received a university education; and became chief field naturalist of the United States Biolecical Support logical Survey

Bailey, William Whitman, an American botanist, born in West Point, N. Y., Feb. 22, 1843. He was educated at Brown and Harvard, having been a pupil of Prof. Asa Gray. In 1867 he was botanist of the United States Geological Survey of the 40th parallel; in 1867-1869 assistant librarian of the Providence Athenæum. He was Professor of Botany at Brown University in 1881-1906. He died

Bailiff, essentially a person intrusted by a superior with power of superintendence. In the United States the word bailiff has no precise mean-

The term is most frequently used to denote a court officer whose duty it is to take charge of juries and wait upon the court.

Baillie, Joanna, a Scotch author; born in Bothwell, near Glasgow, Sept.

11, 1762; died Feb. 23, 1851.

Baillie, Robert, the "Scottish Sidney," was a native of Lanarkshire, who first came into notice in 1676 through his rescue of a brother-in-law, the Rev. Mr. Kirkton, from the clutches of Archbishop Sharp's principal informer. In 1683 he took a prominent part in a scheme of emigration to South Carolina, as he saw no other refuge from the degrading tyranny of the government. tyranny of the government. Accused of conspiring against the King's life, and of hostility to monarchical government, he was tried at Edinburgh and condemned to death upon evidence at once insignificant and illegal. The sentence was carried into execution on the very day that it was passed, Dec. 24, 1684.

Bailly, Jean Sylvain, a French astronomer and statesman, born in Paris, Sept. 15, 1736. The Revolution drew him into public life. mayor of Paris his moderation and impartial enforcement of the law failed to commend themselves to the people, and his forcible suppression of mob violence, July 17, 1791, aroused a storm which led to his resignation. He was condemned by the Revolutionary Tribunal, and executed on Nov. 12, 1793.

Bailment, "a delivery of a thing in trust for some special object or purpose, and upon a contract, express or implied, to conform to the object or purpose of the trust." (Story, on "Bailment.") The party who delivers the thing bailed to another is called the bailor; the one receiving it is called bailee. Various degrees of diligence are required of the bailee, according to the nature of the bailment.

Baily, Edward Hodges, an English sculptor, born at Bristol in 1788. He died in London in 1867.

Bain, Alexander, a Scotch writer on mental philosophy and education, born in Aberdeen in 1818. His most important works are "The Senses and the Intellect" (1855); "The Emotions and the Will" (1859), together the Intellect of the Artillery in 1849. The Senses and the Will of the

forming a complete exposition of the human mind. He died Sept., 1903.

Bain, Alexander, a Scotch electrician, born in Watten, Caithness, in 1810; went to London and began a series of electrical experiments in 1837; invented electric fire alarm and sounding apparatus, and the auto-matic chemical telegraph by which high speed telegraphy was for the first time possible. He died in 1877.

Bainbridge, William, an American naval officer, born in Princeton, N. J., May 7, 1774; became a Captain in 1800; and commanded the frigate "Philadelphia" in the war against Tripoli. In 1812 he was given command of a squadron including the "Constitution," "Essex," and "Hornet." With the "Constitution" as his fiagship, he conquered, in December of that year, the British frigate "Java," carrying 49 guns. Later he commanded a squadron in the Mediterranean, and was afterward stationed at various American coast cities. He died in Philadelphia, July 28, 1833.

Bairaktar (more correctly Bairak-dar), signifying "standard bearer," the title of the energetic Grand Vizier Mustapha. Born in 1755, of poor parents, he entered the military service at an early age, and rose to high command. He deposed the Sultan Mustapha IV., and when the Janissaries revolted, demanding Mustapha's restoration, and besieged the seraglio, Bairaktar defended himself bravely. When he saw that the flames threatened to destroy the palace, and that he was in danger of falling alive into his enemies' hands, he strangled Mustapha, threw his head to the besiegers, and then blew himself up.

Bairam, the name of the only two festivals annually celebrated by the Turks and other Mohammedan nations. The first closes the fast of the month Ramadhan or Ramazan. The second commemorates Abraham's offering of Isaac.

Baird, Absalom, an American military officer, born in Washington, Pa., Aug. 20, 1824; was graduated at the United States Military Academy

Brigadier-General, April 28, 1862, and brevetted Major-General, September 1864, for his conduct in the Atlanta campaign. On March 13, 1865, he was brevetted Major-General, United States army, for his meritorious services in the field during the war. In 1885, he was promoted Brigadier-General and Inspector-General, United States army, and in 1888 was retired. He died July 14, 1905.

Baird, Charles Washington, an American historian and religious writer, son of Robert Baird; born at Princeton, N. J., Aug. 28, 1828; died in Rye, N. Y., Feb. 10, 1881.

Baird, Henry Carey, an American political economist, nephew of Henry C. Carey, born in Bridesburg, Pa., in 1825. He was a publisher at Philadelphia. A strong protectionist, his economical views generally were similar to those of his distinguished uncle, and made public in numerous

pamphlets. He died Dec. 31, 1912.

Baird, Henry Martyn, an American author and educator, born in Philadelphia, Pa., 1832; died 1906.

Baird, Robert, an American historian, born in Fayette county, Pa., Oct. 6, 1798; died at Yonkers, N. Y., March 15, 1863.

Baird, Spencer Fullerton, a distinguished American naturalist, born at Reading, Pa., Feb. 3, 1823. His writings cover nearly every branch of natural history. He died at Wood's Hole, Mass., Aug. 19, 1887.

Baireuth, or Bayreuth, a city and capital of the Bavarian province of Upper Franconia, 43 miles N. N. E. of Nuremberg by rail. A magnificent National theater for the performance of Wagner's music, finished in 1875, was in the following year opened with a grand representation of his Nibelungen trilogy. On Feb. 14, 1883, the great master (who died in Venice) was buried in the garden of his villa here.

Baize, a sort of coarse woolen fabric with a rough nap, now generally used for linings, and mostly green or red in color.

Bajazet, or Bayazeed, I., an Ottoman Sultan, born 1347, succeeded his father, Amurath I., in 1389. He was the first of his family who assumed the title of Sultan. After de-

feating Hungarians, Germans, and French at Nicopoli, on the Danube, Sept. 28, 1396, Bajazet is said to have boasted that he would feed his horse on the altar of St. Peter at Rome. His progress, however, was arrested by a violent attack of the gout. Bajazet was preparing for an attack on Constantinople, when he was interrupted by the approach of Timur the Great, by whom he was defeated at Angora, in Anatolio, July 28, 1402. He was taken captive, and died about nine months afterward, at Antioch in Pisidia. He was succeeded by Mohammed I. Modern writers reject as a fiction the story of the iron cage in which Bajazet was said to have been imprisoned.

Baker, Sir Benjamin, an English engineer, born near Bath, in 1840. In 1877 he superintended the removal of Cleopatra's Needle from Egypt to London. In conjunction with Sir John Fowler he drew the plans for the great bridge over the Firth of Forth. He died May 19, 1907.

Baker, Benjamin W., an American educator, born in Coles county, Ill., Nov. 25, 1841; was brought up on a farm; served in the Union army through the Civil War; was graduated at the Illinois State Normal University in 1870; became a Methodist Episcopal clergyman in 1874; and was financial secretary of the Illinois Wesleyan University in 1883-1893; president of Chaddock College in 1893-1898; of the Missouri Wesleyan College in Cameron, in 1898-1906; then pastor in Florida.

Baker, Edward Dickerson, an American soldier and politician, born in London, England, Feb. 24, 1811; came to the United States in youth. He was elected to the Illinois Legislature in 1837, became a State Senator in 1840, and was sent to Congress in 1844. He served under General Scott in the war with Mexico and was elected United States Senator from Oregon in 1860. He entered the Federal army at the outbreak of the Civil War, and was killed at the battle of Ball's Bluff, Oct. 21, 1861.

Baker, Frank, an American zoölogist: was graduated in the medical department of Columbian University in 1880: was Professor of Anatomy in the University of Georgetown; and

became superintendent of the National Zoölogical Park, in Washington, D. C., Univ. of Ill. since 1918.

Baker, Harriette Newell (Woods) (pseudonyms "Madeline Leslie" and "Aunt Hatty"), an American writer of juvenile stories, born in 1815. She was a daughter of Rev. Leonard Woods and wife of Rev. Abijah R. Baker; died in 1893.

Baker, John Gilbert, an English botanist, born in Guisbrough, Yorkshire, Jan. 13, 1834; was appointed assistant curator at the herbarium at Kew in 1866. His voluminous writings include works on the flora of districts so diverse as the North of England, Madagascar, and Brazil.

Baker, Lafayette C., an American detective, born in Stafford, N. Y., Oct. 13, 1826; was chief of the Secret Service Bureau during the Civil War: and reached the military rank of Brig-

and reached the military rank of Brigadier-General. He superintended the pursuit of Wilkes Booth, President Lincoln's assassin. He died at Philadelphia, Pa., July 2, 1868.

Baker, Marcus, an American cartographer, born in Kalamazoo, Mich., Sept. 23, 1849; was graduated at the University of Michigan in 1870; became connected with the University of Michigan in 1870; became connected with the United States Coast and Geodetic Survey, in 1873, and with the United States Geological Survey, in 1886; and was made secretary of the United States Board on Geographic Names. He was cartographer to the Venezuela Boundary Commission, and after spending many years surveying and exploring prepared, with William H. Dall, the "Alaska Coast Pilot." He died Dec. 12, 1903.

Baker, Newton Diehl, an American lawyer; born in Martinsburg, W. Va., Dec. 3, 1871; was private secretary to Postmaster-General Wilson in 1896-7; began law practice in 1897; was city solicitor of Cleveland, O., in 1902-12; mayor of that city in 1912-14 and 1914-16; and was appointed Secretary of War March 7, 1916. He was recognized for many years as a leader of the Ohio bar and of the municipal reform movement in Cleveland.

Baker, Sir Samuel White, a distinguished English traveler; born in London, June 8, 1821. He was trained as an engineer, and at the age everywhere from Egypt to India.

of 24 he went to Ceylon, where he founded an agricultural settlement at Nuwara Eliya in 1847. In the early part of 1861, accompanied by his (second) wife, he set out for Africa on a journey of exploration. When he had ascended the Nile as far as Gondokoro he met Speke and Grant returning after their discovery of the Victoria Nyanza lake, and learned from them that another large lake in the district had been spoken of by the natives. This lake he determined to discover. and after many adventures he and his wife beheld the Albert Nyanza from a height on March 14, 1864. On his return home he was received with great honor and was knighted. In 1869 be returned to Africa as head of an expedition sent by the Khedive of Egypt to suppress the slave trade and to annex and open up to trade a large part of the newly explored country, being raised to the dignity of pasha. He returned home in 1873, having finished his work, and was succeeded by the celebrated Gordon. In 1879 he explored the island of Cyprus, and subsequently he traveled in Asia and America. He died Dec. 30, 1893.

Baker, William Bliss, an American artist, born in New York in 1859, and is especially noted for his landscapes. He died in Ballston, N. Y., in 1889.

Baker, Mount, an occasionally active volcano in Whatcom county, Wash., belonging to the Cascade Range; very active in 1880; height 10,827 ft.

Baker's Dozen, a familiar phrase said to have originated in an old custom of bakers who, when a heavy pen-alty was inflicted for short weight, used to give a surplus to avoid all risk of incurring a fine.

Baking Powder, a mixture of bicarbonate of soda and tartaric acid, usually with some flour added. water of the dough causes the liberation of carbonic acid, which makes the bread 'rise.'

Bakony Wald, a thickly-wooded mountain range dividing the Hungarian plains, famous for the herds of swine fed on its mast.

Bakshish, an Eastern term for a present or gratuity. A demand for bakshish meets travellers in the East

B. -7.

Baku, a Russian port on the W. shore of the Caspian, occupying part of the peninsula of Apsheron, and a noted centre of oil production. Some of the wells have had such outflow of oil as to be unmanageable, and the Baku petroleum now competes successfully with any other in the markets of the world. Baku is the station of the Caspian fleet, is strongly fortified, and has a large shipping trace. Pop. (Est.) 240,000.

Bakunin, Michael, a Russian anarchist, the founder of Nihilism,

born in 1814 of rich and noble family. Wherever he went, he was influential for disturbance, and after undergoing imprisonment in various States, was handed over to Russia, in 1851, by Austria, imprisoned for five years, and finally set to Siberia. Escaping thence through Japan, he joined Herzen in London, on the staff of the "Kolokol." His extreme views, however, ruined the paper and led to a quarrel with Marx and the International; and having fallen into disrepute with his own party in Russia, he died suddenly and almost alone at Berne, in 1878. He demanded the entire abolition of the State as a State, the absolute equalization of individuals, and the extirpation of hereditary rights and of religion, his conception of the next stage of social progress being purely negative and annihilatory.

Balaam, a heathen seer, invited by Balak, King of Moab, to curse the Israelites, but compelled by miracle to bless them instead (Num. xxii-xxiv).

Balæna, the genus which includes the Greenland, or right whale, type of the family balænidæ, or whale-bone whales.

Balæniceps, a genus of wading birds, belonging to the Sudan, intermediate between the herons and storks, and characterized by an enormous bill, broad and swollen, giving the only known species (also called shoe-bird) a peculiar appearance.

Balænidæ, the true whales, the most typical family of the order cetacea and the suborder cete. They are known by the absence of teeth and the presence in their stead of a horny substance called whale-bone, or baleen.

Balænoptera, fin-back whales.

the possession of a soft, dorsal fin, and by the shortness of the plates of baleen. Balænoptera boops is the northern rorqual, or fin-fish, called by sail-ors the finner. It is the largest of known animals, sometimes reaching 100 feet in length.

Balaklava, a small seaport in the Crimea, 8 miles S. S. E. Sebastopol. In the Crimean War it was captured by the British, and a heroically fought battle took place here (Oct. 25, 1854), ending in the repulse of the Russians by the British. The charge of the Light Brigade was at this battle.

Balance, an instrument employed for determining the quantity of any substance equal to a given weight.

Balance Electrometer, an instrument invented by Cuthbertson for regulating the amount of the charge of electricity designed to be sent through any substance.

Balance of Power, a political principle which first came to be recognized in modern Europe in the 16th century, though it appears to have been also acted on by the Greeks in ancient times, in preserving the relations between their different States. The object in maintaining the balance of power is to secure the general in-dependence of nations as a whole, by preventing the aggressive attempts of individual States to extend their territory and sway at the expense of weaker countries.

Balance of Trade, a term for-merly used by political economists to signify an excess of imports over exports, or of exports over imports in the foreign trade of a country, which required to be balanced by an export or import of the precious metals. After the outbreak of the great war in Europe the world's balance of trade came to the United States because it was the greatest source of supplies.

Balata, the product of the bullettree - its milk or juice, in fact which is a large forest tree, ranging from Jamaica and Trinidad to Ven-ezuela and Guiana. The tree grows to a height of 120 feet, and has a large, spreading head. A tree of average size yields three pints of milk. The milk is dried in hollow wooden trays. genus of balænidæ, characterized by When it is sufficiently dry it is removed from the trays in strips and hung up on lines to harden.

Balbo, Count Cæsare, an Italian author, born at Turin, in 1789. He is chiefly remarkable from the fact that his first important work, "Le Speranze d'Italia," published in 1844, may be regarded as having given the programme of the Moderate Party of Italian politics, and as having to-gether with the writings of d'Azeglio, Durando, and others, created the Liberal Party, in opposition to the Republican Party as represented by Mazzini. Balbo was an accomplished historian and translator. He died in June, 1853.

Balboa, Vasco Nunez de, a celebrated Spanish discoverer, born at Xeres de los Caballeros, in 1475. He Acres de los Cabalieros, in 1445. He accompanied Rodrigo de Bastidas in his expedition to the New World, and first settled in Haiti (or, as it was then termed, Hispaniola). Though an adventurer in search of fortune, his great ambition seems to have been to extend the boundaries of geographical knowledge, and especially to be able to announce to Europe the existence of another great ocean. On Sept. 1, 1513, he began his perilous enterprise. Accompanied by a small band of followers, he began to tread the almost impenetrable forests of the Isthmus of Darien, and, guided by an Indian chief, named Ponca, clambered up the rugged gorges of the mountains. At length, after a toilsome and danger-ous journey, Balboa and his compan-ions approached, on Sept. 25, the summit of the mountain range, when Balboa, leaving his followers at a little distance behind, and advancing alone to the W. declivity, was the first to behold the vast unknown ocean, which he afterward took solemn possession of in the name of his sovereign, and named it the Pacific Ocean, from the apparent quietude of its waters. Surrounded by his followers, he walled into it, carrying in his right hand a naked sword, and in his left the banner of Castile, and declared the sea of the South, and all the regions whose shores it bathed, to belong to the crown of Castile and Leon. During his absence, however, a new goving his absence, however, however

springing up between them, Balboa, accused of a design to rebel, was beheaded in 1517, in violation of all forms of justice.

Balcony, a gallery or projecting framework of wood, iron or stone, in front of a house, generally on a level with the lower part of the windows in one or more floors.

Baldachin, a structure in form of a canopy, supported by columns, and often used as a covering for isolated altars.

Bald Mountain, the name of several eminences in the United States, of which the following are the principal: (1) In Colorado, height, 11,493 feet; (2) in California, height, 8,295 feet; (3) in Utah, height, 11,976 feet; (4) in Wyoming, in the Wind River Range, height, 10,760 feet; and, (5) in North Carolina, height 5,550 feet. The last one was the cause of much excitement in May, 1878, because of inexplicable rumblings which lasted for about cable rumblings which lasted for about two weeks. The mountain shook as if in the throes of an earthquake, immense trees and rocks were hurled down its sides, and, for a time, fears were entertained lest a volcanic eruption should follow. A subsequent examination showed that a large section of the mountain had been split asunder, but no further disturbance occurred.

Baldness, an absence of hair on the head. Congenital baldness (complete absence of hair at birth) is sometimes met with; but, in most cases, is only temporary, and gives place, in a few years, to a natural growth of hair. Occasionally, however, it persists through life. Senile baldness (calvities) is one of the most familiar signs of old age. It com-mences in a small area at the crown, where the natural hair is first replaced by down before the skin becomes smooth and shining. this area the process extends in all directions. It is more common in men than women. A precisely similar condition occurs not unfrequently at an earlier age (presenile baldness). ities agree that this form of baldness is incurable.

Great loss of hair frequently follows severe illnesses or other causes which produce general debility. As health returns, the hair usually returns with it.

Baldric, a broad belt formerly worn over the right or left shoulder diagonally across the body, often highly decorated and enriched with gems, and used not only to sustain the sword, dagger, or horn, but also for purposes of ornament, and as a military or heraldic symbol. The fashion appears to have reached its height in the 15th century. In the United States it now forms a part of the uniform of Knights Templar and other fraternal organizations.

Baldwin, the name of a long line of sovereign Counts of Flanders, of whom the most celebrated was Baldwin IX., who became, afterward, Emperor of Constantinople, under the name of Baldwin I.

Baldwin II., the last Frank Emperor of Constantinople, born in 1217. He was the son of Pierre de Courtenay, and succeeded his brother Robert in 1228. Driven from his throne he died in obscurity in 1273.

Baldwin, Charles H., an American naval officer, born in New York city, Sept. 3, 1822. He entered the navy as a midshipman, in 1839. Serving on the frigate "Congress" during the war with Mexico, he figured in several sharp encounters near Mazatlan. He commanded the steamer "Clifton" at the passage of Forts Jackson and St. Philip, and at the first attack on Vicksburg. He became Rear-Admiral in 1883, receiving the command of the Mediterranean Squadron. He died in New York city, Nov. 17, 1888.

Baldwin, Frank Dwight, a U. S. military officer; born in Michigan, June 26, 1842; entered the voluntee army in 1861 and the regular army i 1866; became colonel of the 4th United States Infantry, July 26, 1901; and was promoted Brigadier-General, U. S. A., June 9, 1902. He was awarded a Congressional medal of honor for service at the battle of Pine Tree Creek Ga., July 20, 1864, and another for gallantry in an action against Indians in Texas. He greatly distinguished

himself in the Philippines, in the early part of 1902.

Baldwin, James Mark, an American psychologist, born in Columbia, S. C., Jan. 12, 1861; Lecturer at Oxford, 1915; Professor at School of Social Sciences, Paris, 1916–18; founder of "The Psychological Review." Author of several works on psychology.

Baldwin, John Denison, an American journalist, politician, and writer on archæology, born at North Stonington, Conn., Sept. 28, 1809; died, Worcester, Mass., July 8, 1883.

Baldwin, Stanley. English Statesman, born 1867. Elected to Parliament in 1906. Early made a great

Baldwin, Stanley. English Statesman, born 1867. Elected to Parliament in 1906. Early made a great success as expert in finance and economics. Appointed Chancellor of the Exchequer in 1922. Succeeded Bonar Law as Premier in 1923. His ministry carried the Country by increased majority in elections of 1924.

Baldwin, Theodore Anderson, American military officer, born in New Jersey, Dec. 21, 1839; entered the army as a private, May 3, 1862, and served in that grade and as quartermaster's sergeant in the 19th United States Infantry, till May 31, 1865, when he became First Lieutenant. He was promoted Captain, July 23, 1867; Major of the 7th Cavalry, Oct. 5, 1887; Lieutenant-Colonel of the 10th Cavalry, Dec. 11, 1896; and Colonel of the 7th Cavalry, May 6, 1899. From Oct. 6, 1898, till Jan. 31, 1899, he served as a Brigadier-General of Volunteers. Retired in 1903.

Balearic Islands, a group of islands, S. E. of Spain, including Majorea, Minorea, Iviza, and Formentera. The islands form a Spanish province, with an area of 1,935 square miles; pop. (1921) 400,000.

Baleen, whale-bone, in the rough or natural state.

Bale-Fire, in its older and strict meaning, any great fire kindled in the open air, or in a special sense, the fire of a funeral pile. It has frequently been used as synonymous with beaconfire, or a fire kindled as a signal, Sir Walter Scott having apparently been the first to use the term in this sense.

vice at the battle of Pine Tree Creek Ga., July 20, 1864, and another for gallantry in an action against Indians chiefly classical, religious, and allegoring Texas. He greatly distinguished cal—some of them executed in part-

Balfour Baler

nership with Breughel-are to he found in most of the leading galleries. Three of his sons also followed

the art, but the best of them, John van Balen (1611-1654), was inferior to his father. He died in 1632.

Baler, a town in the N. E. part of Luzon, Philippine Islands, on the Pacific coast. The population is several thousand, mostly natives. The most conspicuous edifice is a native Catholic church. The town is noted for the heroic defense of a Spanish garrison in 1899, during a siege by the Filipinos, lasting 11 months. The Spaniards were commanded by Lieut, Saturnino Martin Cerezo, who refused to surrender the town even when directed to do so by his superiors in Manila. He entrenched himself in the church and heroically resisted the besiegers until his supplies gave out, when he surrendered with all the honors of war, July 2, 1899. Baler was occupied by the American troops under Major Shunk, in March, 1900.

Bales, Peter, a famous caligrapher, born in 1547. He was one of the early inventors of shorthand. He died about 1610.

about 1610.

Balestier, Charles Wolcott, an American novelist, born in Rochester, N. Y., Dec. 13, 1861; studied in Cornell University; and became connected with a New York publishing house. He was brother-in-law of Rudyard Kipling. He died in Dresden, Saxony, Dec. 6, 1891.

Bales, Michael William, com-

Balfe, Michael William, composer, was born in Dublin, May 15, 1808. His musical talent received early culture, and in his ninth year he made his debut as a violinist, having begun to compose at least two years earlier. In 1826 he wrote the music for a ballet, "La Perouse," performed at Milan; and in 1827 he sang in the Italian Opera at Paris with great applause, his voice being a pure rich baritone. In 1833 he returned to England, and in 1846 was appointed conductor of the London Italian Opera. He died at Rowley Abbey, his estate in Hertfordshire, Oct. 20, 1870.

Balfour, Sir Andrew, a Scottish botanist and physician, born in Fife-

Balfour, Arthur James, a British statesman; born in Scotland, July 1sh statesman; born in Scotland, July 25, 1848; educated at Eton and at Trinity College, Cambridge; entered Parliament in 1874; was private secretary to his uncle, the Marquis of Salisbury, in 1878–1880, and accompanied him to the Berlin Congress; was member of Parliament for Hertford in 1879, and for the East Division of Manchester in 1885; president of the Local Government Board in 1885; Secretary for Scotland in 1886; with a seat in the Cabinet; Lord Rector of St. Andrew's University in 1866; Secretary for Ireland in 1887– 1891; member of the Gold and Silver Commission in 1887-1888; Lord Reccommission in 1887-1888; Lord Rector of Glasgow University in 1890; Chancellor of Edinburgh University in 1891; First Lord of the Treasury in 1891-1892; became the leader of the Conservative opposition in the House of Commons in 1892. In 1895 he again became First Lord of the Treasury and leader of the House ury and leader of the House. He was an effective speaker. As Chief Secretary for Ireland, he was successful. He passed the Crimes Act and Law Act, secured a free grant for rail-ways, made a tour of investigation and created the Congested Districts Board. On the resignation of Lord Board. On the resignation of Lord Sailsbury, Mr. Balfour became prime minister, July 12, 1902. In 1903 he issued a pamphlet on "Insular Free Trade," which caused a sensation as the first blow at British free trade from a British premier. In 1917 he headed a mission to the United States of the Congress had deel United States. after Congress had declared the existence of a state of war against the Imperial German Government. He was British Commissioner to Conference on Limitation of Armaments, at Washington, 1921-22. Created Earl of Balfour for great political services, 1922; Pres. British Academy, 1921-28. He has since taken active part in international affairs. Died Mar. 19, 1930.

Balfour, Nesbit, a British military officer, born in Dunbog, Scotland, in 1743; was promoted Lieutenant-General in 1798 and General in 1803; distinguished himself during the American Revolution; was wounded in the shire, in 1630. He planned with Sir Robert Sibbald, the Royal College of Physicians at Edinburgh, and was elected its first President. battle of Bunker Hill; fought at the battles of Elizabethtown, Brandy-wine, Germantown, and Long Island; and was present at the capture of New York. He was appointed commandant at Charlestown, in 1779. He died in Dunbog, in October, 1823.

Bali, an island of the Indian Archipelago E. of Java, belonging to Holland; greatest length, 85 miles, greatest breadth, 55 miles; area, about 2,260 square miles. It is divided into eight provinces under native rajahs, and forms one colony with Lombok, the united population being estimated

Dec. 31, 1912, at 1,207,310.

Baliol, or Balliol, John, King of Scotland; born about 1249. On the death of Margaret, the Maiden of Norway, and grandchild of Alexander III., Baliol claimed the vacant throne by virtue of his descent from David, Earl of Huntington, brother to William the Lion, King of Scotland. Robert Bruce (grandfather of the King) opposed Baliol; but Edward I.'s decision was in favor of Baliol, who did homage to him for the kingdom, Nov. 20, 1292. Irritated by Edward's harsh exercise of authority, Baliol concluded a treaty with France, then at war with England; but, after the defeat at Dunbar he surrendered his crown into the hands of the English monarch. was sent with his son to the Tower, but, by the intercession of the Pope, in 1297, obtained liberty to retire to his Norman estates, where he died in 1315. His son, Edward, in 1332, landed in Fife with an armed force, and having defeated a large army under the Regent Mar (who was killed), got himself crowned King, but was driven out in three months.

Baliol College, Oxford, founded between 1263 and 1268 by John de Baliol, father of John Baliol, King of Scotland.

Balista, or Ballista, a machine used in military operations by the ancients for hurling heavy missiles, thus serving in some degree the purpose of the modern cannon. They are said to have sometimes had an effective range of a quarter of a mile, and to have thrown stones weighing as much as 300 lbs. The balistæ differed from the catapultæ, in that the latter were used for throwing darts.

Balkan Peninsula, a region in Europe named from the Balkan Mountains; between the Adriatic and Ionian Seas on the W., and the Black Sea, Sea | He died Dec. 11, 1911.

of Marmora, and Ægean Sea on the E.; comprising Bulgaria, Servia, Montenegro, Rumania, Eastern Rumelia, European Turkey, and Greece; area, about 125,500 square miles; pop. est. 17,700,000, about half Slavs. This region was the scene of a war declared by Bulgaria, Montenegro, Servia, and Greece against Turkey and by Tur-Greece against Turkey and by key against these allies in mid-October, 1912. On Nov. 3, beaten at every point, Turkey sued for peace through the Powers. It was also the scene of important military operations in the great war, for a summary of which see APPENDIX: World War.

Balkhash (Kirghiz Tengis; Chinese Sihai), a great inland lake, near the E. border of Russian Central Asia, between 44° and 47° N. lat. and 73° and 79° E. long. Lying about 780 feet above sea level, it extends 323 miles W. S. W.; its breadth at the W. end is 50 miles; at the E. from 9 to 4 miles; the area is 8.400 square miles. miles; the area is 8,400 square miles. Its principal feeder is the river Ili. It has no outlet.

Ball, Ephraim, an American inventor, born in Greentown, O., Aug. 12, 1812; was brought up in the carpenter's trade; in 1840 established a foundry for making plow castings; invented a plow, a turn-top stove, the Ohio mower, the World mower and reaper, the Buckeye machine, and the New American harvester; and for many years before his death had an extensive manufacturing plant at Canton. He died in Canton, O., Jan. 1, 1872.

Ball, John, a priest, was one of the leaders in the rebellion of Wat Tyler, and was in several respects a precursor of Wyclif, having been re-peatedly in trouble for heresy from 1366. He was hanged, drawn, and quartered in 1381.

Ball, Sir Robert Stawell, an English astronomer, born in Dublin, July 1, 1840; studied at Trinity College. He was knighted Jan. 25, 1886.

Ball, Thomas, an American sculptor, born in Charlestown, Mass., June 3, 1819. Chief works: Equestrian statue of Washington, in Boston; Webster statue in New York, and "Emancipation," in Washington, D. C.

Ballad, a narrative song, from the French ballade, Italian ballata, an old kind of song of a lyric nature. Ballata is derived from ballare, to dance.

Ballantine, James, a Scottish artist and poet, born in Edinburgh, June 11, 1808; was brought up as a house painter, but afterward learned drawing under Sir William Allen, and was one of the first to revive the art of glass painting. He was commissioned to execute the stained glass windows for the House of Lords. He died Dec. 18, 1877.

Ballantine, William Gay, an American educator, born in Washing-ton, D. C., Dec. 7, 1848; and Presi-dent of Oberlin College in 1891-1896. Dr. Ballantine was one of the editors of the "Bibliotheca Sacra," in 1884-1891.

Ballarat, or Ballaarat, an Australian town in Victoria, chief center of the gold mining industry of the

Ballinger, Richard Achilles, an American lawyer; born in Boones-boro, Ia., July 9, 1858; admitted to the bar in 1886; Commissioner of the General Land Office in 1907-1909; Secretary of the Interior in 1909-11. His controversy with Gifford Pinchot, Chief Forester, on consequential inter-Chief Forester, on conservation interests in Alaska, led to a Congressional investigation in 1910. Resigned and resumed law practice. Died June, 1922.

ING MACHINE.

Ballot, a means of expressing an individual choice for a public or other officer, or a measure of public importance; the medium through which a voter indicates his preference at an election.

The term ballot, at a club or private election, is applied to a ball used for the purpose of voting. In casting a officers are arranged alphabetically, ball for or against an individual, the the names of the candidates and the arrangement sometimes is that if the party following; (b) one which groups vote be designed in his favor, then a white ball is used, but if it be intended to be against him, then one of a black color is used — whence the phrase "to blackball one." Other methods, however, may be adopted; thus, a ball of any color put through a hole into one drawer may indicate a favorable vote, and into another an unfavorable one.

The ballot, as a political institution,

is known from early times, having been made use of in ancient Greece and Rome. At Athens, the verdicts given in the courts by the dicasts were indicated by balls of stone or metal, black or pierced balls indicating condemnation, while white or unpierced meant acquittal.

When the measure called ostracism was resorted to, the votes were given by means of shells, on which the voters wrote the name of the citizen whom The method they wished banished. known as petalism was employed at Syracuse, the voters using olive leaves as ballots. At Rome the ballot was introduced in the election of magistrates in 139 B. C., and subsequently in trials and legislation, the people voting at first viva voce, but later writing upon tablets the names of their candidates. In the republic of Venice a system of venicy by bellet Venice a system of voting by ballot prevailed for many centuries.

In the United States it was in use in early colonial times; in France it has been in operation in elections since 1851; and in several of the Aus-

tralian colonies since 1855.

Ballot Reform, is a term applied to such improvements in methods of voting as tend to eliminate unfairness at elections. Nearly every State in the Union has adopted some plan intended to make the ballot wholly secret. There is a single ballot, usually called a blanket ballot, because of its size, on which the voter indicates his choice—for a straight vote—by marking a cross in the circle at the head of the column containing the nominees of his party, and for a scattered or split vote, by making a cross in the space before the desired name. Two forms of the single ballot are in use: (a) One, following the Australian plan, in which the titles of the officers are arranged alphabetically, the names of the candidates and the all names and offices by parties.

In New York State the single bal-lot has one column for each organization that had made regular nominations, and another column containing only the titles of the offices to be filled, with a space on the left to indicate the choice by making a cross, and a space beneath the title of office, in which the voter could write the name

of any person for whom he desired to vote, whose name was not printed in any of the party columns of the ballot. Each of the columns is headed by a registered party emblem, the circle in which to indicate the choice for a straight vote, and the name of the party organization. Corruption is baffled, if not defeated by the practical inability of a voter to show how he is

voting.

A new feature of ballot reform is the substitution for the ballot paper, which is folded and deposited by hand, of voting machines, which are contrivances that both record the votes and count them, enabling the inspectors to see at any moment how many votes have been cast, and for whom. No machine has as yet come into general use, but several States have authorized their employment, and others have referred the question of their adoption to local option.

Ballou, Hosea, an American Universalist clergyman, journalist, and historian, born at Halifax, Vt., Oct. 18, 1796; was the first President of Tufts College (1854-1861), and was very successful as editor of the "Universalist Magazine." He died at Somerville, Mass., May 27, 1861.

Ballou, Maturin Murray, an American journalist, son of Hosea Ballou, born in Boston, April 14, 1820; died in Cairo, Egypt, March 27,

Ball's Bluff, a spot on the right bank of the Potomac river in Loudon county, Va., about 33 miles N. W. of Washington; where the bank rises about 150 feet above the level of the It is noted as the scene of a battle between a Union force under Col. Edward D. Baker, and a Confederate force under the command of General Evans, Oct. 21, 1861. The battle resulted in the defeat of the Union force and the death of Baker.

Balm, a tree the specific name being given because it was once sup-posed to be the Scriptural "Balm of Gilead"—an opinion probably erroneous, for it does not at present grow in Gilead, either wild or in gar-dens, nor has it been satisfactorily proved that it ever did. It is a shrub or small spreading spineless tree, 10 tivated in gardens and greenhouses.

to 12 feet high, with trifoliate leaves in fascicles of 2-6, and reddish flowers having four petals. It is found on both sides of the Red Sea, in Arabia, Abyssinia, and Nubia. It does not occur in Palestine.

Balm of Gilead Fir, a tree which furnishes a turpentine-like gum. It is a North American fir, having no geographical connection with Gilead.

Balmaceda, Jose Manuel, a Chilian statesman, born in 1840; early distinguished as a political orator; advocated in Congress separation of Church and State; as Premier, in 1884, introduced civil marriage; elected President in 1886. A conflict with the Congressional Party, provoked by his alleged cruelties and official dishonesty, and advocacy of the claim of Signor Vicuna as his legally elected successor, resulted in Balmaceda's overthrow and suicide in 1891.

Balmerino, Balmerino, stone, Lord, a Scottish Jacobite, born in 1688. He took part in the Jacobite rebellion of 1715, and fought at Sheriffmuir. Having joined the young Pretender in 1745, he was taken prisoner at Culloden, tried at Westminster, found guilty, and beheaded in 1746. His title was from Balmerino, in Fife. Arthur Elphin-

in Fife.

Balmoral Castle, the Highland residence of British royalty, finely situated on the S. bank of the Dee, in the county of, and 45 miles W. of Aberdeen. It stands in the midst of fine and varied mountain scenery, is built of granite in the Scottish baronial style, was enlarged in 1888, and has a massive and imposing appearance. The estate, which is the King's private property, comprises 25,000 acres, mostly deer forest.

Balsa, a kind of raft or float used on the coasts and rivers of Peru and other parts of South America for fishing, for landing goods and passengers through a heavy surf, and for other purposes where buoyancy is chiefly wanted. Also, a kind of wood found in Central America, the West Indies, and northern states of South America. Has half the weight of ordinary cork.

Balsam, the common name of succulent plants of the genus impatiens, having beautiful irregular flowers, cul-

Baltimore

Balsam, an aromatic, resinous substance, flowing spontaneously or by incision from certain plants. A great variety of substances pass under this name. But in chemistry the term is confined to such vegetable juices as consist of resins mixed with volatile oils, and yield the volatile oil on distillation.

Balta, Jose, a Peruvian statesman, born in Lima, in 1816; retired from the army with the rank of Colonel in 1855; Minister of War in 1865; one of the leaders in the insurrection which overthrew the unconstitutional President, Prado, in 1868; and was President of Peru, in 1868–1872. He was murdered in a military mutiny in Lima, July 26, 1872.

Baltic and North Sea Canal, a German ship canal, starting at Holtenau, on the Bay of Kiel, and joining the river Elbe 15 miles from its mouth; called by the Germans the Kaiser Wilhelm Canal. The Emperor William I. commenced the works on June 6, 1887, so far as laying the foundation of the Holtenau locks was concerned, while William II. opened the canal gates in 1895. The work was thus actually completed in the estimated time, eight years, and the estimate of cost, \$40,000,000, had not been exceeded.

Baltic Provinces (in Russia), a term very commonly used to comprehend the five States (for Russian) bordering on the Bultic, viz., Courland, Livonia, Esthonia, Petrograd, and Finland; in a restricted sense it designates the first three only. The Baltic provinces once belonged to Sweden, except Courland, which was a dependency of Poland. The bulk of the population is composed of Esths and Letts; the Germans number above 200,000, the Russians only 65,000. The three provinces combined have an area of 35,614 square miles, and a population (1921) 3,000,000.

Baltic Sea, the great gulf or inland sea bordered by Denmark, Germany, Russia, and Sweden, and communicating with the Kattegat and North Sea by the Sound and the Great and Little Belts. Its length is from 550 to 900 miles; breadth, from 100 month General Butler occupied Federal Hill; in 1863–1864 the city was of Bothnia and Finland, 184,496 fortified to resist a threatened attack

square miles, of which 12,753 are occupied by islands. Its mean depth is 44 fathoms, and the greatest ascertained depth, between Gottland and Courland, 140.

Baltimore, a coextensive city and county of Maryland; sixth city in the United States in pop. in 1900; (1920) 732,826; Pop. (1930) 804,874; on the Patapsco river and seven railroads; 38 miles N. E. of Washington, D. C., and 14 miles from Chesapeake Bay. The city covers an area of 28 square miles, and the expansion of the river gives it a spacious and secure harbor (consisting of an outer bay accessible to the largest ships, and an interior basin for small vessels), which has become the seat of a very large foreign and coastwise trade. The entrance to the harbor is defended by Fort McHenry, an important military post, which successfully resisted an attack by the British fleet in the War of 1812. The city is laid out in general at right angles, with streets averaging 60 feet in width, and is built up with red brick, made from clay beds near the city, white marble and granite, both from quarries near by, and with iron.

The city is the largest oyster canning place in the world, the industry employing over 5,000 vessels and boats of all kinds and several thousand persons. It also ranks very high in the various manufactures of tobacco, and in the exportation of corn and

grains in general.

On Sept. 11, 1814, the British forces under General Ross landed near Baltimore and attempted to carry the city by assault. The American forces were placed at a great disadvantage, and were unable to resist the invasion; but in the assault the British commander was killed, and his troops abandoned their purpose. On the following day, the British fleet bombarded Fort McHenry without practical success. During the Civil War the city was a scene of almost continual excitement. On April 19, 1861, a fatal assault was made on portions of the Sixth Massachusetts and the Seventh Pennsylvania Regiments as they were passing through the city on their way to Washington; in the following month General Butler occupied Federal Hill; in 1863–1864 the city was fortified to resist a threatened attack

by the Confederates; and in the latter year the National Republican Convention, which renominated President Lincoln, met in the city. On Sunday, Feb. 7, 1904, a fire broke out in the centre of the city, and raged for two days, destroying property of the value of \$50,000,000. It necessitated the reconstruction of that portion of the city, and enabled other important improvements, wider streets, new buildings, electric lighting and transit, improved harbor accommodation, etc., to be effectively accomplished in the "Monumental City." Baltimore is the oldest Roman

Baltimore is the oldest Roman Catholic seat in the United States, dating from 1789. It has long been one of the most important commercial centers of the country. It is one of the largest wholesale distributing points in the United States. The city has always been famed for its markets and is the center of a great agricultural and fruit raising country. Baltimore is the terminal for several important steamship lines, and is also noted for its public buildings and monuments. It is called the "Monumental City." There are many higher educational institutions located in the city, including Johns Hopkins University, Loyola College and St. Mary's Seminary, as well as several colleges for women.

Baltimore, George Calvert, Lord, an English colonist, born in Yorkshire about 1580; was for some time Secretary of State to James I., but this post he resigned in 1624 in consequence of having become a Roman Catholic. Notwithstanding this he retained the confidence of the King, who, in 1625, raised him to the Irish peerage, his title being from Baltimore, a fishing village of Cork. He had previously obtained a grant of land in Newfoundland, but, as this colony was much exposed to the attacks of the French, he left it, and obtained another patent for Maryland. He died (1632) before the charter was completed, and it was granted to his son, Cecil, who deputed the governorship to his brother, Leonard.

Baluchistan, a country in Asia, the coast of which is continuous with the N. W. seaboard of India, bounded on the N. by Afghanistan, on the W. by Persia, on the S. by the Arabian Sea, and on the E. by Sind. It has

an area of about 134,630 square miles, and a population (1921) 853,288. In 1910 it was divided into (1) British and administered territory; (2) native States of Kalat and Las Bela; (3) and the Marri and Bugti tribal areas. The British province had an area of 54,228 square miles and pop. of 421,679, and the native States an area of 80,140 square miles and a pop. of 431,619.

Balustrade, a range of balusters, together with the cornice or coping which they support, used as a parapet for bridges or the roofs of buildings, or as a mere termination to a struc-

BALUSTRADE.

ture; also serving as a fence or inclosure for altars, balconies, terraces, staircases, etc.

staircases, etc.

Balzac, Honoré de, a French author, born at Tours, May 20, 1799; died in Paris, August, 1850. From 1819 to 1830 he led a life of frequent privation and incessant industry, producing stories which neither found nor deserved to find readers, and incurring—mainly through unlucky business speculations—a heavy burden of debt, which harassed him to the end of his career. He first tasted success in his 30th year on the publication of "The Last of the Chouans," which was soon afterward followed by "Tne Magic Skin," a marvellous interweaving of the supernatural into modern life, and the earliest of his great works. After writing several other novels, he formed the design of presenting in the "Human Comedy" a complete picture of modern civilization. All ranks, professions, arts, trades, all phases of manners in town and country, were to

be represented in his imaginary system of things. In attempting to carry out this impossible design, he produced what is almost in itself a literature. His work did not bring him wealth; his yearly income, even when he was at the height of his fame, is said to have rarely exceeded 12,000 francs. In 1849, when his health had broken down, he traveled to Poland to visit Madame Hanska, a rich Polish lady, with whom he had corresponded for more than 15 years. In 1850 she became his wife, and three months after the marriage, in August of the same year, Balzac died at Paris.

Bambarra, one of the Sudan rates of Western Africa. The in-States of Western Africa. habitants, a branch of the Mandigoes, number about 2,000,000, and are su-perior to their neighbors in intelligence. The country is within the French sphere.

Bamberger, Heinrich von, an Austrian pathologist, born in Prague in 1822; was graduated in medicine in 1847; became Professor of Special Pathology and Therapeutics, first in the University of Würzburg, and, in 1872, in the University of Vienna. He died in 1888.

Bambino, the figure of our Saviour represented as an infant in swaddling clothes. The "Santissimo swaddling clothes. The "Santissimo Bambino" in the Church of Ara Cœli at Rome, a richly decorated figure carved in wood, is believed to have a miraculous virtue in curing diseases.

Bamboo, a giant grass sometimes reaching the height of 40 or more feet, which is found everywhere in the tropics of the Eastern Hemisphere, and has been introduced into the West Indies, the Southern States of America, and various other regions of the Western world. Bamboo is put to all sorts of uses. Bows, arrows, quivers, the shafts of lances, and other warlike weapons can be made from the stems of bamboo, as can ladders, rustic bridges, the masts of vessels, walking sticks, water pipes, flutes, and many other objects. The leaves are everywhere used for weaving and for packing purposes. Finally, the seeds are eaten by the poorer classes in parts of India; and in the West Indies the tops of the tender shoots are pickled.

Ban, Bann, Banne, Bain, or Bane, a proclamation, public notice, or edict respecting a person or thing.

I. Military and feudal: A procla-

mation in time of war.

II. Historical. The ban of the empire: A penalty occasionally put in force under the old German Empire against a prince who had given some cause of offense to the supreme authority.

III. Law, etc. Banns (plural): The publication of intended marriages, proclamation that certain parties named intend to proceed to marriage, unless any impediment to their union be proved to exist.

Ban, in Austro-Hungary: (1)
Formerly: A title belonging to the
warden of the Eastern Marshes of
Hungary. (2) Now: The Viceroy of Temesvar, generally called the Ban of Croatia. The territory he rules over is called a banat or banate.

Banana, a fruit originally East Indian, but much cultivated in warm countries over the whole globe.

Banana, an island in West Africa, N. of the mouth of the Kongo; also a seaport of the Kongo Free State on the island. It has lost commercial importance in recent years.

Banana-Bird, a bird belonging to the family sturnidæ (starlings), and the sub-family oriolinæ, or orioles. It is tawny and black, with white bars on the wings. It occurs in the West Indies and the warmer parts of Continental America.

Banat, a large and fertile region in Hungary, consisting of the counties of Temesvar, Torontal and Krisso; principal town, Temesvar. The region originally belonged to Hungary; was occupied by the Turks in gary, was occupied by the Turks in 1652-1716; and was reunited to Hungary in 1779. The population exseeds 1,500,000.

Banca, an island belonging to the Dutch East Indies, between Sumatra and Borneo, 130 miles long, with a width varying from 10 to 30; pop. 80,921, a considerable proportion being Chinese. It is celebrated for its excellent tin, of which the annual yield is above 4,000 tons.

Bancroft, Aaron, a Unitarian clergyman, born in Reading, Mass., Nov. 10, 1755; graduated at Harvard,

in 1778; became pastor in Worcester in 1785, where he remained nearly 50 years. Besides a great number of sermons his works include a "Life of George Washington" (1807). He was the father of the historian, George Bancroft. He died at Worcester, Mass., Aug. 19, 1839.

Bancroft, George, an American historian, born near Worcester, Mass., Oct. 3, 1800. He was educated at Harvard and in Germany, where he made the acquaintance of many literary men of note. In 1824 he published a translation of Heeren's "Politics of Ancient Greece," and a small volume of poems, and was also employed in collecting materials for a history of the United States. Between 1834 and 1840 three volumes of his history were published. In 1845 he was appointed Secretary of the Navy, and effected many reforms and improvements in that department. He was American Minister to England from 1846 to 1849, when the University of Oxford conferred on him the honorary degree of D. C. L. He took the convertaint, while in Everyone to the opportunity, while in Europe, to perfect his collections on American history. He returned to New York in 1849, and began to prepare for the press the fourth and fifth volumes of his history, which appeared in 1852. The sixth appeared in 1854, the seventh in 1858, the eighth soon after, but the ninth did not appear until 1866. From 1867 to 1874 he was Minister Plenipotentiary at the Court of Berlin. The 10th and last volume of his great work appeared in 1874. An additional section appeared, first tory of the Formation of the Constitution of the United States, and the whole came out in six volumes in 1884-1885. He settled in Washington on returning from Germany, in 1875, and died there, Jan. 17, 1891.

Bancroft, Hubert Howe, an American historian, born in Granville, Ohio, May 5, 1832. In 1852 he went to California to establish a book business, and began to collect documents, maps, books and MSS. for a complete

Bancroft, The, a steel gunboat of the United States navy; built expressly for a practice ship for the cadets of the United States Naval Academy; launched in 1892.

Bandai-San, a volcano in Japan; 140 miles N. of Tokio. Its summit consists of several peaks, the highest of which is 6,035 feet above the ocean and 4,000 feet above the surrounding plain. On July 15, 1888, there was a terrible explosion of steam which blew out a side of the mountain, making a crater more than a mile in width, and having precipitous walls on three sides. The debris of broken rock and dust poured down the slope and over an area of 27 square miles, killing 461 persons and covering many villages.

Banda Islands, a group belonging to Holland, Indian Archipelago, S. of Ceram, Great Banda, the largest, being 12 miles long by 2 broad. They are beautiful islands, of volcanic origin, yielding quantities of nutmeg. Goenong Api, or Fire Mountain, is a cone-shaped volcano which rises 2,320 feet above the sea. Pop. about 7,000.

Banda Oriental, a State of South America, now usually called URU-GUAY.

Bandel, Ernst von, a Bavarian sculptor, born in 1800, at Ansbach; studied art at Munich, Nuremberg, studied art at Munich, Nuremberg, and Rome; and from 1834 lived chiefly at Hanover, engaged off and on, for 40 years, on his great monument of Arminius, near Detmold, 90 feet high, which was unveiled by the Emperor Wilhelm on Aug. 16, 1875. He died near Donauworth, Sept. 25, 1876.

Bandelier, Adolph Francis Alphonse, a Swiss-American archæologist, born in Berne, Aug. 6, 1840; settled early in the United States. where he did important work under the Archæological Institute of America. His studies were chiefly among the Indians of New Mexico and Arizona, Central America and Mexico. He published many papers on the subject. Died March 19, 1914.

Band Fish. The red band fish. It is about 15 inches long. Its bril-"History of the Pacific States" from Mexico to Alaska. In 1905 he gave his birary of 60,000 volumes and 500 original MSS. to the University of California. Died, 1918. Bandicoot, the largest known species of rat, attaining the weight of two or three pounds, and the length, including the tail, of 24 to 30 inches. It is a native of India, and is very abundant in Ceylon. Its flesh is said to be delicate and to resemble young pork, and is a favorite article of diet with the coolies.

Bandiera, Attilio and Emilio, two brothers of a Venetian family, lieutenants in the Austrian navy, who attempted a rising in favor of Italian independence in 1843. The attempt was a failure, and they fled to Corfu; but, misled by false information they ventured to land in Calabria with 20 companions, believing that their appearance would be the signal for a general insurrection. One of their accomplices had betrayed them, and the party was captured at once by the Neapolitan police. Attilio and Emilio were shot along with seven of their comrades in the public square of Cosenza, on July 25, 1844.

Bandinelli, Baccio, son of a famous goldsmith of Florence, and one of the best sculptors of his time, was born at Florence in 1493. Among his best works are his colossal group of "Hercules," with Cacus at his feet, his "Adam and Eve," his copy of the "Laccoon," and the exquisite bassirilievi which adorn the choir of the Duomo in Florence, where he died in 1560.

Baner, Johan Gustafsson, a Swedish general in the Thirty Years' War, born in 1596; made his first campaigns in Poland and Russia, and accompanied Gustavus Adolphus, who held him in high esteem, to Germany. After the death of Gustavus, in 1632, he had the chief command of the Swedish army, and, in 1634, invaded Bohemia, defeated the Saxons at Wittstock, Sept. 24, 1636, and took Torgau. He ravaged Saxony again in 1639, gained another victory at Chemnitz, and, in 1640, defeated Piccolomini. In January, 1641, he very nearly took Ratisbon by surprise. He died in 1641.

Bang, Herman, a Danish novelist, born in 1857. He came into notice about 1879, from which time he published a number of novels and some poems. He died in 1912.

Bangalore, a town of Hindustan, capital of Mysore, and giving its name to a considerable district in the E. of Mysore State. Pop. 237,496.

Bangkok, the capital city of Siam, situated on both banks of the Menam, about 20 miles from its mouth. The population in 1923 was 745,610, nearly half of whom are Chinese, the others, including Burmese, Annamese, Cam-bodians, Malays, Eurasians, and Eu-The foreign trade of Siam centers in Bangkok, and is mainly in the hands of the Europeans and Chinese. The approach to Bangkok by the Menam, which can be navigated by ships of 350 tons burden (large sea-going ships anchor at Paknam, below the bar at the mouth of the river), is exceedingly beautiful. The internal traffic of Bangkok is chiefly carried on by means of canals, there being only a few passable streets in the whole city. Horses and carriages are rarely seen, except in the neighborhood of the palaces. The native houses on land—of bamboo or other wood, like the floating houses—are raised upon piles, six or eight feet from the ground, and are reached by ladders. The circumference of the walls of Bangkok, which are 15 to 30 feet high, and 12 broad, is about 6 milee

Bangkok is now the permanent residence of the King. The palace is surrounded by high walls, and is nearly a mile in circumference. It includes temples, public offices, accommodation for officials and for some thousands of soldiers, with their necessary equipments, a theater, apartments for a crowd of female attendants, and several Buddhist temples, or chapels. Several of the famous white elephants are kept in the courtyard of the pal-Throughout the interior are distributed the most costly articles in gold, silver, and precious stones. The chief exports are rice, sugar, pepper, cardamoms, sesame, hides, fine woods, ivory, feathers, and edible birds' nests. The imports are tea, manufactured silks and piece goods, opium, hardware, machinery, and glass wares. In 1893, a treaty was concluded at Bangkok, by which Siam made large cessions to France, two French gunboats having forced their way to the capital after an ineffective defense.

Bangor, city, port of entry, and capital of Penobscot county, Me.; at junction of the Penobscot and Kenduskeag rivers and on the Maine Central railroad; 140 miles N. E. of Portland; has exceptional power for manufacturing from the Penobscot river; is chiefly engaged in the lumber industry; and is the seat of a noted theological seminary. Pop. (1920) 25,978; (1930) 28,749.

Bangs, John Kendrick, an American humorist and editor, born in Yonkers, N. Y., May 27, 1862. He was long famous for his light verse and humorous stories. Died, 1922.

Bangs, Lemuel Bolton, an American physician; born in New York, Aug. 9, 1842; was president of the American Association of Genito-Urinary Surgeons (1895) and editor of "American Text-Book of Genito-Urinary Diseases." D. Oct. 4, 1914.

Bangweolo (also called Bemba), a great Central African lake, discovered by Livingstone in 1868, which is 150 miles long by 75 in width, and 3,700 feet above the sea. On its S.

shore Livingstone died.

Banian, or Banyan, an Indian trader, or merchant, one engaged in commerce generally, but more particularly one of the great traders of Western India, as in the seaports of Bombay, Kurrachee, etc., who carry on a large trade by means of caravans with the interior of Asia, and with Africa by vessels.

Banim, John, an Irish novelist, dramatist, and poet, born in Kilkenny, April 3, 1798; died in Kilkenny, Aug. 13, 1842.

Banishment (the act of putting under ban, proclamation, as an outlaw), a technical term for the punishment of sending out of the country under penalties against return.

Banister, John, an Anglo-American scientist, born in England; set-tled in the West Indies, and later in Virginia, in the vicinity of Jamestown, where he devoted himself to the study of botany. He died in 1692. Bankiva Fowl, a fowl living wild His son, JOHN, born in Virginia, was in Northern India, Java, Sumatra, etc. educated in England, and studied law there; became Colonel in the Virginia

otic conventions of the Revolutionary period; was a Representative from Virginia in the Continental Congress in 1778-1779, and one of the signers of the Articles of Confederation. He died near Hatchers Run, Va., in 1787.

Banjermassin, a former Sultanate in the S. E. of Borneo, with an area of 5,928 square miles, and a population of about 300,000, chiefly Mohammedans. Tributary to Holland since 1787, it was annexed on the death of the last Sultan in 1857, and is now governed by the Dutch Resident for the S. and E. of Borneo, who has an assistant at Martapura, where the Sultans formerly lived.

Banjo, a musical instrument with five strings, having a head and neck like a guitar, with a body or sounding-board hollow at the back, and played with the hand and fingers. It is the favorite instrument of the plantation negroes of the Southern States and their imitators, and seems to have had its origin in the bandore, a musical instrument like a lute or guitar, invented by John Ross or Rose, a famous violin-maker, about 1562.

Bank, primarily an establishment for the deposit, custody and repayment on demand, of money; and obtaining the bulk of its profits from the investment of sums thus derived and not in immediate demand. The term is a derivative of the banco or bench of the early Italian money dealers.

Bank Acceptances, commercial notes for discount which the Federal Reserve Banking Act of 1913 permitted National banks to accept. This system of financing trade has been in operation abroad for many years and to some extent in the United States, but has never been extended to domestic business lest the credit privi-lege should be overdone. The process is about the same as having an ordinary note discounted at a bank, but is largely restricted to foreign business.

English Henry, an Bankes, statesman and historian; born in London in 1757; died Dec. 17, 1834.

Bank Note, an engraved certifi-cate representing its face value in spemilitia; member of the Virginia Ascie. In the production of bank notes, sembly; and prominent in the patrithe principal purpose is to render their

forgery impossible, or at least easy of detection. This is sought to be effected by peculiarity of paper, design, and printing.

In the United States, the bank notes at present in circulation are manufactured by the Government Bureau of Engraving and Printing, the paper being made by a private concern, un-der a patented process, the chief ingredients being a mixture of linen and cotton fiber, into which are in-troduced threads of silk, so arranged as to be perceptible after the notes are printed. This style of paper is furnished only to the government. Superior skill is exercised in engraving the plates, nearly all parts of them being executed by the geometrical lathe and the ruling machine the work of which it is impossible to imitate successfully by hand. The printing of the notes is done in colored inks of the best quality, sometimes as many as four shades being used. The great expense of the machines used in the engraving, and the superior quality of the work generally, renders successful counterfeiting almost impossible. The notes, when badly worn, are returned to the United States Treasury, other notes being issued in their stead.

Bankruptcy Laws, regulations passed by a competent authority with a view to distributing the property of an insolvent equitably among his creditors and free the debtor from further obligation. In England, before 1841, only a tradesman could be a bankrupt. This distinction was then abolished. It was abolished in the United States in 1869. The act "to establish a uniform system of bankruptcy throughout the United States," was passed by both Houses of the 55th Congress, and by the approval of President McKinley, became a law on July

1, 1898.

The provisions under which a man into bankruptcy against his will are as follows: (1) Where a man has disposed of his property with intent to defraud. (2) Where he has disposed of his property to one or more creditors to give a preference to them. (3) Where he has given a preference through legal proceedings. (4) Where a man has made a voluntary assignment for the benefit of his and in 1858, and in 1859 he was electcreditors generally. (5) Where a ed Governor of his native State. On

man admits in writing that he is bankrupt. The last two provisions are practically voluntary proceedings. Under the common law, a man is considered insolvent when he cannot pay his debts when they are due; under the new law, he is deemed insolvent only when his property, fairly valued, is insufficient to pay his debts. Only two offenses are cited under the new law: one when property is hidden away after proceedings in bankruptcy have been begun, and the other when perjury is discovered. Discharges are to be denied in only two cases; one, in which either of the offenses detailed has been committed, and the other, when it is shown that fraudulent books have been kept. The term of imprisonment for either of these offenses is not to exceed two years.

The law provides a complete system throughout the United States, and for its administration by the United States courts in place of the different systems formerly in existence in the various States administered by State courts. In bankruptcy proceedings, a bankrupt debtor may turn over all his property to the court, to be administered for the benefit of his creditors, and then get a complete discharge from his debts. A bankrupt may of his own motion offer to surrender his property to the administration of the United States court and ask for his discharge in voluntary bankruptcy, or creditors may apply to the court to compel a bankrupt to turn over his property to be administered under the act for the benefit of the creditors in voluntary bankruptcy. The bankrupt who has turned over all his property and conformed to the provisions of the act, is entitled to a judgment of court discharging him. The law was slightly amended in 1903.

Banks, Sir Joseph, an English naturalist, born in London in 1743. He died in 1820, and bequeathed his collections to the British Museum.

Banks, Nathaniel Prentiss, an American legislator and soldier, born in Waltham, Mass., Jan. 30, 1816. At first a factory worker, he studied law, and became successively a member of the State and National Legislatures. He was Speaker of Congress in 1856,

the outbreak of the Civil War, he took a command in the army, at first on the Potomac, then at New Orleans, and finally on the Red river. Relieved of his command in 1864, he re-entered Congress, voting mainly with the Republican party. He died in Waltham, Sept. 1, 1894.

Banks, Thomas, English an sculptor, born in 1735. He died in 1805.

Banks in the United States, financial institutions comprising (1) National banks; (2) State banks; and (3) savings banks, consisting of (a) mutual savings banks; and (b) stock savings banks. These are general throughout the entire country. In addition to these, are (1) co-operative banks, common to New England, especially Massachusetts; (2) loan and trust companies, established in nearly all the large cities; and (3) building and loan associations, now represented in most of the States and Territories. The last three classes partake of some of the features of regular banking, especially in the reception of money on deposit, subject to call, and the pay-ment of interest thereon. The first three kinds of banks only are here considered.

The first bank in the United States was organized in Philadelphia in 1780, and a Bank of North America was planned in 1781 and opened in 1782. The Massachusetts Bank was incorporated in 1784; that of New York was chartered in 1791, although, since 1784, under Alexander Hamilton's "Articles of Association," it had been doing business. Alexander Hamilton also originated a plan for a United States bank, with a capital of \$10,000,000, three-fourths to be paid in United States stock, at 6 per cent., which plan was adopted and approved by Washington in 1791. The bank was reorganized in 1816 with a capital of \$35,000,000, the United States subscribing \$7,000,000, with interest at 6 per cent., but in consequence of a general financial depression, was, the next year, in great danger of failure. Congress refusing to renew the charter, a State bank, called the United States bank, was chartered in Pennsylvania, and eventually failing, the whole account was residently failing, the way approved a new currency act,

The \$28,000,000 deposited by shareholders was totally lost, while the Gov-ernment realized \$6,093.167 upon its investments of stock. State banks were afterward chartered in the interests of individual and dominant political parties. The charters were sometimes fraudulently obtained and currency issued to three times the amount of their capital, and, in 1814, 1837, and 1857, many of them suspended payment. A reform movement in bank currency was inaugurated in Massachusetts in 1825, and a "safety-tynd" curter 1825, and a "s fund" system, recommended by Mr. Van Buren, adopted in 1829. In 1838 the Free Bank Act passed the New York Legislature, which authorized any number of persons to form a banking association, subject to certain

specified conditions and liabilities.
On Feb. 25, 1863, the National banking system was organized, but the act establishing it was modified by that of June 3, 1864. This provided for a National Bank Bureau in the Treasury Department, whose chief officer is the Comptroller of the Currency. Under it National banks could be organized by any number of individuals, not less than five, the capital to be not less than \$100,000 except in cities of a population not exceeding 6,000; in these banks could be established a capital of not less than \$50,000. In cities having a population of 50,000 the capital stock could not be less than \$200,000. One third of the capital was required to be invested in United States bonds, which were deposited in the Treasury for security, upon which notes were issued equal in amount to 90 per cent. of the current market value, but not exceeding 90 per cent. of the par value; and these notes were receivable at par in the United States for all payments to and from the Government, except for duties on imports, interest on the public debt, and in redemption of the national currency. On March 3, 1865, an act was passed by which the circulation of the State banks was taxed 10 per cent., which drove their notes out of existence.

Various laws have since been passed whole account was settled in 1856. which, among other things, established the gold dollar as the standard unit of ence of Scotland. The English are value, and placed at a parity with said to have lost 30,000, and the that standard all forms of money is Scotch 8,000 men. Not far off was sued or coined by the United States. The bill also made a number of improvement change in the property of the standard of The bill also made a number of important changes in the regulations of the 11th century. In conjunction governing National banks. The new with Macbeth, cousin of Duncan, the law permitted National banks, with \$25,000 capital, to be organized in places of 3,000 inhabitants or less, whereas the minimum capital previ-ward, violently dethroned Duncan, ously was \$50,000. It also permitted banks to issue circulation on all classes of bonds deposited up to the par value of the bonds, instead of 90 per cent. of their face, as before.

More recent features of banking in

the United States are the Oklahoma scheme for guaranteeing the deposits of banks, which Attorney-General Bonaparte nullified, as far as Na-tional banks were concerned, in 1908; the combined savings and insurance banks of Massachusetts, known as of Massachusetts, known as of "Macbeth."

"Brandeis banks," established in 1908; the School Savings Banks pernatural being, supposed by some of (g. v.) founded by J. H. Thiry, in the persantry in Ireland and the ScotNew York, in 1885; and the Postal tish Highlands to sing a mournful ditSavings Banks (g. v.) established to under the windows of the house SAVINGS BANKS (q. v.), established by Congress in 1910. At the special session of Congress in 1913 an elaborate scheme was introduced for reforming the national banking laws.
This resulted in the establishment of
the Federal Reserve System, under
which it was obligatory for National
banks and permissible for State banks to become associated in the new organization (see Federal Reserve System; Federal Farm Banks).

On Jan. 1, 1929, there were 7,691 National banks within the United States, with an aggregate capital of \$1.593,856,000. They had a total of \$22,639,337,000 on deposit, while their total resources were \$28,508,-239,000.

Bannock, a tribe of North American Indians belonging to the Shoshoni stock. They are divided into two sections, inhabiting Nevada and Montana.

Bannockburn, a village of Stir-lingshire, Scotland, 3 miles S. S. E. of Stirling, on the Bannock Burn, a little affluent of the Forth. In the great battle of Bannockburn, fought on June 24, 1314, Robert Bruce, with 30,000 Scotch, gained a signal victory over Edward II., with 100,000 English, and the independ-

and caused him to be secretly assassinated. Banquo, though not an accomplice, was a witness of the crime: and being subsequently regarded by Macbeth with fear and suspicion, the latter invited him and his son to supper, and hired assassins to attack them on their return home during the darkness of night. Banquo was slain, but the youth made his escape. Shakespeare has interwoven this oc-

ty under the windows of the house when one of the inmates is about to die

Bantam, a variety of the common domestic fowl, originally brought from the East Indies, noted for its small size and pugnacity.

Banting, Frederick Grant, discoverer of insulin, born near Allison, Ont., in 1891. Studied medicine, served in the World War as a surgeon, later devoted his time to research. Occupies the Chair of Medical Research at Toronto University and, in 1923, received the Nobel Prize jointly with his assistant, Dr. MacLeod, for their dis-covery of insulin, an extract from the

pancreas, for treating diabetes.

Banting, William, an Englishman of notable corpulence, born in 1797, who by adopting a simple diet was able to relieve himself of his superfluous flesh. The dietary recom-mended was the use of butcher's meat principally, and abstinence from beer, farinaceous food, and vegetables. He died in 1878.

Bantu, the ethnological name of a group of African races dwelling below about 6° N. lat., and including the Kaffirs, Zulus, Bechuanas, the tribes of the Loango, Kongo, etc., but not the Hottentots.

Banvard, John, an American artist, poet, and dramatist, born in New York about 1820; died in 1891.

Banvard, Joseph, an American Baptist clergyman and historian, brother of the preceding, born in New York in 1810; died in 1887.

Banyan Tree, a species of the genus ficus. It is regarded as a sacred tree by the Hindus.

BANYAN TREE.

Bapaume, a small town of N. France, 15 miles S. S. E. of Arras and 25 miles N. W. of St. Quentin, the scene of the great battle of Jan. 3, 1871, when the Germans were forced back behind Somme. The town also figures in the Peace of the Pyrenees, in 1659, by which it was ceded to Louis XIV., and in the great Arras campaign of 1917. See APPENDIX: World War.

Baptism (from the Greek baptizo, from bapto, to immerse or dip), a rite which is generally thought to have been usual with the Jews even before Christ, being administered to proselytes. From this baptism, however, that of St. John the Baptist differed. cution on account of their rejection of infant baptism. The history of the Baptists in England prior to the 16th century is still a matter of controversy. The first regularly organized church was Arminian, and was established in 1610 or 1611. A Calvinistic

because he baptized Jews also as a symbol of the necessity of perfect purification from sin. Christ himself never baptized, but directed his disciples to administer this rite to converts (Matt. xxviii: 19); and baptism, therefore, became a religious ceremony among Christians, taking rank as a sacrament with all sects which acknowledge sacraments. Three modes of administering the rite have been adopted - immersion, pouring and The question, on which sprinkling. there have been innumerable disputes, turns upon the meaning of the Greek preposition following the verb. The advocates of baptism by immersion, as the only valid form, claim that the preposition is "in;" the advocates of sprinkling contend that the preposition is, "with." The Greek Church adopted the custom of immersion; but the Western Church adopted or allowed the mode of baptism by pouring or sprinkling, since continued by most Protestants.

Baptists, a Protestant denomination based on the belief that immersion is the only Scriptural mode of baptism, and that those only are proper subjects for this ceremony who are converted and profess personal faith in Christ. They thus reject both infant baptism and baptism by sprinkling or pouring of water as invalid. There are, however, other sects, including the Mennonites, the Christians, the Disciples of Christ, etc., who accept the prominent principles of the Baptists in whole or in part, and yet are not classified with them, owing to some minor differences. The Baptists reject the name of Anabaptists as a term of reproach, holding that it is incorrect, because their members generally receive the rite on their admission to the church, and because they were not identified with the Baptists of Munster. The Baptists first appeared in Switzerland, in 1523, and soon spread to Germany, Holland, and other continental countries, whence they were driven to England by persecution on account of their rejection of infant baptism. The history of the Baptists in England prior to the 16th Baptist Church was founded about 1633. Those holding Arminian views received the name of General Baptists, and those holding Calvinistic views the name of Particular Baptists. In 1640 there were seven Baptist congregations in London.

The Baptists in the United States spring historically from the English and Welsh Baptists; but the first Baptist church was organized by Roger Williams, who was a minister in the Massachusetts Colony previous to his immersion. He was persecuted for holding principles which inclined to Anabaptism, and for antagonizing the authorities of the colony in ecclesiastical matters. After being immersed, in 1639, by Ezekiel Holliman, whom he in turn immersed with 10 others, he organized a Baptist Church in Providence, R. I. In 1644 he obtained Providence, R. I. In 1644 he obtained a charter which granted to the people of Rhode Island entire freedom of conscience. There were other Baptists, however, who emigrated from England in the 17th century, and, before the end of the 18th century, became numerous in New England, New York, Pennsylvania, Virginia, Georgia, and other States. In all the British colonies, excepting Rhode Island, the Baptists were persecuted for land, the Baptists were persecuted for a long time. In Massachusetts laws were issued against them in 1644; several of them were imprisoned in 1651; others exiled in 1669; and a Baptist meeting-house was closed in 1680. New York issued laws against them in 1662, and Virginia in 1664. This persecution had greatly abated at the beginning of the 18th century. After the Revolutionary War the Baptists increased with great rapidity, especially in the South and Southwestern States, and have steadily increased ever since.

There are at present three bodies of Regular Baptists, the Northern, the Southern, and the Colored, all of whom agree in doctrinal and ecclesiastical principles, but each has its own associations, State Conventions, and general missionary and other associations. In 1845 a controversy concerning slavery, which had been going on for some time, caused a division between the Baptists in the Northern and those in the Southern States, af-

tinued to support the nome Mission Society and the American Baptist Missionary Union, on an anti-slavery basis. In 1879 the question of reuniting the divisions was agitated, but pothing was accomplished. The tinued to support the Home Mission nothing was accomplished. Southern Division is the largest branch of white Baptists. After the division of 1845 the Southern churches established the Southern Baptist Convention, which holds annual meetings, where the promotion and direction of the denominational interests are considered, such as Sunday-schools, and home and foreign missions. It is composed of representatives from associations, other organizations, and from the churches. The Colored Baptists compose the largest body of Regular Baptists, although many Colored Bap-tists are not members of this division; those only being included who have separate churches, State Conventions, and associations. The Colored Baptists of the North are generally members of churches belonging to white associations. In 1866 the first State Convention of Colored Baptists was organized in North Carolina, the second in Alabama, and the third in Virginia, both in 1867, and the fourth in Arkansas in 1868. There are (1900) Colored conventions in 15 States and the District of Columbia. Besides these associations there are the American National Convention, which deliberates upon questions of general concern; the Consolidated American Missionary Convention, the General Association of the Western States and Territories, the New England Missionary Convention, and the Foreign Missionsionary Convention of the United States.

Besides the three large divisions of Baptists, there are 10 smaller ones.
(1) Six Principle Baptists date back to Roger Williams and the year 1639 for their origin. They differ from the Regular Baptists in holding the Ar-minian instead of the Calvinistic creed, and in the practice of the laying on of hands in the reception of members. (2) Seventh Day Baptists, in the United States, date their origin back to 1671, when Stephen Mumford, from England, organized the first church in Newport, R. I. Their only difference from other Baptists is found ter which the Northern Baptists con- in their keeping the seventh day as

"the Sabbath of the Lord." (3) Freewill Baptists. The first church of this sect was founded by Benjamin Randall in New Durham, N. H., in 1780. At first their organizations were called simply Baptist churches, but later the word "Freewill" was applied to them, in allusion to their doctrine concerning the freedom of the will. (4) Original Freewill Baptists date back to 1729, when a number of General Baptist churches were founded in North Carolina. In 1759 many of these general churches became Calvinistic. Those which did not join the Calvinistic association were called "Freewillers," because they held the doctrine of the freedom of will. (5) doctrine of the freedom of will. (5) General Baptists are thus named, because they originally differed from the Regular Baptists in holding that the atonement was for the whole race and not merely for those effectually called. They date back to the beginning of the 18th century. (6) Separate Baptists originated in the great Whitefield revival. In doctrine they generally agree with the Freewill Baptists. (7) United Baptists. A sect which sprang from the opposition to the great revi-val of George Whitefield. They hold moderate Calvinistic views. (8) Baptist Church of Christ. A sect organized in 1808 in Tennessee, where half their number is found. They have a mild form of Calvinism with a general atonement. (9) Primitive Baptists are variously known as Primitive, Old ment to conciliate the Jews, to reschool, Regular, and Autimission. Baptists. Their organization occurred they might choose, at the yearly about 1835. They do not believe in the establishment of Sunday-schools, lease Jesus, but the Jews demanded other societies. about 1835. They do not believe in the establishment of Sunday-schools, mission, Bible, and other societies, which they hold are unscriptural because they are human institutions. (10) Old Two-Seed-in-the-Spirit-Predestinarian Baptists. A conservative body of Baptists who are strongly Calvinistic, believing firmly in predestination. The phrase "Two-Seed" is understood to mean their belief that there are two seeds, one of the good and one of the evil. The doctrine is supposed to have been originated by Elder Daniel Parker, who preached in Tennessee in 1806-1817, in Illinois till 1836, and later in Texas, where he died.

All Baptist denominations are con-

exception of the Original Freewill Baptists. In 1928 statistics for 1926 showed Baptist bodies, 60,192 churches; over 50,000 ministers; 8,-441,913 members. Of these the Southern Baptist Convention had 23,374 churches and 3,524,378 members; the Negro Baptists 22,081 churches and 3.196.623 members: Northern Baptist Convention 7.611 churches and 1,289,-966 members; Primitive Baptists 2,267 churches and 81,374 members. Other Baptist bodies 4,859 churches and 348.541 members.

Baptist Young People's Union of America, an association representing numerous young people's socie-ties connected with the Baptist Churches in all the States and in Canada. Organized in June, 1891, in Chicago, Ill., its present headquarters.

Bar, in hydrography, a bank of sand, silt, etc., opposite the mouth of a river, which obstructs or bars the entrance of vessels. The bar is formed where the rush of the stream is arrested by the water of the sea, as the mud and sand suspended in the river water are thus allowed to be deposited. It is in this way that deltas are formed at the mouths of rivers. The navi-gation of many streams is kept open only by constant dredging.

Barabbas, a noted robber in Christ's time, who was awaiting death for sedition and murder. was a custom of the Roman govern-Barabbas.

Baracoa, a seaport town in the province of Oriente, Cuba; on the N. E. coast; 90 miles E. N. E. of Santiago; is the oldest settlement in Cuba and one of the oldest in the New World (1514); has a small, shallow harbor. Pop. (Est.) 30,000.

Baranoff Island, one of the Alexander Islands, Alaska. It is about 75 miles long. On its coast is the town of Sitka. The island derives its name from the Russian trader, Baranoff, who, in 1799, took possession of it.

Barataria Bay, in the S. E. part gregational in polity, with the possible of Louisiana, extending N. from the Gulf of Mexico, between the parishes of Jefferson and Plaquemine. This bay is about 15 miles long by 6 wide. It, and the lagoons branching out of it, were rendered notorious about the years 1810-1812 as being both the headquarters and rendezvous of the celebrated Lafitte and his buccaneers.

Baratier, Johann Philipp, a German litterateur, remarkable for the precocity of his intellect, was born in 1721. At the age of 7 he under-stood Greek and Hebrew, and two years later he compiled a Hebrew dicyears later the complete a fredew distinguished the was 13 when he translated the "Itinerary of Benjamin of Tudela." Excess of work and, perhaps, a too rapid development of his intellectual faculties brought about a languid malady, and, at the age of 19 years he died.

Barbacan, a projecting watch tower, or other advanced work, be-fore the gate of a castle or fortified town. The term barbacan was more especially applied to the out-work intended to defend the drawbridge, which in modern fortifications

is called the tete du pont.

Barbadoes, or Barbados, the most eastern of the West India Islands, first mentioned in 1518, and occupied by the British in 1625; length 21 miles, breadth, 13; area, 106,470 acres, or 166 square miles; mostly under cultivation. Capital, Bridgetown. It is more densely peopled than almost any spot in the world the population as estimated world, the population as estimated in 1927 was 169,385, or nearly 1,000 to the square mile. The climate is very hot, though moderated by the constant trade winds; and the island is subject to dreadful hurricanes.

Barbaro, Francesco, one of the most distinguished Italian authors of the 15th century, born at Venice, in 1398; died in 1454.

Barbaroux, Charles Jean Marie, one of the greatest of the Girondists, was born at Marseilles, March 6, 1767. He opposed the party of Marat and Robespierre, and even directly accused the latter of aiming at the dictatorship; consequently, he was, in May, 1793, proscribed as a royalist and an enemy of the Republic. He fled to Calvados, and thence with a few friends to the Gironde, erally in the open air, for a social enemy of the Republic. A large gathering of people, generally in the open air, for a social enemy of the Republic.

where he wandered about the country, hiding himself as he best could for about 13 months. At last, on the point of being taken, he tried to shoot himself; but the shot miscarried, and he was guillotined at Bordeaux, June 25, 1704. 25, 1794.

Barbary, a general name for the most northerly portion of Africa, extending about 2,600 miles from Egypt to the Atlantic, with a breadth varying from about 140 to 1,550 miles; comprising Morocco, Fez, Algeria, Tunis and Tripoli (including Barca and Fezzan). The principal races are the Berbers, the original inhabitants, from whom the country takes its name; the Arabs, who conquered an extensive portion of it during the times of the caliphs; the Bedouins, Jews, Turks, and the French colonists of Algeria, etc. The country, which was prosperous under the Conthesining was prosperous under the Carthaginians, was, next to Egypt, the richest of the Roman provinces, and the Italian States enriched them-selves by their intercourse with it. In the 15th century, however, it became infested with adventurers who made the name of Barbary corsair a terror to commerce, a condition of things finally removed by the French occupation of Algeria.

Barbary Ape, or Magot, a monkey — the macacus inuus, found in the N. of Africa, and of which a col-ony exists on the Rock of Gibraltar. It is the only recent European quadrumanous animal. It is sometimes called the magot, and is the species occasionally exhibited, when young, by showmen in the streets.

Barbazan, Arnauld Guilhem, Sire de, a French captain, who was distinguished by Charles VI. with the title of "Chevalier Sans Reproche," and by Charles VIII. with that of "Restaurateur du Royaume et de la Couronne de France," born about the end of the 14th century. He was killed at Bullegneville, in 1432.

1. Barbecue. 1. A beef dressed whole, as is done in an election campaign. To do this, the carcass of the animal, split to the backbone, is laid upon a large gridiron, under and around which is placed a charcoal fire.

tertainment or a political rally, one leading feature of which is the roasting of animals whole to furnish the numerous members of the party with needful food.

Barbel. 1. A small fleshy thread or cord, of which several hang from the mouth of certain fishes.

2. A knot of superfluous flesh growing in the channels of a horse's mouth.

Barber, one who shaves beards and dresses hair. In early times the operations of the barber were not confined, as now to shaving, hair-dressing, and the making of wigs; but included the dressing of wounds, blood-letting, and other surgical operations. It seems that in all countries the art of surgery and the art of shaving went hand in hand. The title of barber-chirurgeon, or barbersurgeon, was generally applied to barbers. The State of New York in 1903 adopted a law regulating the business of barbers, enforcing stringent sanitary rules in their shops, and appointing a commission to enforce the law.

Barber, Edward Atlee, an American archæologist, born in Baltimore, Md., Aug. 13, 1851; was graduated at Williston Seminary in 1869, and was assistant naturalist in the United States Geological Survey in 1874-1875. Subsequently he was engaged in gold dredging. His writings include a history of the ancient Pueblos and a large number of mag-

azine articles on ceramics.

Barber, Francis, an American general, born at Princeton, N. J., 1751; died 1783. He graduated at what is now Princeton University in 1767, entered the Revolutionary Army as a major in 1776, and rose steadily through meritorious service to the rank of Adjutant-General. He was accidently killed by a falling tree, after recovering from severe wounds received at the battles of Monmouth, Newton, and at Yorktown.

Barber, John Warner, an American author, born in Windsor, Conn., in 1798: died in 1885. His writings were mainly historical and include: State Annals; "Historical Scenes in the United States," "Religious Events," "Elements of General History," "Our Whole Country, Historican States," "Historican States," "States of General History," "Our Whole Country, Historican States of General Historican States of General History," "Our Whole Country, Historican States of General History," "Our Whole Country, Historican States of General Historican States of General History," "Our Whole Country, Historican States of General History," "Our Whole Country, Historican States of General Historican States of General

cal and Descriptive."

Barberini, a celebrated Florentine family, which since the pontificate of Maffeo Barberini (Urban VIII., 1623 to 1644), has occupied a distinguished place among the nobility of Rome.

Barberry, or Berberry, the English name of the berberis. The common barberry is planted in gardens or in hedges, being an ornamental shrub, especially when covered with a profusion of flowers or loaded with fruit. It has yellow flowers with an unpleasant smell, which, however, are much frequented by bees. Their juice is acid, hence they are used for preserves and confectionery.

Barber's Itch, a disease of the skin of the face caused by the entrance of a fungus into the hair follicles of the beard.

Barbet. Birds having short, conical bills, with stiff bristles at the base, short wings, and broad and rounded tails. It is from the bristles, which have an analogy to a beard, that the name is derived. These birds are found in the warmer parts of both hemispheres, the most typical coming from South America.

Barbette, a mound of earth on which guns are mounted to be fired over the parapet.

In fortification. En barbette: Placed so as to be fired over the top of a parapet, and not through embrasures.

Barbiano, Abrecht da, an Italian military officer; formed the first regular company of Italian troops organized to resist foreign mercenaries, about 1379. This organization, named the "Company of St. George," proved to be an admirable school, as from its ranks sprang many future officers of renown. He became Grand Constable of Naples in 1384, and died in 1409.

Barbier, Henri Auguste, a French poet, born in Paris, April 29, 1805; died in Nice, Feb. 13, 1882.

Barbier, Jules, a French dramatist, born in Paris; 1825; d. 1901.

Barbieri, Giovanni Francesco, otherwise known as GUERCINO (the squinter) DA CENTO, an eminent and prolific historical painter, born near Bologna in 1590. He died in 1666.

PAOLO ANTONIO BARBIERI, a celebrated still-life and animal painter, was a brother of Guercino; born 1596, died 1640.

Barbour, Erwin Hinckley, an American geologist, born near Oxford, O.; was graduated at Yale College in 1882; was assistant paleontol-ogist in the United States Geolog-ical Survey in 1882–1888; Stone Proical Survey in 1882-1888; Stone Pro-fessor of Natural History and Geol-ogy in Iowa College in 1889-1891; became Professor of Geology in the University of Nebraska, and acting State Geologist in 1891; and curator of the Nebraska State Museum since 1891. In 1893 he took charge of the annual Morrill geological expeditions, and since then he has also been engaged in the United States Geological and Hydrographic Surveys.

Barbour, John, a Scottish poet, born about 1316. His great epic, "The Bruce," tells the story of Robert Bruce and the battle of Bannockburn. It was written in 1375 and brought him favor from the King. He died in Aberdeen, March 13, 1395.

Barbour, John Humphrey, an American educator, born in Torrington, Conn., May 29, 1854. He was rector of Grace Church, Hartford, till 1889, and then became Professor of New Testament Literature and International Control of the Packelon Divinity. terpretation at the Berkeley Divinity School. He died in Middletown, Conn., April 29, 1900.

Barbour, William McLeod, a Congregational clergyman, born in Fochabers, Scotland, May 29, 1827; professor in Bangor Theological Seminary in 1868-1877; Professor of Divinity and college pastor in Yale, 1877-1887; became principal and Professor of Theology in the Congregational College in Montreal, Canada, in 1887. He died in 1892.

Barca, a commissariat of the Italian colony of Eritrea; area, 12,700 square miles; pop. (Est.) 35,000; capital, Agordat. The name was formerly applied to the whole country extending along the N. coast of Africa, between the Great Syrtis (now the ment of Tripoli; at another as an in- rial Guard. On the day the allies en-

dependent province, governed directly from Constantinople.

Barcelona, the most important manufacturing city in Spain, in province of same name; pop. (1924) 760,-572. The province of Barcelona has an area of 2,968 square miles, and pop. 1,349,282. Barcelona manufactures silk, woolens, cottons, lace, hats, firearms, etc., which form its principal exports. It imports raw cotton, coffee, cocoa, sugar, and other colonial produce; also Baltic timber, salt fish, hides, iron, wax, etc. Next to Cadiz it is the most important port in Spain. The harbor was extended and its entrance improved in 1875. Barcelona is noted for labor disturbances.

Barclay, Robert, the apologist of the Quakers, born in 1648, at Gordonstown, Moray, and educated at Paris, where he became a Roman Catholic. Recalled home by his father, he followed the example of the latter and became a Quaker. His first treaties in support treatise in support of his adopted principles, published at Aberdeen in the year 1670, under the title of "Truth Cleared of Calumnies," together with his subsequent writings, did much to rectify public sentiment in regard to the Quakers. He died in 1690. He was a friend of and had influence with James II.

Barclay de Tolly, Michael, Prince, a Russian military comman-der, of Scottish descent, born in Li-vonia in 1755. He began his military career in the campaigns against the Turks, the Swedes, and the Poles. He was wounded at Eylau, when he was made lieutenant-general. In March, 1808, he surprised the Swedes at Umea, by a march of two days over the ice which covered the Gulf of Bothnia. He was made governor-general of Finland, and, in 1809, appointed Minister of War. He was author of the plan of operations which was followed with signal advantage by the Russian army in the campaign of 1812. After the battle of Bautzen, May 26, 1813, he was appointed commander-in-chief of the Prusso-Russian army; and under him Witt-Gulf of Sidra) and Egypt, and bounded on the W. by Tripoli, and on the S. by the Libyan Desert. It was at one time considered a depart-Grand Duke Constantine the Imperior of the Constantine the Constantine

tered Paris he was created General ceeded the medical school. He died Field-Marshal. He died in 1818. in Hyde Park, N. Y., May 24, 1821.

Barclay-Allardice, Robert, known as Captain Barclay, the pedestrian, was born in 1779, and succeeded to the estate of Uric, near Stonehaven, in 1797. He died May 8, 1854. His feat of walking 1,000 miles in 1,000 consecutive hours took place at Newmarket, in June to July, 1809.

Barcochba, or Barcokecas ("son of a star"), a famous Jewish impostor, whose real name was Sim-eon, and who lived in the 2d century A. D. After the destruction of Jerusalem by Titus, the Jews, at dif-ferent periods, sought to regain their independence; and Barcochba, seeing his countrymen still impatient of the Roman yoke, resolved to attempt their emancipation. With this view he sought to sound the dispositions of his co-religionists of Egypt, Mesopotamia, Greece, Italy and Gaul, and sent forth emissaries, who traveled over all the provinces of the Roman Empire. When all was ready Barcochba, solemnly announced himself as King and Messiah, and seized by surprise on many fortified places. All who refused to submit to him, particularly the Christians, were put to death. The revolt was crushed by the Romans after a five years' conflict in which Barcochba perished miserably.

Bard, a poet by profession, especially one whose calling it was to cally one whose calling it was to celebrate in verse, song, and play the exploits of the chiefs or others who patronized him, or those of contemporary heroes in general. Bards of this character flourished from the earliest period among the Greeks, and to a lesser extent among the Ro-mans. Tacitus seems to hint at their existence among the Germanic tribes. It was, however, above all, among the Gauls and other Celtic nations that they flourished most.

Bard, Samuel, an American physician, born in Philadelphia, April 1, 1742; practiced in Philadelphia and the future Czar, Alexander II. While New York; was the principal mover a young officer in the hussars, some in the establishment of the medical love passages with a Grand Duchess school of Kings (Columbia) College: caused his transfer to the Caucasus, president of the New York College of Physicians and Surgeons that suc- Shamyl secured him, in 1852, the rank

Barebone, or Barbone, Praise-God, a member of the legislative body assembled by Cromwell in 1653, after the dissolution of the Long Parliament. The royalists facetiously distinguished him by calling the convention "Barebone's Parliament."

Barefooted Friars, monks who use sandals, or go barefoot. They are not a distinct body, but may be found in several orders of mendicant friars -for example, among the Carmelites, Franciscans, Augustinians. There were also barefooted nuns.

Barentz, Willem, a Dutch navi-gator. He was one of the early Arctic explorers; his attempt being to find a northeast passage to China. In his first voyage he reached lat. 77°-78′, and in his last, 80° 11′. He commanded several exploring expeditions around Nova Zembla and Spitzbergen, on one of which he had seven vessels loaded with rich goods for Eastern trade. In the summer of 1596, he set out with two ships, which were frozen in at Ice Haven in September. The following June they attempted to reach the mainland in boats, but most of them were lost.

Barham, Rev. Richard Harris, a humorous writer, born in 1788 at Canterbury; educated at Paul's School, London, and at Brasenose, Oxford. He published an unsuccessful novel, Baldwin, wrote nearly a third of the arti-cles in Gorton's Biographical Dictionary, and contributed to Blackwood's Magazine. In 1824 he was appointed priest in ordinary of the chapel-royal, and afterwards rector of St. Mary Magdalene and St. Greorgy-by-St.-Paul, London. In 1837, on the starting of Bentley's Miscellany, he laid the main foundation of his literary fame by the publication in that periodical of the Ingoldsby Legends. He died in 1845.

Bariatinski, Alexander Ivanovich, Prince, a Russian field-marshal, born in 1814, and educated with of lieutenant-general. He died in Geneva, March 9, 1879.

Baring, family name of the founders of one of the greatest financial and commercial houses in the world; now known as Baring Brothers & Co. The father of the founders was JOHN BARING, a German cloth manufacturer, who started a small business at Larkbear, near Exeter, England, in the first half of the 18th century. Two of his sons, Francis and John (1730-1816), established in London in 1770 the now existing house.

In 1885, the then head of the firm, Edward Charles Baring, was raised to the peerage, as Baron Revelstoke.

Barite, or Baryta, a mineral called also baroselenite, sulphate of baryta and heavy spar. It is found in the United States and on the continent of Europe. It is sometimes trans-

parent, sometimes opaque.

Baritone, or Barytone, a male voice, the compass of which partakes of those of the common bass and the tenor, but does not extend so far downward as the one, nor to an equal

height with the other.

Barium, the metallic basis of baryta, which is an oxide of barium; specific gravity 4; symbol Ba. It is only found in compounds, such as the common sulphate and carbonate, and was isolated by Davy for the first time in 1808. It is a yellow, malleable metal, which readily oxidizes, decomposes water, and fuses at a low temperature.

Bark, the exterior covering of the stems of exogenous plants. It is composed of cellular and vascular tissue, is separable from the wood, and is often regarded as consisting of four layers. Bark contains many valuable products, as gum, tannin, etc.; cork is a highly useful substance obtained from the epiphlœum; and the strength and flexibility of bast make it of considerable value. Bark used for tanning is obtained from oak, hemlock-spruce, species of growing in Australia, etc. acacia. Angostura bark, Peruvian, or cinchona bark. cinnamon, cascarilla, etc., are useful barks.

Bark, or Barque, a three-masted vessel of which the foremast and mainmast are square-rigged, but the

Bark, Peruvian, is the bark of various species of trees of the genus cinchona, found in many parts of South America, but more particularly in Peru, and having medicinal proper-ties. Its medicinal properties depend upon the presence of quinine, which is now extracted from the bark, imported, and prescribed in place of nauseous mouthfuls of bark.

Barker, Albert S., an American naval officer, born in Massachusetts, March 31, 1843; was graduated at the United States Naval Academy in 1859; served on the frigate "Mississippi" in the operations to open the Mississippi respectively. Mississippi river in 1861-1863, taking part in the bombardment and passage of Forts Jackson and St. Philip and the Chalmette batteries, the capture of New Orleans, and the attempted pas-sage of Port Hudson, where his vessel was destroyed. He became Captain was destroyed. He became Captain May 5, 1892; commanded the cruiser "Newark" during the war with Spain; subsequently succeeded to the command of the battleship "Oregon," which he took to Manila; became a Rear-Admiral, and was placed in command of the Norfolk Navy Yard in 1899; and in July, 1900, became commandant of the Brooklyn Navy Yard. mandant of the Brooklyn Navy Yard. He died Jan. 29, 1916.

Barker, Fordyce, an American physician, born in Wilton, Franklin co., Me., May 2, 1819; died in New York city, May 30, 1891.

BARK.

Barker, Matthew Henry, English novelist; born at Deptford in mizzenmast has fore-and-aft sails only. 1790. Died in London, June 29, 1846. Bark Louse, or Scale Insect. The bark lice are very small insects, whose females are wingless, their bodies resembling scales. They sting the bark of trees with their long, slender beak, drawing in the sap, and, when very numerous, injure or kill the tree. On the other hand, the males have two wings, but no beak, and take no food.

Barksdale, William, an American statesman and military officer, born in Rutherford county, Tenn., Aug. 21, 1821. He entered Congress in 1853, but gave up his seat when his State seceded, and took command of a regiment of Mississippi volunteers. He was made a Brigadier-General after a campaign in Virginia, and was killed at Gettysburg, July 2, 1863.

Barley. Barley is the hardiest of all the cereals, and was originally a native of Asia, but it is now cultivated all over the world, even as far N. as Lapland. In former times, it was largely used as an article of food, but the greater proportion of the barley now grown is used in the preparation of malt and spirits.

Barleycorn, John, a personification of the spirit of barley, or malt liquor, often used jocularly, and in humorous verse.

Barlow, Francis Channing, an American military officer, born in Brooklyn, N. Y., Oct. 9, 1834; was graduated at Harvard College in 1855; studied law in New York, and practiced there. In 1861 he enlisted as a private in the 12th Regiment, New York State National Guard, which was among the first troops at the front. He was promoted Lieutenant after three months' of service; Colonel during the siege of Yorktown; distinguished himself in the battle of Fair Oaks, or Seven Pines, for which he was promoted Brigadier-General; fought in almost every subsequent battle of the Army of the Potomac. He was severely wounded at Chancellorsville, May 2, 1863, and at Gettysburg, July 1, 1863. He was mustered out of the service with the rank of Major-General of volunteers. In 1866–1868, he was Secretary of State of New York; in 1871 became Attorney-General; and in 1873 resumed law practice in New York. He died in New York york. Jan. 11, 1896.

Barlow, Joel, an American poet and diplomatist; born in Reading, Conn., March 24, 1754. In the course of his adventurous career he fell in with the French army and was a sharer in its memorable retreat from Russia. Being overcome by cold and privation, he died near Cracow, Dec. 22, 1812.

Barmecides, an illustrious family of Khorassan, the romance of whose history is equally familiar to Europeans and Americans in the "Thousand and One Nights" (Arabian Nights' Entertainments), and to Orights' their historicans. entals in the pages of their historians and poets; and who flourished at the Court of the early Abbasside Caliphs. Barmec, or Barmek, the founder of the family, transmitted the honors conferred on him by the Caliph Abd-al-Malik to his son, Khalid, and from him they passed to his son, Yahia, who, becoming tutor to the famous Haroun-al-Raschid, acquired an influence over that Prince; which, with Haroun's personal affection for the family, carried his sons, Fadl, or Fazl, Giaffar, Mohammed, and Mousa, to the highest dignities of the Court. The virtues and munificence of the Barmecides were, for a long period, displayed under favor of Haroun, as well as to the admiration of his subjects; but one of the brothers, Giaffar, having at last become an object of suspicion to the cruel and treacherous ca-liph, Yahia and his sons were suddenly seized, Giaffar beheaded, and the others condemned to perpetual impris-onment. The year 802 is assigned as the date of this tragedy.

Barnabas, St., or Joseph, a disciple of Jesus, and a companion of the Apostle Paul. He was a Levite, and a native of the Isle of Cyprus, and is said to have sold all his property, and laid the price of it at the feet of the apostles (Acts iv: 36, 37). He was a beloved fellow laborer with Paul.

Barnacle, a common crustacean belonging to the group of stalked cirripedia. It fixes itself to the bottoms of vessels and other inanimate and also animate objects, and its head being thus attached kicks food into its mouth with its legs. The term is often applied to persons who are superfluous fixtures in some institution or organization.

Barnard, Edward Emerson, an American astronomer, born in Nashville, Tenn., Dec. 16, 1857; graduated at Vanderbilt University in 1887; was astronomer in Lick Observatory, California, in 1887-1895, and then became Professor of Astronomy in Chicago University and Director of the Yerkes Observatory. His principal discoveries were the fifth satellite of Jupiter in 1892, and 16 comets. He also made photographs of the Milky Way, the comets, nebulæ, etc. The French Academy of Sciences awarded him the Lelande gold medal in 1892, and the Arago gold medal in 1893, and the Royal Astronomical Society of Great Britain gave him a gold medal in 1897. He was a member of many American and foreign societies, and a contributor to astronomical journals. D., 1923.

Barnard, Frederick Augustus Porter, an American educator, born in Sheffield, Mass., May 5, 1809; was graduated at Yale College in 1828; instructor there in 1830; Professor of Mathematics and Natural Philosophy in the University of Alabama in 1837-1848, and afterward of Chemistry and Natural History till 1854; Professor of Mathematics and Astronomy in the University of Mississippi, 1854-1861; its president in 1856-1858; and its Chancellor in 1858-1861. He was president of Columbia College, New York city in 1864-1899, He died 1999. York city, in 1864-1888. He died 1889.

Barnard, Henry, an American educational reformer, born at Hartford, Conn., in 1811; died there in 1900. He was graduated at Yale in 1830; entered the legal profession, became interested in politics, and during service in the legislature distinguished himself by his interest in the public school system, and the vigor with which he urged reforms. He was in succession School Commissioner of R. I.: Superintendent of Schools in Connecticut; President of the University of Wisconsin; President of St. John's College, Annapolis, and was first United States Commissioner of Education. He organized the Bureau, and in his reports suggested or supported the reforms that have since been made.

Barnard College, an educational (non-sectarian) institution for women only, in New York city; organized in 1889, and named in honor of Frederick A. P. Barnard, through whose to the radical element of the Demo-

efforts its foundation was largely due. It was made essentially a part of Columbia University, certain courses of study in the University and the use of its library being open to the students of Barnard. In January, 1900, the college was formally incorporated with Columbia University.

Barnardo, Thomas J., an English philanthropist; founder of the Barnardo Homes for homeless children; had his attention first turned in this direction by the condition in which he found a boy in a ragged school in East London in 1866. Following up the subject, he began to rescue children who had found their only shelter at night under archways, or in courts and alleys. These were introduced to his homes, where they received an industrial training, were saved from a possible career of crime, and enabled to achieve an honorable position in life. He died in 1905.

Barnato, Barney, a South African speculator. His real name is believed to have been Bernard Isaac. He was born in London, England, about 1845, of Hebrew parents. He began business there as a dealer in diamonds, and in five years earned enough to buy shares in the Kimberley diamond mines. He established a partnership with Cecil Rhodes, and, when, in 1886, gold was discovered, secured possession of the greater part of the region. He committed suicide by jumping from committed suicide by jumping from the deck of the steamer "Scot," bound from Cape Town to Southampton, June 14, 1897.

June 14, 1891.

Barnave, Antoine Pierre

Joseph Marie, a French orator, was

Cranchle in 1761. The Constituent Assembly appointed him their President in January, 1791. After the flight of the King, he defended Lafayette against the charge of being privy to this step, and, upon the arrest of the royal family, was sent, with Petion and Latour-Maubourg, to meet them, and to conduct them to Paris. When the correspondence of the court fell into the hands of the victorious party, Aug. 10, 1792, they pretended to have found documents which showed him to have been secretly connected with and he was guillotined Nov. 29, 1793.

supported Van Buren in the campaign

Barnegat Bay, a bay on the E. coast of New Jersey, about 25 miles in length. Barnegat Inlet connects the bay with the Atlantic.

Barnes, Albert, an American Presbyterian minister, born in Rome, N. Y., Dec. 1, 1798. For 37 years pastor of the First Presbyterian pastor of the First Presbyterian Church in Philadelphia; he was best known by his "Notes" on the New Testament (of which over 1,000,000 volumes are said to have circulated), Isaiah, Job, Psalms, etc. He died at Philadelphia, Dec. 24, 1870.

Barnes, Joseph K., an American medical officer, born in Philadelphia, July 21, 1817; was educated in the medical department of the University of Pennsylvania; became Assistant Surgeon in the army in 1840, and served at various posts through the Mexican War. At the beginning of the Civil War he was summoned from Oregon, and assigned to duty in the office of the Surgeon-General. In 1863, he was appointed a Medical Inspector, with the rank of Colonel, and in September of the same year was promoted to Brigadier-General. In 1865 he was brevetted Major-General, United States Army. He was Surgeon-General of the army from 1864 till 1882, when he was retired. He died in Washington, D. C., April 5, 1883.

William, an English Barnes, poet and philologist, born in Dorset-shire, Feb. 22, 1800; died in Winter-bourne Came, in October, 1886.

Barneveldt, Jan Van Olden, Grand Pensionary of Holland, born in 1549. He had scarcely reached his 20th year when he was called to the office of Councilor and Pensionary of Rotterdam; and such was the opinion even then entertained of his eminent abilities and integrity that he was allowed an important share in the management of those transactions with France and England by which the United Provinces sought to maintain themselves against Spain, whose yoke they had just thrown off. His conduct in the high office of Grand Pensionary of Holland and West Friesland, which he afterward filled, not only secured the independence, but recical sections were large and frequent. He was a lecturer on temperance and other popular subjects. He died at Bridgeport, Conn., April 7, 1891.

Barnum, William H., an American statesman, born in Boston Cor-

cratic Party in New York State, which stored the trade and improved the finances of the United Provinces. After the election of Maurice of Nassau to the dignity of Stadtholder, Barneveldt became the champion of popular liberties, and opposed with determina-tion the ambitious designs of the new prince. The latter finally carried the day and Barneveldt was adjudged to death as a traitor and heretic, by 26 deputies named by Maurice. The sentence was carried into effect in 1619.

Barney, Joshua, an American naval officer, born in Baltimore, Md., July 6, 1759. He was captured by the British in March, 1778, but was exchanged in August of the same year; was captured again and held a prisoner till he escaped in 1781. In April, 1782, he took the British ship "General Monk," off Cape May; in November, 1782, he carried dispatches to Dr. Franklin in France, and brought back a sum of money lent by the French government. 1794 he went with Monroe to France, and for six years served in the French navy. In 1814, he commanded the fleet stationed in Chesa-peake Bay. He died in Pittsburg, Pa., Dec. 1, 1818.

Barn Owl, a bird of prey belonging to the family strigide. It is called also the white owl, the church owl, the screech owl, the hissing owl, the yellow owl, the howlet, and the hoolet. It is found in the United States and in Europe.

Barnum, Frances Courtenay (Baylor), an American novelist, born in Arkansas, 1848. Died, 1920.

Barnum, Phineas Taylor, an American showman, born at Bethel, Conn., July 5, 1810; after various un-successful business ventures, finally es-tablished Barnum's Museum in New York (1841), which was twice burned. He introduced Tom Thumb, Jenny Lind, Commodore Nutt, Admiral Dot, the woolly horse, Jumbo, etc., to the American public. In 1871 he established his great circus. He was mayor of Bridgeport, and four times member of the Connecticut Legislature.

ners, N. Y., Sept. 17, 1818. He died in Lime Rock, Conn., April 30, 1889.

Barnwell, Robert Woodward, an American statesman, born in Beaufort, S. C., Aug. 10, 1801; was graduated at Harvard University in 1821; became a lawyer; was a member of Congress from South Carolina in 1829-1833; a United States Senator from that State, 1850-1851; Commissioner from South Carolina to confer with the Federal Government regarding the proposed secession of the State, in 1860; member of the Provisional Confederate Congress, 1861-1862; a Confederate Senator in 1862-1866; and then president of the University of South Carolina (an office he had held in 1835-1841) till 1873. He died in Columbia, S. C., Nov. 25, 1882.

Baroda, the second city of Guzcrat, and third in the Presidency of Bombay, India; capital of the territory of the Guicowar in the State of the same name. It is 248 miles N. of Bombay, with which it is connected by railway. Baroda occupies an important situation between the coast and the interior, and its trade is considerable. Pop. (1921) 94,712.

Barometer, an instrument for measuring the weight of the air and the variations of its pressure in order to determine changes in the weather, the height of mountains, and other phenomena. This most useful instrument had its origin in an experiment of Torricelli, an Italian, who flourished about the middle of the 17th century.

Baron, in the feudal system of the Middle Ages, the title baron, derived from the Latin varo, which signifies a man, and, sometimes, a servant, was given, at first, to the immediate tenant of any superior. In England, baron is the lowest grade of rank in the House of Lords.

Baronet, originally a term apparently in use as early as the time of Edward III. for certain landed gentlemen not of the dignity of lords, summoned to the English Parliament to counterbalance the power of the clergy. Subsequently it became the name given to three titled orders.

Baronius, or Baronio, Cæsar, an erected expressly for the housing of Italian ecclesiastical historian, born in troops or one which has been impro1538. He owes his fame to his work, vised for that purpose.

"Ecclesiastical Annals," comprising valuable documents from the papal archives, on which he labored from the year 1580 until his death, June 30, 1607.

Barony, the lordship or fee of a baron, either temporal or spiritual.

Barotse, or Marotse, an important Bantu tribe inhabiting the banks and the regions E. of the Upper Zambezi, from about 14° to 18° S. lat. In Livingstone's time the Makololo were the dominant tribe in these parts of South Africa, but since then they have been almost entirely annihilated by the Bantus, who now occupy the vast territory from the Kabompo river to the Victoria Falls.

Barouche, a four-wheeled carriage with a falling top and two inside seats in which four persons can sit, two fronting two.

Barr, Amelia Edith, an Anglo-American novelist, born in Ulverton, Lancashire, England, March 29, 1831. She was the daughter of the Rev. William Huddleston, and in 1850 married Robert Barr. She came to the United States in 1854, and lived for some years in Texas; but after her husband's death (1867) removed to New York, where her first book, "Romance and Reality," was published in 1872. She was a prolific writer, and her novels are still popular. Died, 1919.

Barr, Robert, a Scottish author, born in Glasgow, Sept. 16, 1850; he spent his childhood in Canada, drifted into journalism, joined the staff of Detroit "Free Press," and wrote under the name of "Luke Sharp." He went to London in 1881 and founded "The Idler" with Jerome K. Jerome. He died Oct. 22, 1912.

Barracan, strictly, a thick, strong stuff made in Persia and Armenia of camel's hair, but the name has been applied to various wool, flax, and cotton fabrics.

Barracand, Leon Henri, a French poet and novelist, born at Romans, Drome, May 2, 1844.

Barrack, a hut or small lodge. The plural, barracks, is now generally applied to a large structure, either erected expressly for the housing of troops or one which has been improvised for that purpose.

Barracuda, a pike-like seafish allied to the mullets, common on both coasts of America. The great barra-cuda reaches a length of 8 feet and a weight of 40 pounds. It is as savage as a shark. Its flesh is pleasant flavored, but is not always eaten, as there are times when it it not wholesome.

Barranquilla, the principal port of the Republic of Colombia, in the Department of Bolivar, near the left bank of the Main channel of the Magdalena, 15 miles distant from the sea. A railway connects it with the seaport of Sabanilla, 20 miles to the northwest. Trade is largely in the hands of the Germans. A United States consul is resident at Barranquilla. Pop. (1923) 64,543.

Barras, Paul Francois Jean Nicolas, Comte de, a French Jaco-bin, born in Provence, in 1755, of an ancient family; served as second lieutenant in the regiment of Languedoc until 1775. July 14, 1789, he took part in the attack upon the Bastille, and Aug. 20, 1792, upon the Tuileries. In 1792 he was elected a member of the National Convention, and voted for the unconditional death of Louis XVI. In February, 1795, he was elected President of the Convention, and, in that capacity, declared Paris in a state of siege, when the Assembly was attacked by the populace. Afterward, when the Convention was assailed, Bonaparte, by Barras's advice, was appointed to command the artillery; and that general on the 13th Vendemaire (Oct. 5, 1795), decisively repressed the royalist movement. Napoleon's coup d'état (Nov. 9, 1799), effectually overthrew his power. He died in Paris, Jan. 29, 1829.

Barre, a city in Washington county, Vt.; on the Winooski river and the Central Vermont and other railroads; 6 miles S. E. of Montpelier; is widely noted for its granite quarries and interests connected therewith. Pop. (1930) 11,307.

Barre, Isaac, a British soldier, born at Dublin in 1726. Gazetted as an ensign in 1746, he became friendly

with General Wolfe, under whom he rose to the rank of Lieutenant-Colorose to the rank of Lieutenant-Colo-nel. He was wounded in the cheek at Quebec, was beside Wolfe when he fell, and figures in West's picture of manager of the Varieties Theater, in

"The Death of Wolfe." He entered Parliament in 1761, and held office successively under Lord Bute, Pitt, Rockingham, and Lord Shelburne. In Pitt's second administration he exposed the corruptions of the ministry, was a strong opponent of Lord North's ministry, and opposed the taxation of He died in London, July America. 20, 1802.

Barren Grounds, a large tract in the Northwest Territories of Canada, extending N. from Churchill river to the Arctic Ocean, between Great Bear and Great Slave Lakes and Hudson Bay. It largely consists of swamps,

lakes, and bare rock.

Barrett, John, an American di-plomatist, born in Grafton, Vt., Nov. 28, 1866; was graduated at Dartmouth College in 1889, and the same year went to the Pacific coast and was engaged in journalism till 1894. During 1894-1898 he was United States Minister Resident and Consul-General at Bangkok, Siam, and, after the ex-piration of his term of office, repre-sented several American newspapers in Manila, Philippine Islands. After the American victory in Manila Bay he made a special study of conditions in the Philippine Islands, and, returning by way of London, addressed a joint assembly of members of the House of Commons and the London Chamber of Commerce, on the condi-tion of trade in the Far East. He re-turned to the United States in the summer of 1899, and later held several diplomatic appointments; became Director-General of the Pan-American Union in 1907.

Barrett, Lawrence, an American actor, born in Paterson, N. J., April 4. 1838. His first appearance on the stage was in 1853. In 1856 he appeared as Sir Thomas Clifford in "The Hunchback" at Chambers Street Theater, New York city, and in 1857 he supported Mr. Burton, Charlotte Cushman, Edwin Booth, and other eminent actors. He served as a cap-tain in the 28th Massachusetts Infantry in the early part of the Civil War. Later he acted at Philadelphia, Washington, and at Winter Garden, in New

New Orleans, where for the first time he played the parts of Richelieu, Hamlet, and Shylock. He gained steadily in distinction both as manager and actor. His last appearance was on March 18, 1891, in the character of Adrian du Mauprat to the Richelieu of Mr. Booth. He died in New York city, March 21, 1891.

Barrett, Wilson, an English dramatist, born in Essex, Feb. 18, 1846; died July 22, 1904.

Barrie, town and capital of Sim-coe county, Ontario, Canada; on an arm of Lake Simcoe and the Grand Trunk railroad; 64 miles N. W. of Toronto; founded in 1832; incorpo-rated in 1871; has steamers to all lake ports. Pop. (1921) 7,200. .

Barrie, James Matthew, a Scottish author; born in Kurriemuir, Forfarshire, May 9, 1860. He went to London in 1885, to engage in journalism. His peculiar talent for depicting Scottish village life and rustic characters with fidelity, pathos, and poetic charm, brought him fame. He was created a baronet in 1913.

Barrier Reef, a coral reef which extends for 1,260 miles off the N. E. coast of Australia, at a distance from land ranging from 10 to 100 miles.

Barrili, Antonio Giulio, an Ital-Barrili, Antonio Giulio, an Italian novelist, born in Savona, in 1836. Engaging in journalism when only 18, he assumed the management of "Il Movimento" in 1860, and became proprietor and editor of "Il Caffaro" in Genoa in 1872. He took part in the campaigns of 1859 and 1866 (with Garibaldi in Tyrol) and in the Roman expedition of 1867, and sat in the Chamber of Deputies in 1876–1879. He was one of the most prollife 1879. He was one of the most prolific writers of modern Italy. D. in 1909.

Gerardo, a American statesman, born about 1810; became President of Salvador in 1860. He was deposed by Duenas as the outcome of the war with Guatemala, and, while endeavoring to bring about a revolution in order to become president again, he was captured and executed, in 1865.

Barrios, Justo Rufino, a Guatemalan statesman, born in San Marcos, about 1834: opposed President Cerna

1867, and was active in overthrowing the regime established by that president (1871). Two years later, when Granados took command of the army, Barrios became President and, by successive elections, he held the office till his death. His administration was marked by prosperity and freedom. A war with Salvador resulted from a proclamation intended to bring about the union of all the Central American nations in one republic. In an assault upon Chalchuapa, Barrios, putting himself at the head of a deserted regi-ment, was killed April 2, 1885. His widow lives in New York.

Barrister, Barraster, or Barreter, in England, a member of the legal profession who has been admitted to practice at the bar; a counselor at law. The term corresponding to barrister is in the United States counselor at law; but the position of the latter is not quite the same.

Barron, James, an American naval officer, born in Virginia in 1769; became Lieutenant in the navy in 1798, and was soon promoted to Captain. He commanded the "Chesapeake" in 1807, and was attacked by the British ship "Leopard" as a result of his refusal to allow the "Chesapeake" to be searched for deserters. The "Chesapeake," which was quite unprepared, discharged one gun previous to striking her colors. She was captured and three alleged deserters were found. Barron was court-martialed and suspended for five years. Upon his restoration, as the outcome of a long correspondence with his perscual enemy, Commodore Decatur, a duel was fought and Decatur was killed. Barron became senior officer in the navy in 1839, and died in Norfolk, Va., April 21, 1851.

Barron, Samuel, an American naval officer, born in Hampton, Va., about 1763; in 1805 commanded a squadron of 10 vessels in the expedi-tion against Tripoli. On his return to the United States was appointed Commandant of the Gosport Navy Yard, but died immediately afterward, Oct. 29, 1810.

Barrow, an artificial mound or tumulus, of stones or earth, piled up over the remains of the dead. Such in the revolutionary movements of erections were frequently made in ancient times in the New and Old Worlds. When opened they are often found to contain stone cysts, calcined bones, etc.

Barrow, Frances Elizabeth, an American author, born in Charleston, S. C., Feb. 22, 1822, was educated in New York, where she was married to James Barrow. She wrote, under the name of AUNT FANNY, numerous books for children. She died in New York city, May 7, 1894.

Barrow, Sir John, a notable English writer on travels, born at Dragleybeck, Lancashire, June 19, 1764; died in London, Nov. 23, 1848.

Barrows, John Henry, an American educator, born in Medina, Mich., July 11, 1847; was graduated at Olivet College in 1867; subsequently studied in Yale College, Union and Andover Theological Seminaries, and at Gottingen; was pastor of the First Presbyterian Church, in Chicago, for 14 years; organized and was president of the World's Parliament of Religions, at the World's Columbian Exposition in Chicago, in 1893. He delivered a course of lectures on Christianity in the principal universities in India, under the patronage of the University of Chicago, in 1896–1897, and became President of Oberlin College in 1898. He died in Oberlin, O., June 3, 1902.

Barrundia, Jose Francisco, a Central American statesman, born in Guatemala, in 1779. He became President of the Central American Republic in 1829; retaining office for something over a year. In 1852 he was again elected President. He came to the United States in 1854, as Minister from Honduras, to propose the annexation of that territory to the United States, but died suddenly before anything was accomplished, in New York city, Aug. 4.

Barry, Ann Spranger, an English actress, born in Bath, 1734. As Desdemona she had, during her whole career, no competitor. She died in London, in 1801, and is buried in Westminster Abbey.

Barry, Sir Charles, an English architect, born in London, in 1795. He was knighted in 1852, and died suddenly in 1860. Barry, John, an American naval officer, born in Tacumshane, Ireland, in 1745. He settled in Philadelphia, in 1760. When the Revolutionary War broke out he was appointed commander of the "Lexington," with which he captured the British tender "Edward," in 1776. He afterward took command of the "Raleigh," which was captured by the British "Experiment;" but in his next command, the "Alliance," he captured the British ships "Atlanta" and "Trepassy." He was chosen to convey Lafayette and Noailles back to France; and, in 1794 was appointed commodore. He died Sept. 13, 1803.

Barry, Spranger, an Irish actor, the great rival of Garrick, born in Dublin, in 1719. He was brought up as a silversmith; but his matchless form and voice led him to try the stage. He died in London, in 1777.

Barry, Thomas Henry, an American military officer, born in New York, Oct. 13, 1855; graduated at the United States Military Academy in 1877; was a brigadier-general of volunteers, serving in the China relief expedition and in the Philippines, in 1900-1; promoted brigadier-general, U. S. A., Aug. 18, 1903, and majorgeneral, April 29, 1908; commanded the pacification army in Cuba in 1907-9; superintendent United States Military Academy 1910-13; commander of the Eastern Department of Governor's Island, N. Y., 1913-17; then appointed to the newly-created Central Department.

Barry, William Farquhar, an American military officer, born in New York city, Aug. 18, 1818; graduated at the United States Military Academy in 1838; and first saw active service in the Florida war (1852-1853). In the Mexican War he acted as aide-de-camp to General Worth. At the outbreak of the Civil War he was made chief of artillery, and organized the artillery of the Army of the Potomac. He subsequently became chief of artillery to Sherman, and took part in the march to the sea. In 1865 he was brevetted Major-General. In 1867 he had charge of the Artillery School at Fort Monroe. William Taylor, an American statesman, born in Lunenburg, Va., Feb. 5, 1784. He served in the War of 1812; and from 1814— 1816 was United States Senator from 1816 was United States Senator from Kentucky. In 1828 he was appointed Postmaster-General under Jackson; and was on his way as Minister to Spain when he died, Aug. 30, 1835.

Barrymore, Ethel (Mrs. Russell G. Colt), an American actress, born in Philadelphia, Pa., Aug. 15, 1879; made her debut with John Drew in 1806. later was starred

1896; later was starred.

Barrymore, John (John Blythe), an American actor, born Feb. 15, , member of a notable theatrical family; made his debut in Chicago in 1903; later appeared in London and Australia; acts also for films.

Barrymore, Lionel (Lionel Blythe), American actor, born 1884, notable on both screen and stage. Best known photoplay "The Copperhead."

Bart, Barth, or Baert, Jean, a French sailor, born at Dunkirk, 1650, the son of a poor fisherman. He became captain of a privateer, and, after some brilliant exploits, was appointed captain in the Royal Navy. In recognition of his services, he was made commodore and ennobled. He died in 1702, and is regarded to this day as the typical naval hero of France.

Barth, Heinrich, a German traveler, born in Hamburg in 1821. His explorations, which extended over an area of about 2,000,000 square miles, determined the course of the Niger and the true nature of the Sahara. He died in 1865.

Barthélemy - Saint - Hilaire, Jules, a French statesman; born in Paris, Aug. 19, 1805. He was on the side of the Moderate party in the revolution of 1848, and during the troublous times of 1870-1871 he was closely associated with M. Thiers. In 1875 he became a life senator, and in the cabinet of M. Jules Ferry, consti-tuted 1880, he was appointed minis-ter of foreign affairs. The chief event of his tenure of this office was the occupation of Tunis. He died in Paris, Nov. 25, 1895.

cipal works: the "Lion of Belfort;" statue of Lafayette, in Union Square, New York; bronze group of Lafayette and Washington, in Paris (1895); and the colossal figure in New York harbor, "Liberty Enlightening the World." He died in Paris, Oct., 1904.

Bartholomew, Edward Sheffield, an American sculptor, born at New York and in Rome, where he lived during the latter part of his life. Among his works are "Blind Homer, Led by His Daughter," "Eve," "Youth and Old Age," etc. He died in Naples, May 2, 1858.

Bartholomew Fair, or Bartlemy Fair, a celebrated fair, which was long held in Smithfield, England,

at Bartholomew-tide.

Bartholomew, Massacre of St., the slaughter of French Protestants in Paris, beginning Aug. 24, 1572. After the death of Francis II., Catherine de' Medici had assumed the regency for her son, Charles IX., then only 10 years old, and was compelled, in spite of the opposition of the Guises, to issue an edict of toleration in favor of the Protestants. The party of the Guises now persuaded the nation that the Catholic religion was in the greatest danger. The Huguenots treated in the most cruel manner; Prince Conde took up arms; the Guises had recourse to the Spaniards, Conde to the English, for assistance. Both parties were guilty of the most atrocious cruelties, but finally concluded peace. The queen-mother caused the king, who had entered his 14th year, to be declared of age, that she might govern more absolutely unshe might govern more absolutely under his name. Duke Francis de Guise had been assassinated by a Huguenot, at the siege of Orleans; but his spirit continued in his family, which considered the Admiral Coligny as the au-thor of his murder. The king had been persuaded that the Huguenots had designs on his life, and had con-ceived an implacable hatred against them. Meanwhile, the court endeav-ored to gain time, in order to seize the persons of the prince and the admiral by stratagem, but was disappointed, Bartholdi, Frederic Auguste, a by stratagem, but was disappointed, and hostilities were renewed with sace, April 2, 1834; received the cross more violence than ever. In the battle of the Legion of Honor in 1865; prin- of Jarnac, 1569, Conde was made prisBartholomew Bartlett

oner and shot by Captain de Montesquieu. Coligny collected the remains of the routed army; the young Prince Henry de Bearn (afterward Henry IV., King of Navarre and France), the head of the Protestant party after the death of Conde, was appointed commander-in-chief, and Coligny commanded in the name of the Prince manded in the name of the Prince Henry de Conde, who swore to revenge the murder of his father. The advantageous offers of peace at St. Germain-en-Laye (Aug. 8, 1570) blinded the chiefs of the Huguenots, particularly Admiral Coligny, who was wearied with civil war. The king appeared to have entirely disengaged himself from the influence of the himself from the influence of Guises and his mother; he invited the old Coligny, the support of the Huguenots, to his court, and honored him as a father. The most artful means were employed to increase this delu-sion. The sister of the king was married to the Prince de Bearn (Aug. 18, 1572), in order to allure the most distinguished Huguenots to Paris. Some of his friends endeavored to dissuade the admiral from this visit; but he could not be convinced that the king would command an assassination of the Protestants throughout his kingdom. On Aug. 22, a shot from a window wounded the admiral. The king hastened to visit him, and swore to punish the author of the villainy; but, on the same day, he was induced by his mother to believe that the admiral had designs on his life. "God's death!" he exclaimed: "kill the admiral; and not only him, but all the Huguenots; let none remain to disturb us!" The following night Catherine held the bloody council which fixed the execution for the night of St. Bartholomew, Aug. 24, 1572. Af-ter the assassination of Coligny, a bell from the tower of the royal palace, at midnight, gave to the assembled com-panies of burghers the signal for the general massacre of the Huguenots. The Prince of Conde and the King of Navarre saved their lives by going to mass, and pretending to embrace the Catholic religion. By the king's or-ders, the massacre was extended through the whole kingdom; and if, ders, the massacre was extended through the whole kingdom; and if, in some provinces, the officers had honor and humanity enough to disobey the orders to butcher their inno-

cent fellow citizens, yet instruments were always found to continue the massacre. This horrible slaughter continued for 30 days, in almost all the provinces; the victims are calculated at 30,000. At Rome, the cannons were discharged, the Pope ordered a jubilee and a procession to the Church of St. Louis, and caused the Te Deum to be chanted. Those of the Huguenots who escaped fled into the mountains and to Rochelle. The duke of Anjou laid siege to that city, but, during the siege, received the news that the Poles siege, received the news that the Poles had elected him their king. He concluded a treaty, July 6, 1573, and the king granted to the Huguenots the exercise of their religion in certain towns. The court gained nothing by the massacre of St. Bartholomew.

Bartholomew, St., the apostle, probably the same person as Nathanael, mentioned, in the Gospel of St. John, as an upright Israelite, and one of the first disciples of Jesus.

Bartholomew, St., an island, one of the West Indies, in the Leeward group, belonging to France, being transferred by Sweden in 1878. It is a dependency of Guadeloupe. The island has a mountainous surface and is about 24 miles in circumference.

Bartlett, Edwin Julius, American chemist, born in Hudson, O., Feb. 16, 1851; the author of many papers on chemical subjects.

Bartlett, Sir Ellis Ashmead, an English politician, born in Brooklyn, N. Y., of American parents, in 1849; educated in England; was Civil Lord of the Admiralty in 1885-1886, and 1886-1892, and brother of William Ashmead Bartlett, who married the BARONESS BURDETT-COUTTS. Bartlett, Homer Newton, an American composer, born in Olive, N. Y., Dec. 28, 1846. He wrote a large number of anthems, quartets, and glees, etc. He died in 1905.

Bartlett, John, an American author and publisher, born in Plymouth, Mass., June 14, 1820; became a publisher in Cambridge, 1836, and head of

a mercantile career. After 1837, he entered the book-importing trade in New York. In 1850, he was appointed one of the commissioners to fix the Mexican boundary. In 1855, he was made Secretary of State of Rhode Island. He wrote various valuable records, genealogies, local histories, etc. His best known work is his "Dictionary of Americanisms" (1850). He died in Providence, May 28, 1886.

Bartlett, John R., an American naval officer, born in New York in 1843; was appointed an acting midshipman in the navy from Rhode Isl. in 1859. During the Civil War, he took part in many important naval conflicts, from New Orleans to the capture of Fort Fisher. Subsequently he was on surveying duty in Nicaragua and on the United States Coast Survey; was promoted to Captain, July 1, 1892; and was retired July 12, 1897. After the declaration of war against Spain, in 1898, he was recalled to active service, and on July 9, succeeded Rear-Admiral Erben as commander of the Auxiliary Naval Squadron for the protection of the Atlantic coast cities. St. Louis, Nov. 22, 1904. He died at

Bartlett, Josiah, an American physician and statesman, born in Amesbury, Mass., in 1729; was one of the signers of the Declaration of Independence, and a member of the Continental Congress (1775-1776); became Chief Justice of New Hampshire (1788); and first Governor of New Hampshire under the new State Constitution. He died in 1795.

Bartlett, Paul Wayland, American sculptor: born at New Haven, 1865. His chief works are the equestrian statue of General McClellan in Philadelphia, and the statue of Lafayette, presented to France by the children of America, and now in Paris.

Bartlett, Samuel Colcord, an American educator, born in Salisbury, N. H., Nov. 25, 1817. In 1877 he ac-cepted the presidency of Dartmouth College, which he held until 1892, when he resigned. He died in Hanover, N. H., Nov. 16, 1898.

Bartlett, William Francis, an American philanthropist; born in Oxford, Mass., Haverbill, Mass., Jan. 6, 1840; was a in 1830; was educated at Clinton, N. student in Harvard University at the Y and early became a teacher, and

outbreak of the Civil War, but left to enter the army; was wounded in the battle of Ball's Bluff, suffering the loss of a leg; but continued in the service; was twice wounded at Port Hudson; and in the battles of the Wilderness, while leading the 57th Massachusetts Regiment, was again wounded, taken prisoner, and sent to Libby Prison. At the close of the war, he was made a Major-General of Volunteers for distinguished services in the field. He died Dec. 17, 1876.

Bartolini, Lorenzo, an Italian sculptor, born at Vernio, in Tuscany, in 1777; went to Paris while still a young man. His chief patron was Napoleon, who, in 1808, sent him to Carrara, to establish a school of scupl-ture. Besides an immense number of busts, he produced several groups, the most celebrated are "Charity," "Hercules and Lycas," He died 1850.

Bartolomeo, di San Marco,
Fra, or Baccio Della Porta, one

of the most distinguished masters of the Florentine School of painting, born at Savignano, in Tuscany, in 1469. He was a warm adherent of Savonarola, after whose tragical end in 1500 he took the habit of the cloister. He died in Florence in 1517.

Bartolozzi, Francesco, an engraver, born at Florence in 1725, or acording to others, in 1730, died at Lisbon 1813. In Venice, in Florence, and Milan he etched several pieces on sacred subjects, and then went to London, where he received great encouragement. After forty years' residence in London he went to Lisbon on the invitation of the Prince Regent of Portugal to take the superintendence of a school of engravers, and remained there till his death.

Barton, Andrew, one of Scot-land's first great naval commanders; flourished during the reign of James IV., and belonged to a family which for two generations had produced able and successful seaman. In 1497 he commanded the escort which accompanied Perkin Warbeck from Scotland. After doing considerable damage to English shipping he was killed in 1512.

founded at Bordentown, N. J., a free school, opening it with six pupils. In 1854 it had grown to 600, when she became a clerk in the Patent Office in Washington. On the outbreak of the Civil War she resigned her clerkship, and became a volunteer nurse in the army hospitals and on the battle-field. On the breaking out of the Franco-Prussian War, in 1870, she aided the Grand Duchess of Baden in preparing military hospitals, assisted the Red Cross Society, and, at the request of the authorities, superintended the distribution of work to the poor of Strasburg, in 1871, after the siege, and in 1872 did a like work in Paris. At the close of the war, she was decorated with the Golden Cross of Baden and the Iron Cross of Germany. On the organization of the American Red Cross Society in 1881, she was made its President. In 1889 she had charge of movements in behalf of sufferers from the floods at Johnstown, Pa.; in 1892 distributed relief to the Russian famine sufferers; in 1896, personally directed relief measures at the scenes of the Armenian massacres; in 1898 took relief to the Cuban re-concentrados, and performed field work during the war with Spain; and in 1900 undertook to direct the re-lief of sufferers at Galveston, but in 1900 undertook to unter-lief of sufferers at Galveston, but broke down physically. In 1903 she undertook the re-organization of the Pad Cross Society in the United Red Cross Society in the States. She died April 12, 1912.

Barton, George Hunt, an American geologist, born in Sudbury, Mass., July 8, 1852; was graduated at the Massachusetts Institute of Technology in 1880; assistant on Hawaiian Gov-ernment survey, 1881-1883; assistant in Geology in the Massachusetts Institute of Technology in 1883-1884; then Assistant Professor of Geology there; also occupied the corresponding chair in Boston University and the Teachers' School of Science; and was Assistant Geologist of the United States Geological Survey. In 1896 he was a member of the sixth Peary expedition He is the author of to Greenland. many technical papers.

Barton, William, an American military officer, born in Warren, R. I., May 26, 1748; learned the trade of a hatter; but joined the Revolutionary

the night of July 10, 1777, he performed the exploit which made him famous. Leading 38 men, in four whale-boats, across Narragansett Bay, he surprised and captured the British General, Prescott, at his headquarters, and hurried him away to Washington's camp in New Jersey. Barton received a sword from Congress, and was brevetted Colonel. He was after-ward a member of his State Convention which adopted the Federal Constitution. He died in Providence, Oct. 22, 1831. In his later years, like some other heroes of the Revolution, he was much reduced in circumstances and spent some time in a debtors' prison.

Barton, William Paul Crillon, an American botanist, born in Philadelphia, Pa., Nov. 17, 1786; died in Philadelphia, Feb. 29, 1856.

Bartram, John, an American bot-

anist, born in Chester county, Pa., March 23, 1699; died at Kingsessing, near Philadelphia, Pa., Sept. 22, 1777. Bartram, William, an American botanist and ornithologist, born in Kingsessing, Pa., Feb. 9, 1739; a son of John Bartram. He compiled a list of American birds, which was the best of its kind up to the time of Wilson.

He died in Kingsessing, July 22, 1823. Baruch, in Church history, a son of Neriah, who was a friend of Jere-miah's, and at least occasionally acted as his amanuensis (Jer. xxxii: 12; xxxvi: 4, 17, 32; xliii: 6; xlv: 1; li: 59). Two apocryphal books or letters have been attributed to him.

Barye, Antoine Louis, a French sculptor, born in Paris, Sept. 24, 1795; died in Paris, June 25, 1875.

Baryta, or Barytes, or Oxide of Barium, the earth present in the minerals witherite (carbonate of barium) and heavy spar (sulphate of barium).

Basalt, a word said to have been derived from an African word, and to have meant basaltoid syenite, from Ethiopia or Upper Egypt. In general the name is given to any trap rock of a black, bluish, or leaden gray color, and possessed of a uniform and compact texture.

Bascinet, or Basnet, a light helmet sometimes with, but more frequently without, a visor, in general use for English infantry in the reigns Army soon after Bunker Hill. On of Edward II. and III., and Richard II. Bascom, Florence, an American educator; daughter of Dr. John Bascom, was educated at the University of Wisconsin, and at Johns Hopkins University, receiving from the first the degree of B. A. and B. L. in 1882, B. S., in 1884, and M. A. in 1887; and from the latter that of Ph. D., in 1892. She was the first woman to whom Johns Hopkins granted a degree, and the first to receive a Ph. D. from any American college. Subsequently, she was engaged in teaching; became pro-fessor at Bryn Mawr College; and, in 1899, was chosen to supervise the geological survey of Chester county, Pa.

Bascom, Henry Bidleman, an American clergyman, born in Han-cock, N. Y., May 27, 1796. In 1850 he was made a Bishop of the Methodist Episcopal Church. He edited the "Quarterly Review" from 1846 till 1850. His writings were published in 1856. He died in Louisville, Ky., Sept. 8, 1850.

Bascom, John, an American educator and philosophical writer, born at Geneva, N. Y., in 1827. He was President of the University of Wisconsin, in 1874-1887, and in 1891-1901 was Professor of Political Science in Williams College. He wrote many works. He died Oct. 3, 1911.

principally in the United States. It the successor of Eugenius.

originated in the English school-boy game of "rounders;" but it has been so improved and so generally played as to merit its name of "the Na-tional game of America." The play-ing of baseball has become largely a business or a "profession," and skilled players receive large salaries. As an amateur game, however, it is also most popular.

Basel Confession of, a Calvinistic confession introduced by Œcolampadius at the opening of the Synod of Basel (1531). It was adopted by the Protestants of Basel in 1534. Simple and comparatively moderate in its terms, it occupies an intermediate place between Zwingli and Luther.

Basel, Council of, a celebrated Ecumenical council of the Church, convoked by Pope Martin V. and his successor, Eugenius IV. It was opened Dec. 14, 1431, under the presidency of the Cardinal Legate Juliano Cesahini of St. Angelo. The objects of its deliberations were to extirpate here-sies (that of the Hussites in particular), to unite all Christian nations under the Catholic Church, to put a stop to wars between Christian princes, and to reform the Church. But its first steps toward a peaceable reconciliation with the Hussites were displeasing to the Pope, who authorized the Cardinal Legate to dissolve the Council. That body opposed the pretensions of the Pope. On the Pope continuing to issue bulls for its dissolution the Council commenced a formal process against him, and cited him to appear at its bar. On his refusal to comply with this demand the Council declared him guilty of contumacy, and, in May, 1439, it declared Eu-genius, on account of his disobedience of its decrees, a heretic, and formally deposed him. Excommunicated Eugenius, they proceeded, in a regular conclave, to elect the Duke Amadeus of Savoy to the papal chair. Felix V. - the name he adopted - was acknowledged by only a few princes, cities, and universities. After this the moral power of the Council declined; its last formal session was held May 16, 1443, though it was not technically dissolved till May 7, 1449, when it Base Ball, a field game played gave in its adhesion to Nicholas V.

Bashan, a rich, hilly district, lying E. of the Jordan, and between the mountains of Hermon on the N., and those of Gilead and Ammon on the S. The country takes its name ("fat," "fruitful") from its soft and sandy soil. It is celebrated in Scripture for its stately oaks, fine breeds of cattle, and rich pasturage.

Bashford, James Whitford, an American clergyman, born in Fayette, Wis., May 27, 1849; graduated at the Theological School of Boston University in 1876; became instructor of Greek at the University of Wisconsin in 1874; president of the Wesleyan University of Ohio in 1889; and a bishop in 1904.

Bashi Bazouks, a body of irregular troops in the service of the Turkish Sultan. They are principally of Asiatic races, and formed a contingent of the Turkish army during the Russian War, 1853–1856. As light cavalry they are considered excellent.

Bashkirtseff, Marie, a Russian author, born in Russia in 1860. She died in Paris in 1884.

Basil, St., surnamed The Great, Bishop of Cæsarea, in Cappadocia, where he was born about 326. After extensive travels, St. Basil retired to the Desert of Pontus, and there founded an order of monks. He succeeded Eusebius in the See of Cæsarea in 370. He died in 380.

Basilan, the largest island of the Sulu Archipelago, Philippine Islands. This island is very mountainous, and most of it is covered by virgin forests. The soil is extremely rich and produces e variety of valuable crops, including cotton, coffee, sugar, chocolate, tobacco, indigo, and spices of all sorts. Basilan has about 15,000 inhabitants and three excellent harbors. The name Basilan is also applied to the whole group of 34 adjacent islets. The leadgroup of 34 adjacent islets. The leading port is Isabela, on Basilan Strait.

Basilica, originally the hall or court-room in which the King administered the laws made by himself and the chiefs who formed his council. Many of the oldest and most splendid of the Roman churches are built on the plan of the basilica, and are called basilicas in consequence.

regarded as a kind of serpent, lizard, or dragon. The name is now applied to a genus of saurian reptiles with a crest along the back and tail.

Basket Ball, an indoor game played upon a circumscribed space on a floor, usually by five players on each side. At each end of this playing space a basket is placed at a height of about 10 feet. The ball is round, somewhat lighter than a foot-ball, and is passed from one player to another by throwing, or striking with the hands only; the ultimate object being to lodge it in the opponent's basket, which action counts two points. The rules as to interference, playing out of bounds, etc., are adapted from those of foot-ball.

Baskett, James Newton, an American zoologist, born in Kentucky, Nov. 1, 1849; graduated at the Missouri State University in 1872. He has devoted himself to the study of comparative vertebrate anatomy, with ornithology as a specialty.

Basking Shark, a shark, called in English also the sun fish and the sail fish; it is the largest known shark, sometimes reaching 36 feet in length, but it has little of the ferocity seen in its immediate allies. It is called basking because it has a habit of lying motionless on the water, as if enjoying the warmth of the sun.

Basques, or Biscayans (in their own language, Euscaldunac), a remarkable race of people dwelling partmarkable race of people dwelling part-ly in the S. W. corner of France, but mostly in the N. of Spain adjacent to the Pyrenees. They are probably de-scendants of the ancient Iberi, who occupied Spain before the Celts. They preserve their ancient language, former manners, and national dances, and make admirable soldiers, especially in guerrilla warfare.

Bas-Relief, that is, low relief, as applied to sculpture; a representation of one or more figures, raised on a flat surface or background, in such a manner, however, as that no part of them shall be entirely detached from it. Alto-rilievo, or high relief, is that in which the figures project half of their apparent circumference from the background. Mezzo-rilievo, or middle re-lief, is a third species, between the two. But, generally speaking, the first term is made to comprehend both distilled from them. It is the Indian

Bass, in music. (1) The string which gives a bass sound. (2) An instrument which plays the bass part; especially of the violoncello or bass-viol, and the contrabasso or double bass. (3) The lowest of the principal human voices; those higher in pitch being, respectively, baritone, tenor, alto or contralto, mezzo-soprano,

Bass, the name of a number of fishes of several genera, but originally belonging to a genus of sea fishes of the perch family, distinguished from the true perches by having the tongue covered by small teeth and the preoper-

culum smooth.

Bass, Edward, first Protestant Episcopal Bishop of Massachusetts, born in Dorchester, Nov. 23, 1726. During the Revolution he omitted During the Revolution he omitted from the church service all reference to the royal family and the British Government. For this he was expelled from the Society for Propagating the Gospel. In 1797 he was consecrated Bishop of Massachusetts, and finally also of New Hampshire and Rhode Island. He died in Newburgnert Mass Sont 10. died in Newburyport, Mass., Sept. 10,

Basset, a name used with some latitude in France for any very shortlegged dogs, but especially for various breeds of sporting dogs resembling (though larger than) the dachshund.

Bassett, James, a Canadian-American missionary, born in Glenford, Ontario, Jan. 31, 1834; served as a chaplain in the Union army in 1862— 1863; and afterward in 1871, he went as a missionary to Persia under the direction of the Presbyterian Board. There he finally obtained the estab-lishment of a United States legation in Persia. He died in 1906.

Bassett, John Spencer, an American historian, born in Tarboro, N. C., Sept. 10, 1867; Professor of History in Trinity College, N. C., in 1893-1906, then at Smith College, Died, Jan. 27, 1928. Author of several histories and biographies.

Bassia, the mohra or moho tree.
A large tree growing in the East Indies; it is also found in Africa. The flowers have a heavy, sickening smell, and an intoxicating spirit is

butter tree.

Bassora, or Bussora, a town of Asiatic Turkey, on the W. bank of the Euphrates, here called the Shat-el-Arab, 56 miles from its mouth in the Persian Gulf. The population, once 150,000, had sunk in 1854 to 5,000, but the establishment of the English Tigris and Euphrates Steamship Company has alternated. ship Company has altogether changed the prospects of Bassora and the town now probably contains at least 40,000 inhabitants, most of them actively engaged in commerce.

Bass Strait, a channel beset with islands, which separates Australia from Tasmania, 120 miles broad, discovered by George Bass, a surgeon in the Royal navy, in 1798.

Basswood, the American lime tree or linden, a tree common in North America, yielding a light, soft timber.

Bastard, an illegitimate child. According to the Roman law, one born out of wedlock might be legitimated by subsequent marriage and acknowledg-ment of his parents. The Roman law has been long adopted in Scottish law, and in that of some of the United States.

Bastian, Adolf, a German traveler and ethnologist, born in 1826. He has travelled very extensively and his numerous writings throw light on almost every subject connected with ethnology or anthropology, as well as psychology, linguistics, non-Christian religions, geography, etc. D. in 1905.

Bastian, Henry Charlton, an English biologist, born in Truro in 1837; was an advocate of spontaneous generation. He died Nov. 17, 1915.

Bastien-Lepage, Jules, a French painter, born at Damvilliers, Nov. 1, 1848. De died at the height of his fame, Dec. 10, 1884.

Bastille, properly means any strong castle provided with towers, but as a proper name is applied to a famous castle which once existed in Tamous castle which once existed in Paris, in which State prisoners and other persons arrested by lettres de cachet were confined. It was founded by Hugues d' Aubriot in 1369, and completed by the addition of four towers in 1383. The lettres de cachet mentioned above were issued in the same of the king but the pages of name of the king, but the names of

the individuals were inserted by the ministers, who were the depositaries of these letters.

The invention of the lettres de

cachet immediately opened the door to the tyranny of ministers and the in-trigues of favorites, who supplied

themselves with these orders, in order to confine individuals who had become obnoxious to them. These arrests became continually more arbitrary, and men of the greatest merit were liable to be imprisoned. On July 14, 1789, the Bastille was surrounded by a tumultuous mob, who first attempted to negotiate with the governor, Delaunay, but this failing attacked the fortress. For hours they continued the siege without being able to effect more than an entrance into the outer court of the Bastille, but at last the arrival of some of the Royal Guard with a few pieces of artillery forced the governor to let down the second drawbridge and admit the populace. The governor was seized, but on the way to the Hôtel de Ville he was torn from his captors and put to death. The next day the destruction of the Bastille, commenced. A bronze column has been erected on its site. The event considered by itself was of no great national importance, but it marked the beginning of the French Revolution.

Bastion, a projecting mass of earth or masonry at the angle of a earth or masoury at the angle of a fortification, having two faces and two flanks, and so constructed that every part of it may be defended by the flank fire of some other part.

Basutoland, a native province and British South African possession, bounded by the provinces of the Orange Free State, Natal, and the Cape of Good Hope: area. 11.716 square miles: pop. (1925) 540,000 including 1,603 Europeans; capital, Maseru. The province is divided into The province is divided into Maseru. seven districts, and each district into wards, mostly presided over by hereditary chiefs. The Basutos belong chiefly to the Bechuanas, and have made greater advances in civilization than any other South African race.

Bat, the common name of all animals of the class mammalia which are furnished with true wings, and so are capable of really flying or propelling themselves in the air. Bats are now generally placed by naturalists in the Lake Village, N. H., July 27, 1832;

order cheiroptera, although, like many other animals of that great order, most of them are by no means exclusively

LONG-EARED BAT.

carnivorous. Upward of 130 species have been described, and there is great probability that the actual number existing is very much greater.

Batanes, a group of small islands in the extreme N. of the Philippines, over which, and Cagayan, nearby, American control was established in March, 1900. Pop. (Est.) 50,000.

Batangas, a province of Luzon, Philippine Islands; on the S. W. coast of the main body of Luzon; area, 1,108 square miles; pop. (Est.) 270,000, all civilized; dominant race, Tagalog; capital, Batangas. It contains 22 pueblos.

Batavia, properly the name of the island occupied by the ancient Batavi, became at a later date the Latin name for Holland and the whole kingdom of the Netherlands.

Batavia, village and capital of Genesee county, N. Y.; on Tona-wanda creek and the New York Central & Hudson River and other railroads; 37 miles E. of Buffalo; is in a farming section; has varied in-dustries; and is the seat of the State Institution for the Blind and the Dean Richmond Memorial Library. Pop. (1930) 17,375.

Batavia, a city and seaport of Java, on the N. coast of the island, the capital of all the Dutch East Indies, founded in 1619. Its inhabitants are chiefly Malay, with an admixture of Chinese and a small number of Europeans. Pop. 1925 (est.) 290,408.

entered the Union army at the beginning of the Civil War; and was brevetted Brigadier-General, United States Volunteers, March 13, 1865; became Brigadier-General and Quar-United . termaster-General. States United Army, June 26, 1890; and was retired July 27, 1896. He was awarded a Congressional medal of honor for dis-tinguished gallantry during the Civil

War. He died Jan. 4, 1901.

Batcheller, George Sherman, an American jurist; born in Batchellerville, N. Y., July 25, 1837; graduated at Harvard University; was admitted to the bar in 1858; entered the Union army at the beginning of the Civil War; was taken prisoner at Harper's Ferry, and exchanged in 1863. In 1889 he became Assistant Secretary of the United States Treasury; in 1890, United States Minister-Resident, and Consul-General to Portugal; and in 1897, a member of the International Tribunal of Egypt Tribunal of Egypt again. In the last year he received from King Humbert the decoration of the great cordon of the Order of the Crown of Italy, in recognition of his services as President of the Universal Postal Congress which met in Washington in May, 1897. D. in 1908.

Bate, William Brimage, an in 1886.

American legislator, born near Castalian Springs, Tenn., Oct. 7, 1826.

In the Civil War he rose from private to the rank of Major-General ploration. in the Confederate army, and was three times dangerously wounded. He was an Elector-at-Large for Tennessee on the Democratic ticket in 1876; was elected Governor in 1882 and a U. S. Senator, 1887, 1893, 1899. He died Mar. 9, 1905.

Bateman, Kate Josephine, an American actress, born in Baltimore, Md., Oct. 7, 1842. About 1851 she and her sister Ellen began to act, they being known as the Bateman Sisters. She became rich and famous, and, having married George Crowe, an English physician, identified herself with the management of a London theater.

Bates, Alfred E., an American military officer, born in Monroe, Mich., July 15, 1840; was a Briga-dier-General, U. S. V., in the war with dier-General, U. S. V., in the war with mission, and on the same day was re-Spain in 1898. He died Oct. 13, 1909. commissioned a Brigadier-General of

Bates, Arlo, an American author, born in East Machias, Me., Dec. 16, 1850. He graduated from Bowdoin in 1876, when he engaged in literary work in Boston, and afterward became Professor of English Literature in the Massachusetts Institute of Technology. Died 1918.

Bates, Charlotte Fiske, an American poet and miscellaneous prose-writer, born in New York city, Nov. 30, 1838. She was married in 1891 to Adolphe Rogé, who died in

1896.

Bates College, co-educational institution at Lewiston, Me. This was the first college in the East to provide for the higher education of women. In 1928 it had a faculty of 46, and 615 students.

Bates, Edward, an American lawyer, born in Belmont, Va., Sept. 4, 1793. He was Attorney-General of the United States in Lincoln's first administration; and had been a candidate for the presidential nomination in 1860. He died in St. Louis, Mo., March 25, 1869.

Bates, Harriet Leonora (Vose), better known as ELEANOR PUTNAM, an American story and sketch writer, wife of Arlo Bates, born in 1856; died

Bates, Henry Walter, an English naturalist, born in Leicester, Feb. 18, 1825. In 1848 he began an exploration of the Amazon region in Brazil. He died in London, Feb. 16, 1892

Bates, John Coalter, an American military officer, born in St. Charles co., Mo., Aug. 26, 1842; edu-cated at Washington University, St. Louis; entered the regular army as a Lieutenant in the 11th United States Infantry, May 14, 1861; served on the staff of General Meade from the battle of Gettysburg to the close of the war; promoted Captain, May 1, 1863; Major, May 6, 1882; and Colonel of the 2d United States Infantry, April 25, 1892. On May 4, 1898, he was appointed a Brigadier-General of Volunteers; on July 8, was promoted Major-General for his services in the Santiago campaign; on April 13, 1899, was honorably discharged under this comVolunteers. In February, 1899, he was appointed Military Governor of the province of Santa Clara, Cuba, and in April following, was ordered to duty in the Philippines, where he several times greatly distinguished himself in the latter part of that year and the early part of 1900. In March, 1900, he was assigned to the command of the department of Southern Luzon; was promoted Major-General, U. S. A., June 9, 1902, and Feb. 1, 1906, was promoted Chief of Staff and Lieutenant-General; died, 1919.

Bates, Joshua, an American financier, born in Weymouth, Mass., in 1788. Mr. Bates was the principal founder of the Boston Public Library, and in 1852, the first year of its existence, he made it a gift of \$50,000, and later gave it 30,000 volumes. Died in London, Sept. 24, 1864.

Bates, Katharine Lee, an American story writer, poet, and educator, born in Falmouth, Mass., Aug. 12, 1859; was called to the chair of English Literature in Wellesley College in 1891; edited collections of ballads, etc. Died 1920.

in 1891; edited collections of ballads, etc. Died 1929.

Bates, Samuel Penniman, an American historian, born in Mendon, Mass., Jan. 29, 1827; State Historian of Pennsylvania, 1866–73; died 1902.

Batfish, a fish found in the waters of Florida and the West Indies; noted for its peculiar shape. Its ventral and pectoral fins resemble the legs of a frog.

Bath, Order of the, in heraldry, etc., an order of knighthood, so called because the recipients of the honor were required formerly to bathe the evening before their creation. It was instituted by Henry IV. in 1399, and, falling into disuse, was revived by George I. in 1725.

Bath Chair, a small carriage or chair on wheels, drawn by a chairman, and intended for the conveyance of invalids or others for short distances.

Bathometer, an instrument for measuring the depth of sea beneath a vessel without casting a line.

Bathori, a Hungarian family, which gave Transylvania five princes, and Poland one of its greatest kings.

Bathori, Elizabeth, niece of ductor of an orchestra has a baton Stephen, King of Poland, and wife of for the purpose of directing the per-

Count Nadasdy, of Hungary; a historical monster. By means of large bribes, she induced an old man servant and two female servants to kidnap and convey to her, either by stratagem or force, young girls from the neighboring country, whom she slowly put to death in the dungeons of her castle by the most horrible tortures. Inquiry was at length made into the appalling rumors, when it was discovered that this female fiend had murdered in cold blood, not fewer than 650 maidens. The domestics who assisted her were either beheaded or burned alive. The Countess, who merited certainly the greater punishment, died quietly in 1614, in her fortress of Esej, where she had been confined for life.

Bath-sheba, the wife of Uriah. David caused her husband to be slain, and afterward took her to wife. These sins displeased Jehovah, who sent the prophet Nathan to David, with the parable of the ewe lamb. David bitterly repented, but yet was punished. Bath-sheba was the mother of Solomon, whose succession to the throne she took pains to secure.

COLLAR AND BADGE, ORDER OF BATH.

Baton, a short staff or truncheon, in some cases used as an official badge, as that of a field marshal. The conductor of an orchestra has a baton for the purpose of directing the per-

formers as to time, etc. In heraldry the bastard bar is a baton sinister.

Baton Rouge, city and capital of the State of Louisiana and of East Baton Rouge parish; on the Mississippi river and several railroads; 89 miles N. W. of New Orleans; built on a bluff commanding a fine view of its environment. Besides the State Capitol, it contains the State University, State Penitentiary, State Asylums for the Deaf, Dumb, and Blind, insane asylum, and many charitable institutions. It was the charitable institutions. It was the State capital in 1847-1864 and since 1880. The State ordinance of secession was adopted here in 1861, and the city was held by Federal troops in 1862-65. Pop. (1930) 30,729.

Batthyanyi, one of the oldest and most powerful of the noble families of Hungary, which traces its origin

Batoum, or Batum, a Russian port on the E. coast of the Black Sea.

Battering Ram, an ancient milidown walls. It existed among the Assyrians, the Greeks, and the Romans. It consisted of a pole or beam of wood, sometimes as much as 80, 100, or even 120 feet in length. It was suspended by its extremities from a single point, or from two points in another beam above, which lay horizontally across two

BATTERING RAM.

which it gave to the masonry at each and resumed military service.

vibration being rendered all the more effective that one end of it was armed with iron.

Battery, in law, the unlawful beating of another, or even the touching him with hostile intent. In military usage, a certain number of artillerymen united under the command of a field officer, and the lowest tactical unit in the artillery. In a battery there are gunners who work the guns, and drivers who drive the horses by which these guns are transported from place to place. Batteries are usually distinguished as horse, field, and garrison

of Hungary, which traces its original as far back as the invasion of Pannonia by the Magyars, in 884 A.D., and has given to Hungary many distinguished warriors, statesmen, and churchmen.

Battle, a town in Sussex, England, 6 miles N. W. of Hastings. An uninhabited heathland then, Senlac by name, it received its present name from the battle of Hastings, fought here on Oct. 14, 1066, which won England for the Normans.

Battle, Cullen Andrews, an American military officer; born in Powelton, Ga.; June 1, 1829. At the outbreak of the Civil War he entered the Confederate army, and during the war was wounded seven times, promoted Brigadier-General on the field of Gettysburg, and Major-General in October, 1864. After the war he devoted most of his time to journalism in Newbern, N. C. D. in 1905.

Battle, Kemp Plummer, an American educator; born in Franklin Co., N. C., Dec. 19, 1831; graduated at the University of North Carolina in 1840. olina in 1849; was a member of the State Convention of North Carolina in 1861 that passed the ordinance of secession; State Treasurer, 1866-1868; president of the University of North Carolina, in 1876-1891; and afterward Professor of History there.

posts. When at rest it was level, like the beam above it. When put in action against a wall, it was swung horizontally by men who succeeded each other in constant relays, the blow the succeeded each other in constant relays, the succeeded each other in constant relays, the blow the succeeded each other in constant relays, the blow the succeeded each other in constant relays, the succeeded each other in constant relays are succeeded each other in constant relays are succeeded each other in constant relays are succeeded each other in constant relay

Battle Creek, a city in Calhoun county, Mich.; on the Kalamazoo river and the Michigan Central and other railroads; 45 miles S. W. of Lansing; is largely engaged in manufacturing, producing, among other commodities, a vast amount of breakfast and health foods. It is the seat of Battle Creek College (Adv.), and one of the largest sanitaria in the country. Pop. (1930) 43,573.

Battle-Ground, a town in Tippecanoe Co., Ind., where the famous battle of Tippecanoe was fought between the United States troops under General Harrison and the Indians under Tecumseh and his brother, "The Prophet," on Nov. 7, 1811.

Battleship, a term specifically applied to a warship designed for fighting in the first line of battle, and to be able to give and receive the severest possible blows; hence its armor is the least vulnerable, its guns are the heaviest, and the qualities of the cruiser and armored cruiser are subordinated to its protection and armament. The development of the battleship has been one of rapid progress among the maritime nations of Europe, and from the rivalry to secure the most formidable type have come, in recent years, the Dreadnaught and Super-Dreadnaught classes. In 1925 the United States navy had eighteen vessels classed as battleships of the first line and an equal number classed as battleships of the second line. Each bore the name of a State, and all ranged in displacement from 22,000 tons to 32,000. Several of the most powerful ones are popularly designated as Dreadnaughts and Super-Dreadnaughts, but the official classname is battleship.

Batum, or Batoum, a port on the east coast of the Black Sea, acquired by Russia by the Treaty of Berlin, on condition that its fortifications were dismantled and it were thrown open as a free port. It rapidly grew to be the main outlet for Transcaucasia, in-cluding the traffic in petroleum, im-mense quantities of which are shipped;

Battle, Trial by, or Wager of built outside it; it was connected by a (originally battel), an old method of military road with Kars; and finally, deciding disputes by personal combat. in July, 1886, the Russian government declared it to be a free port no longer. Its importance as a naval and military station to Russia is unques-tionably great, and it will probably rank as one of the strongest positions on the Black Sea. The water is of great depth close inshore, and the shipping lies under protection of the overhanging cliffs of the Gouriel Mountains. Pop. (Est.) 46.000.

Baudelaire, Charles, a French poet, born April 9, 1821; died 1867. He was the herald, if not the founder of the so called decadent school of French literature. He seems to have striven to be as offensive as possible in the expression of his peculiar views of life, nature and God, yet his work will live because of its wonderful technique, which is not equalled in French poetry.

Bandry, Paul, a French painter, born Nov. 7, 1828, at La Roche-sur-Yon; died Jan. 17, 1886.

Bauer, Wilhelm, a German inventor, born in Dillingen, in 1822. He served as an artilleryman during the Schleswig-Holstein War (1866), and, meanwhile, conceived the plan of a submarine vessel for coast defense. It was subsequently adopted by Russia. He afterward made improvements in torpedoes. He died in 1875.

Bauernfeld, Eduard von, an Austrian dramatist, born in Vienna, Jan. 13, 1802; died Aug. 9, 1890.

Baum, Friedrich, a German military officer in the British service in the Revolutionary War. He arrived in Canada in 1776, and in Burgoyne's expedition acted as Lieutenant-Colonel of the Brunswick dragoons. He was sent out with 800 men and two pieces of artillery on a foraging expedition. Near Bennington, Vt., he was attacked by the New Hampshire militia under Stark, and utterly defeated. himself was killed Aug. 16, 1777. He

Bauxite, a mineral occurring in round, concretionary, disseminated grains: found extensively in France and other parts of Europe, and in the United States, principally in Alabama and Georgia. The purest bauxite is and Georgia. its harbor was enlarged for alleged called aluminum ore, because com-commercial reasons; an arsenal was mercial aluminum is made from it.

Ü

Bausset, Louis François, Cardinal, born in Pondiccherry, India, Dec. 14, 1748. His father, who held an important position in the French Indies, sent young Bausset to France when he was but 12 years of age. He was educated by the Jesuits, and became higher of Alais in 1724 came bishop of Alais in 1784. After the restoration of Louis XVIII., in 1815, he entered the Chamber of Peers; the following year he became a member of the French Academy; and, in 1817, he received the appointment of Cardinal. He died in Paris, June 21, 1824.

Bautain, Louis Eugene Marie, a French philosopher, born in Paris, Feb. 17, 1796; died Oct. 18, 1867.

Bavaria, a republic of Central Europe, in the S. of Germany, com-posed of two isolated portions of unequal size. Bavaria is estimated to contain an area of 30,346 English square miles, and is divided into eight circles (kreise). The total population in 1925 was 7.379,594.

Bavaria is one of the most favored countries in Germany, in respect of the fruitfulness of its soil. In the plains and valleys the soil is capable of producing all kinds of crops. The forests of Bavaria, composed chiefly of fir and pine trees, cover nearly a third of its entire surface, and yield a large revenue to the State; much timber being annually exported, together with potashes, tar, turpentine, and other products peculiar to these wooded regions. The principal mineral products are salt, coal, and iron. Some of the mining works belong to the State, and contribute something to the public revenue; but the minerals are not wrought to the extent they might be. In the rearing of cattle and sheep the Bavarians are somewhat backward. Swine are reared in great numbers in all parts of the country, and poultry and wild fowl are abundant. wolves and bears, with which the forests of Bavaria were at one time infested, are nearly extinct.

The manufactures of Bavaria are singly not very important, being mostly on a small scale, and conducted by individuals of limited capital. The principal articles manufactured are linens, woolens, cottons, silks, leather. linens, woolens, cottons, silks, leather. Prussia, and to pay a war indemnity paper, glass, earthen and iron and of 30,000,000 florins. Soon after Basteel ware, jewelry, etc., but the supply of some of these articles is inade-

quate to the home consumption. leather, paper, glass, and ironware, rather large quantities are exported. The optical and mathematical instru-ments made at Munich are the best on the Continent, and are prized accordingly. But the most important branch of manufacture in Bavaria is the brewing of beer—the universal and favorite beverage of the country.

There are over 7,500 schools in Bavaria, attended by more than 1,091,800 pupils. Attendance at school is compulsory up to 16 years of age. There are three universities in Bavaria—two of which (Munich and Wurzburg) are Roman Catholic, and one (Erlangen) Protestant. The capital, Munich, contains a library of 800,000 volumes, including 25,000 MSS.; several scientific and literary institutions, academies, and national societies, and extensive collections of works of art.
The religion of the State is Roman

Catholicism, which embraces more than 70 per cent. of the population. The Protestants number about 21 per cent.; the Hebrews 1 per cent., the re-

mainder being Mennonites, etc.

Bavaria was formerly a member of the Germanic Confederation, and now since the reorganization after the World War, is a democratic republic, with parliamentary government. It is a state without a president, thus lacking organ required to maintain the balance of power against parliamentary control. Power is in the Diet, which is a single Chamber elected by universal suffrage ballot, and can be dissolved by popular demand. The Minister-President is appointed by the Diet, and other ministers are selected by him with consent of the Diet. The royal or Wittlesbach party is still strong.

In 1805 Bavaria was raised, by the treaty of Presburg to the rank of a kingdom, with some further accessions of territory, all of which were confirmed by the treaties of 1814 and 1815. In the war of 1866 Bavaria sided with Austria, in consequence of which it was obliged, by the treaty of August 22 in the same year, to cede a small portion of its territory to

verein under Prussian regulations. In the Franco-German War of 1870-1871 Bavaria took a prominent part, and since 1871 it has been one of the constituent States of the German empire, represented in the Bundesrath by 6; in the Reichstag by 48 members. In 1886 King Louis II. committed suicide from alienation of mind. His brother Otto succeeded, but he being also insane, his uncle Luitpold became regent. The latter died Dec. 12, 1912, and was succeeded by his son, pro-claimed King as Ludwig III., Nov. 5, In Nov., 1918, the former dynasty was deposed and an independent republic founded.

Baxter, Richard, an English Noncomformist preacher and theologi-English cal writer; born in Shropshire in 1615. He early entered the Church, and, taking sides with the Parliamentary party, became chaplain to one of the regiments of the Commonwealth. But, either his Republican opinions offensively prominent or his enemies took advantage of his public preaching to denounce him; for, after enduring much persecution, he, then enduring much persecution, he, then 70 years old, was brought before Judge Jeffreys, who abused him in court, and fined him £500, with imprisonment till paid. Baxter was a prolific writer, a large portion of his works being polemical. D. Dec. 8, 1691.

Baxter, Sylvester, an American publicist, born in West Yarmouth, Mass., Feb. 6, 1850; was educated in Germany; spent many years as a newspaper correspondent in various parts of the world; "father" of the Greater Boston movement. Died 1927.

Bay, an arm or inlet of the sea extending into the land, with a wider mouth proportionally than a gulf.

Bay, a berry, and especially one from some species of the laurel; also the English name of the laurus nobilis. A fine tree, with deep green foliage and a profusion of dark purple or black berries.

Bayadere, a name originally given by the Portuguese to the singing and dancing girls of Hindustan. They are of two kinds - those who are embrate with song and dance the festi- 47,554; (1930) 47,355.

vals of the gods; the latter are em-ployed by the grandees of India to amuse and cheer them at their banquets.

Bayamo, or San Salvador, a town in the interior of the E. part of the island of Cuba, situated in a fertile and healthy district on the northern slope of the Sierra Maestra. It is connected by a railway with Manzan-

Bayard, or more properly Bayart, Pierre du Terrail, Chevalier de, called the "knight without fear and without reproach"; born in 1476, in the castle of Bayard, near Grenoble, was one of the most spotless characters of the Middle Ages. He was simple and modest: a true friend and tender lover; pious, humane, and magnanimous. He died April 30, 1524.

Bayard, Thomas Francis, an American statesman and diplomatist, born in Wilmington, Del., Oct. 29, He was admitted to the bar in 1851 and practiced law until 1868, when he succeeded his father, James A. Bayard, in the United States Senate. In the Democratic National Convention of 1872 he received 15 votes for the presidential nomination. and in 1880 and 1884 his name was voted on in the National conventions. In 1885 Mr. Bayard was chosen Secretary of State, and in 1892, was appointed United States Ambassador to the Court of St. James, being the first to bear that title. Mr. Bayard filled this office with high honor to himself and his country. During his official residence in London he was the recipient of marked attentions, and by his public utterances and his engaging personality promoted the best feeling in both social and government circles. He died in Dedham, Mass., Sept. 28, 1898.

Bay City, city and capital of Bay county, Mich., on the Saginaw river and several railroads; 13 miles N. of Saginaw; includes since 1905 the former city of West Bay City, on the opposite side of the river. The city is a port of entry; is in a rich forming specified and in the city is a port of entry; is in a rich of two kinds—those who are employed as priestesses in the temples, and those who go about the country as itinerants. The former class celesure as it in the temples, and the cultivation of beet as it in the country as it is a port of tentry, is a port of tentry is a port of tentry, is a port of tentry is a port of tentry is a port of tentry, is a port of tentry is a port of t

Bayeux, an ancient city of Normandy, in the French Department of Calvados, on the Aure. The Gothic cathedral—the oldest, it is said, in Normandy—was rebuilt after a fire by William the Conqueror, in 1077; but the present edifice dates mainly from 1106 to the 13th century.

Bayeux Tapestry, a celebrated roll of linen cloth or canvas, 214 feet in length and 20 inches wide, containing, in 72 distinct compartments, a representation, in embroidery, of the events of the Norman invasion of England, from Harold's leave-taking of Edward the Confessor, on his departure for Normandy, to the battle of Hastings. It contains the figures of 623 men, 202 horses, 55 dogs, 505 animals of various kinds net hitherto enumerated, 37 buildings, 41 ships and boats, and 49 trees—in all 1,512 figures. These are all executed by the needle, and are believed to have been the handiwork of Matilda, the queen of William the Conqueror, and by her presented to the Cathedral of Bayeux. This piece of tapestry is exceedingly valuable, both as a work of art of the period referred to, and as correctly representing the costume of the time. It has been engraved, and several works upon the subject have been published.

Bay Islands, a small group in the Bay of Honduras, 150 miles S. E. of Balize. The cluster was proclaimed a British colony in 1852, but in 1859 they were ceded to the Republic of Honduras.

Bayle, Pierre, French critic and miscellaneous writer, the son of a Calvinist preacher, born at Carlat (Languedoc) in 1647, died at Rotterdam 1706. His chief work is a Dictionary of History and Criticism, which he first published in 1696. This work, much enlarged, has passed through many editions. It is a vast storehouse of facts, discussions, and opinions, and though it was publicly censured by the Rotterdam consistory for its frequent impurities, its pervading scepticism, and tacit atheism, it long remained a favorite book both with literary men and with men of the world. The articles in his dictionary, in themselves, are generally of little value, and serve only as a pretext for

the notes, in which the author displays, at the same time, his learning and the power of his logic.

Bayley, James Roosevelt, an American theologian, born in New York city, Aug. 23, 1814; studied at Trinity College, Hartford, and became minister of the Protestant Episcopal Church; but, in 1842, was converted to the Roman Catholic faith; and, after studying at Paris and Rome, became a priest in 1844. After serving as secretary to Archbishop Hughes, he was consecrated the first Bishop of Newark, N. J., in 1853. In 1872 he became Archbishop of Baltimore, Md. He was the founder of Seton Hall College and several other institutions. He died in Newark, N. J., Oct. 3, 1877.

Bayley, William Shirley, an American geologist, born in Baltimore, Md., Nov. 10, 1861; graduated at Johns Hopkins, in 1883; since 1887 has been Assistant Geologist of the Lake Superior division of the United States Geological Survey, author of books on geology and editor of geological periodicals.

Baylor University, a coeducational institution in Waco, Tex.; now under the auspices of the Baptist Church.

Bayly, Ada Ellen, an English novelist, best known as EDNA LYALL.

Bayly, Thomas Haynes, an English song-writer and author; born in Bath, Oct. 13, 1797. After deserting successively both law and church, Bayly, during a short sojourn in Dublin, first discovered his powers as a ballad writer and achieved his earliest successes. He died April 22, 1839.

Baynes, Thomas Spencer, an English editor, born in Wellington, Somerset, in 1823. He studied under Sir William Hamilton at Edinburgh, and in 1864 he was appointed to the Chair of Logic, Rhetoric, and Metaphysics in St. Andrews University, a post he held till his death, in London, in 1887.

sured by the Rotterdam consistory for its frequent impurities, its pervading excepticism, and tacit atheism, it long remained a favorite book both with literary men and with men of the world. The articles in his dictionary, in themselves, are generally of little value, and serve only as a pretext for but was not universally introduced

until after the pike was wholly laid aside, in the beginning of the 18th century. About 1690 the bayouet began to be fastened by means of a socket to the outside of the barrel, instead of being inserted as formerly in the inside. A variety of the bayonet, called the sword bayonet, is widely used.

Bayonne, a city in Hudson county, N. J.; on New York harbor, Newark bay, and the Central Railroad of New Jersey; 7 miles S. W. of New York city; is principally engaged in shipping coal and refining petroleum; and has a fine residential section. Pop. (1920) 76,754; (1930) 88,979.

Bayonne Conference, a conference held at Bayonne, in June, 1565, between Charles IX. of France, the queen mother, Catherine de Medicis, Elizabeth, Queen of Spain, and the Duke of Alva, envoy of Philip II., to arrange plans for the repression of the Huguenots. It is generally believed that the massacre of St. Bartholo-mew's Day was determined upon at this meeting.

Bayonne, Treaty of, a treaty of peace agreed to May 4, 1808, and signed on the next day, between Napoleon I. and Charles IV., King of Spain. The latter resigned his kingdom, and Napoleon I. engaged to maintain its integrity, and to preserve the Roman Catholic religion. His son, Ferdinand VII., confirmed the cession May 10.

Bayreuth. See BEYROUT.

Bayrhoffer, Karl Theodore, a German Hegelian philosopher, and radical politician, born in Marburg in 1812, was Professor of Philosophy there, taking the chair in 1845. In pulsion. During the brief rule of liberalism in Hesse, he was chosen president of the Chamber; but, in 1853, he was forced to flee to the United States. He died in Jordan, Wis., Feb. 3, 1888. 1846 his radical views caused his ex-

Bay Rum, an aromatic, spirituous liquid, used by hair dressers and perfumers, prepared in the West Indies by distilling rum in which bay leaves have been steeped.

or natural evaporation of sea water in large shallow tanks or bays.

Bay Window, a window projecting beyond the line of the front of a house, generally either in a semi-hex-

agon or semi-octagon. Bazaine, Francois, Achille, a French military officer, born in Ver-sailles, Feb. 13, 1811. He served in Algeria, in Spain against the Carlists, in the Crimean War, and joined the Mexican expedition as general or division, in 1862, and, in 1864, was made a marshal of France. He commanded the 3d Army Corps in the Franco-Prussian War, when he capitulated at Metz, after a seven weeks' siege, with an army of 175,000 men. For this act he was tried by court-martial in 1871, found guilty of trea-son and condemned to death. This sentence was commuted to 20 years' seclusion in the Isle St. Marguerite, from which he escaped and retired to Spain. He died in Madrid, Sept. 23, 1888. His widow, who had clung faithfully to him in his adversity, and had plotted successfully for his escape, died in Mexico City, Jan. 8, 1900. She was a woman of aristocratic birth and much beauty.

Bazan, Emilia Pardo, a Spanish author, born in Coruna, in 1852; published works on history and philosophy, and was the author of "Studies in Darwinism," "Saint Francis of Assisi," and many novels. These, translated into English, have become very popular. Died 1921.

Bazar, an exchange; a market place; a place where goods are exposed for sale. Bazar is a term originally derived from the Arabic, and literally signifies the sale or exchange of goods. The name has of late years been adopted in many America and been adopted in many American and European cities, and is applied to places for the sale of fancy goods, etc.

Baxtau, or Bastau, a Pyrenean valley in the extreme N. of Spain; having a length of 9 miles, and an average breadth of 4 miles. It is inhabited by about 8000 reaches. habited by about 8,000 people, who form, under Spanish supervision, a sort of diminutive republic, at the head of which is the mayor of Elizon-Bay Salt, a general term for do. The citizens of this republic rank coarse grained salt, but properly apwith the Spanish nobility and hold plied to salt obtained by spontaneous special privileges, which were granted

them for former services to the Spanish crown.

Bdellium, in Scripture, is in Hebrew bedholachh, rendered in the Septuagint of Gen. ii: 12, anthrax (literally, burning coal). Some modern writers, following the Septuagint translation, make it a mineral, as are the gold and the onyx stone, with which it is associated in Gen. ii: 12. Others think that it was the gum described below; while the Rabbins, Bochart, and Gesenius consider that it was a pearl, or pearls.

Beach, Alfred Ely, an American publisher and inventor, born in Springpublisher and inventor, born in Spring-field, Mass., in 1826; son of Moses Yale Beach, editor of the old New York "Sun." In 1846 he established the "Scientific American," in connec-tion with Orson D. Munn. For nearly 50 years he was editor of this paper and director of its patent business. He

died in New York city, Jan. 1, 1896.

Beach, Amy Marcy Cheney, an American composer, and one of chief of the few women who are distinguished as creative musicians. She was born in New Hampshire, Sept. 5. 1867. Her most important works are "The Gaelic Symphony," for full orchestra, a "Jubilate," written for the Women's Building at the Chicago Exposition, and a cyclus of fourteen songs.

Beach, Moses Yale, an American publisher and inventor, born 1800; died 1868. He became owner of the New York "Sun" three years after its establishment. His inventions relate to the manufacture of paper, and include a rag-cutting machine.

Beaconsfield, Benjamin Dis-raeli, Earl of, an English statesman and author; born in London, England, Dec. 21, 1804; the eldest son of Isaac D'Israeli, the well-known au-thor of the "Curiosities of Literature": his mother also being of Jewish race. Little is known of his early education, though it is certain he never attended a public school or a university. In 1817 he was baptized into the Church of England. He acquired a good reputation as an author, and sought eminence in politics.

February, 1868, he reached the summit of his ambition, becoming premier on the resignation of Lord Derby, but being in a minority after the general election he had to give up office the following December. In 1874 he again became prime minister with a strong Conservative majority, and he remained in power for six years. This period was marked by his elevation to the peerage in 1876 as Earl of Beaconsfield, and by the prominent part he took in regard to the Eastern question and the con-clusion of the treaty of Berlin in 1878, when he visited the German capital.

In the spring of 1880 Parliament was rather suddenly dissolved, and the new Parliament showing an overwhelming Liberal majority, he resigned office, though he still retained the leadership of his party. Not long after this, the publication of a novel called "Endymion" (his last, "Lothair," had been published 10 years before) showed that his intellect was still vigorous. His physical powers, however, were now giving way, and he died April 19, 1881, after an illness of some weeks' duration. His wife had died in 1872 after having been created Viscountess Beaconsfield.

Bead Snake, a beautiful little snake, variegated with yellow, car-mine, and jet black. Though venommine, and jet black. Though venomous, it rarely uses its fangs. It is about two feet long.

Beagle, a small hunting dog.

Beagle Island, an island discovered by Admiral Fitzroy, during a voyage in the "Beagle," to survey Patagonia, in 1828-1834. The channel of the same name is on the S. side of the Island of Tierra del Fuego.

Beal, George Lafayette, an American military officer, born in Norway, Me., May 21, 1825. When the Civil War broke out, he was captain of the Norway Light Infantry. On Jan. 15, 1866, he was mustered out of san. 15, 1806, he was mustered out of service with the brevet of Major-General of Volunteers. In 1880-1885 he was adjutant-general of Maine, and in 1888-1894, State treasurer. He died in Norway, Me., Dec. 11, 1896.

His first appointment to office was in 1852, when he became chancellor of the exchequer under Lord Derby. In ington, D. C., Feb. 4, 1822; graduated

at the United States Naval Academy to support the decks and retain the in 1842, and at the beginning of the Mexican War was assigned to duty in California, under Commodore Stock-ton. After the war, he resigned his naval commission and was appointed Superintendent of Indian Affairs for California and New Mexico. He was commissioned a Brigadier-General in the army by President Pierce. He served in the Union army in the Civil War, and at its close engaged in stock raising in Los Angeles, Cal., till 1876, when President Grant appointed him United States Minister to Austria. He died in Washington, D. C., April 22, 1893.

Beale, Lionel Smith, an English physiologist and microscopist, born in London, Feb. 5, 1828. He was a member of the Royal Medical and Chirurgical, the Microscopical, and other English and foreign societies, and is the author of a number of medical and scientific works.

Beall, John Young, a Confederate guerilla, born in Virginia, Jan. 1, 1835; was appointed an acting master in the Confederate naval service in 1863. On Sept. 19, 1864, he and a number of followers were shipped on the Lake Erie steamer "Philo Parsons" as passengers, and at a given signal, took possession of the vessel, making prisoners of the crew. They also scuttled another boat, the "Isl-and Queen," and tried to wreck a railroad train near Buffalo, N. Y. In spite of a proclamation of Jefferson Davis accurate Davis assuming the responsibility of this expedition, Beall was hanged on Governor's Island, New York, Feb. 24, 1865, on the ground that, if acting under orders, he should have shown some badge of authority.

Beam, a long, straight and strong piece of wood, iron, or steel, especially when holding an important place in some structure, and serving for sup-port or consolidation; often equivalent port or consolidation; often equivalent Columbian University in Washington, to girder. In a balance it is the part from the ends of which the scales are partment of Fishes, United States suspended. In a loom it is a cylindrical piece of wood on which weavers with the warp before weaving; also, the cylinder on which the cloth is bian Exposition in 1893, and at Atrolled as it is woven. In a ship, one of the strong transverse pieces stretching across from one side to the other State Fish Culturist in 1906.

sides at their proper distance; hence, a ship is said to be on her beam ends when lying over on her side.

Beaming, the art of winding the web on the weaver's beam in a manner suitable for weaving, with regard to firmness and evenness. It is to some extent a special employment, followed by workmen trained as beamers.

Bean, a well known cultivated plant which may be primarily divided into the garden bean and the field bean. Of the former, there are numerous sub-varieties. The earliest is the mazagan, which is small seeded; while the largest is the windsor. The field bean runs into two leading sub-varieties, a larger and a smaller one. The navy bean is the common white bean used as an article of diet.

The word is also applied to any leguminous plant resembling a bean, though not of the genuine genus. Such, for example, as the Florida bean, which is the seed, not the fruit, of a West Indian plant. These seeds are washed up on the Florida shore, and are sometimes used as food, and sometimes they are polished and used as ornaments.

Bean, Nehemiah S., an American inventor, born in Gilmanton, N. H., in 1818; learned the machinist's trade. In the winter of 1857-1858 he built his first steam fire engine, which he named the "Lawrence," and sold it to the city of Boston. In 1859 he took the management of the Amostock keag Locomotive Works in Manchester, where he had been employed in 1847–1850. During 1859 he built the "Amoskeag Steam Fire Engine, No. 1," the first of a class of engines which now is used everywhere. He died in Manchester, N. H., July 20, 1896.

Bean, Tarleton Hoffman, an American ichthyologist, born in Bain-bridge, Pa., Oct. 8, 1846; graduated at Columbian University in Washington, Bear, the English name of the various species of plantigrade mammals belonging to the ursus and some neighboring genera. The term plantigrade, applied to the bears, intimates that they walk on the soles of their feet; not, like the digitigrade animals, on their toes. Though having six incisor teeth in each jaw, like the rest of the carnivora, yet the tubercular crowns of the molar teeth show that their food is partly vegetable. They grub up roots, and, when they can obtain it, greedily devour honey. They hibernate in winter. The best known species is ursus arctos, the brown bear, the one sometimes seen dancing to the amusement of children in the streets. They are wild in this country, on the continent of Europe, and in Asia. The grizzly bear, black bear and Polar bear are well known in menageries.

bear are well known in menageries.

In Stock Exchange parlance, a bear is one who contracts to sell on a specified day certain stock not belonging to him, at the market price then prevailing, on receiving imaginary payment for them at the rate which obtains when the promise was made. It now becomes his interest that the stock on which he has speculated should fall in price; and he is tempted to effect this end by circulating adverse rumors regarding it; while the purchaser, called a "bull," sees it to his advantage to make it rise. The origin of the term is uncertain.

In astronomy, the word is applied to one or other of two constellations, Ursa Major and Ursa Minor, called respectively the Great Bear and the Little Bear. When the word Bear stands alone, it signifies Ursa Major.

Beard, the hair that grows on the chin, lips, and adjacent parts of the face of men, and sometimes, though rarely, of women. Its growth is the distinctive sign of manhood.

Beard, Daniel Carter, an American artist and author, born in Cincinnati, O., June 21, 1850; first engaged in civil engineering, but later studied art and has since become known as a book and magazine illustrator. He founded and became teacher of the Department of Animal Drawing in the Woman's School of Applied Design, believed to be the first class of this character in the world.

Beard, George Miller, an American physician and hygienic writer, born at Montville, Conn., May 8, 1839; made a specialty of the study of stimulants and narcotics, hypnotism, spiritualism, etc. He died in New York, Jan. 23, 1883.

Beard, Henry, an American painter, born in Ohio, in 1841; son of James Henry Beard, and nephew of William Holbrook Beard; served in the Union army during the Civil War; and, after his removal to New York city, in 1877, was chiefly engaged in illustrating books and periodicals. He died in New York, Nov. 19, 1889.

Beard, James Henry, an American painter, born in Buffalo, N. Y., in 1814. In his childhood his parents removed to Ohio. He became a portrait painter in Cincinnati, and painted the portraits of Henry Clay and other distinguished men. He died in Flushing, N. Y., April 4, 1893.

Beard, William Holbrook, an American painter, born in Painesville, O., April 13, 1825; brother of James H. Beard; was a traveling portrait painter from 1846 till 1851, when he settled in Buffalo, N. Y. He made many studies of decorative architecture. He died in New York city, Feb. 20, 1900.

Beard Moss, a lichen of gray color, forming a shaggy coat on many forest trees.

Beardsley, Aubrey, an English author and illustrator, born in Brighton, in 1874; died in Mentone, France, March 16, 1898.

Beardsley, Samuel, an American jurist, born in Hoosic, N. Y., Feb. 9, 1790. He became Associate Judge of the Supreme Court of New York in 1844, and three years later succeeded Judge Bronson as Chief Justice. On his retirement he devoted himself to the practice of his profession. He died in Utica, N. Y., May 6, 1860.

Bearer Company, a British organization for removing wounded soldiers from the field of battle to the dressing station or temporary hospital.

Bear Lake, Great, an extensive sheet of fresh water in the Northwest Territory of Canada.

Bear River, a river of the United States, 400 miles long; rises in the N. of Utah, and flows N. into Idaho; turns abruptly S., re-enters Utah, and

empties into Great Salt Lake.

Bear's Grease, the fat of bears, esteemed as of great efficacy in nourishing and promoting the growth of hair. The unguents sold under this name, however, are in a great measure made of hog's lard or veal fat, or a mixture of both, scented and slightly colored.

Beast Fables, stories in which animals play human parts, a widely spread primitive form of literature, often surviving in more or less developed forms in the more advanced civilizations.

. Beat, in music, the beating or pulsation resulting from the joint vibra-tions of two sounds of the same strength, and all but in unison. Also a short shake or transient grace-note struck immediately before the note it is intended to ornament.

Beatification, in general, the act of rendering supremely blessed, also the state of being rendered supremely blessed. In a special sense an act by which the Pope declares, on evidence which he considers himself to possess, that a certain deceased person is in the enjoyment of supreme felicity in Heaven. It is the first step toward canonization, but it is not canonization itself.

Beaton, David, Cardinal Archbishop of St. Andrew's, Scotland, born in 1494. He became Abbot of Arbroath in 1525, Lord Privy Seal three years later, was sent on several missions to France, received a cardinal's hat in 1538, and in the following year became Primate. On the death of James V., he, by craft and determination, secured to himself the chief power in Church and State, being named Lord High Chancellor of Scotland, and Papal Legate. He opposed an alliance with England, and especially distinguished himself as a persecutor of the Reformers. The trial and burning of George Wishart for heresy took place under his direction, and, a short time afterward Beaton was assassinated at St. Andrew's, in May, 1546. With his death, church tyranny came to an end in Scotland.

Beattie, James, a Scottish poet and miscellaneous writer, born at Laurencekirk, Kincardineshire, Oct. 25, 1735. In 1765 he published a poem, the "Judgment of Paris," and in 1770 his celebrated "Essay on Truth," for which the University of Oxford conferred on him the degree of LL. D.; and George III. honored him, when on a visit to London, with a private conference and a pension. He died in Aberdeen, Aug. 18, 1803.

Beatty, David, 1st Earl, a Brit. Jan. 17, 1871; was appointed a naval cadet in 1884; became a lieutenant in 1892; accompanied Lord Kitchener's expedition to Egypt; was in China at the Boxer uprising; was promoted to rear-admiral in 1910 and vice-admiral in 1914; won the first sea battle in the World War off Helgoland Bight; and commanded the battle-cruiser di-vision of the British fleet in the great naval battle off Jutland, May 31, 1916. Lord Beatty married Ethel, only daughter of the late Marshall Field of Chicago. See APPENDIX: World War.

Beatty, John, an American legislator, born in Bucks county, Pa., Dec. 19, 1749; was educated at Princeton, and took up the study of medicine with Dr. Rush of Philadelphia. He fought with distinction through the Revolutionary War, reaching the rank of Colonel; was Delegate to the Continental Congress in 1783-1785; Speaker of the House; served in the convention which adopted the Federal Constitution; was a member of Congress in 1793-1795; and Secretary of State of New Jersey in 1795-1805. He died in Trenton, N. J., April 30, 1826.

Beatty, John, an American military officer, born near Sandusky, O., Dec. 16, 1828. He fought on the Union side in the Civil War, rising from private to Brigadier-General, and showing intrepid courage at Stone River, 1862–1863. He was a member of Congress in 1868–1874; Republican Presidential Elector-et-Large in lican Presidential Elector at Large in 1884; and author of "High Tariff or Low Tariff, Which?" He died Dec. 21, 1914.

Beaufort, Margaret, an English countess, born in 1441; daughter of John, first Duke of Somerset, and

mother of Henry VII., King of England. In the Wars of the Roses, she and her son, Henry, became more or less dangerous to the Yorkists and were for a long time in retirement or exile. Henry was attainted by a Parliament under Richard III., and Margaret's estates forfeited. After the accession of her son as Henry VII. she took no part in public affairs. Her life forms one of the romantic episodes of English history. She was devoutly religious, and founded several religious institutions.

Beauharnais, Eugene de, Viceroy of Italy, and a Prince of the French Empire, son of Alexandre de Beau-harnais and Josephine, born in Paris in 1781. After his mother's marriage to Napoleon, he, in 1796, became aidede-camp to the latter, and served with distinction in the campaigns of Italy and Egypt. Beauharnais was wounded at Acre, contributed to the victory of Marengo, was created Prince of the Empire in 1805, and Vicercy of Italy. In 1806, he married the Princess Amalie Augusta, of Bavaria, and in the same year was adopted by the Emperor as his son, and appointed governor of Lombardy and Venice. He served in the campaign of 1809, defeated the Austrians at Raab, and distinguished himself at Wagram. His military talents were particularly evinced in the retreat from Moscow, and in the following campaigns of 1813–1814. To Beauharnais may be mainly ascribed the victory of Lutzen. After the fall of Napoleon, he retired to Munich, was allowed, by the Treaty of Fontainebleau and the Congress of Vienna, to retain his extensive possessions in Italy, and took his place as Duke of Leuchtenberg among the Bavarian nobles. His children subsequently ranked as members of the imperial family of Russia. He died Feb.

21, 1824.

Beaumarchais, Pierre Augustin, Baron de, born in Paris, Jan. 24, 1732. He was a mar of singular versatility of talent, being by turns politician, artist, dramatist, and merchant. At the beginning of the American War of Independence (1777), Beaumarchais entered into a speculation for supplying the colonies with arms, ammunition, etc.: he lost several vessels, three of which were taken

in one day by the English cruisers in coming out of the river of Bordeaux, but the greater number arrived in America, and inspired the colonists with renewed hope. He died in Paris, May 18, 1799.

Beaumont, city and capital of Jefferson county, Tex.; on the Neches river and the Gulf & Interstate and other railroads; 30 miles N. of the Gulf of Mexico; is in a region abounding in petroleum. The Beaumont Oil fields is one of the largest in the world; ships large quantities of lumber and shingles; and has rice, saw, shingle, stave, and heading mills, foundry and machine shops, and car works. Pop. (1930) 57.732.

Beaumont, a picturesque town in N. France, near the left bank of the Meuse, 12 miles E. by S. of the battlefield of Sedan and the same distance from the Belgian border. It was conspicuous in the Franco-Prussian war of 1870, and later in the great World War. See APPENDIX: World War.

Beaumont, Francis, and Fletcher, John, two eminent English dramatic writers, contemporaries of Shakespeare, and the most famous of literary partners. The former was born at Grace-Dieu, in Leicestershire, in 1584. At the age of 16 he published a translation, in verse, of Ovid's fable of "Salmacis and Hermaphroditus." He died March 6, 1616, and was buried in Westminster Abbey. John Fletcher was born at Rye, Sussex, in December, 1579. His father was successively Dean of Peterborough, Bishop of Bristol, Worcester, and London. The "Woman Hater," produced in 1606–1607, is the earliest work known to exist in which he had a hand. He died in 1625.

Beaumont, William, an American surgeon, born in Lebanon, Conn., in 1785. His experiments on digestion with the Canadian St. Martin, who lived for years after receiving a gunshot wound in the stomach which left an aperture of about two inches in diameter, were of great importance to physiological science. He died in St. Louis, Mo., April 25, 1853.

Beauregard, Pierre Gustave Toutant, an American military officer, born in St. Martin's parish, La,

May 28, 1818; was graduated at the United States Military Academy and appointed a brevet Second Lieutenant of Artillery in 1838. He distin-guished himself in the Mexican War, where he won the brevet of Major. He resigned his commission after the secession of Louisiana in February following; was appointed com-mander of the Confederate forces at Charleston, S. C., and there opened the hostilities of the Civil War by bombarding Fort Sumter, on April 11. After the evacuation of the fort by Major Anderson, General Beauregard was transferred to Virginia. where he commanded the Confederate where he commanded the Confederate forces in the battle of Bull Run, on July 21. In March, 1862, he was ordered to the Army of the Mississippi, under Gen. Albert S. Johnston, and in April following fought the battle of Shiloh, gaining a victory over the National forces the first day, but being defeated by General Grant on the sen defeated by General Grant on the sec-ond day. Failing health kept him from active duty till June, 1863, when he took charge of the defense of Charleston against the combined land and naval forces. He remained in command there till April, 1864, when he was ordered to Richmond to strengthen its defenses. On May 16, he attacked General Butler in front of Drury's Bluff, and forced him back to his intrenchments between the James and the Appomattox rivers. He attempted to aid General Joseph E. Johnston in opposing General Sherman, but in April surrendered with the former to the latter. After the war he became president of the New Orleans, Jackson and Missis-sippi Railroad Company, Adjutant-General of the State, and a manager of the Louisiana State Lottery. In 1866 the chief command of the Rumanian army was tendered him, and in 1869 that of the army of the Khedive of Egypt, both of which he declined. He died in New Orleans, Feb. 20, 1893.

Beaux, Cecilia, an American artist, born in Philadelphia about 1877. She won nearly every prize for which she competed in America, and became a member of the National Academy in 1892, and also of the Société des Beaux-Arts in Paris. Her work is exclusively portraiture.

Beaver, a quadruped of the order Rodentia, or gnawers, the only species of its genus. It is very widely dis-

BEAVER.

tributed, being found in the N. parts of Europe, Asia, and America, nowadays most abundantly in the N. and thinly peopled parts of North America, dwelling in communities on the banks of rivers and lakes.

At one time immense numbers of these animals were killed for their fur, which was largely used in making hats, but in more recent times they have suffered less persecution on this account, their fur now not being held in the same estimation.

The beaver is about two feet in length; its body thick and heavy; the head compressed, and somewhat arched at the front, the upper part rather narrow; the snout much so. The eyes are placed rather high on the head, and the pupils are rounded; the ears are short, elliptical, and almost concealed by the fur. The skin is covered by two sorts of hair, of which one is long, rather stiff, elastic, and of a gray color for two-thirds of its length next the base, and terminated by shining, reddish-brown points; the other is short, thick, tufted, and soft, being of different shades of silver-gray or light lead color. The hair is shortest on the head and feet. The hind legs are longer than the fore, and are completely webbed. The tail is 10 or 11 inches long, and, except the part nearest the body, is covered with hexagonal scales.

Beauvais, a town of N. France, at the confluence of the Therain and Avelon, 49 miles N. by W. of Paris. It was besieged by the English in 1346 and 1433, and by the Duke of Burgundy in 1472, and was in the field of operations during the World War. See APPENDIX: World War.

Beaver, James Addams, an American military officer and statesman, born in Millerstown, Pa., Oct. 21, 1837; was graduated at Jefferson College, Canonsburg, Pa., in 1856; and studied law with H. N. McAllister, Bellefonte, Pa., whose partner he afterward became. On the outbreak of the Civil War he was made Lieutenant-Colonel of the 45th Pennsylvania Volunteers. At the battle of Ream's Station, he was severely wounded and lost a leg; and was retired with the rank of Brigadier-General of Volunteers (Dec. 22, 1864). He then resumed the practice of law; became Major-General of the Pennsylvania State Militia; was defeated as a Republican endidate for Governor in 1882; elected in 1887; President of the Board of Trustees of the Pennsylvania State College; Vice-Moderator of the Presbyterian General Assembly in 1888 and 1895; and member of the Commission on Investigation of the War Department in 1898. He died Jan. 31, 1914.

Bebeerine, in chemistry, an uncrystallizable basic substance, extracted from the bark of the greenheart tree of Guiana. In pharmacy, the sulphate of bebeerine is a very valuble medicine, being used like quinine as a tonic and febrifuge.

Bebek, a beautiful bay on the European side of the Bosphorus, with a palace of the Sultan, known as the Humayunabad, and built in 1725.

Bebel, Ferdinand August, a German Socialist, born in Cologne in 1840. He settled in Leipsic in 1860, joined various labor organizations, and became one of the editors of the "Volkstaat" and the better known "Vorwarts." Membership in the North German Reichstag was followed by his election to the German Reichstag, of which he was a member from 1871 to 1881, and which he entered again in 1883. He died Aug. 13, 1913.

Bec, a celebrated abbey of France, in Normandy, near Brionne, now represented only by some ruins. Lanfranc and Anselm were both connected with this abbey.

Beccaria, Cesare Bonesana, Marquis de, an Italian political philosopher, born at Milan, March 15, 1738. He is chiefly known as author of the celebrated "Treatise on Crimes and Punishments," which first appeared in 1764, and advocated great reforms in criminal legislation. He died in Milan, Nov. 28, 1794.

Becerra, Gaspar, a Spanish painter and sculptor, born in 1520. He studied under Michael Angelo at Rome, and is credited with the chief share in the establishment of the fine arts in Spain. He died in 1570.

arts in Spain. He died in 1570.

Beche, Sir Henry, an English geologist, born in 1796. He founded the Geological Survey of Great Britain, which was soon undertaken by the Government, De la Beche being appointed director general. He also founded the Museum of Practical Geology, and the School of Mines. He died in 1855.

Bechuanaland, an extensive tract in South Africa, inhabited by the Bechuanas, extending from 28° S. lat. to the Zambesi, and from 20° E. long. to the Transvaal border. The colony was annexed to Cape Colony and the protectorate placed under a British commissioner in 1895.

Beck, James Burnie, an American lawyer, born in Dumfriesshire, Scotland, Feb. 13, 1822; came to the United States when a youth, and settled in Kentucky. He was elected a Democratic Representative to Congress in 1866, 1868, 1870, and 1872, and United States Senator in 1876, 1882, and 1888. He died in Washington, D. C., May 3, 1890.

Beck, James Montgomery, an American lawyer, born in Philadelphia, Pa., July 9, 1861; was admitted to the bar in 1884; and was assistant attorney-general of the United States in 1896-1900. During the World War he published a number of critical reviews of conditions which attracted attention; member of Congress 1927-29.

Becker, George Ferdinand, an American geologist, born in New York, Jan. 5, 1847; graduated at Harvard University in 1868; was Instructor of Mining and Metallurgy in the University of California in 1875-1879; attached to the United States 1875-Geological Survey since 1879, and Special Agent of the 10th Census, 1879-1883. He was appointed a special agent to examine into the mineral resources of the Philippine Islands in 1898.

Becker, Karl Ferdinand, a German musician, born in Leipsic, July 17, 1804; died in Leipsic, Oct. 26, 1877.

Becker, Karl Ferdinand, a German philologist, born in Liser, April 14, 1775; died in Offenbach, Sept. 5,

Becker, Karl Friedrich, a German historical writer, born in Berlin, 1777; wrote various popular works on historical topics. He died in Berlin, March 15, 1806.

Becket, Thomas, the most celebrated Roman Catholic prelate in the English annals; born in London in 1117 or 1118. He was the son of Gilbert, a London merchant. His mother is said to have been a Saracen lady, to whose father Gilbert was pris-oner in Jerusalem, having become a captive during the Crusades. The lady is said to have fallen in love with the prisoner, to have assisted him in obtaining his liberty, and afterwards to have followed him to London, where she found him with the greatest difficulty. After studying at Oxford and Paris, Becket studied civil law at Bologna, Italy, and returning to England was made Archdeacon of Canterbury and Provost of Beverly.

In 1158 Becket was appointed highchancellor, and at this time was a complete courtier, conforming in every respect to the humor of the king. Henry II. raised his favorite to the primacy, on the presumption that he would aid him in those political views, in respect to Church power, which all the sovereigns of the Norman line embraced, and which, in fact, caused a continual struggle till its termination by Henry VIII.

Becket was consecrated archbishop

in 1162, and immediately affected an austerity of character which formed

ander III. held a general council at Tours in 1163, at which Becket at-tended and made a formal complaint of the infringements by the laity on the rights and immunities of the Church. On his return to England he began to act in the spirit of this representation, and to prosecute several of the nobility and others holding Church possessions, whom he also proceeded to excommunicate. Finding himself the object of the king's displeasure, he soon after attempted to escape to France: but being intercepted, Henry, in a Parliament at Northampton, charged him with a violation of his allegiance, and all his goods were confiscated.

After much negotiation a sort of reconciliation took place in 1170, on the whole to the advantage of Becket, who, being restored to his see, with all his former privileges, behaved on the occasion with excessive haughtiness. After a triumphal entry into Canterbury the young Prince Henry, crowned during the lifetime of his father, transmitted him an order to restore the suspended and excommunicated prelates, which he refused to do, on the pretence that the Pope alone could grant the favor, though the latter had lodged the instruments of cen-

sure in his hands.

The deposed prelates thereupon immediately appealed to Henry in Normandy, who in a state of extreme exasperation exclaimed, "What an unhappy prince am I, who have not about me one man of spirit enough to rid me of a single insolent prelate, the perpetual trouble of my life!" These rash and too significant words induced four of the attendant barons, Reginald Fitz-Urse, William de Tracy, Hugh de Morville, and Richard Brete, to resolve to wipe out the king's reproach. Having laid their plans, they forthwith proceeded to Canterbury, and having formally required the archbishop to restore the suspended prelates, they returned in the evening of the same day (Dec. 29, 1170), and placing soldiers in the courtyard, rushed with their swords drawn into the cathedral, where the archbishop was at vespers, and advancing toward him threatened him with death if he a very natural prelude to the part still disobeyed the orders of Henry. which he meant to play. Pope Alex- Becket, without the least token of

fear, replied that he was ready to die for the rights of the Church; and magnanimously added, "I charge you in the name of the Almighty, not to hurt any other person here, for none of them have been concerned in the late transactions." The confederates then strove to drag him out of the church; but not being able to do so, on account of his resolute deportment, they killed him on the spot with repeated wounds, all which he endured without a groan.

Thus perished Thomas Becket in his 52d year, a martyr to the cause which he espoused, and a man of un-questionable vigor of intellect. He was canonized two years after his death. In the reign of Henry III. Chaucer will prove an enduring testi-

mony.

Beckwith, Sir George, an English military officer, born in 1753. His scene of action was largely in America—in the United States, and the West Indies. He fought with the English in the American Revolution in 1776-1782, and was intrusted with important diplomatic commissions in 1782-1791, as there was then no British Minister to the United States. In 1804, he was made governor of St. Vincent, and four years later governor of Barbadoes. As England was then at war with France, he organized an expedition and conquered Martinique, for which he obtained the thanks of the House of Commons. Later (1810) he conquered Guade-loupe, the last possession of the French in that part of the world. When he returned to England, after nine years' service in the West Indies, a set of silver plate was given to him by the legislature of the Barbadoes, and the King conferred upon him armorial distinction. He died in London, March 20, 1823.

Beckwith, James Carroll, an American genre painter, born in Hannibal, Mo., Sept. 23, 1852; was a pupil of Carolus Duran, and became a member of the National Academy in

1894. Died, Oct. 24, 1917.

Beckwith, John Watrus, an American Episcopal bishop, born in Raleigh, N. C., Feb. 9, 1831; was graduated at Trinity College, Hart-ford, in 1852; ordained priest in 1855; and was elected Bishop of Georgia, being consecrated in Savan-nah, April 2, 1868. He was an elo-quent and powerful preacher, and published several sermons and addresses. He died in Atlanta, Ga., Nov. 24, 1890.

Becquerel, Antoine Cesar, a French physician, and member of the Institute, born in Chatillon-sur-Loing, March 7, 1788. In early life he served in the French army in Spain as an officer of engineers. He invented a new psychometer in 1866. He died in his body was taken up and placed in a Paris, Jan. 18, 1878. His son, Alex-magnificent shrine erected by Arch- ANDRE EDMOND (1820-1891) and his magnificent shrine erected by Arch- ANDRE EDMOND (1820-1891) and his bishop Stephen Langton; and of the grandson Antoine Henri (1852-1908), popularity of the pilgrimages to his son of Alexandre, were also eminent tomb the "Canterbury Tales" of physicists, and made valuable researches on the nature and chemical effects of light, and the magnetic properties of many substances. The latter discovered the luminous ema-nations called "Becquerel Rays."

Bed, in ordinary language, an article of domestic furniture to sleep

upon.

In law, a divorce from bed and board, is the divorce of a husband and wife, to the extent of separating them for a time, the wife receiving support, under the name of alimony, during the severance.

In mechanics, a bed is the foundation piece or portion of anything on which the body of it rests, as the bed piece of a steam engine; the lower stone of a grinding mill; or the box, body, or receptacle of a vehicle.

Bede, or Bæda, generally known as the Venerable Bede, the greatest figure in ancient English literature. was born near Monkwearmouth, Durham, about 673. Left an orphan at the age of six, he was educated in the Benedictine Abbey at Monkwearmouth, entering the monastery of Jarrow, where he was ordained priest in his 30th year. His industry was enormous. Bede wrote homilies, lives enormous. Bede wrote homilies, lives of saints, hymns, epigrams, works on grammar and chronology, and the great "Ecclesiastical History of England," in five books, gleaned from native chronicles and oral tradition. This was translated from Latin into Anglo-Saxon by King Alfred. The first editions were issued from Strasburg in the 15th century. He died in the monastery of Jarrow, May 26. 735.

Bede, Cuthbert, pseudonym of EDWARD BRADLEY, an English author, born in Kidderminster in 1827; died in Lenton, Dec. 12, 1889.

Bedell, Gregory Thurston, an American clergyman, born in Hudson, N. Y., Aug. 27, 1817; in early life was rector of the Protestant Episcopal Church of the Ascension, New York city. In 1859 he was consecrated Assistant Bishop of Ohio, and in 1873 Bishop of that State. He died in New York city, March 11, 1892.

Bedford, Gunning, an American patriot, born in Philadelphia, Pa., about 1730; was a lieutenant in the French War; entered the Revolutionary army with the rank of Major; was wounded at White Plains; became Muster-Master-General in 1776; was a delegate to the Continental Congress; and was elected Governor of Delaware in 1796. He died in Newcastle, Del., Sept. 30, 1797.

Bedford, Gunning, an American lawyer, born in Philadelphia, Pa., in 1747; was graduated at Princeton in 1771; became a lawyer; acted for a time as aide-de-camp to General Washington; represented Delaware in the Continental Congress in 1783-1786; and became Attorney-General of the State, and United States Judge for the District of Dela-ware. He died in Wilmington, Del., March 30, 1812.

Bedford, Gunning S., an American physician, born in Baltimore, Md., in 1806; introduced into the United States obstetrical clinics for the gratuitous treatment of poor women. He died in New York city, Sept. 5, 1870.

Bedford Level, an eastern district of England, comprising about 450,000 acres. It was a mere waste of fen and marsh, until the time of Charles I., when, in 1634, a charter was granted to Francis, Earl of Bed-

complished the undertaking at an enormous expense, and it now forms one of the most fertile and grain-productive districts of the kingdom.

Bedlam, a contraction from Bethlehem, a famous English hospital for lunatics.

Bedloe's Island, an island in New York harbor; ceded to the United States Government, in 1800; the site of Fort Wood, erected in 1841 and mounted with 77 guns; now the location of Bartholdi's colossal statue of "Liberty Enlightening the World."

Bedmar, Alfonso de la Cueva, Marquis of, Cardinal Bishop of Ovie do, a Spanish diplomatist, born in 1572. He was created Cardinal in 1622, was afterward Spanish gover-nor of the Netherlands, made himself detested by the Flemings, and retired to Rome, where he died in 1655.

Bedouins, a Mohammedan people of Arab race, inhabiting chiefly the deserts of Arabia, Syria, Egypt, and North Africa. They lead a nomadic existence in tents, huts, caverns and ruins, associating in families under sheiks or in tribes under emirs.

Bee, the common name given to a large family of hymenopterous or membranous-winged insects, of which the most important is the common hive or honey bee (apis mellifica). It belongs to the warmer parts of the Eastern Hemisphere, but is now natural-ized in the Western. A hive commonly consists of one mother or queen, from 600 to 800 males or drones, and

DRONE BEE.

from 15,000 to 20,000 working bees, formerly termed neuters, but now known to be imperfectly developed females. The last mentioned, the smallon condition of being allowed 95,000 næ, and six abdominal rings, and are acres of the reclaimed land. He acest, have twelve joints to their anten-

outside of the hind legs, a smooth, hollow, edged with hairs, called the basket, in which the kneaded pollen or bee bread, the food of the larvæ, is

QUEEN BEE.

stored for transit. The queen has the same characteristics, but is of larger size, especially in the abdomen; she has also a sting. The males, or drones, differ from both the preceding by having 13 joints to the antennæ; a rounded head with larger eyes, elongated and united at the summit; and no stings. The queen has two large ovaries, consisting of a great number of small cavities, each containing 16 or 17 eggs. The inferior half-circles, except the first and last, on the abdomen of working bees, have each on their inner surface two cavities, where the wax secreted by the bee from its saccharine food, is formed in layers, and comes out from between the abdominal rings. Respiration takes place

WORKER BEE.

by means of air tubes which branch out to all parts of the body, the bee being exceedingly sensitive to an impure atmosphere. Of the organs of sense the most important are the antennæ, deprivation of these resulting in a species of derangement. The majority of entomologists regard their function as in the first place auditory, but they ter of Lyman, and sister of Henry are exceedingly sensitive to tactual lumpressions, and are apparently the principal means of mutual communi- part of her life was devoted to

cation. Bees undergo perfect metamorphosis, the young appearing first as larvæ, then changing to pupæ, from which the imagos or perfect insects spring.

The humblebees, or bumblebees, of which over 60 species are found ir North America, belong to the genus bombus, which is almost world wide in its distribution. Of these species solitary females which have survived the winter, commence constructing small nests when the weather begins to be warm enough; some of them going deep into the earth in dry banks, oth-

ers preferring heaps of stone or gravel,

and others choosing always some bed of dry moss. In the nest the bee col-

lects a mass of pollen and in this lays

ROYAL CELLS.

some eggs. The cells in these nests are not the work of the old bee, but are formed by the young insects similarly to the cocoons of silk worms; and when the perfect insect is released from them by the old bee, which gnaws off their tops, they are employed as honey-cups. The humblebees, how ever, do not store honey for the win-ter, those which survive till the cold weather leaving the nest and penetrating the earth, or taking up some other sheltered position, and remaining there till the spring.

Beech, a tree. The wood is brittle and not very lasting, yet it is used by turners, joiners, and millwrights. The fine thin bark is employed for making baskets and band-boxes.

Beecher, Catherine Esther, an American author and educator, daugh-

training teachers and supplying them to needy fields, especially in the Western and Southern States. She wrote numerous works on education and on the woman question. She died in Elmira, N. Y., May 12, 1878.

Beecher, Henry Ward, an American clergyman, born in Litchfield, Conn., June 24, 1813. He was the son of Lyman Beecher; graduated from Amherst in 1834; studied in Theological Seminary, Cincinnati, Ohio; and began clerical duty as pastor of a church in Lawrenceburg, Ind., removing to Indianapolis in 1839. From 1847 until his death he was Pastor of Plymouth Congregational Church in Brooklyn. He was one of the founders of the "Independent" and of the "Christian ' (now the "Outlook"). He Union ' was also a prominent anti-slavery orator, as well as a famous lecturer. He died in Brooklyn, N. Y., March 8, 1887.

Beecher, Lyman, an American clergyman, born in New Haven, Conn., Oct. 2, 1775. His ancestors were Puritans. He graduated from Yale in 1796, and became pastor of the Presbyterian Church in East Hampton, L. I.; then of a Congregational church in Litchfield, Conn., in 1810; and then of the Hanover Street Congregational Church in Boston, Mass. In 1832 he became President of Lane Theological Seminary, near Cincin-nati, Ohio. His influence throughout the country was very great, especially on the questions of temperance and of slavery. His "Six Sermons on In-temperance" had a great effect, and have been frequently republished and translated into many languages. His franslated into many languages. Its sermon on the death of Alexander Hamilton, in 1804, with his "Remedy for Dueling" (1809), did much toward breaking up the practice of dueling in the United States. He died in Brooklyn, N. Y., June 10, 1863.

Beecher, Thomas Kinnicuty, States of Lynger, States of L

an American clergyman, son of Lyman, and brother of Henry Ward Beecher, born in Litchfield, Conn., Feb. 10, 1824. He became pastor in Brooklyn in 1852, and in Elmira, N. Y., in 1854. He was a very successful brooklyn of the latest and on effective writer on ful lecturer and an effective writer on current topics. He died in Elmira, N. Y., March 14, 1900.

Beechey, Frederick William, an English naval officer, born in London, Feb. 17, 1796. He died in London, Nov. 29, 1856. Beechey Island in the Arctic Archipelago was named after him.

Bee Eater, in the singular the English name of a genus of birds, more fully called the yellow throated bee eater of Africa.

Beelzebub. (1) The fly-god, a god worshipped in the Philistine town of Ekron. (II. Kings i: 3) (2) An evil spirit. (3) Any person of fiendish cruelty, who is nicknamed by his adversaries, or, in contempt of moral sentiment, appropriates the appella-tion to himself and cherishes it as if it were an honorable title.

Beer, an alcoholic drink made from the malted grains of barley, boiled with hops and then fermented with yeast. The manufacture of ale or beer is of very high antiquity. Herodotus ascribes the invention of brewing to Isis, and it was certainly practised in Egypt. Xenophon mentions it as being used in Armenia, and the Gauls were early acquainted with it. Pliny mentions an intoxicating liquor made of corn and water as common to all the nations of the west of Europe, and in England ale-booths were regulated by law as early as the 8th century. A rude pro-cess of brewing is carried on by many uncivilized races; thus chica or maize beer is made by the South American Indians, millet beer by various African tribes, etc. The beers common to most countries are: lager beer that is, store beer, the name being given to it because it is usually kept for four to six months before being used. In brewing it the fermentation is made to go on rather slowly and at a low temperature; Schenk beer, brewed in winter for immediate use; bock beer, brewed extra strong and The served during the spring months. alcohol in beer averages about 4 per cent.

Beerbohm-Tree, Herbert, an English actor, born in London, in 1853. In 1897 he opened his new theatre, Her Majesty's, in the Hay-market. He died July 2, 1917.

Henry Augustin, Beers, American author, born in Buffalo, N. Y., July 2, 1847. He graduated from Yale in 1859; became tutor there in 1871, and Professor of English Literature in 1880. Died Sept. 7, 1926,

ature in 1880. Died Sept. 7, 1926.

Beersheba (now Bir-es-Seba, "the well of the oath"), the place where Abraham made a covenant with Abinelech, and in common speech, representative of the southernmost limit of Palestine, near which it is situated. It is now a mere heap of ruins near two large and five smaller wells, though it was a place of some importance down to the period of the crusades.

Beet, a genus of plants distinguished by its fruit being inclosed in a tough woody or spongy five-lobed enlarged calyx. The garden beet, or beet of general cultivation, is of biennial duration, and has a tender fleshy root. Red beet is principally used at table, in salad, boiled, and cut into slices, as a pickle, and sometimes stewed with onions; but if eaten in great quantity it is said to be injurious to the stomach. The beet may be taken out of the ground for use about the end of August, but it does not attain its full size and perfection till the month of October. When good it is large and of a deep red color, and when boiled is tender, sweet, and palatable.

Beethoven, Ludwig von, one of the greatest musical composers of modern times, was born in Bonn, in 1770. His genius was very early displayed, and his musical education was begun by his father, and continued by the court organist, who introduced him to the works of Sebastian Bach and Handel. He soon attempted composition, and showed wonderful facility in improvisation. About 1790, he settled at Vienna, where Mozart quickly recognized his marvellous powers. When about 40 years of age, he was attacked with deafness, which became total, and lasted through life. He became, gradually, the victim of morbid irritability and hopeless melancholy, ending in confirmed hypochondria, and, finally, dropsy and delirium. He continued to compose, however, long after he had ceased to hear himself play, and received homage and honors from all parts of Europe. He died unmarried, in Vienna, March 26,

1827. Vast power, intense passion, and infinite tenderness are manifested in all his compositions, which abound no less in sweetest melodies than in grand and complicated harmonies. A statue of Beethoven, by Hulmel, was erected at Bonn, in 1845.

Beet Sugar, the sugar obtained from the beet; similar to cane sugar, but inferior in sweetening power. Beet root contains an average of about 10 per cent. of saccharine matter; sugar cane, 18 per cent. Of the varieties, the white Selvig beet is richest.

Of the 985,568,640 pounds of sugar produced in the United States in 1901, about one-third was from beets and two-thirds from cane, and of the 599,774,613 pounds of beet sugar imported, 484,344,004 pounds came unrefined. The annual statement of the American Beet Sugar Company furnishes ample proof of the advance which has been made by the beet sugar industry in the United States. In 1880 the domestic production of beet sugar was 357 tons, and in 1901 it had increased to 124,859 tons, a gain in 20 years of nearly 350 per cent.

The quantity of beet sugar produced in the United States in the year ending June 30, 1929 was 2,036,000,000 pounds against 1,664,000,000 pounds in 1919 an increase of 372,000,000 pounds as compared with an increase of 40,000,000 pounds of cane sugar in the same period. Of the total beet sugar production Colorado furnished 696,000,000 pounds; Nebraska 280,-000,000; and Montana and Wyoming 240,000,000. The scarcity of sugar of all kinds immediately after the World War acted as a great stimulus to the growth of the beet sugar industry. 1,000,000 tons of beet sugar was produced in 1920. In 1929 this output was 1,018,000 tons. The sugar beet industry is today one of the most important developments of agriculture; 79 factories engage in refining.

came, gradually, the victim of morbid irritability and hopeless melan-choly, ending in confirmed hypochondria, and, finally, dropsy and delirium. He continued to compose, however, long after he had ceased to hear himbelf play, and received homage and honors from all parts of Europe. He honors from all parts of Europe. He died unmarried, in Vienna, March 26, the had carly part of his reign establishing this industry in France, and in

1812 he ordered the building of 10 factories and placed Delessert in charge of their construction. In 1830 attempts were made in the United States to introduce the cultivation of the sugar beet. It was not, however, till 1876 that the first successful beet sugar factory was built, being erected in Alvarado, Cal.

Beetle, a name often used as synonymous with the term Coleoptera, but restricted by others to include all those insects that have their wings protected by hard cases or sheaths, called elytra. Beetles vary in size from a mere point to the bulk of a man's fist, the largest, the elephant beetle of S. America, being 4 inches long. The so called 'black beetles' are not properly beetles at all, but cockroaches, and of the order Orthoptera.

Beggars, a term first applied to the 300 Protestant deputies under Henri de Brederode and Louis de Nassau, who protested against the establishment of the Inquisition in Holland, in April, 1566. The Dutch patriots assumed this designation when they rebelled against Spain in 1572.

Beghards, Beguards, or Begards, various spellings of a name said by some to be derived from their begging favor from God in prayer, and to the fact that they were religious mendicants.

Begonia, an extensive genus of succulent-stemmed herbaceous plants, order Begoniaceæ, with fleshy oblique leaves of various colors, and showy unisexual flowers, the whole perianth colored. They readily hybridize, and many fine varieties have been raised from the tuberous-rooted kinds. From the shape of their leaves they have been called elephant's ear. Almost all the plants of the order are tropical.

Beguines, Beguins, or Beguimæ. Associations of praying women which arose in the Netherlands in the 13th century, the first being formed at Nivelles, in Brabant, in A. D. 1226, and spread rapidly in the adjoining countries. They used to weave cloth, live together under a directress, and leave on being married, or indeed whenever they pleased. They still ex-ist in some of the Belgian towns, notably at Ghent, where they are renowned as makers of lace, though un- ground, were executed by the orders

der different rules from those formerly observed.

Begum (a feminine form corresponding to beg, or bey), an Indian title of honor equivalent to princess, conferred on the mothers, sisters, or wives of native rulers. The Begum of Oudh is well known in Indian his-

Behaim, or Behem, Martin, a German mathematician and astronomer, born in Nuremberg about 1430. He colonized the Island of Fayal, where he remained for several years, and assisted in the discovery of the other Azores; was afterward knighted, and returned to his native country, where, in 1492, he constructed a ter restrial globe, still preserved. He died in Lisbon in 1506 in Lisbon in 1506.

Behemoth, the animal described in Job xi: 15-24. It is probably the hippopotamus, which, in the time of Job, seems to have been found in the Nile below the cataracts, though now it is said to occur only above them. A second opinion entertained is that Job's behemoth was the elephant; while a few scholars make the less probable conjecture that it was the rhinoceros.

BEGONIA REX.

Behistun, or Bisutun, a mountain near a village of the same name in Persian Kurdistan, celebrated for the sculptures and cuneiform inscriptions cut upon one of its sides - a rock rising almost perpendicularly to the height of 1,700 feet. These works, which stand about 300 feet from the of Darius I., King of Persia, and set forth his genealogy and victories. To receive the inscriptions, the rock was carefully polished and coated with a hard, siliceous varnish. Their probable date is about 515 B. C. They were first copied and deciphered by Rawlinson.

Behm, Ernst, a German geographer, born in Gotha, Jan. 4, 1830; died in Gotha, March 15, 1884.

Behn, Aphra, or Afra, or Aphara, an English author; born in Wye, in 1640. Early in life she spent several years in the West Indies, where she met the Indians, who became the model of her famous "Oroonoko." She was the first woman writer in England who earned a livelihood by her pen. She died in London, April 16, 1689.

Behring, another spelling of BER-ING.

Beissel, Johann Conrad, a German mystic, born in Eberbach, in 1690. He settled in Pennsylvania in 1720, and established the German Seventh-Day Baptists, at Ephrata, in 1728. He died in Ephrata, in 1768.

Beit, Alfred, So. African financier, b. Hamburg, 1853, d. London, July 16, 1906. He was associated with Cecil Rhodes (q. v.) and left an immense fortune in benefactions.

Beitzke, Heinrich Ludwig, a German historian, born in Muttrin, Feb. 15, 1798; died in Berlin, May 10, 1867.

Bejapoor, a ruined city of Hindustan, in the Bombay Presidency, one of the largest cities in India until its capture by Aurungzebe in 1686. The ruins are chiefly Mohammedan, the principal being Mahomet Shah's tomb, with a dome visible for 14 miles. Pop. 13,245.

Beke, Charles Tilstone, an English geographer, explorer, and author, born in London, Oct. 10, 1800. In 1834 he published "Origines Biblicæ: or, Researches in Primeval History," one of the first attempts to reconstruct history on the principles of the young science of geology. He explored Abyssinia, Godjam and the countries lying to the W. and S., previously almost entirely unknown to Europeans. He died in London, July 31, 1874.

Bekker, Immanuel, a German scholar distinguished by his recensions of the texts of Greek classics, born in Berlin, May 21, 1785; died in Berlin, June 7, 1871.

Bel, in Accadian, Assyrian and Babylonian mythology, a god; mentioned in Scripture, in Is. xlvi: 1; Jer. 1: 2, li: 41; in the Septuagint, in Baruch vi: 40, and in the apocryphal additions to the Book of Daniel, as well as by classical authors. It has been discovered that, prior to 1600 B. C., the highly interesting Turanian people called Accadians, the inventors of the cuneiform writing, who wielded extensive authority in Western Asia before the Semitic Assyrians and Babylonians had come into notice, worshipped as their first triad of gods, Anu, ruling over the heaven; Elu, Belu, or Bel, over the earth; and Ea, over the sea. Bel's three children, or three of his children, were Shamas, the sun-god; Sin, the moon-god; and Ishtar, the Accadian Venus. Sayce shows that some first born children were vicariously offered in sacrifice by fire to the sun-god. From the Accadians, human sacrifice passed to various Semitic tribes and nations. Bel's name Elu identifies him with the Phonician El, who, in a time of trouble, offered his first born son, "the beloved," on a high place, by fire. It is not settled whether or not Bel was the same also as the Phœnician Baal. To the wrath of Bel the deluge was attributed. In Scripture times he was known exclusively as a Babylonian divinity, being distinguished from both Nebo and Merodach. In the later Babylonian Empire, however, Merodach came to be generally identified with Bel, though sometimes distinguished from him, being called "the lesser Bel."

Bel and the Dragon, one of the books of the Apocrypha, or, more precisely, certain apocryphal chapters added to the canonical Book of Daniel. The Jews consider them as no part of their Scriptures. They were penned probably by an Alexandrian Jew, the language used being not Hebrew, nor Aramæan, but Greek. The Church of Rome accepts Bel and the Dragon as part of the Holy Scripture; most, if not all, Protestant churches reject it. The story of Bel and the Dragon tells

how Daniel enlightened Cyrus, who is represented as having been a devout worshiper of Bel, by proving that the immense supplies of food laid before the idol were really consumed, not by it or by the inhabiting divinity, but by the priests and their families. On Cyrus urging that the dragon, also worshipped, was at least a living God, Daniel poisoned it, for which he was thrown into a hons' den, where the Prophet Habakkuk fed him. Ultimately he was released, and his persecutors put to death.

Belasco, David, American actor, His career as actor, playwright and producer was brilliant, the best known of his plays being "The Wife," "Mad-ame Butterfly," "Girl of the Golden ame Butterfly," "Girl of the Golden West," "Kiki." He created the following dramatic stars; E. H. Sothern, Blanche Bates, David Warfield, Mrs. Leslie Carter and Lenore Ulric. Died in New York, May 14, 1931.

Belem, a town in Portugal, W. of Lisbon; noted for a monastery founded in 1500, to commemorate the voyage of Vasco da Gama, and now used as an orphan asylum.

Belemnite, a genus of fossil chambered shells.

Belfast, a seaport and municipal and parliamentary borough of Ireland (in 1888 declared a city), principal town of Ulster, and county town of Antrim, built on low, alluvial land on the left bank of the Lagan, at the head of Belfast Lough. Previous to about 1830 the cotton manufacture was the leading industry of Belfast, but nearly all the mills have been converted to flax spinning. The iron shipbuilding trade is also of importance, and there are breweries, distilleries, flour mills, oil mills, foundries, print works, tan yards, chemical works, rope works, etc. The commerce is An extensive direct trade is carried on with British North America, the Mediterranean, France, Belgium, Holland, and the Baltic, besides ports of the British Islands. Belfast is comparatively a modern town. It returns four members to Parliament. Pop. (1926) 425,156.

North Sea, W. and S. by France, and E. by the duchy of Luxemburg, Rhen-ish Prussia, and Dutch Limburg; greatest length, 165 miles; greatest breadth, 120 miles; area, about 11,750 square miles. For administrative purposes it is divided into nine provinces

— Antwerp, South Brabant, East
Flanders, West Flanders, Hainaut,
Liege, Limburg, Luxemburg, and Namur. Pop. (1926) 7,874,601.

The greater part of the country is well adapted for agricultural operations, and the inhabitants have so happily availed themselves of their natplaywright and producer, born July ural advantages that they early began, 25, 1854 in San Francisco, California. and in some respects still deserve to be regarded as the model farmers of

Europe.

The mineral riches of Belgium are great, and, after agriculture, form the most important of her national interests. They are almost entirely confined to the four provinces of Hainaut, Liege, Namur, and Luxemburg, and consist of lead, manganese, calamine or zinc, iron, and coal. All these minerals, however, are insignificant compared with those of iron and coal. The coal field has an area of above 500 square miles. The 1927 production was 27,573,550 metric tons, one of the largest and most valuable of all the Belgian exports, and employing about 125,000 persons. Nearly the whole of this coal is taken by France.

The industrial products of Belgium are very numerous, and the superiority of many of them to those of most other countries is confessed. The fine linens of Flanders, and lace of South Brabant are of European reputation. Scarcely less celebrated are the car-pets and porcelain of Tournay, the cloth of Verviers, the extensive foundries, machine works, and other iron and steel establishments of Liege, Seraing, and other places. The cotton and woolen manufacturers, confined chiefly to Flanders and the province of Antwerp, have advanced greatly. Other manufactures include silks, beet sugar, beer. In 1927 production of pig iron was 3,751,440 metric tons; zinc output was 201,630 metric tons, while steel manufacture was 3,708,495 metric tons.

The railways have a length of about

Belgium, a kingdom of Europe. 3.000 miles, three-fourths belonging to bounded N. by Holland, N. W. by the the State. The value of the general

commerce for 1927 was: imports, 29,179,537,000 francs; exports, 26,620,738,000 francs. Of this the trade with the United States was 116,201,-318 francs in imports, and exports of 72,240,477 francs. The budget for 1928 was: revenues, 10,563,562,000 francs; expenditures, 10,482,731,000 francs; expenditures, 10,482,731,000 francs. The national debt Dec. 31, 1927, amounted to 55,060,000,000 francs, while receipts from reparations payments in 1928 were 1,067,710,000 francs.

The Belgian population is composed of Flemish and Waloons, the former German and latter French extraction.

Almost the entire population belong to the Roman Catholic Church. Protestantism is fully tolerated, and even salaried by the State, but cannot count above a mere fraction (some 10,000) of the population among its adherents. At the census of 1890 nearly 27 per cent. of the population above 15 years of age could neither read nor write. French is the official language of Belgium and in general use among the educated classes, and there can scarcely be said to be a national literature.

The Belgium constitution combines monarchial with a strong infusion of the democratic principles. The executive power is visited in a hereditary king; the legislative in the king and two chambers—the Senate and the Chamber of Representatives—the former elected for eight years, the latter for four, but one-half of the former renewable every four years, and one-half of the latter every two years. The senators are elected partly directly, partly indirectly (by the provincial councils) and must be 40 years of age. Their numbers depend on population. The deputies or representatives are elected directly, one for every 40,-000 inhabitants at most. In 1914 the Senators numbered 120, and the Rep-resentatives 186. Failure to vote by anyone legally entitled to do so, incurs a fine.

The army is recruited by annual calls to the colors comprising 49 per cent of those inscribed on the rolls. Military service is compulsory for those called to the colors. Active army

Spanish, Austrian and French domination, Belgium was united by the Congress of Vienna to Holland, under the title of the kingdom of the Netherlands. A most injudicious measure of the Dutch government, an at-tempt to assimilate the language of the provinces by prohibiting the use of French in the courts of justice, excited an opposition, which, en-couraged by the success of the French revolution of 1830, broke out into revolt. The electoral system, more-over, gave the preponderance to the N. provinces, though inferior in population, and the interests of the provinces were diametrically opposed in matters of taxation. Belgium was agricultural and manufacturing, Holland commercial; the one wished to tax imports and exports, the other property and industry. In the cham-bers three different languages were spoken, Dutch, German, and French; and the members frequently did not understand each other. Nothing but the most skillful government could have overcome these difficulties, and no statesman appeared fitted to grapple with them. The revolutionary movement became general in the S., and the Dutch troops, at first successful before Brussels, were finally repulsed, and compelled by the arrival of fresh bands of insurgents from all quarters to retire. The Flemings saluted the volunteers of Liege, Mons, and Tournay by the ancient title of Belgians, and this name, which properly distinguished only a section of the people of the S. provinces, became henceforth recognized as the patriotic designation of the whole.

A convention of the great powers assembled in London to determine on the affairs of the Netherlands and stop the effusion of blood. It favored the separation of the provinces, and drew up a treaty to regulate it. In the meantime the National Congress of Belgium offered the crown to the Duke of Nemours, second son of Louis Philippe, and, on his declining it, they offered it, on the recommendation of England, to Leopold, Prince of Saxeservice is eight years, followed by five years in the reserves. The field army consisted of six army divisions and two cavalry divisions.

After being for centuries under the title of Leopold I., on July 21, 1831.

In November of the same year the five powers guaranteed the crown to him by the treaty of London.

During the reign of Leopold, a prosperous period of 34 years, Belgium became a united and patriotic com-munity. Arts and commerce flourished, and a place was taken in the family of nations upon which the Belgian people could look with complacency. Leopold II. succeeded his fa-ther in 1865. In recent years the chief feature of Belgian polities has been a keen struggle between the clerical and the liberal party. At the elec-tions in June, 1878, the liberals gained a majority, which they lost in 1884, and failed to regain in 1890, but, after a revision of the constitution, they were returned by a large majority in 1894. In 1908 Belgium annexed the Kongo Free State (q. v.). King Leopold II. died Dec. 17, 1909, and was succeeded by his nephew, as AL-BERT I. (q. v.).

Belgium was the first victim of Teutonic ruthlessness in the war in Europe. It was invaded by the Germans, notwithstanding that Germany was one of the guarantors of its integrity, Aug. 3, 1814; the capital was removed to Antwerp, Aug. 18, to Ostend, Oct. 8, and to Havre, France, Oct. 12. See APPENDIX: World War.

Belgrade, a city and capital of Jugo-Slavia, on the right bank of the Danube in the angle formed by the junction of the Save with that river, consists of the citadel or upper town, on a rock 100 feet high; and the lower town, which partly surrounds it. Of late years many modern improvements have been introduced and many fine edifices have been built. It manu-factures carpets, silks, etc. The city suffered severely in the various move-ments that led to the crushing of Servia. See APPENDIX: World War. Pop. (1928 Est.) 240,000.

Belisarius, the great general of the Roman Emperor Justinian, was a native of Illyria. He commanded an expedition against the King of Persia about 530; suppressed an insurrection at Constantinople; conquered Gelimer, King of the Vandals, and put an end to their dominion in Africa; was recalled and honored with a triumph. In 535, Belisarius was sent to Italy to carry on war with the Goths, and took Rome in 537. He

Vitiges, whom he soon after besieged in turn, and captured at Ravenna, but was recalled, through jealousy, before he had completed the conquest of Italy. Belisarius recovered Rome from Totilus in 547, and was recalled the next year. He was afterward sent against the Huns. He was charged, in 563, with conspiracy against Justinian, but was acquitted. That he was deprived of sight, and reduced to beggary, appears to be a fable of late invention. Died in 565.

Belize, or British Honduras, a British colony washed on the E. by the Bay of Honduras, in the Caribbean Sea, and elsewhere surrounded by Guatemala and Mexico. It forms the S. E. part of the peninsula of Yucatan, and measuring 180 by 60 miles, has an area of 8,598 square Since 1862 Belize has ranked as a British colony, with a lieutenantgovernor, whose rank was raised, in 1884, to that of governor. Pop. (1921) 45,317. Belize, the capital, is a depot for foreign goods for Central America. and has a population of about 12,660.

Belknap, George Eugene, an American naval officer, born in Newport, N. II., Jan. 22, 1832; was appointed midshipman in the navy in 1850. 1852, rose to Rear-Admiral in 1889; and was retired in 1894. He took part in the capture of the Barrier Forts on the Canton river, China, in 1856; and in the Civil War. In 1873, while engaged in deep sea sounding in the North Pacific Ocean, he made discoveries concerning the bed of the ocean that found high favor among scientists. He was appointed Superintendent of the United States Naval Observatory in 1885. He died in 1903.

Belknap, William Worth, an American military officer, bern in Newburg, N. Y., Sept. 22, 1829; grad-uated at Princeton, and read law in Keokuk, Ia., where he was elected to the Legislature in 1857. In 1861 he entered the Union army as Major of the 15th Iowa Volunteers and was engaged at Shiloh, Corinth, and Vicksburg; but became most prominent in Sherman's Atlanta campaign. He was promoted to Brigadier-General, July 30, 1864, and Major-General, March 13, 1865. He was collector of internal revenue in Iowa from 1865 was there unsuccessfully besieged by to Oct. 13, 1869, when he was appointed Secretary of War, which of-fice he occupied till March 7, 1876. He resigned in consequence of accusations of official corruption. Subsequently he was tried and acquitted. He died in Washington, D. C., Oct. 12, 1890.

Bell, a hollow, sounding instrument of metal. The metal from which bells are usually made (by founding), is an alloy, called bell-metal, commonly composed of 80 parts of copper and 20 of tin.

Bells, as the term is used on ship-Bells, as the term is used on ship-board, are the strokes of the ship's bell that proclaim the hours. Eight bells, the highest number, are rung at noon and every fourth hour afterwards, i. e., at 4, 8, 12 o'clock, and so on. The intermediary periods are indicated thus: 12:30, 1 bell; 1 o'clock, 2 bells; 1:30, 3 bells, etc., until the eight bells announce 4 o'clock when the series recommences. o'clock, when the series recommences 4:30, 1 bell; 5 o'clock, 2 bells, etc. The even numbers of strikes thus always announce hours, the odd numbers half hours.

Bell, Alexander Graham, inventor of the telephone, was born in Edinburgh, March 3, 1847; son of Alexander Melville Bell. He was educated at Edinburgh and in Germany, and settled in Canada in 1870. 1872 he came to the United States and introduced for the education of deaf mutes the system of visible speech contrived by his father. He became Professor of Vocal Physiology in Boston University, and at the Philadelphia Exhibition, in 1876, exhibited his telephone, designed and partly constructed some years before. was also the inventor of the photo-phone in 1880, of the graphophone in 1887. Died, 1922.

Bell, Alexander Melville, a Scotch elocutionist, born at Edin-burgh in 1819. He is inventor of the system of visible speech, in which all the possible articulations of the human voice have corresponding characters designed to represent the respective positions of the vocal organs. This system has been successfully employed in teaching the deaf and dumb to speak. Besides writing on this subject he has written on elocution, stenography, etc. Died Aug. 7, 1905, thropist, born in New York city. Aug.

Bell, Andrew James, a Canadian educator, born in Ottawa, May 12, 1856; educated at the University of Toronto, and at Breslau University; became Professor of Latin and Literature in Victoria University, in 1889. He is an active member of the Canadian Institute, and has contributed some important papers to its "Transactions.

Bell, Benjamin Taylor A., a Scotch-Canadian mining expert, born in Edinburgh, July 2, 1863; was educated in Edinburgh; went to Canada in 1882. In 1890 he organized the General Mining Association of the Province, and in 1892 he was instrumental in uniting the coal, gold, and other mineral interests of Nova Scotia

into a like organization.

Bell, Henry, a Scotch engineer, born in Linlithgowshire in 1767. In he turned his attention 1798 pecially to the steamboat, the practicability of steam navigation having been already demonstrated. In 1812 the "Comet," a small 30-ton vessel built at Glasgow under Bell's directions, and driven by a three horse-power engine made by himself, commenced to ply between Glasgow and Greenock, and continued to run till she was wrecked in 1820. This was the beginning of steam navigation in Europe. Bell is also credited with the invention of the "discharging machine" used by calico printers. He died in Helensburgh, in 1830. A monument has been erected to his memory at Dunglass Point on the Clyde.

Bell, Henry Haywood, an American naval officer, born in North Carolina, about 1808; was appointed a midshipman from that State in 1823. Shortly after the outbreak of the Civil War, he became Fleet Captain of the Western Gulf Squadron. He commanded one of the three divisions of the fleet which captured New Orleans, and was sent to raise the United States flag over the custom house and the city hall. In In 1866 he was promoted to Rear-Admiral; and, in 1867, retired. He was drowned at the mouth of the Osaka river, Japan, Jan. 11, 1868.

Bell, Isaac, an American philan-

4, 1814; died in New York city, Sept. 30, 1897.

Bell, James Franklin, an American military officer, born in Shelby-ville, Ky., Jan. 9, 1856; was gradu-Academy in 1878; was promoted to First Lieutenant, Dec. 29, 1890; Captain, March 2, 1899, and Colonel of the 36th United States Infantry, July 5, following. In an action with the Filipino insurgents near Porac, Luzon, Sept. 9, following, he so signally distinguished himself that President McKinley directed that a Congressional medal of honor be presented to him. He had much to do with the estab-lishment of the United States War School for Cavalry and Light Artil-lery at Fort Riley, Kan.; was chief of staff, U. S. A., 1906-10; became commander of the Eastern Depart-ment, Governor's Island, New York, in March, 1927. In France, May, 1918-1920: member Cal Debric Com'n since 1920; member Cal. Debris Com'n since 1927

Bell, John, an American states-man, born near Nashville, Tenn., Feb. 18, 1797; was admitted to the bar in 1816; member of Congress from 1827 to 1841; Speaker in 1834, and Secretary of War in 1841. During this period he became from an ardent free trader, a protectionist and supporter of the Whigs, and favored the reception of petitions for the abolition of slavery in the District of Columbia; afterward (1858) he vigorously op-posed the admission of Kansas as a slave State. He sat in the United States Senate from 1847 to 1859, and, in 1860, was nominated for the Presidency by the "Constitutional Union" Party, but received only 39 electoral votes, cast by the States of Tennes-see, Kentucky and Virginia. He afterward took no active share in politics, and died Sept. 10, 1869.

Bell, Liberty, a famous which was rung when the Continental Congress declared the independence of the United States in 1776. The order for founding it was given in 1751. The State House of Pennsylvania, in Philadelphia, work on which had been suspended for a number of years, was then approaching completion. The lower floors were already occupied by

men of the Province of Pennsylvania, then consisting of one body. A committee was appointed by the Freemen, with Peter Norris as chairman, and empowered to have a new bell cast for the building. The commission for the bell was, in the same year, awarded to Robert Charles, of London, the specification being that the bell should weigh 2,000 pounds and cost £100 sterling. It was to be made by the best workmen, to be examined carefully before being shipped, and to contain, in well shaped letters around it, the inscription: "By order of the Province of Pennsylvania for the State House in the City of Philadelphia, 1752." An order was given to place underneath this the prophetic words from Leviticus xxv: 10: "Proclaim liberty throughout the land and to all the inhabitants thereof." The reason for the selection of this text has been a subject of much conjecture, but the true reason is apparent when the full text is read. It is as follows: "And ye shall hallow the 50th year and proclaim liberty throughout the land and to all the inhabitants thereof." In selecting the text the Quakers had in memory the arrival of William Penn and their forefathers more than half a century before. In August, 1752, the bell arrived, but though in apparent good order, it was cracked by a stroke of the clapper while being tested. It was recast successfully, and placed in position in June, 1753. After the Declaration of Independence it rang out the memorable message of "Liberty throughout the land and to all the inhabitants thereof." For 50 years the bell continued to be rung on every festival and anniversary, until it eventually cracked. An ineffectual attempt was made to cause it to continue serviceable by enlarging the cause of its dissonance and chipping the edges. It was removed from its position in the tower to a lower story, and only used on occasions of public sorrow. Subsequently, it was placed on the original timbers in the vestibule of the State House, and, in 1873, it was suspended in a prominent position immediately beneath where lower floors were already occupied by larger bell, presented to the city in the Supreme Court in the Chamber, 1866, now proclaims the passing while in the other assembled the Free-hours. In 1893 it was taken to Chicago and placed on exhibition at the World's Columbian Exposition.

Bell, Lilian, an American novelist, born in Kentucky in 1867.

Bell, Robert, a Canadian geologist, born in the township of Toronto, Ont., June 3, 1841; author of about 130 reports and papers, a list of which is found in the "Biblio of the Royal Society.

Bell, Samuel Dana, an American jurist, born in Francestown, N. H., Oct. 9, 1798; died in Winchester, N. H., July 31, 1868.

Belladonna, a European plant, atropa belladonna, or deadly night-shade, natural order solanaceæ. It is native in Great Britain. All parts of the plant are poisonous, and the incautious eating of the berries has often produced death. The inspissated juice is commonly known by the name of extract of belladonna. It is narcotic and poisonous, but is of great value in medicine, especially in nervous ailments. It has the property of causing the pupil of the eye to dilate. The fruit of the plant is a dark, brownish-black shining berry. The name signifies beautiful lady, and is said to have been given from the use of the plant as a cosmetic.

Bellamy, Edward, an American writer, born in Chicopee Falls, Mass., March 29, 1850. He was educated in Germany; admitted to the bar; was on the staff of the "Evening Post" of New York in 1871-1872; and on his return from the Sandwich Islands in 1877, he founded the Springfield "News." He is best known by his novel "Looking Backward" (1888), a socialistic work, of which an immense number of copies were sold in two years. He died in Chicopee Falls, Mass., May 22, 1898.

Bellamy, Mrs. Elizabeth Whitfield, (Croom), an American novelist, writing under the pseudonym KAMBA THORPE, born at Quincy, Fla.,

1839. She died in 1900.

Bell Bird, a bird, called also the arapunga. It is pure white in color, about a foot in length, and has a voice like the tolling of a bell. It inhabits

bilis jalapa), sometimes also to certain tropical American and West Indian species of convolvulaceæ, with extremely beautiful and fragrant flowers, which open only during the night.

Belle - Isle, or Belle - Isle - en Mer, a French island in the Bay of Biscay, Department of Morbihan, 8 miles S. of Quiberon Point; length, 11 miles; greatest breadth, 6 miles. Pop. about 10,000, largely engaged in the pilchard fishing. The capital is Le pilchard fishing. The cap Palais, on the N. E. coast.

Belle-Isle, a rocky island 9 miles long, at the E. entrance to the Strait of Belle-Isle, the channel, 17 miles wide, between Newfoundland and the

coast of Labrador.

Belle-Isle, an island in the James river, near Richmond, Va., where Union prisoners were confined during the Civil War.

Belles Lettres, polite, or elegant literature: a word of somewhat vague signification. Rhetoric, poetry, fiction, history, and criticism, with the lan-guages in which these works are written come under this head.

Belleville, city and capital of St. Clair county, Ill.; on the Illinois Central and other railroads; 14 miles S. E. of St. Louis, Mo.; is in a wheat, corn, oats, hay, and vegetable section; has valuable coal mines nearby; and manufactures traction engines, glass, stoves and ranges, machinery, bricks, and farming implements. Pop. (1926 Est.) 27,400.

Bellville, city, port of entry, and capital of Hastings district, Ontario, Canada; on the Moira river, Quinte bay, and Grand Trunk railroad; 113 miles E. of Toronto; has a fine harbor; superior water-power, and steamer connection with Canadian and United States points; is the sent of Albert College (M. E.); and is chiefly engaged in manufacturing and farming.

Pop. (1921) 12,206.

Belligerent, a nation or a large section of a nation engaged in carrying on war. When a revolted party of great numerical strength are able to form a regular government and rule over the whole, or part of the territory like the tolling of a bell. It inhabits which they claim, humanity dictates that they should not be treated as Belle de Nuit, a name sometimes given to the Marvel of Peru (mira- if captured, be regarded as prisoners of war. To attain this result, it is needful for those who have risen in arms against the government to make every effort to obtain for their party the position of belligerents. In the contest between the Federals and Confederates, in the war of 1861-1865 the latter, at the commencement of the struggle, claimed the privilege of belligerents. Their demand was acbelligerents. Their demand was acceded to by the British Government, on which the Federal authorities took umbrage, contending that the recognition had been premature.

Bellingham, city, port of entry, and capital of Whatcom county, Wash.; on Bellingham bay and several railroads; 80 miles N. of Seattle; comprises the former cities of Fair Haven and Whatcom, united in 1993; has an excellent harbor on Puget sound, state normal school, two Carnegie libraries and varied manufac-

tures. Pop. (1930) 30,823.

Bellingham, Richard, an English colonial governor, born in 1592; arrived in Boston in 1634, and in the following year became deputy governor of Massachusetts. In 1641 he was candidate for governor against Winthrop, and was elected; was re-elected in 1654 and 1665; and held the governorship at the time of his death. In 1664 he refused to go to England at the command of the King, to defend his administration. He became Major-General in the same year. He died Dec. 7, 1672.

Bellini, the name of a Venetian family which produced several remarkable painters. GIOVANNI BELLINI, born in 1426, died in 1512, was the founder of the older Venetian school of painting, and contributed greatly to its progress. His best works are altar pieces.

Bellinzona, a town of Switzer-land, capital of the canton of Ticino; charmingly situated on the left bank

A colossal tal city, he is unsurpassed. bronze bust of Bellman, by Bystrom, was erected in the Zoological Garden at Stockholm in 1829, and there a popular festival is held yearly in his honor. He died in Stockholm, Feb. 11, 1795.

Bello, Andres, a Spanish-American diplomatist and author, born in Caracas, Venezuela, Nov. 30, 1780. From 1810 to 1828 he represented Venezuela in London; in 1829, became an official of the Bureau of Finance; in 1834, Minister of Foreign Affairs for Chile; in 1842, the first rector of Santiago University. He was the auther of "Principles of International Law" (1832), and his entire works were printed after his death at the expense of the State. He died in Santiago, Chile, Oct. 15, 1865.

Bellona, the goddess of war, and sister or wife, or sister-wife and charioteer of Mars.

Bellot, Joseph René, a French naval officer, born in Paris in 1826. In 1851 he joined the expedition to the Polar regions in search of Sir John Franklin, and took part in sev-eral explorations. He was drowned in an attempt to carry despatches to Sir Edward Beleher over the ice, in 1853. His diary was published in 1855.

Bellot Strait, the passage on the N. coast of North America, which separates North Somerset from Boothia Felix, and connects Prince Regent Inlet with Franklin Channel. Its E. entrance was discovered in 1852 by Lieut. Joseph Rene Bellot.

Bellows, an instrument for blowing the fire in manufactories, forges or private houses.

Bellows, Albert F., an American painter born in Milford, Mass., Nov. 20, 1829; was one of the first to succeed with water colors. He died in Auburndale, Mass., Nov. 24, 1883.

charmingly situated on the left bank of the Ticino, about 5 miles from its embouchure in in the N. end of Lago Maggiore. It occupies a position of great military importance.

Bellman, Carl Michael, a Swedish poet, born in Stockholm, Feb. 4, 1740. His poems were often improvisations, and the airs of his songs were largely of his own composition. As singer of the rollicking life of a capital carries of the civil war (1861-1865). He was singer of the rollicking life of a capi- the Civil War (1861-1865). He was

an effective preacher and public speaker. He died in New York, Jan. 30,

Bellows Fish, called also the trumpet fish or sea snipe. It is 4 or 5 inches long, and has an oblong, oval body and a tubular elongated snout, which is adapted for drawing from among sea-weed and mud the minute crustacea on which it feeds.

Bell Rock, or Inch Cape, a dangerous reef surmounted by a light-house, situated in the German Ocean, about 12 miles from Arbroath, nearly opposite the mouth of the river Tay. It is said that in former ages the monks of Aberbrothock caused a bell to be fixed on this reef, which was rung by the waves, and warned the mariners of this dangerous place. The reef is partly uncovered during the ebb

Bell-Smith, Frederic Marlett, an English artist, born in London, Sept. 26, 1846; went to Canada in 1866. He was for seven years Art Director at Alma College, St. Thomas, and teacher of drawing in the public schools of London, Ont. About 1888 he became a portrait and figure painter; but he is best known as a painter of landscapes.

Belmont, a town in the E. part of Cape Colony, midway between Orange River Junction and Kimberley. It was the scene of one of the earliest engagements in the war of 1899-1900, between the Boers and the British under Gen. Lord Methuen. The town was attacked by the British on Nov. 23, 1899, while on the march to the relief of Kimberley, and the battle resulted in a victory for them. Two days later Lord Methuen took Graas Pan, 10 miles N. of Belmont, after again defeating the Boers.

Belmont, August, an American banker, born in Alzey, Germany; ed-ucated at Frankfort, and was apprenthe Rothschild's banking ticed to house in that city when 14 years old. In 1837 he went to Havana to take charge of the firm's interests, and soon afterward was sent to New York city, where he established himself in the banking business and as the representative of the Rothschilds. He was Consul-General of Austria, in 1844-1850; became Charge d'Affaires at chinery plants in the world, manu-

The Hague in 1853; and was Minister-Resident there in 1854-1858. He was a delegate to the Democratic National Convention in 1860, and when a portion of the delegates withdrew and organized the convention in Baltimore, he was active in that body, and through it became Chairman of the National Democratic Committee, an office he held till 1872. He was an active worker in the party till 1876, when he closed his political career. He died in New York city, Nov. 24. 1890.

Belmont, August, an American banker, born in New York city, Feb. 18, 1853; son of the preceding. He was graduated at Harvard University in 1875; at once entered his father's banking house, and on the death of his father became head of the firm of August Belmont & Co., also representing the European banking firm of the Rothschilds. In February, 1900, he organized the Rapid Transit Subway Construction Company to back John B. McDonald, who had been awarded the \$35,000,000 contract for the construction of the rapid transit system in New York city. He became largely interested in railroad and banking affairs. Died, 1924.

Belmont, Perry, an American lawyer, born in New York, Dec. 28, 1851; son of August Belmont; graduated at Harvard University in 1872. and at Columbia College Law School in 1876; was admitted to the bar and practiced in New York till 1881, when he was elected as a Democrat to Congress, and served till 1887, being a member of the Committee on Foreign Affairs. In 1885 he was appointed Chairman of the Committee on Foreign Affairs, and in 1888 United States Minister to Spain. He was one of the principals in the execu-tion of the great contract for the construction of a rapid transit system in New York city, in 1900.

Beloit, a city in Rock county, Wis.; on the Rock river and the Chicago & Northwestern and other railroads; 84 miles S. W. of Milwau-kee; is the seat of Beloit College (Cong.); has ample power from the river for its factories; and, besides one of the largest wood-working ma-

s wind-mills, towers and shoes, and building paper. Pop. (1926 Est.) 25,400.

Belshazzar, the last of the Babylonian kings, who reigned conjointly with his father Nabonadius. He per-ished B. C. 538, during the successful storming of Babylon by Cyrus.

Belt, in astronomy, a varying number of dusky, belt-like bands or zones encircling the planet Jupiter parallel to his equator, as if the clouds of his atmosphere had been forced into a series of parallels through the rapidity of his rotation, and the dark body of the planet was seen through the comparatively clear spaces between.

In physical geography, two passages or straits connecting the Baltic with the German Ocean, viz. (a) the Great Belt, between the islands of Seeland and Laland on the N. and Fuhnen and Langeland, on the W. (b) The Little Belt, between the mainland of Denmark on the W., and the island of Fuhnen on the E.

Beltane, a superstitious observ-ance now or formerly practiced among the Scottish and Irish Celts, as well as in Cumberland and Lancashire. The Scotch observe the Beltane festi-The Scotch observe the Beltane resurval chiefly on the 1st of May (old style), though in the W. of that country St. Peter's Day, June 29, was preferred. In Ireland there were two Beltanes, one on the 1st of May, and the other on the 21st of June. The ceremones varied in different places, but one assential part of them over. but one essential part of them every-where was to light a fire. At Cal-lander, in Perthshire, the boys went to the moors, cut a table out of sods, sat round it, lit a fire, cooked and ate a custard, baked an oatmeal cake, divided it into equal segments, blackened one of these, drew lots, and then compelled the boy who drew out the blackened piece to leap three times through the fire. Merry-makings came at length to attend the Beltane festival.

Beluga, a species of fish—the great or Hausen, sturgeon. It is sometimes 12 to 15 feet in length, and weighs 1,200 pounds, or in rare cases even 3,000. The best isinglass is made from its swimming bladder. Its flesh, many mountains in Scotland N. of the

Caspian and Black Seas and the large rivers which flow into them. The word is also applied to a cetacean. It is called also the white whale. It is from 18 to 21 feet in length, and inhabits Davis Straits and the other portions of the Northern Seas, and sometimes ascends rivers.

Belus, the Roman name of the and Babylonian divinity Assyrian called Bel in Isaiah xlvi: 1.

Belus, a Phonician river at the base of Mt. Carmel. Its fine sand, according to tradition, first led the Phænicians to the invention of glass. Belus, Temple of, an enormous temple in ancient Babylon, rebuilt by Nebuchadnezzar, about 604 B. C. Its site is thought, by some authorities, to be the modern Bers-Nimrud, and by others, Babil.

Belvedere, in architecture the uppermost story of a building open to the air, at least on one side, and frequently on all, for the purpose of obtaining a view of the country and for enjoying cool air. A portion of the Vatican has this name.

Bembo, Pietro, an Italian scholar, born at Venice in 1470. Pope Paul III. conferred on him, 1539, the hat of a cardinal, and soon after the bishoprics of Gubbio and Bergamo. He died in 1547.

Bemis, Edward Webster, an American economist, born in Spring-field, Mass., April 7, 1860; graduated at Amherst College in 1880; was Proat Amnerst College in 1880; was Professor of Economical Science in the Kansas State Agricultural College, 1897-9; later engaged in economic research work in Cleveland, O., Chicago, Ill., New York city, and elsewhere; author of numerous papers and articles on city administration.

Bemis (incorrectly BEMUS) Heights, a village in Saratoga county, N. Y., on the Hudson river, famous as the scene of the first battle of Stillwater, Sept. 19, 1777.

Ben (Hebrew, "son"), a prepos-

itive syllable signifying in composition "son of," found in many Jewish names, as Bendavid, Benasser, etc.

Ben, a Gaelic word signifying mountain, prefixed to the names of though sometimes eaten, is occasional- Firths of Clyde and Forth; as, Ben ly unwholesome. It is found in the Nevis, Ben MacDhui, etc. Benaiah, the name of 12 different persons mentioned in the Bible, the one chiefly important being a son of Jehoida, a chief priest. He was made commander-in-chief in Joab's place by Solomon.

Benalcazor, Belasazor, or Velalcazor, Sebastian de, the name given to Sebastian Movano from his native town; a Spanish soldier who figured in the Spanish conquests in South America. His gallant conduct attracted the attention of Pizarro, who promoted him. He took the city of Quito, made an expedition into Colombia and reduced Popayan, and was appointed governor of that part of the country in 1538. He was forced to resign this office in consequence of legal complications and died when about to return to Spain, in 1550.

Benares, a town in Hindustan, Northwest Provinces, administrative headquarters of a district and division of the same name, on the left bank of the Ganges, from which it rises like an amphitheater, presenting a splen-did panorama of temples, mosques, palaces, and other buildings, with Fine their domes, minarets, etc. ghauts lead down to the river. It is one of the most sacred places of pilgrimage in all India, being the head-The quarters of the Hindu religion. principal temple is dedicated to Siva, whose sacred symbol it contains. It is also the seat of government and other colleges, and of the missions of various societies. Benares carries on a large trade in the produce of the district and in English goods, and manufactures silks, shawls, embroidered cloth, jewelry, etc. The population in (1921) 102 447 tion in (1921) 198,447.

Benbow, John, an English admiral, born in Shrewsbury about 1650, died 1702. For his skill and valor in an action with a Barbary pirate he was promoted by James II. to the command of a ship of war. William III. employed him in protecting the English trade in the Channel, which he did with great effect, and he was soon promoted to the rank of rear-admiral. In 1701 he sailed to the West Indies with a small fleet, and in August of the following year he fell in with the French fleet under Du Casse, and in the heat of action a chain-shot carried

away one of his legs. At this critical instant, being most disgracefully abandoned by several of the captains under his command, the whole fleet effected its escape. Benbow, on his return to Jamaica, brought the delinquents to a court-martial, by which two of them were condemned to be shot. He himself died of his wounds.

Bench Warrant, a warrant issued by the court before which an indictment has been found to arrest the accused, that he may appear and find bail for his appearance at the trial. It is used extensively in the United States to bring into court persons who have neglected to obey an order of court, such as delinquent jurymen.

Bencoolen, a seaport on the W. coast of Sumatra Island, Dutch East Indies; capital of a Residency of the same name. It was founded in 1685 by the English and ceded to the Dutch in 1824. Area of Residency, 9,399 square miles; pop. of Residency, 214,272; of town, 5,000.

Bendemann, Eduard, a German painter, born in Berlin, Dec. 3, 1811; died in Dusseldorf, Dec. 27, 1889.

Bendire, Charles Emil, a German-American military officer and ornithologist, born in Darmstadt, Germany, April 27, 1836, came to the United States in 1852, and entered the army in 1854. He served through the Civil War, becoming a Captain in the 1st Cavalry. After the war he was transferred to the West, and was retired April 24, 1886. During his stay in the West he applied himself to the study of ornithology, and collected a vast amount of material in various branches of natural history. In 1870 he began to collect the eggs of North American birds, which finally numbered more than 8,000 specimens, and this collection he presented to the United States National Museum. He is the author of "The Life Histories of North American Birds, with Special Reference to their Breeding Habits and Eggs."

Benedetti, Vincent, Count de, a French diplomatist of Italian extraction, born in Bastia, Corsica, April 29, 1817; died in Paris, March 28, 1900.

Benedict, a married man; from the Latin benedictus (a happy man). Benedict VII., Pope, succeeded John XIII. in 972. After the death of the Emperor Otho I., the Romans imprisoned Benedict, who was strangled in the castle of St. Angelo, in 974.

Benedict XIV., Pope, was born at Bologna in 1675, of the noble family of Lambertini. Benedict was learned, not only in theology, but in history and literature, and had also a taste for the fine arts. His works were published at Rome, in 12 volumes quarto. He died in 1758, and was succeeded by Clement XIII.

Benedict XV., Pope (Giacoma Cardinal Della Chiesa), born in Pogli, Italy, Nov. 21, 1854; was educated at the Academy of Noble Ecclesiastics in Rome; ordained in 1878; became archbishop of Bologna in 1907, a cardinal in 1914, and Pope, in succession to Pius X., on Sept. 3, 1914. He had a thorough training in diplomacy, which was utilized in attempts to ameliorate conditions in the warring countries and to bring peace. Died, 1922. See APPENDIX: World War.

Benedict, St., the founder of the Order of the Benedictine Monks, was born at Nursia, in the Dukedom of Spoleto, in Italy, in 480 A. D. Authors are not agreed upon the time and place of his death.

Benedict, Frank Lee, an American novelist and poet, born in New York in 1834.

Benediction (from the Latin benedicere, literally, "to speak well of;" "to commend"), a solemn invocation of the Divine blessing upon men or things. The ceremony in its simplest form may be considered almost coeval with the earliest expressions of religious feeling. The Sabbath is said to have been blessed. Christ "took bread and blessed it," and "lifting up His hands," blessed His disciples. In the primitive Church the custom gradually developed itself in various liturgical forms. In Protestant churches a form of benediction is used at the close of religious services. In the Roman Church a priestly benediction has been defined as a formula of imperative prayer, which, in addition to the desire which it expresses, transmits a certain grace or virtue to the object over which it is pronounced.

Benedictus, the name given to the hymn of Zacharias (Luke i: 68), used as a canticle in the morning service of the Episcopal Church to follow the lessons. This position it has occupied from very ancient times. It is also used in the Church of Rome.

Benefice, under the feudal system, an estate held by feudal tenure. Formerly, and even sometimes yet, the word was applied to an ecclesiastical living of any kind, any church endowed with a revenue, whether a dignity or not.

Benefit of Clergy, the advantage derived from the preferment of the plea "I am a clergyman." When in medieval times, a clergyman was arraigned on certain charges he was permitted to put forth the plea that with respect to the offense of which he was accused, he was not under the jurisdiction of the civil courts, but, being a clergyman, was entitled to be tried by his spiritual superiors. The cases in which the benefit of clergy might be urged were such as affected the life or limbs of the offender, high treason, however, excepted. The exemption has never been recognized in America, and is abolished in Great Britain.

Benevento (ancient Beneventum), a city of Southern Italy, 32 miles N. E. of Naples, and is the capital of a province of same name. Near Benevento, in 1266, was fought the great battle between Charles of Anjou and his rival, Manfred, in which the latter was killed, and his army totally defeated. During the reign of Napoleon I., Benevento was formed into a principality conferred on Talleyrand. In 1815, it again reverted to the Pope. In 1860, it was annexed to the kingdom of Italy. Pop. of city (1925) 27.449.

Benevolence, in the history of the law of England, was a species of forced loan or contribution, levied by kings without legal authority. It was first so called in 1473, when asked from his subjects by Edward IV. as a mark of good will toward his rule. James I. tried, but with little success, to raise money by this expedient, and it was never again attempted by the crown; Charles I. expressly declining to have recourse to it.

Benezeth, Anthony, a French-American philanthropist, was born in St. Quentin's, France, Jan. 31, 1713; lived from infancy in England and the United States. The greater part of his writings were in the form of tracts against the slave trade and in favor of the American Indians. He died in Philadelphia, Pa., May 3, 1784.

Benfey, Theodor, a German Orientalist and comparative philologist, born of Jewish parents near Gottingen, Jan. 28, 1809. In 1862 he was appointed to the chair of Sanskrit and Comparative Philology in the University of Gottingen, which he held till his death, June 26, 1881.

Benga, an African tribe, living on the Spanish island, Corisco, off the W. coast, having moved from the interior within a few generations. American Presbyterian Board of Missions have translated books into the language, which closely resembles the

Kamerun and Dualla.

Bengal, a province in British India, formerly a presidency, reconstituted a province in 1912; comprises the deltas and lower valleys of the Ganges; area, 78,412 square miles; pop. (1921) 46,653,177; area with the native States of Cooch Behar and Hill Tippera included, 84,000, pop. 47,000,000. The chief town and port is Calcutta, pop. (1921) 1,327,547.

The English first got a firm footing Bengal about 1644, and in 1707, Calcutta was erected into a presidency, and the foundation of British power in India laid. A bill conferring upon agricultural tenants a transferable interest in their holdfings and protecting them against evic-

tion was passed in 1885.

Bengal, Bay of, that portion of the Indian Ocean which lies between Hindustan and Farther India, or Burma, Siam, and Malacca, and may be regarded as extending S. to Ceylon and Sumatra. It receives the Ganges, Brahmaputra, and Irrawadi.

Bengal, or Bengola, Light, a kind of firework, giving a vivid and sustained blue light. It is used for

signals at sea.

Bengough, John Wilson, a Canadian poet, born in Toronto, April 5, and Grammar School. In 1873 he es- pontoon bridges, in which he was a

tablished the "Grip," a humorous weekly, in Toronto. His political car-toons in this paper were highly artistic. He is also widely known as a lecturer and a poet.

Benguela, a district belonging to the Portuguese on the W. coast of South Africa; bounded N. by Angola, and S. by the Kunene river; founded by the Portuguese in 1617.

Benguet, a province of Luzon, Philippines; separated from the central W. coast by the province of La Union; area, 990 square miles; pop. (Est.) 25,000; capital, Baguio, 143 miles N. of Manila; native races, Hocano and Igarrotes.

Ben-Hadad, or Benhaddad, the name of three kings of Syria. The first was a contemporary of Asa, King of Judah (929-873 B. c.), I Kings, xv. The second (860-824 B. c.) of the time of Ahab, King of Israel, I Kings, xx. The third at the time of Jehoahaz, King of Israel (856-839 B. C.), II Kings, xiii.

Benham, Andrew Ellicott Kennedy, an American naval officer, born in New York, April 10, 1832; entered the navy in 1847; was com-missioned Rear-Admiral in 1890, and was retired in 1894. During the Civil War he served in the South Atlantic and West Gulf Blockading Squadrons. In April, 1893, he commanded one of the divisions in the great naval display at New York; in 1894, as commander of a squadron at Rio de Janeiro, Brazil, he forced the commander of the insurgents' squadron to raise the blockade of the city and to cease firing on American vessels; in 1898 was naval prize commissioner in Savannah, Ga. He died Aug. 11, 1905.

Benham, Henry W., an American military engineer, born in Cheshire, Conn., in 1816; was graduated at the United States Military Academy in 1837; and became Colonel of the United States Engineers, and Brevet Major-General, United States army. He commanded the engineer brigade and laid several pontoon bridges under, fire during the Chancellorsville bat-tles; constructed and commanded the defenses at City Point; devised the picket shovel; and made many im-1851: studied in the Whitley District provements in the construction of

recognized expert. He died in New York, June 1, 1884.

Beni, a river of Bolivia, South America; formed by the union of all the streams flowing down the Eastern Cordillera.

Beni-Hassan, a village of Mid-dle Egypt, on the E. bank of the Nile, remarkable for the grottoes or catacombs in the neighborhood.

Beni-Israel, a race in the W. of India (the Konkan sea board, Bombay, etc.) who keep a tradition of Jewish origin, and whose religion is a modified Judaism; supposed to be a remnant of the ten tribes.

Benin, a former negro kingdom of West Africa, on the Bight of Benin, extending along the coast on both sides of the Benin river, W. of the lower Niger, and to some distance inland. The chief town is Benin (pop. 15,000), situated on the river Benin, one of the mouths of the Niger.

In February, 1897, the Benin country was included within the Niger Coast Protectorate, and a British Coast Protectorate, and a British Resident was installed in the chief town. The whole territory was then between 3,000 and 4,000 square miles in extent, contained about 400 towns and villages, and had a population of which no trustworthy estimate could be formed.

Benin, Bight of, part of the Gulf of Guinea, West Africa, which extends into the land between the mouth of the river Volta and that of the Nun.

Benjamin, the youngest son of Jacob and Rachel (Gen. xxxv: 16-18). Rachel died immediately after he was born, and with her last breath named him Ben-oni, the "son of my sorrow;" but Jacob called him Ben-jamin, "son of my right hand."

The tribe of Benjamin, small at first,

was almost exterminated in the days of the Judges, but afterward it greatly increased. On the revolt of the ten tribes, Benjamin adhered to the camp of Judah; and the two tribes ever afterward closely united. King Saul and Saul of Tarsus were both Benjamites.

English parentage and of Jewish faith. He was educated at Yale College; admitted to the bar in New Orleans, in 1832; and elected to the United States Senate in 1852 and 1858. At the beginning of the Civil 1858. At the beginning or the Civil War, he resigned from the Senate and declared his adhesion to the State of Louisiana. In 1861 he accepted the office of Attorney-General in the Cabinet of Jefferson Davis, and afterward her of Jelerson Davis, and afterward became successively Confederate Secretary of War and Secretary of State. After the war he went to London, England, where he was admitted to the bar in 1866. He gained a successful practice, and in 1872 was formally presented with a silk gown. He wrote a "Treatise on the Law of Sale wrote a "Treatise on the Law of Sale of Personal Property" (1868). He died in Paris, May 7, 1884.

Benjamin, Park, an American journalist, poet, and lecturer, born at Demerara, British Guiana, Aug. 14, 1809. He studied law originally. His poems, of a high order of merit, have never been collected. He died in New York, Sept. 12, 1864.

Benjamin, Park, an American lawyer, editor, and miscellaneous writer, son of the preceding, born in New York, May 11, 1849. A graduate of the United States Naval Acadamy (1867) emy (1867), he served on Admiral Farragut's flagship, but resigned in 1869. As a lawyer he has been a patent expert. He edited the "Scientific American" (1872-1878). Died, 1922.

Bennett, Enoch Arnold, English author of over fifty books and plays, born May 27, 1867. Best known works: "The Old Wive's Tale," "Clayhanger," and "Ricyman Steps." Died in London, England, Mar. 27, 1931.

Bennett, Charles Wesley, an American Methodist clergyman and educator, born at East Bethany, N. Y., July 18, 1828; was Principal of Genesee Wesleyan Seminary (1869–1871), Professor of History and Logic at Syracuse University (1871–1885), Professor of Historical Theology at Garrett Biblical Institute, Evanston (1885–1891). He died at Evanston, Ill., April 17, 1891.

Bennett, Edmund Hatch, an American lawyer, born in Manches-ter, Vt., April 6, 1824; was graduated Benjamin, Judah Philip, an American lawyer, born in Manches-American lawyer, born in St. Croix, ter, Vt., April 6, 1824; was graduated West Indies, Aug. 11, 1811; was of at the University of Vermont in 1843. and admitted to the bar in 1847. From 1871 he was Professor and Dean at the Law School of Boston University. He died Jan. 2, 1898.

Bennett, James Gordon, Scotch-American journalist; founder and proprietor of the New York "Herald," born in Newmill, Keith, Sept. 1, 1795. Trained for the Ro-man Catholic priesthood, he emigrated to the United States in 1819, where he became in turn teacher, proof reader, journalist, and lecturer; he founded the New York "Herald," May 6, 1835, price one cent. He spared no effort and expense in securing news, and laid the foundation of its after enormous success. It was the first newspaper to publish the stock lists and a daily money article. He died in New York, June 1, 1872.

Bennett, James Gordon, an American journalist, born in New York city, May 10, 1841; son of James Gordon Bennett, founder of the New York "Herald," of which he became managing editor in 1866, and from that time largely controlling, and becoming proprietor on the death of his father in 1872. In 1870 he sent Henry M. Stanley on the exploring expedition which resulted in the finding of Dr. Livingstone, and, in finding of Dr. Livingstone, and, in conjunction with the London "Daily Telegraph," supplied the means for his journey across Africa by way of the Kongo in 1874-1878. He founded the "Evening Telegram" in New York, and established daily editions of the "Herald" in Paris and London. He early gave much attention to yachting. He resides mainly in Paris, collecting foreign news, and directing by telegraph the management and policy of his newsmanagement and policy of his news-papers. The New York "Herald" was incorporated in 1899. Died, 1918.

Bennett, Joseph H., an American philanthropist, born in Juliustown. N. J., Aug. 16, 1816. He engaged in the clothing business in Philadelphia, Pa., when 16 years old. His property was said to be worth \$3,000, 000, and it is estimated that he gave

Bennett, Sanford Fillmore, an Bennett, Sanford Fillmore, an American hymnologist, born in Eden, N. Y., in 1836. He settled in Elkhorn, Wis., in 1860, and became editor of the "Independent." Resigning this place, he entered the 40th Wisconsin Volunteers and served with them throughout the war. In 1867 he aided J. P. Webster, the composer, in preparing "The Signet Ring," a Sunday School hymn book, to which he contributed about 100 hymns. "The Sweet Bye and Bye" was one of the first of these. Many of Mr. Bennett's first of these. Many of Mr. Bennett's hymns and songs have been published in sheets. He died in Richmond, Ill., June 12, 1898.

Ben-Nevis, the most lofty mountain in Great Britain, in Invernesshire, immediately E. of Fort William and the opening of the Caledonian canal, at the S. W. extremity of Glenmore. It rises to the height of 4,406 feet, and in clear weather yields a most extensive prospect. An observatory was established on its summit in May 1881 by the Scottish Mateore-May, 1881, by the Scottish Meteorological .Society.

Benningsen, or Bennigsen, Levin August, Baron, a Russian general, born in Hanover in 1745. He entered the service of Catherine II., and distinguished himself by great gallantry. He died in 1826.

Bennington, town and county-seat of Bennington co., Vt.; on the Bennington and Rutland and the Lebanon Springs railroads; 36 miles E. of Troy, N. Y. Bennington is historically famous on account of the battle fought Aug. 16, 1777, when General Stark with his "Green Mountain Boys" defeated a large British detachment sent from General Burgoyne's army to capture the public stores near N. Bennington. Pop. (1920) 9,982.

Benson, William Shepherd, an American naval officer, born in Macon, Ga., Sept. 25, 1855; was graduated at the United States Naval Academy in 1877; promoted to captain, July 24, 1909, and rear-admiral, May 11, 1915; was commandant of the Philadelphia navy yard in 1913-15; and was appointed chief of the newly-\$1,000,000 to charity. He bequeathed and was appointed chief of the newly-created Bureau of Operations in 1915. Sylvania for its proposed college for Continued as chief of naval operations women. He died in Philadelphia, until Sept. 1919, when he was retired. Sept. 29, 1898. Benteen, Frederick William, an American military officer, born in Petersburg, Va., Aug. 24, 1834; was educated in his native State; and at the outbreak of the Civil War went to Missouri and organized a company of Union volunteers. His most brilliant service after the war was in his campaigns against the Indians. He died in Atlanta, Ga., June 22, 1898.

Bent Grass, a genus of grasses, distinguished by a loose panicle of small, flowered, laterally compressed spikelets. The species are numerous and are found in almost all countries and climates.

Bentham, Jeremy, an English jurist, born in London, Feb. 15, 1748; educated at Westminster and Oxford; entered Lincoln's Inn, in 1763. He was called to the bar, but did not practice, and, having private means, devoted himself to the reform of civil and criminal legislation. He died in London, June 6, 1832, leaving his body for dissection. His remains are to be seen at University College, London.

Bentley, Richard, a celebrated English divine and classical scholar, distinguished as a polemical writer; born near Wakefield, in Yorkshire, Jan. 27, 1662. He died at the master's lodge at Trinity, July 14, 1742.

Benton, Thomas Hart, an American statesman, born near Hillsboro, N. C., March 14, 1782; settled in Tennessee, where he studied law, and was elected to the Legislature. In 1812 he raised a regiment of volunteers, and also served on General Jackson's staff. After the war, he started a newspaper in St. Louis, by which he became involved in several duels. On the admission of Missouri as a State, he was chosen United States Senator in 1820, and, in this post, during 30 years' continuous service, took a leading part in public affairs. A determined opponent of Calhoun's nullification scheme, he afterward supported Jackson in his war on the United States bank, and earned the sobriquet of "Old Bullion" by his opposition to the paper currency. He died in Washington, April 10, 1858.

Benzene, or Benzel (C_e H_e), a carbon compound, best obtained from the destructive distillation of coal-tar. It is the source from which is derived

all the aniline colors, and artificial flavors.

Benzine (C₆ H₁₄), a liquid hydrocarbon obtained from a fractional distillation of petroleum. It may also be got by distilling 1 part of crystallized benzoic acid intimately mixed with 3 parts of slacked line. It is quite colorless, of a peculiar, etheral, agreeable odor, is used by manfacturers of india-rubber and gutta-percha, on account of its great solvent powers, in the preparation of varnishes, and for cleaning gloves, removing greasespots from woollen and other cloths, etc., on account of its dissolving fats and resins. It is highly inflammable, and must be used with great caution. It must not be confounded with benzene.

Benzoin, a solid, fragile, vegetable substance, of a reddish-brown color. Benzoin is obtained from the tree called Styrax benzoin, and perhaps from some others. On making incisions into the bark, it flows out in the form of a balsamic juice, having a pungent taste and an agreeable odor.

Beothukan, (red man, or Indian), a linguistic stock of North American Indians, inhabitants of the region of the Exploits river in Northern Newfoundland, and believed to have been limited to a single tribe, the last known survivor of which died in 1829.

Beowulf, an Anglo-Saxon epic, the only manuscript of which belongs to the 8th or 9th century, and is in the Cottonian Library (British Museum). The poem, which is the longest and most important in Anglo-Saxon literature, is in many points obscure, and the manuscript is somewhat imperfect.

Béranger, Pierre Jean de, the national poet of France; born in Paris, Aug. 19, 1780. He died in Paris, July 16, 1857, and received the honor of a public funeral, at which the most eminent men in France, both of the world of literature and politics, attended.

Béraud, Jean, a painter of great power, born in St. Petersburg, of French parentage, in 1845. His subjects are usually chosen from Parisian life. His latest works have been modernized scenes from the New Testament.

Berbera, a seaport of British Somaliland, Eastern Africa, with a good harbor, on a bay of the Gulf of Aden. It was conquered by Egypt in 1875, but in July, 1884, the British Government took possession of it, and a small Indian force is now stationed here. It is the scene of a large annual fair, which brings over 30,000 people together from all quarters in the East. Coffee, grains, ghee, gold dust, ivory, gums, cattle, ostrich feathers, etc., are brought hither from the interior, and exchanged for cotton, rice, iron, Indian piece goods, etc.

Berbers, a people spread over nearly the whole of Northern Africa, from whom the name Barbary is derived. The chief branches into which the Berbers are divided are, first, the Amazirgh, or Amazigh, of Northern Morocco, numbering from 2,000,000 to 2,500,000. They are for the most part quite independent of the Sultan of Morocco, and live partly under chieftains and hereditary princes and partly in small republican communities. Second, the Shuluh, Shillooh, or Shellakah, who number about 1,450,000, and inhabit Southern Morocco. They are more highly civilized than the Amazirgh. Third, the Kabyles in Algeria and Tunis, who are said to number 960,000; and fourth, the Berbers of the Sahara, who inhabit the oases. Their language has affinities to the Semitic group, but Arabic is spoken along the coast. They are believed to represent the ancient Mauritanians, Numidians, Gætulians, etc.

Berbice, a river of British Guiana; flows generally N. E. into the Atlantic. It is navigable for small vessels for 165 miles from its mouth, but beyond that the rapids are numerous

and dangerous.

Berea College, a co-educational (non-sectarian) institution, in Berea, Ky.; organized in 1858. Under the guidance of the able men who directed its course, this institution did an almost incredible work among the mountaineers both black and white in the Southern States. In the winter of 1903-1904, the Kentucky legislature forbade co-education of white and blacks, and Berea was obliged to establish branch for its colored students.

Berean, a Scottish religious sect founded by the Rev. J. Barclay in 1773, and also called Barclayans.

Berengarius, of Tours, a theologian of the 11th century. He was born at Tours in 908, long held an ecclesiastical office there, and was afterward archdeacon of Angers. He was thoroughly versed in the philosophy of his age, and did not hesitate to apply reason to the interpretation of the Bible. He denied the dogma of transubstantiation, and was charged with heresy. He died on the Isle of St. Cosmos, near Tours, in 1088.

Berenice, a daughter of Herod Agrippa I., who was the son of Aristobulus, who was the son of Herod the Great (Acts xii; Matthew ii). She was the sister of Herodes Agrippa II., before whom Paul preached A. D. 63 (Acts xv: 13), and the wife of Herodes of Chalcis, who seems to have been her uncle, and left her a young widow. After the capture of Jerusalem she went to Rome (A. D. 75), and Titus is said to have been so much attached to her that he promised to marry her; but on the death of his father he sent Berenice from Rome, much against his will and hers, when he found that the proposed match was disagreeable to the people.

Beresford, Lord Charles de la Poer, an English naval officer, born in Ireland, Feb. 10, 1846; became a Cadet in 1857; Lieutenant, 1868; Captain, 1882; and Rear-Admiral, 1897. In 1882 he commanded the "Condor" in the bombardment of Alexandria, and was especially mentioned and honored for his gallantry. In December, 1899, was appointed the second in command of the British squadron mobilized in the Mediterranean Sea. Lord Beresford accompanied the Prince of Wales on his visit to India in 1875-1876, as naval aide-de-camp, and held the same relation to the Queen in 1896-1897. He has served several terms in Parliament. Besides the numerous honors for gallantry as an officer he has received three medals for saving life at sea under trying circumstances. In 1898 he visited China at the request of the Associated Chambers of Commerce of Great Brittain to make a study of the complicated commercial conditions existing there; and on his return, in 1899, he passed through the United States.

and was received with distinguished honors by official and commercial bodies. He has done much to promote the "open door" policy as a condition of international commerce in China. Died, 1919.

Beresina, or Berezina, a river of Russia in Europe; rendered famous on account of its disastrous passage by the French army during the retreat of Napoleon I. from Russia, in 1812.

Berezovsk, a village in the Russian province of Perm, near Ekaterinburg, gives name to a famous gold field, wrought since 1744.

Berg, Frederick William Rambert, a Russian general, chiefly notorious for the severity with which he treated the unfortunate population of Poland during the insurrection of 1863, and which excited the horror and indignation of the civilized world.

Bergamot, a fruit tree, a variety or species of the genus citrus, variously classed with the orange, citrus aurantium, the lime, atrus limetta, or made a distinct species as citrus bergamia. It is probably of Eastern origin, though now grown in Southern Europe, and bears a pale yellow, pearshaped fruit with a fragrant and slightly acid pulp. Its essential oil is in high esteem as a perfume. Bergamot is also a name given to a number of different pears.

Bergen, a seaport on the W. coast of Norway, the second town of the kingdom, about 25 miles from the open sea, on a bay of the Byford. The trade is large, timber, tar, train oil, cod liver oil, hides, and particularly dried fish (stock fish) being exported in return for corn, wine, brandy, coffee, cotton, woolens, and sugar. In 1445 a factory was established here by the Hanseatic cities of Germany. Pop. (1925) 91,081.

Bergerac, Savinien Cyrano de, a French author, born in Paris in 1619, distinguished for his courage in the field, and for the number of his duels, more than a thousand, most of them fought on account of his monstrously large nose. He died in 1655. His writings are often crude, but full of invention, vigor, and wit. He was made the hero of a drama bearing his name, written by Edmond Rostand, the French playwright, which had a

phenomenal success in the United States in 1899-1900, and was the occasion of a suit for plagiarism.

Bergerat, Auguste Emile, a French journalist, playwright and novelist, born in Paris, April 29, 1845, son-in-law of Theophile Gautier, and since 1884, particularly known as the anusing chronicler of the "Figaro" under the pseudonym of "Caliban." He also wrote two novels.

Bergh, Henry, an American philanthropist, born in New York in 1823; was founder and President of the American Society for the Prevention of Cruelty to Animals (1866), founder of the American Society for the Prevention of Cruelty to Children (1881), Secretary of Legation and acting Vice-Consul at St. Petersburg (1862–1864). He died in New York city, March 12, 1888.

Bergh, Pieter Theodoor Helvetius van den, a Dutch dramatist and poet, born in 1799; died in 1873.

Berghaus, Heinrich, a German geographer, born in Cleves, Prussia, May 3, 1797; died in Stettin, Feb. 17. 1884.

Bergman, Ernest von, a German surgeon, born in Riga, Dec. 16, 1836. He was educated at Vienna, Dorpat, and Berlin. He served in the Prussian army during 1866-1870; was Professor of Surgery in the University of Würzburg in 1878-1882; and became Director of the Surgical Clinic at Berlin University in 1882. He died March 25, 1907.

Bergman, Torbern Olof, a Swedish physicist and chemist, born in Catherineberg, March 20, 1735. His theory of chemical affinities greatly influenced the subsequent development of chemistry. He died July 8, 1784.

Bergmann, Carl, a German musician, born in Ebersbach, Saxony, April 11, 1821. Being implicated in the Revolution of 1848, he left Germany for the United States in 1849. An enthusiastic Wagnerite, he was himself the composer of an opera, a symphony and many concert pieces. He died in New York city, in August 1876.

of invention, vigor, and wit. He was made the hero of a drama bearing his name, written by Edmond Rostand, the French playwright, which had a Beriberi, Beriberia, Berriberian Berriberian

weakness, and by numbness of the lower extremities. It is generally fatal It occurs frequently in Ceylon among the colored troops, and on some portions of the Indian coast.

Bering, or Behring, Vitus, a Danish explorer, born in Jutland, in 1680. After making several voyages to the East and West Indies, he entered the service of Russia, while still young; became a captain-commander in 1772; and was sent by the Empress Catharine in charge of an expedition (planned by Peter the Great before his death), the object of which was to determine if Asia and America were united. Crossing Siberia he sailed from the river Kamchatka in July, 1728; and reached lat 67° 18′ N., having passed through the strait since called after him, without knowing it. Discovering that the land trended greatly to the W. he concluded that the continents were not united, and returned; without, however, seeing America. In another voyage, in 1774, he touched upon the American coast, in lat 58° 21′ N.; and gave name to Mount St. Elias. In returning his ship was cast upon an island, since named after him, an outlier of the Aleutian group, and here he perished, in December, 1741.

Bering Sea, that part of the North Pacific Ocean between the Aleutian Islands, in 55°, and Bering Strait, in 66° N., by which latter it communicates with the Arctic Ocean. The United States having claimed the exclusive right of seal fishing in the Bering Sea in virtue of the purchase of Alaska from Russia, and this right having been disputed by the British, it was decided in August, 1893, by an arbitration tribunal, to which the question was referred, that no such right existed, but at the same time regulations for the protection of the fur seal were drawn up and agreed to between the two powers, the chief being the prohibition of seal fishery within the zone of 60 miles round the Pribilof Islands, inclusive of the territorial waters, and the establishment of a close season for the fur seal from May 1 to July 31 inclusive, applying to the part of the Pacific and Bering Sea, N. of 35° and E. of the 180th meridian from Greenwich.

Bering Strait, the channel which separates Asia and America at their nearest approach to each other. It was discovered by Bering in 1728, and first explored by Cook in 1788.

was discovered by Cook in 1788.

Berkeley, a town in Alameda county, Cal.; on the Southern Pacific railroad; 8 miles N. E. of San Francisco; is the seat of the State University and of the State Institution for the Deaf, Dumb, and Blind, Pop. (1920) 56,036; (1930) 81,109.

Berkeley, Dr. George, Bishop of Cloyne, born in Ireland in 1685; became fellow of Trinity College, Dublin, in 1707; in 1724 Dean of Derry. He published proposals for the conversion of the American savages to Christianity by the establishment of a college in the Bermuda Islands. He arrived at Rhode Island in 1728, but, the plan lacking support, he returned and became Bishop of Cloyne. He died suddenly at Oxford in 1753, Berkeley holds an important place in the history of philosophy. His most celebrated philosophical work is: Treatise on the Principles of Human Knowledge, 1710, in which his philosophical theory is fully set forth.

Berkeley, Sir John, one of the proprietors of New Jersey, born in 1607. He was a prominent Royalist during the contest of Charles I. with Parliament. Charles II. granted him, with Sir George Carteret, a proprietary interest in New Jersey and Carolina. He died Aug. 28, 1678.

Berkeley, Sir William, an English colonial Governor, born near London, about 1610. In 1632 he was a Commissioner of Canada, and in 1641 became governor of Virginia. In 1676 he resigned and returned to England. He died July 13, 1677.

Berkshires, The, or Berkshire Hills, a range of mountains in the N. W. of Massachusetts; in Berkshire county; stretching 16 miles N. and S.

Berlin, now Kitchener, capital of Waterloo county, Ontario, Canada; on the Grand river and the Grand Trunk and other railroads; 63 miles W. of Toronto; contains a Roman Catholic college and several manufacturing plants. Pop. (1921) 21,763.

Berlin, the capital of the Prussian dominions and of the German re-

public, the residence of the President of Germany and foreign ambassadors; in the province of Brandenburg; the largest city in Germany, and, for the beauty and size of its buildings, the regularity of its streets, the importance of its institutions of science and art, and its activity, industry, and trade, one of the first in Europe. It is situated on a dreary sandy plain, about 126 feet above the level of the gea, on both sides of the Spree, a sluggish stream, here about 200 feet broad, which winds through the city from S. E. to N. W., and divides into several branches and canals. The main stream and its branches are spanned by a large number of bridges.

The literary institutions of the city are numerous and excellent. They include the university, the academy of sciences; the technical high school, the mining academy, the high school of agriculture, the academy of arts, the school of music, the seminary for Oriental languages, the military academy and school of engineering, many gymnasia and real-schools; an institution for instructing the deaf and dumb, etc. The chief libraries are the royal library, founded in 1659, and now containing 900,000 volumes and 25,000 manuscripts; and the university library, with about 300,000 volumes. The public museums and picture galleries are on a scale adequate to the importance of the city. Evangelical Lutheran Cathedral dedicated 1905, in the presence of Kaiser Wilhelm II., is one of the finest modern churches in the world.

The most important branches of manufacturing industries are steam engines and other machinery; brassfounding, the making of lamps and other articles of metal; printing and the kindred arts, spinning and weaving, the making of sewing machines, paper, tobacco and cigars, pottery and porcelain, pianos and harmoniums, artificial flowers, brewing, etc. A considerable quantity of the manufactures are exported In the royal iron-foundry, busts, s'atues, bas-reliefs, etc., are cast, together with a great variety of ornaments of unrivaled delicacy of workmanship. Berlin is well supplied with city and other railways. Berlin has rapidly risen to be the first city in Germany.

Pop. (1925) with suburbs, 4,042,000. No other city of Germany has over 1,000,000 inhabitants except Hamburg.

Berlin, University of, a celebrated institution of learning in Berlin, Germany. It is, with the exception of Bonn, the youngest of the German universities, but is probably the most famous of them all.

Berlioz, Hector, a French composer, born in La Cote St. Andre, Dec. 11, 1803. He forsook medicine to study music at the Paris Conservatoire, where he gained the first prize in 1830 with his cantata, "Sardanapale." He died in Paris, March 9, 1869. After his death appeared "Memoires," written by himself.

Berm, or Berme, in fortification, a narrow, level space at the foot of the exterior slope of a parapet, to keep the crumbling materials of the parapet from falling into the ditch.

In engineering, a ledge or bench on the side or at the foot of a bank, parapet, or cutting, to catch earth that may roll down the slope or to strengthen the bank. In canals, it is a ledge on the opposite side to the towpath, at the foot of a talus or slope, to keep earth which may roll down the bank from falling into the water. Slopes in successive benches have a berme at each notch, or, when a change of slope occurs, on reaching a different soil.

Bermuda Cedar, a species of cedar which covers the Bermuda Islands. The timber is made into ships, boats and pencils.

Bermuda Grass, a species of grass, called in Bermuda, devil grass. It grows in the American Southern States and in Southern Europe. It is much esteemed for pasture.

Bermuda Hundred, a locality in Chesterfield county, Va.; the scene of a battle in the Civil War between the Union troops under General Butler, and the Confederates under General Beauregard. The battle was fought May 16, 1864, and resulted in a defeat for Butler.

bas-reliefs, etc., are cast, toget er with a great variety of ornaments of unrivaled delicacy of workmanship. Berlin is well supplied with city and other railways. Berlin has rapidly risen to be the first city in Germany.

Bermudas, The, or Somer's Islands, a group of small islands, about 360 in number, in the North Atlantic Ocean, belonging to Great Britain, stretching N. E. by E. and S. W. by W. about 20 miles, the light-

house on Gibb's Hill being 580 miles | Bern, the chief city of the above S. E. of Cape Hatteras; area, about canton, was, by the decision of the 30 square miles. The principal islands Council of the Confederation, in 1848, are those of Bermuda, St. George, 1re-land, and Somerset. The protection af-forded to shipping by their numerous 107,700. Bern was founded by bays, and their position in the track of Duke Berthold V., of Zahringen, in the homeward bound West India ves-the conversion of the perial city by a charter from the Em-perial city by a charter from the Em-perial city by a charter from the Emand likewise, into a British naval station for West Indian fleets. The har-bor of St. George's Island has been greatly improved, is fortified, protected by a breakwater, and has water and space enough to float the largest fleet. The principal productions are fruits, vegetables, maize, and tobacco. Pineapples are very abundant and largely exported. The climate is mild and salubrious; almost realizing the idea of a perpetual spring. Fish abounds, and forms a profitable source of industry to the inhabitants. Breadstuffs, etc., are imported from the United States, and manufactured goods from England. Hamilton, on Bermuda Island, is the seat of the colonial government. Pop. (1925 Est.) 27,741. These Islands were discovered by Bermudez, a Spaniard, in 1522, and settled by the English in 1607, and are supposed to be the "still vexed Bermoothes," mentioned in Shakespeare's "Tempest." They are a favorite winter resort.

Bermudez, Remigio Morales, a Peruvian statesman, born in Tarapaca Province, Sept. 30, 1836; began business in the nitrate trade in his native province. In 1854, as a lieutenant, he joined the revolutionary army, which finally overthrew General Ech-inique's government. In 1864 he joined the revolution against President Castilla. In the war with Chile, he led the force that marched to Africa. When Caceres was elected President, in 1886, Bermudez was chosen Vice-President, and was elected President in 1890. He died in Lima, March 31, 1894.

Bern, or Berne, a Swiss canton, bounded on the N. by France. It is the most populous, and next to the Grisons, the most extensive canton of Switzerland, its area being 2.657 square miles, and its pop. (1921), 680,-000, more than one-sixth of the Swiss people.

Bernadotte, Jean Baptiste Jules, a French general, afterward raised to the Swedish throne, was the son of an advocate of Pau, born Jan. 26, 1764. He enlisted at 17, became sergeant-major in 1789, and subaltern in 1790. In 1794 he was appointed a General of Division, and distin-guished himself greatly in the campaign in Germany, and on the Rhine. In 1798 he married Mademoiselle Clary, sister-in-law of Joseph Bona-parte. The following year he became for a short time Minister of War, and on the establishment of the Empire was raised to the dignity of Marshal of France, and the title of Prince of Ponte-Corvo. On the death of the Prince of Holstein-Augustenburg, the heir apparency to the Swedish crown was offered to the Prince of Ponte-Corvo, who accepted with the consent of the Emperor, went to Sweden, abjured Catholicism, and took the title of Prince Charles John. In the main-tenance of the interests of Sweden, a serious rupture occurred between him and Bonaparte, followed by his accession, in 1812, to the coalition of sovereigns against Napoleon. At the battle of Leipsic, he contributed effectually to the victory of the allies. At the close of the war strenuous attempts were made by the Emperor of Austria and other sovereigns to restore the family of Gustavus IV. to the crown; but Bernadotte, retaining his position as Crown Prince, became King Sweden on the death of Charles XIII., in 1818, under the title of Charles XIV. During his reign agriculture and commerce made great advances, and many important public works were completed. He died March S. 1844, and was succeeded by his son Oscar.

Bernard, Charles de (properly BERNARD DU GRAIL DE LA VILLETTE), a French novelist, born in Besancon, Feb. 25, 1804; died in Neuilly, March 6, 1850.

Bernard, Claude, a French physiologist, born in 1813; died in Paris in 1878.

Bernard, Sir Francis, an English administrator, born in Nettleham, in 1714; was Governor of New Jersey in 1758-1760, and of Massachusetts Bay in 1760-1769. He did a great deal toward precipitating the Revolution by his aggressive attempts to strengthen the royal authority. He was finally recalled on account of the unpopularity resultant on his bringing troops into Boston. He died in Aylesbury, England, June 16, 1779.

Bernard, Mountague, an English lawyer, born in Gloucestershire, Jan. 28, 1820. In 1872 he assisted Sir Roundell Palmer in preparing the British case for the Geneva Arbitration Tribunal. He died at Overross, Sept. 2, 1882.

Bernard, Great St., a celebrated pass of the Pennine Alps in Switzerland in the canton Valais, on the mountain road leading from Martigny to Aosta in Piedmont.

The dogs kept at St. Bernard to assist the brethren in their humane labors are well known. In the midst of tempests and snowstorms the monks, accompanied by some of these dogs, set out for the purpose of track-

ing those who have lost their way.

Bernard, Little St., a mountain of Italy, belonging to what are called the Graian Alps, about 10 miles S. of Mont Blanc. The pass across it is one of the easiest in the Alps, and is supposed by many to be that which Hannibal used. The Hospice at the summit of the pass has an elevation of 7,192 feet.

Bernard, St., Abbot of Clairvaux, was born of a noble family in Burgundy, in 1091. He was educated at the University of Paris. At the age of 23 he entered the recently founded monastery of Citeaux, accompanied by his brothers and 20 of his companions. He observed the strictest rules of the Order, and so distinguished himself by his ability and acquirements that he was chosen to lead the colony to Clairvaux, and was made abbot of the new house; an office which he filled till his death. In 1128

he prepared the statutes for the Order of Knights Templar. He was founder of 160 monasteries; and was the chief promoter of the second crusade. St. Bernard died at Clairvaux in 1153, and was canonized in 1174.

Bernard, Simon, a French engineer, born in Dole, April 28, 1779. He served under Napoleon as his aidede-camp; was wounded at the battle of Leipsic; superintended the defense of Torgau, and was present at Waterloo. In 1816 he came to the United States; was commissioned a Brigadier-General of Engineers; and planned an elaborate system of seacoast defenses, the most important of the works built by him being Fort Monroe. In 1831 he returned to France; was made aidede-camp to Louis Philippe, and designed the fortifications of Paris. In 1834 he was appointed Minister of War. He died in Paris, Nov. 5, 1839.

Bernard, William Bayle, an Anglo-American dramatist, born in Boston, Mass., Nov. 27, 1807. His first work was a nautical dramacalled the "Pilot." This proved successful and encouraged him to pursue a literary career. He wrote in all 114 plays, of which the best known is "Rip Van Winkle." He died in Brighton, England, Aug. 5, 1875.

Bernard Dog, St. The St. Bernard, as bred to modern ideas, is an immense red or orange colored dog, marked with white on muzzle, neck, chest, feet, and tip of tail. Many of the finest St. Bernards measure over 30 inches high at the shoulder and weigh over 150 pounds.

Bernard of Chartres, surnamed Sylvestris, a writer of the 12th century.

Bernard of Treviso, an Italian alchemist, born in Padua in 1406; died in 1490.

Bernardine, the name given to the Cistercian monks, a branch of the old Benedictines, from St. Bernard, who, entering the order, gave it such an impulse that he was considered its second founder.

est rules of the Order, and so distinguished himself by his ability and acquirements that he was chosen to lead the colony to Clairvaux, and was made abbot of the new house; an office which he filled till his death. In 1128

came a member in 1404. He died in 1444, and was canonized in 1450.

Bernhard, Karl, pseudonym of Nicolai de Saint Aubain, a celebrated Danish novelist, born in Copenhagen, Nov. 18, 1798; died in Copenhagen, Nov. 25, 1865.

Bernhardi, Theodor von, a German historian and diplomat, born in Berlin, Nov. 6, 1802; died at Kunersdorf, Silesia, Feb. 12, 1887.

Bernhardt, Rosine Sarah, a French actress, born in Paris, Oct. 22, 1844. At an early age her Jewish parents placed her in a convent at Versailles. When 14 years old she left the convent, and entered the Paris Conservatoire, and there studied tragedy and comedy. In 1862 she made her debut at the Theatre Francais, in Racine's "Iphigene" and Scribe's "Valerie," but, not achieving a success, she retired for a time from the stage. Her first great success was as Marie de Neuberg, in Victor Hugo's "Ruy Blas," in January, 1867. Becoming very popular by her representations, notably in "Andromaque" and "La Sphinx," she was recalled to the Francais, and was soon recognized as the foremost actress in French tragedy. In 1879 she visited London with the company of the Comedie Francaise and was warmly received; in 1880, 1887, 1891, 1896, 1900, and 1910–1911 made successful tours in the United States, and between and after these dates visited Switzerland, Holland, South America, Italy, Algeria, Australia, etc. In 1916–17 she was again in the United States and subjected to a severe surgical operation. She has also done considerable work in painting, and literature. Died, 1923.

Bernhardy, Gottfried, a German classical philologist, born in Landsberg-on-the-Warthe, March 20, 1800; died in Halle, May 14, 1875.

Bernier, Francois, a French physician and traveler, born in Angers about 1625; set out on his travels in 1654, and visited Egypt, Palestine, and India, where he remained for 12 years as physician to the Great Mogul Emperor Aurungzebe. He died in Paris in 1688.

Bernina, a mountain of the Rhætian Alps, 13,290 feet high, in the Swiss canton of Grisons, with remark-

able and extensive glaciers. Its summit was first attained in 1850.

Bernini, Giovanni Lorenzo (known also as IL CAVALIERE BERNINI), an Italian painter, born in Naples in 1598, and obtained, among his contemporaries, the reputation of being the modern Michael Angelo, on account of his success as painter, statuary, and architect. He died in 1680.

Bernouilli, or Bernoulli, a family which produced eight distinguished men of science. The family fled from Antwerp during the Alva administration, going first to Frankfort, and afterward to Basel. John, born in Basel, in 1667, wrote with his brother, James, a treatise on the differential calculus; developed the integral calculus, and discovered, independently of Leibnitz, the exponential calculus. He died in 1748.

Bernstorff, Count Johann, a German diplomat, born in London, Eng., Nov. 14, 1862; was educated in Dresden and Ratzeburg; entered the diplomatic service in 1889; filled important posts in various countries till 1908, when he became ambassador to the United States; continuing in that relation till the declaration of a state of war against the Imperial German Government, April 6, 1917.

Berquin, Louis de, the first protestant martyr in France, born in 1490. He was a gentleman of Artois, a friend of Badius, the savant. When, in 1523, the police began to seize Luther's works, with a view to suppressing Protestantism, they found among Berquin's books some manuscripts of his own writing that were pronounced heretical. As he refused to retract, he was thrown into prison. Francis I., whose counselor he was, obtained for him his freedom, but he was burned alive in Paris, April 17, 1529.

Berrian, William, an American Episcopal clergyman and writer, born in New York in 1787; was rector of Trinity Church, New York (1830-1862). He died in New York city, Nov. 7, 1862.

Berrien, John McPherson, an American statesman, born in New Jersey, Aug. 23, 1781; graduated at Princeton College in 1796, and was admitted to the bar in Georgia when 18 years old. He represented Georgia in the United States Senate in 1825–1829 and 1840–1852; was Attorney-General of the United States in 1829-1831, and a delegate to the Baltimore Convention in 1844. In 1829 he delivered a speech so clear and impressive against certain measures before Congress that the title of "American Cicero" was given him. Hin Savannah, Ga., Jan. 1, 1856. He died

Berro, Bernardo Prudencio, an Uruguayan statesman, born in Montevideo about 1800. He was President of the republic in 1860-1864. The revolution of Flores was successful soon after the expiration of his term. In 1868 he stirred up a revolt against Flores, was imprisoned, and soon afterward shot through a window in his cell, in April, 1868.

Berry, a succulent fruit, in which the seeds are immersed in a pulpy mass inclosed by a thin skin. Populary it is applied to fruits like the strawberry, bearing external seeds on a pulpy receptacle, but not strictly berries.

Berryer, Antoine Pierre. French advocate and statesman, born in Paris in 1790. In 1814 he proclaimed at Rennes the deposition of Napoleon, and remained till his death an avowed Legitimist. In 1840 he was one of the counsel for the defense of Louis Napoleon after the Boulogne fiasco. He gained additional reputa-tion in 1858 by his defense of Montalembert, and was counsel for the Patterson-Bonapartes in the suit for the recognition of the Baltimore marriage. He died in 1868.

Bersaglieri, a corps of riflemen or sharpshooters, introduced into the Sardinian army by Gen. Della Mar-mora, about 1849. They took part in the Russian War and also assisted at the battle of the Tchernaya, Aug. 16, They were likewise employed 1855. in the Italian Wars of 1859 and 1866.

Bersezio, Vittorio, an Italian novelist and playwright, born at Peveragno, Piedmont, in 1830.

Bert, Paul, a French statesman and physiologist, born in Auxerre, Oct. 17, 1833. While engaged in public life, M. Bert still pursued with ardor his scientific investigations, attracting

ments in vivisection. Appointed by the French Ministry to the governor-ship of Tonquin and Annam, he went out there in 1886, but died Nov. 11, of the same year. The anti-religious views of M. Bert excited much contro-

Berthelot, Pierre Eugene Marcellin, a French chemist, born in Paris, Oct. 25, 1827. In 1878 he became president of the committee on explosives, which introduced smokeless powder. His labors also led to the discovery of dyes extracted from coaltar. He died March 18, 1907.

Berthier, Alexander, Prince of Neufchatel and Wagram, Marshal, Vice-Constable of France, etc.; born in Versailles, Nov. 20, 1753; killed himself, June 1, 1815.

Berthold of Ratisbon, a celebrated German preacher and Franciscan monk; ranked as the most powerful preacher of his time in the German world. It is said that as many as 60,000 people flocked to hear him in the open fields. His sermons have been preserved. He died in 1272.

Bertillon, Alphonse, a French anthropologist, born in Paris in 1853; is widely noted as the founder of a system of identification of criminals. In 1880, while Chief of the Bureau of Identification in the Prefecture of Police, he established his system of measurements which has given marvelous results for their precision. The system has since been adopted by the police authorities of the large cities of Europe and the United States. He was one of the expert witnesses in handwriting in the trial of Capt. Dreyfus in 1899, and soon after its close was removed from his office. He was author of numerous works bearing upon his system. He died Feb. 13, 1914.

Bertillon System, a system of identification of criminals, introduced into France by Alphonse Bertillon. The system depends upon accurate measurements of various portions of the human body, especially the bones, which in adults never change. The parts measured are the head, ear, foot, middle finger, the extended forearm, height, breadth, and the trunk. These measurements are placed upon a card, world-wide attention by his experi- and together with photographs of the bodily features, take the place of the old portraits in the rogues' gallery.

Bertrand, Eugene, a French operatic manager, born in 1835; died in Paris, Jan. 21, 1900.

Bertrand Henri G., Count, a French military officer, born in Chateauroux in 1773, and early entered the armies of the Revolution as engineer. He accompanied the expedition to Egypt, and directed the fortifica-tion of Alexandria. He distinguished himself at Austerlitz and became Napoleon's adjutant; and, after the bat-tle of Aspern, in 1809, for his share in saving the French army by bridges, he was created count and governor of Illyria. After serving with credit in the subsequent campaigns, he retired with the Emperor to Elba, was his confidant in carrying out his return to France, and finally shared his banishment to St. Helena. On Napoleon's death, Bertrand returned to France. where, though sentence of death had been pronounced upon him—a sentence which Louis XVIII. had wisely recalled—he was restored to all his dignifies, and, in 1830, appointed Commandant of the Polytechnic School. In 1840, he formed part of the expedition which brought back the remains of Napoleon to France. I died in Chateauroux, Jan. 31, 1844.

Berwick, or more fully, Berwickon-Tweed, a seaport town of England, formerly a Parliamentary borough and (with small adjoining district) a county by itself, but now incorporated with Northumberland, and giving name to a Parliamentary divi-

sion of the county.

Beryl, a colorless, yellowish, bluish or less brilliant green variety of emerald, the prevailing hue being green of various shades, but always pale, the want of color being due to absence of chromium, which gives to the emerald its deep, rich green.

Beryllium, a rare white malleable

metal, the same as glucinum.

Berzelius, Johann Jakob, Baron, a Swedish chemist, born in Ostgothland, Aug. 29, 1779. To him pre-eminently belongs the honor of applyting the great principles which had been established by Dalton, Davy, Gay-Lussac, and himself, in organic chemistry, to the study of the laws the 15th century, and founder of the

which regulate the combinations forming the structures of the animal and vegetable kingdoms; and of thus opening the way for the discoveries of Mulder, Liebig, Dumas, and others. To him, chemistry is indebted for the discovery of several new elementary bodies, more especially selenium, thorium, and cerium; and to his skill as a manipulator may be traced many of the analytical processes at present in use. He died Aug. 7, 1848. All the scientific societies of the world enrolled his name among their members.

Berzelium, (See CAROLINIUM). Besancon, a city in the N. E. of France, the capital of the Depart-ment of Doubs, on the river Doubs. It contains Roman remains, including an amphitheater, aqueduct and triumphal arch of Mars, as well as a cathedral of diversified architectural style, and the Renaissance palace of Cardinal Granwelle, who was born in Besancon. Victor Hugo was also a native of Besancon. Watch-making is the principal industry. Pop. (1921)

55,652. Besant, Annie, an English theosophist and author, born in London, Oct. 1, 1847; was married in 1867 to the Rev. Fank Besant, brother of Sir Walter Besant, but was legally separated from him in 1873. In 1889 she joined the Theosophical Society, and has since been active in theosophical propaganda in Great Britain and the

United States. Besant, Sir Walter, an English novelist; born in Portsmouth, England, Aug. 14, 1836; was educated in London and at Christ's College, Cambillation. bridge; was for a time professor in the Royal College Mauritius; knighted May 24, 1895. He died in London, June 9, 1901.

Bessarabia, a province of Rou-mania extending N. W. from the Black Sea, between the Pruth and Danube sea, between the Fruth and Dahubs and the Dniester; area, 17,143 square miles; pop. (1920) 2,441,000; capital, Kishinef. It has been alternately in the possession of Turkey and Russia several times between 1474 and 1878. The inhabitants are chiefly

1878. The inhabitants are chiefly Walladrians, Gipsies, and Tartars.

Bessarion, John, a Greek scholar, born in Trebizond in 1395, one of the

library of St. Mark at Venice; was a monk of the Order of St. Basil. He died in Ravenna, Nov. 19, 1472.

Bessel, Friedrich Wilhelm, astronomer, born in Minden, Prussia, July 22, 1784. He died in Konigs-berg, March 17, 1846.

Bessels, Emil, a German naturalist, born in Heidelberg, June 2, 1847; died in Stuttgart, March 30, 1888.

Bessemer, Sir Henry, an English inventor, born in Charlton, Hertfordshire, Jan. 19, 1813; began mod-eling and designing patterns when 18 years old; chose engineering as a profession, and, after long and costly experiments, announced, in 1856, his discovery of a means of rapidly and cheaply converting pig iron into steel, by blowing a blast of air through the iron when in a state of fusion. For this discovery the Institution of Civil Engineers awarded him the Gold Telford Medal, and several foreign gov-ernments honored him with valuable tokens. In the United States appreciation of his great discovery took the form of creating industrial cities and towns under his name. He was elected President of the Iron and Steel Institute of Great Britain in 1871; knighted by the Queen in 1879, and received the freedom of the city of London in 1880. He died in London, March 15, 1898.

Bessemer Steel, steel made from pig iron, from which practically all the carbon, etc., has been removed by exposing the molten mass to a current of air.

Bessey, Charles E., an American botanist, born in Wilton, O., May 21, 1845; educated at Harvard University; Professor of Botany in the Iowa Agricultural College in 1870–1884; Professor of Botany in the University of Nebraska since 1884. He was also President of the Society for the Promotion of Agricultural Science in 1883-1885; President of the Ne-braska Academy of Sciences in 1891; acting Chancellor of the University of Nebraska in 1888-1891; Fellow of the American Association for the Advancement of Science. Died in 1915.

Bessieres, Jean Baptiste, Duke of Istria, a marshal of the French of Napoleon (1804) to the throne, he became Marshal of France. He showed his usual conspicuous courage at Austerlitz, Jena, Eylau, and Friedland, and, raised to the rank of Duke of 1stria, commanded in Spain in 1808-1809. In the Russian campaign he led the cavalry of the Guard, and did much by his sleepless courage and presence of mind to save the wreck of the army in the disastrous retreat from Moscow. On the morning of the battle of Lutzen (May 1, 1813), he fell mortally wounded by a cannon ball.

Bestiary, the name given to a class of written books of great popularity in the Middle Ages, describing all the animals of creation, real or fabled, composed partly in prose, partly in verse, and generally illustrated by drawings.

Betauzos, Juan Jose de, a Spanish historian and adventurer of the 16th century; was author of an account of the conquest of Peru by Pi-

Betel, or Betle, the English name of the piper betle, a shrubby plant with evergreen leaves, belonging to the typical genus of the pepperworts. is extensively cultivated in the East Indies. Its leaf is used as a wrapper to inclose a few slices of the areca palm nut with a little shell lime. The Southern Asiatics are perpetually chewing it to sweeten the breath, to strengthen the stomach, and, if hunger be present, to deaden its cravings.

Betham-Edwards, Matilda, an English author, born in Suffolk, in 1836, was educated privately; has published numerous works in poetry, fiction, and on French rural life. She was made an officer of public instruction in France in 1891.

Bethania, or Bethany, a town in Syria, about 2 miles S. E. of Jerusalem, on the way to Jericho. It is now a small place, inhabited by a few Turkish families, by whom it is called Lazari, in memory of Lazarus, who dwelt here, and who was here raised from the dead. The inhabitants show the pretended sites of the houses of Lazarus, of Martha, of Simon the leper, and of Mary Magdalene. The alleged tomb of Lazarus and Lazarus and Lazarus of Martha, of Simon the leper, and of Mary Magdalene. The alleged tomb of Lazarus, a large ex-Empire, born of poor parents at Preis-sac, Aug 6, 1768. At the accession cavation in the rock, is also shown.

The situation of Bethania is extremely picturesque.

Bethany College, a co-educational institution in Linsborg, Kan.; organized in 1881: under the auspices of the Lutheran Church.

Bethany College, a co-educational institution in Bethany, W. Va.; organized in 1841: under the auspices of the Church of the Disciples.

Bethel, a town of Palestine, about 10 miles from Jerusalem, now called Beitin, or Beiteen. The patriarch Jacob here had a vision of angels, in commemoration of which he built an altar. Interesting ruins abound in the vicinity.

Bethel College, an educational institution in Russellville, Ky.; organized in 1854; under the auspices of the Baptist Church.

Bethesda, a pool in Jerusalem, near St. Stephen's Gate, and the Temple of Omar.

Bethlehem, the birthplace of Jesus Christ and of King David, and the Ephratah of the history of Jacob; is now a small, unwalled village of white stone houses, in the midst of a most interesting country, 6 miles S. of Jerusalem. The population, about 3,000, is wholly Christian — Latin, Greek, and Armenian. The Convent of the Nativity, a large, square building, resembling a fortress, was built by the Empress Helena, in 327 A. D., but destroyed by the Moslems in 1236, and, it is supposed, restored by the crusaders. Within it is the Church of the Nativity, which is subdivided among the Latins, Greeks, and Armenians, for devotional purposes. The Bethlehemites chiefly gain their subsistence by the manufacture and sale of crucifixes, beads, boxes, shells, etc., of mother-of-pearl and olive wood.

Bethlehem, a borough in Northampton and Lehigh counties, Pa.; on the Lehigh river and canal and several railroads; 57 miles N. of Philadelphia; since 1904 includes the former borough of West Bethlehem; contains a Moravian theological seminary and other educational institutions, and has silk mills, rolling mills, machine shops, and brass and spelter works. It was founded in 1741 by Moravians under Count Zinzendorf. Pop. (1930) 57,892.

Bethsaida, a village on the W. shore of the Lake of Galilee, the birth-place of Peter and Andrew and Philip.

Bethune, a town of N. France, 24 miles N. N. W. of Arras; in the midst of the richest coal mines in France; has large industrial interests; was once strongly fortified; ceded to France by the Peace of Nijmwegen in 1678; occupied by the allied forces in 1710; restored to France by the Treaty of Utrecht; pop. about 15,000. Bethune was in the sphere of the great Arras campaign. See Appendix: World War.

Betterton, Thomas, English acttor, born in 1635; excelled in Shakespeare's characters of Hamlet, Othello, Brutus, and Hotspur, and was the means of introducing shifting scenes instead of tapestry upon the English stage. He died in 1710, and was buried in Westminster Abbey.

Betting, or Wagering, a contract by which two or more parties agree that a certain sum of money or other thing shall be paid or delivered to one of them on the happening or not happening of an uncertain event. At common law, wagers are not per se, void, but statutes prohibiting betting have been passed by many of the States.

Betts, Craven Langstrath, an American poet and story writer, born in New Brunswick, in 1853.

Betty, William Henry West, better known as the Young Roscius, an English actor, born at Shrewsbury in 1791; died in London, Aug. 24, 1874.

Beust, Friedrich Ferdinand, Count von, an Austrian statesman, born in Dresden, Jan. 13, 1809. He entered the service of Austria as Minister of Foreign Affairs, became President of the Ministry, Imperial Chancellor, and, in 1868, was created Count. In 1871-1878 he was Ambassador in London, in 1878-1882, in Paris. He died near Vienna, Oct. 24, 1886.

Beveridge, Albert Jeremiah, an American lawyer, born in Highland county, O., Oct. 6, 1862; was brought up on a farm; graduated at De Pauw University; and engaged in law practice in Indianapolis. He entered political life in 1883, and soon won a

Beverly, a city and popular summer-resort in Essex county, Mass.; tures. It has been translated into on the North Shore and the Boston & Maine railroad; 18 miles N. E. of Boston; is the seat of the New England Industrial School for Deaf Mutes; and under President Taft was the "suppose capital" of the United Taft was the "suppose capit

the "summer capital" of the United States. Pop. (1930) 25,086.

Bewick, Thomas, an English wood engraver, born in Northumberland in 1753. He died in 1828.

Beyle, Marie-Henri, better known under the pseudonym of "Stendhal," a French novelist and critic, born in Grenoble, Jan. 23, 1783; died in Paris, March 23, 1842.

Beyrout, or Beirut, a flourishing commercial town, situated in a most picturesque position on the coast of Syria, and at the foot of Lebanon, 55 miles from Damascus, and 147 from Jerusalem. It is the chief seaport, market-town, and emporium of all the trade with the shores of Syria, Palestine, and Cilicia, with a regular service of Egyptian, French, and British steamers. The American vice-consul at this place was shot at during a riot in September, 1903, and warships were sent there. Pop. about 80,000.

Bezants, or Byzantines, coins of the old Byzantine empire.

Beza, or Beze, Theodore de, a French Protestant theologian and re-former, born in Vezelai, in 1519. In 1558, he was sent to ask the intercession of several German princes in behalf of the persecuted Huguenots in France. The next year he settled at Geneva, and was thenceforth the associate of Calvin till his death, and his successor as Professor of Theology and head of the Protes-tant party. His energy and activity of mind, like his bodily health, continued unabated till he was nearly 80 years of age, and he only ceased preaching in 1600. He died in 1605.

Bezique, or Besique, a game of cards of French origin.

Bhagavatgita, or Bhagavadgita, in Sanskrit literature, a song re-lating a discourse between Krishna

reputation as an effective orator. He served as U. S. Senator for Indiana during 1899-1911. Died Apr. 27, 1927. of known literature. Its teaching is nearly a city and reputation of server and reputation of server. Beverly, a city and popular sum-pantheistic. It consists of 18 lecer-resort in Essex county, Mass.; tures. It has been translated into

Bheels, or Bhils, a Dravidic race inhabiting the Vindhya, Satpura, and Satmala Hills, a relic of the Indian aborigines driven from the plains by the Aryan Rajputs. The bers are about 750,000. Their total num-

Bhutan, an independent State in the Eastern Himalayas; area about the Eastern Himalayas; area about 20,000 square miles; pop. est. 250,-000. The Bhutanese are a backward race, governed by a Dharm Rajah, regarded as an incarnation of deity, and by a Deb Rajah, with a council of eight. They are nominally Ruddbiefs Buddhists.

Biafra, Bight of, a large bay on the W. coast of Africa, at the head of the Gulf of Guinea, between Capes Formosa and Lopez.

Bianchini, Francesco, an Italian astronomer, born in Verona, in 1662. He died in 1729.

Biard, Auguste Francois, French genre painter, born in 1798; died in 1882.

Biarritz, a watering-place and noted winter resort in France; on the Bay of Biscay in the Department of the Basses-Pyrenees; 4 miles S. W. of Bayonne. It was the royal summer residence during the Second Empire.

Biart, Lucien, a French novelist, poet and writer of travels, born in Versailles, June 21, 1829. He published a number of novels, containing masterly descriptions of Mexican and South American nature and customs.

Bias, one of the seven sages of Greece; a native of Priene, in Ionia; celebrated for his practical knowledge and strict regard to justice. He flourished about 550 B. C., and died at a very advanced age.

Biberach, a town of Wurtemberg, delightfully situated on the Reiss, 23 miles S. S. W. of Ulm. It retains its and his pupil Arjun in the midst of a old ramparts and towers, and in front battle. Schlegel considers it the most of the theater is a monument to Wieland, who was born in the neighborhood.

Bible (French bible, with similar forms in other languages, from Greek biblia, books, from biblos, the inner bark of the papyrus, used for writing on, hence a book), the collection of Sacred Writings or Holy Scriptures of the Christians. The older and larger division of these writings is also received by the Lews as embody. also received by the Jews as embodying their faith, and is called the Old Testament, or Scriptures of the Old Covenant, because the Jewish religion was represented as a compact or covenant between God and the Jews, and the Greek word for covenant signifies also last will or testament. The same figure was applied to the Christian religion, which wes considered as an extension of the old covenant, or a covenant between God and the whole hu-The sacred writings race. peculiar to the Christians are, there-Govenant, or the New Testament. Protestants and Roman Catholics do not altogether agree as to the books that ought to be admitted into the canon or list of writings belonging to the Old Testament. A certain number of books classed by the former under the head of Apocrypha are called by the latter "deutero-canonical," as being admitted into the canon at a later date than the rest, but are held to be of equal authority.

The scriptures were, no doubt, originally written on skins or parchments

rolled up into rolls or volumes.

The earliest and most famous version of the Old Testament is the Septuagint, or Greek translation, completed it is believed in the 2d century B. C. The Syriac version, called the Peshito, was made in the 2d century after Christ, and is celebrated for its fidelity. The famous Latin version of St. Jerome, known as the Vulgate, was finished in 405.

The New Testament, besides being originally written in Greek, also differs remarkably from the Old in this respect, that while the writings comprehended in the earlier collection range over a period of 1,000 years, those included in the latter were produced almost contemporaneously—

most of them probably between A. D. 50 and A. D. 70. The collection consists of 27 writings, ascribed either to apostles or to persons intimately associated with them. Five of the works are in the form of historical narra-tives, four of which relate from different points of view the story of Christ's life, while the fifth describes the formation and extension of the Church by the ministry of the leading apostles. Twenty-one are epistolary. Thirteen of these bear the name of St. Paul as their author, nine being addressed to various Christian communitries, three (I and II Timothy, and Titus) — called the pastoral epistles — to office-bearers in the Church, and one to a private individual (Philemon). The epistle to the Hebrews formerly ascribed to Paul is believed to have been written by Apollogs. Some other letters—one ascribed los. Seven other letters—one ascribed to James, two to Peter, three to John, and one to Jude—are often known as the catholic (that is, general) epistles, as having been intended for the use of Christians in general. The only remaining work is the Apocalypse or Revelation of St. John. Of these writings the epistles are the earliest in date and were written to various Christian communities to give advice in special circumstances, to explain points of doctrine, or to warn against mistaken beliefs. They are adapted to the special conditions and mental attitude of those to whom they were addressed; thus in the letters to the Corinthian Christians, who dwelt in Greece, various speculative questions are discussed. The first three Gospels, called the synoptic Gospels, were probably written in or near A. D. 70, that of Mark being perhaps the earliest. The fourth Gospel is of much later date (about A. D. 100), and has a markedly different character. It gives an account of Christ's life not so much from an objective and historical as from a subjective and personal point of view.

All the books of the New Testament have come down to us as originally written in the Greek language. The writers of the New Testament were all, or nearly all, Jews; and while employing the Greek language,

they exhibit many traces of their native idiom, so that their writings present more or less of a Hebraic coloring. The body, as has been well said, is Greek; the spirit is Hebrew. The first translation of the whole Bible into English was by Wycliffe and his coadjutors, who translated from the Latin and published their work in 1382. William Tyndale made a translation from the original tongues of the New Testament and part of the Old, which he printed at Worms in 1525. It was proscribed and burned in England, but copies were smuggled over and used in secret. The Pentateuch was published by Tyndale in 1530. He also translated some of the prophetical books. His translation was superior to all previous versions in purity, perspicuity, and accuracy, and it formed the basis of all subsequent translations.

Tyndale suffered martyrdom in 1536, but his work was taken up by Miles Coverdale. He and his coadjutors completed the translation and the whole Bible was issued in one large volume. In 1537 a new and revised edition was published. Another version appeared in 1560 known as the Genevan Bible, or more familiarly as the Breeches Bible, from its rendering of Genesis 3: 7. This, however, was not popular with the Church of England, and in 1568 a revision of Coverdale's version was made. This was known as the Bishop's Bible, because of the number of bishops who assisted in its production.

In the reign of James I. a demand was made for a new translation, and at the Hampton Court Conference (1604) the suggestion was made by Dr. Rainolds of Oxford, as spokesman of the Puritan representatives, and accepted by the king. The work was committed to 54 scholars, but only 47 took part in it. They were divided into six companies, who had their respective tasks assigned them and met apart. The revision was begun in 1607, and occupied three years. The whole work was revised by 12 of the translators, two out of each company, and a final revision was made by Dr. Myles Smith, the writer of the preface, and Dr. Bilson, Bishop of Winchester. The completed work was published in a folio volume in 1611.

The translators were enjoined to follow the ordinary Bible read in the churches commonly called the Bishops' Bible, and not to make alterations unless the meaning of the original could be more accurately conveyed. The general accuracy of this translation, which is usually known as the Authorized Version, and the surfit of the translation of the surfice of the surfit of the surfice of t purity of its style, so won the appro-bation of scholars and commended it to readers generally that from the time of its adoption it has superseded all other versions. Latterly, however, the advances made in Hebrew scholarship and biblical criticism gave rise to a general demand among those interested in the study of the Bible for a revision of the Authorized Version, and the task was undertaken by a number of the Anglican clergy, with the aid of associates from various other bodies. The work was set afoot by the convocation of Canterbury, which in 1870 appointed a committee to consider the question of revision. The committee in a few months reported favorably on the scheme, rec-ommending that "the revision be so conducted as to comprise both marginal renderings and such emendations as it may be found necessary to insert in the text of the authorized version"; stating also "that in the above resolutions we do not contemplate any new translation of the Bible, or any alteration of the language, except where in the judgment of the most competent scholars such change is necessary." Two companies were soon formed — one for the Old, the other for the New Testament, including a number of scholars belonging to the United States—and the revised version of the New Testament was issued in 1881, while that of the Old Testament appeared in 1885. In accuracy at least the revised version is greatly superior to the old, on which it made 10,000 emendations. Of other translations than the English Authorized Version, that of Luther, which formed an epoch in the history of the German language, is the most remarkable. It was finished in 1534.

pany, and a final revision was made by Dr. Myles Smith, the writer of the preface, and Dr. Bilson, Bishop of Winchester. The completed work was published in a folio volume in 1611. A clergyman of Wales, whom the want of a Welsh Bible led to London, occasioned the establishment of the British and Foreign Bible Society, which was founded in London, March

7, 1804.

In the United States the great American Bible Society, formed in 1816, acts in concert with the aux-iliary societies in all parts of the Union. The annual income of the society is now over \$500,000, and its total issue has amounted to about 64,000,000 copies. These have been mostly in English, Spanish, and French, from the society's plates. The managers have occasionally purchased Bibles in Europe, and issued them to applicants, in German, Dutch, Welsh, Gaelic, Portuguese, modern Greek, and some other European languages. They have also furnished money to print translations into pagan languages, by American missionaries. It is the object of the society to supply every one who can read in the United States, before devoting much attention to distribution abroad. Yet Spanish America and Ceylon, Greece, and the Sandwich Islands have been furnished with Bibles by the society. Other American societies are the Pennsylvania Bible Society, the American and Foreign Bible Society, and the American Bible Union.

Bible Statistics, an interesting compilation, said to be the fruits of three years' labor by the indefatigable Dr. Horne, and given by him in his introduction to the study of the Scriptures. The basis is an old English Bi-

ble of the King James version.
Old Testament.— Number of books, 39; chapters, 929; verses, 23,214; words, 593,493; letters, 2,728,100.

New Testament.-Number of books, 27; chapters, 260; verses, 7,959; words, 181,253; letters, 838,380.

The Bible.—Total number of books, 66; chapters, 1,189; verses, 31,173; words, 772,746; letters, 2,566,480

words, 773,746; letters, 3,566,480.

Apocrypha.— Number of books, 11; chapters, 184; verses, 6,031; words,

125,185.

Old Testament.—The middle book of the Old Testament is Proverbs. The middle chapter is Job xxix. The middle verse is II Chronicles xx, between verses 17 and 18. The shortest book is Obadiah. The shortest verse is Chron. i: 25. The word "and" ran of the Mohammedans, the Eddas

occurs 35,543 times. Ezra vii: 21 contains all the letters of our alpha-bet. The word "Selah" occurs 73 times and only in the poetical books. II Kings xix and Isaiah xxxvii are alike. The Book of Esther does not contain the words God or Lord. The last two verses of II Chronicles and the opening verses of the Book of Ezra are alike. Ezra ii and Nebeniah vii arealike. miah vii are alike. There are nearly 30 books mentioned, but not found in the Bible, consisting of civil records and other ancient writings now nearly all lost. About 26 of these are alluded to in the Old Testament.

New Testament.— The middle book is II Thessalonians. The middle chap-

ter is between Romans xiii and xiv. The middle verse is Acts xvii: 17. The smallest book is II John. The smallest verse is John xi: 35. The word "and" occurs 10,684 times. The name Jesus occurs nearly 700 times in the Gospels and Acts, and in the Epistles less than 70 times. The name Christ alone occurs about 60 times in the Gospels and Acts, and about 240 times in the Epistles and Revelation. The term Jesus Christ occurs 5 times

in the Gospels. The Bible. - The middle book is Micah. The middle (and smallest) chapter is Psalm cxvii. The middle verse is Psalm cxviii: 8. The middle line is II Chronicles iv: 16; the largest book is that of the Psalms; the largest chapter is Psalm cxix. The word Jehovah (or Lord occurs 6,855 times. The word "and" occurs 46,227 times. The number of authors of the Bible is 50. The Bible was not until modern times divided into chapters and verses. The division of chapters has been attributed to Lanfrank, Archbishop of Canterbury, in the reign of William I.; but the real author of this division was Cardinal Hugo de Sancto-Caro, about 1236. The number of languages on earth is estimated at 3,000; the Bible or parts of it have been rendered into only about 180, or, lan-guages and dialects together, 345. The first English translation complete of the Bible was by Wyclif in 1380. The first American edition was printed in Boston in 1752.

of the Scandinavians, the Tripitikes of the Buddhists, the Five Kings of the Chinese, the three Vedas of the Hindus, the Zend Avesta and the Scriptures of the Christians. The Koran is, except the Eddas, the most recent of these seven Bibles and not older than the 7th century of our era. It is a compound of quotations from the Old and New Testaments, the Tal-mud and the gospel of St. Barnbas. The Eddas of the Scandinavians was first published in the 14th century. The Tripitikes of the Buddhists contain sublime morals and pure aspirations: their author lived and died in the 6th century before Christ.

The sacred writings of the Chinese are called the Five Kings, king meaning web of cloth or the warp that keeps the threads in their place. They contain the best sayings of the best sages on the ethico-political duties of life. These savings cannot be traced to a period earlier than the 11th century before Christ. The three Vedas are the most ancient books of the Hindus, and it is the opinion of Max Muller, Wilson, Johnson and Whitney that they are not older than 11 cen-turies before Christ. The Zend Aves-ta of the Persians is the grandest of all these sacred books next to our Bible. Zoroaster, whose sayings it contains, was born in the 12th century before Christ. It is the sacred book

of the fire worshippers. Biblical Archæology, Society of, a society founded in London Dec. 9, 1870, "for the investigation of the archæology, history, arts, and chron-ology of ancient and modern Assyria, Palestine, Egypt, Arabia, and other Biblical lands; the promotion of the study of the antiquities of those countries, and the record of discoveries hereafter to be made in connection therewith."

Biblical Criticism, the science which deals with the text of the Bible. It is of two kinds: the Lower, or Textual Criticism, which is concerned with the accuracy and meaning of the passages; and the Higher or Literary Criticism, which seeks to discover the origin, date, authorship and relations of the various books, and to find out by internal evidence whether they are

er they have undergone revision since they were first composed.

Bibliography, the science or knowledge of books, their authorship, the dates of their first publication, and of the several editions they have gone through, with all other points requisite for literary history.

Bichloride of Gold, in chemistry and pharmacy, a substance which has risen into notoriety on account of the use made of it in the cure of dip-somania and chronic alcoholism. Its employment by Dr. Keeley produced a profound impression on the medical world.

Bicycle, a light-wheeled vehicle propelled by the rider, consisting of two wheels attached to a frame composed of tubing. Between these is arranged an axle, attached to lower part of frame, to which are affixed two pedals, one on either side; to this axle is attached a sprocket-wheel over which runs an endless chain connecting with a smaller sprocket on the rear wheel. There are also chainless bicycles, in which a system of cogs takes the place of the chain. The frames are dis-tinguished as "diamond" and "drop;" the former used by men, the later by women cyclists. The rider sits upon a saddle attached to a seat-post affixed to the frame; he there steers the machine by means of a handle-bar, which turns the front wheel in any direction required. The momentum of the vehicle, and the proper use of the steering bar keeps it in an upright position.

Biddeford, a city in York county, Me .: on the Saco river and the Boston & Maine railroad; 15 miles S. W. of Portland; settled in 1630; has trolley to famous Old Orchard Beach (4 miles); has good water-power, cotton and woollen mills, and large trade in lumber and farm products. Pop. (1930) 17,633.

Biddle, Anthony Joseph Drexel, an American author and explorer; born in Philadelphia, Oct. 1, 1874.

Biddle, Arthur, an American lawyer, born in Philadelphia, Pa., Sept. 23, 1852; graduated at Yale in 1873; studied law and was admitted to the bar in 1878. Later he became a member of his father's firm and devoted much time to the study of cerbased on earlier documents and wheth- tain branches, the results of which

were published in his works. He died in Atlantic City, N. J., March 8, 1897.

Biddle, Clement, the "Quaker Soldier," was born in Philadelphia, May 10, 1740. Although a strict Quaker, he identified himself with the Revolutionary cause even to the extent of going to war. He was present at the battles of Princeton, Brandywine, Germantown and Monmouth. He also shared the sufferings of Valley Forge. He resigned active service in 1780, but assisted in the making of the Federal Constitution in 1787. After that he was United States marshal of Pennsylvania. He died in Philadelphia, July 14, 1814.

Biddle, James, an American naval officer, born in Philadelphia, Pa., in 1793; entered the navy as a mid-shipman on the "Philadelphia" in shipman on the "Philadelphia" in 1800, and was on that frigate when she was wrecked on the Barbary coast in 1803. In the War of 1812 he served on the "Wasp" in the capture of the British sloop "Frolic," and was captain of the "Hornet" at the capture of the "Penguin." In 1845 he was given command of the East India Squadron and concluded the first treaty between the United States and China. He died in Philadelphia, Oct. 1, 1848.

Biddle, John, father of the modern Unitarians, born in Wotton-under-Edge, in Gloucestershire, in 1615; was educated at Oxford, and became master of a free school at Gloucester. He was repeatedly imprisoned for his anti-Trinitarian views. A general act of oblivion restored him to liberty, when he immediately disseminated his opinions both by preaching and by the publication of his "Twofold Scripture Catechism." He was again imprisoned, and the law of 1648 was to be put in operation against him when, to save his life, Cromwell banished him to St. Mary's Castle, Sicily, and assigned him 100 crowns annual-He was repeatedly imprisoned for his and assigned him 100 crowns annually. Here he remained three years, until the Protector liberated him in 1658. He then continued to preach his opinions till the death of Cromwell, and also after the Restoration, when he was committed to jail in 1662, and died a few months after.

Biddle, Nicholas, an American naval officer, born in Philadelphia, Austrian army officer, born in Roslau,

Pa., Sept. 10, 1750. After serving in the British navy and in the Arctic ex-Phipps, he returned to his native country at the outbreak of the Revolution, and was one of the five officers who received the rank of captain at the organization of the American navy in 1775. In command of the "Andrea Doria" he accompanied Fleet-Captain Hopkins to the Bahamas, and was present at the capture of New Providence. In 1777 he took command of the 32-gun ship "Randalph" the first American Frieste command of the 32-gun snip "Randolph," the first American frigate ever launched. He met the British "Yarmouth," 64 guns, on March 7, 1778, and in the ensuing action the "Randolph" blew up, causing the death of her captain and about 315 others. others.

Biddle, Nicholas, an American financier, born in Philadelphia, Pa., Jan. 8, 1786; became secretary to John Armstrong, United States Minister to France, in 1804, and subsequently went to England as secretary to Large Menney the Large Menney than United States to James Monroe, then United States Minister. He returned home in 1807, was elected to the Pennsylvania Legislature in 1810, and was appointed a director of the United States Bank in 1819. He became president of the bank in 1823 and managed it ably down to the expiration of its charter. He died in Philadelphia, Feb. 27, 1844.

Bidwell, John, an American politician, born in Chautauqua county, N. Y., Aug. 5, 1819. In 1831 his parents moved to Ashtabula county, O., where he acquired an academical education and taught school. He went to California in 1841; served in the Mexican War, reaching the rank of Major; was a member of the Consti-tutional Convention of 1849; and of the National Democratic Convention in Charleston, in 1860. In the Civil War he was brigadier-general of California militia. In 1864 he was elected to Congress as a Republican; in 1866 was a member of the Philadelphia Convention; in 1890 was the un-Successful Prohibition candidate for Governor of California; and, in 1892, unsuccessful candidate of his party for the Presidency. He died in Chico, Cal., April 5, 1900.

Biela, Wilhelm, Baron von, an

Prussia, March 19, 1782; known from his discovery of the comet bearing his name. He died in Venice, Feb. 18, 1856.

Biela's Comet, a comet which took its name from Major Biela of the Austrian army, who traced it out in 1826 and furnished such data regarding its movements as to convince the other astronomers of his day that he had a proprietary right to it. The same comet had been noticed on March 8, 1772, and again in 1805.

Biehlesohle, a stalactite cavern in the Harz Mountains, on the right bank of the Bode.

Biennial, a plant that requires two seasons to come to maturity,

Bienville, Jean Baptiste le Moyne, a French colonist, born in Montreal, Feb. 23, 1680. In 1698, with his brother, Iberville, he left France to found a colony at the mouth of the Mississippi. In 1700 he constructed a fort 54 miles above the mouth of the river, and in 1701, he succeeded to the direction of the colony, the seat of which became Mobile. In 1718 he received a commission as governor of Mississippi, and about this time founded the city of New Orleans. In 1724 he was summoned to France, and, on Aug. 9, 1726, was removed from office. In 1733 he was sent back to the colony as governor, with the rank of lieutenant-general. In 1743 he was again removed and returned to France, where he died in 1765.

Bierstadt, Albert, an American painter, born near Dusseldorf, Germany, Jan. 7, 1830: removed with his parents to Salem, Mass., in 1831; begen to paint in oils in 1851; and in 1853 returned to Dusseldorf to study his art, spending a winter in Rome, traveling in Italy and Switzerland, and returning to the United States in 1857. In 1859 he accompanied General Lander's expedition to the Rocky Mountains, and spent several months in studies of mountain scenery. He was elected a member of the National Academy in 1860. In 1861 he finished his painting, "Laramie Peak," and in 1863 "View of the Rocky Mountains—Lander's Peak." These at once gave him a high reputation. He died in New York city, Feb. 18, 1902.

Bies-Bosch, a marshy sheet of water interspersed with islands, between the Dutch Provinces of North Brabant and South Holland, formed in 1421 by an inundation which destroyed 72 villages and 100,000 people.

Bigamy, in civil law, the act of marrying a second time, while the first husband or wife is still known to be

living, and not divorced.

Big Bend Country, a volcanic plain near the center of the State of Washington. It covers 4,800 square miles, a third of it being gently rolling, brown loam prairie, suitable for farming, and the rest low hills and plateaus of bunch grass and sage brush, where livestock is ranged. The Columbia river curves round this region, flowing in a ravine 1,500 feet below the general level. It is traversed by several remarkable chasms, many miles long, and from a furlong to half a league wide, with sheer walls ot black basalt 500 feet high.

Big Bethel, a village in Virginia, on the peninsula between the York and James rivers; the scene of a battle, June 10, 1861, between the Federal and Confederate forces. It resulted in the defeat of the Federal

army.

Big Bone Lick, a salt spring, in Boone county, Ky., 11 miles S. of Burlington, where fossil remains of mastadons and other extinct fauna have been found.

Bigelow, Erastus Brigham, an American inventor, born in Boylston, Mass., April 2, 1814; became a leading manufacturer in Clinton, Mass.; invented looms for suspender weaving, for counterpanes, for coach lace and for carpets. He died in Boston, Dec. 6, 1879.

Bigelow, Frank Hagar, an American clergyman and meteorologist, born in Concord, Mass., Aug. 28, 1851; graduated at Harvard in 1873, and at the Episcopal Theological School at Cambridge, Mass.; was ordained in 1880, and became assistant rector at St. John's Church in Washington, D. C. In 1873-1876 and 1881-1883 he was Astronomer at the Cordoba Observatory, Argentine Republic in 1884-1889, Professor of Mathematics at Racine College, Wisconsin; and in 1893 became Professer

of Meteorology in the United States Weather Bureau.

Bigelow, Jacob, an American physician, born in Sudbury, Mass., Feb. 27, 1787; graduated at Harvard College in 1806, and began medical practice in Boston in 1810. He early became known as a botanist, and a number of plants were named for him by Sir J. E. Smith. He died in Boston, Jan. 10, 1879.

Bigelow, John, an American author, born in Malden, N. Y., Nov. 25, 1817; graduated at Union College, in 1835, and became first a lawyer and afterward a journalist. In 1845-1846 he was inspector of Sing Sing prison; in 1849-1861 one of the editors of the New York "Evening Post;" in 1861-1864, United States Consul-General at Paris; and in 1864-1867, Minister to France. He was Secretary of State of New York in 1875-1877. In his will Samuel J. Tilden appointed him his biographer and a trustee of the bulk of his estate, set apart for a public library in New York city. He died

Dec. 19, 1911.

Bigelow, John, Jr., an American military officer, born in New York, May 12, 1854; son of the preceding; graduated at the United States Military Academy in 1877. In 1887-1889 was adjutant-general of the militia in the District of Columbia; and in 1894-1898, Professor of Military Science at the Massachusetts Institute of Technology, and later at Rutgers College. During the war with Spain he was wounded in the attack on San Juan, Cuba, July 1, 1898. Retired as major in 1904. Served in historical branch, General Staff, during the World War.

World War.

Bigelow, Poultney, an American author, born in New York, Sept. 10, 1855; son of John Bigelow; graduated at Yale University and at the Columbia Law School in 1882, and was admitted to the bar. In 1875–1876 he took a journcy around the world in a sailing ship, which was wrecked on the coast of Japan. He traveled in China, Africa, the West Indies, and Demerara. He has made canoe voyages on the principal waters of Europe, and was the first person to take a canoe through the Iron Gates of the Danube.

Bigelow, Timothy, an American military officer, born in Worcester, Mass., Aug. 12, 1739. On May 23, 1775, he led a company of minute men to Cambridge, and became a Major in Ward's regiment. He was under Arnold in the expedition to Quebec in 1775, and was there captured, remaining a prisoner till 1776. He became a Colonel in 1777, and assisted in the capture of Burgoyne. He also saw service at Valley Forge, Monmouth, West Point, and Yorktown. He died in Worcester, Mass., March 31, 1790.

Biggs, Asa, an American jurist, born in Williamston, N. C., Feb. 4, 1811; died in Norfolk, Va., March 6, 1878.

Big Horn, the wild sheep of the Rocky Mountains, named from the size of its horns, which are 3½ feet long, the animal itself being of the same height at the shoulder.

Big Horn Mountains, a range of mountains beginning near the center of Wyoming and running N. into Montana, containing heights of from 8,000 to 12,000 feet, and covering 7,500 square miles.

Big Horn River, a river of Montana and Wyoming; rises in the Rocky Mountains near Fremont's Peak, and flows N. E. into the Yellowstone. Along its course is some of the grandest mountain scenery in the world.

Bignonia, a genus of plants (that of the trumpet flowers). It has four perfect stamina, two long and two short. The species, which are numerous, are nearly all of an ornamental character, owing to their fine, large trumpet like, monopetalous corollas, colored red, blue, yellow, or white.

Big Trees, the sequoia gigantea, "big tree" of California, is found only on the W. slope of the Sierra, while the "redwood," belonging to the same genus, is confined to the Coast Range.

The Calaveras Grove of sequoia gigantea is the northernmost of the California groves of big trees, and it is the nearest to San Francisco. It is, however, comparatively seldom visited, as the Mariposa Grove is conveniently included in the usual route to the Yosemite. The Calaveras Grove covers an area 1,100 yards long and

70 yards wide, 4,750 feet above the sea, and contains about 100 trees of large size, besides many smaller ones. The tallest now standing is the Keystone State, which is 325 feet high and 45 feet in girth. The Mother of the Forest (denuded of its bark) is 315 feet high and has a girth of 61 feet, while the prostrate Father of the Forest measures 112 feet in circumference. Two other trees are over 300 feet high, and many exceed 250 feet. A house has been built over a stump with a diameter of 24 feet. The bark is sometimes 1½ feet in thickness. About 5 miles to the S. is the Stanislaus or South Grove, also containing many fine trees.

The Mariposa Grove of big trees, so

called from its situation in Mariposa county, occupies a tract of land (6,-500 feet above the sea) 4 square miles in area, reserved as a State Park, and consists of two distinct groves, one-half mile apart. The Lower Grove contains about 100 fine specimens of the sequoia gigantea, including the Grizzly Giant, the largest of all, with a circumference of 94 feet and a diameter of 31 feet. Its main limb, 200 feet from the ground, is 61/2 feet in diameter. In ascending to the Upper Grove, which contains 365 big trees, the road passes through a tunnel, 10 feet high and 914 feet wide (at the bottom), cut directly through the heart of a living sequoia, 27 feet in diameter. About 10 of the trees in the Mariposa Grove exceed 250 feet in height (highest 272 feet) and about 20 trees have a circumference of over 60 feet, three of these being over 90 feet. The Calaveras Grove has taller trees than any of the Mariposa Grove, but the latter has those of greater cir-cumference. The wood of the sequoia gigantea, like that of the sequoia sempervirens, is easily worked, durable, and susceptible of a high polish. The sequoia sempervirens, or redwoods, sometimes reach a height of 300 feet.

The Santa Cruz Grove of big trees contains about a score of the genuine redwood with a diameter of 10 feet and upward. The largest is 23 feet across; one of the finest, named the Pioneer, has a girth of 70 feet. The redwood is one of the most prized varieties of lumber, and is shipped in great quantities to the Eastern States,

where its ornamental qualities are fully appreciated.

Big Woods, a forest region in the S. E. part of Minnesota, extending S. from St. Cloud to Le Sueur, where it crosses the Minnesota, and sends branches toward Faribault and Mankato.

Bihe, a fruitful district of South Africa, E. of Benguela, and under Portuguese influence. Bihe is an important caravan center, as the only route across the continent passes through it. Pop. 95.000.

through it. Pop. 95,000.

Bijapur, a decayed city in the Bombay Presidency, 160 miles S. E. of Poona. It was for centuries the capital of a powerful kingdom. Pop. (1925) 32,485.

Bikaner, a native State of Rajputana, India, under the superintendence of a political agent and the governor-general's agent for Rajputana. Area, 23,315 square miles; pop. (Est.) 750,000; city, 69,410.

Bilaspur, a district in the chief commissionership of the Central Provinces of India. Area, 7,618 square miles; pop. 1,146,223.

Bilbao, a town of Northern Spain, the capital of the Basque Province of Vizcaya, is situated in a mountain gorge on the Nervion, 8 miles S. E. of its mouth at Portugalete, and 63 miles N. by E. of Miranda by rail. Bilbao is well built. The place, which is purely a trading town, prides itself on being kept exceptionally clean. Pop. (1924) 120,369.

Bilberry, the name given to one or two species of a genus of plants belonging to the order cranberries. It is also called the whortleberry. It has angular stems, drooping, urceolate, almost waxy flowers, greenish with a red tinge, and black berries very pleasant to the tas'e. It grows in woods and healthy places. The great bilberry or bog whortleberry is an allied species with rounded stems, smaller flowers, and less agreeably tasted fruit. It grows in mountain bogs. It is called also the bleaberry or blaeberry. The name is also applied to the fruit of the species described.

Pioneer, has a girth of 70 feet. The redwood is one of the most prized varieties of lumber, and is shipped in great quantities to the Eastern States, on which she would rest if aground.

Bilguer, Paul Rudolf von, a russian military officer, born in Prussian military officer, born in Ludwigslust, Mecklenburg-Schwerin, Sept. 21, 1815. He was a lieutenant in the army, and was best known as an authority on chess. He died in Berlin, Sept. 10, 1840.

Biliary Calculus, a concretion which forms in the gall bladder or bile ducts; gall stone. It is generally composed of a peculiar crystalline fatty matter which has been called

cholesterine.

Bill, a written or printed paper containing a statement of any particulars. In common use a tradesman's account, or a printed proclamation or advertisement, is thus called a bill. In legislation a bill is a draft of a proposed statute submitted to a legislative assembly for approval, but not yet enacted or passed and made law. When the bill has passed and received the necessary assent, it becomes an act.

Billaud-Varennes, Jacques N., the son of a French advocate at Rochelle, born in 1756; was educated at the same college as Fouche, and proved himself one of the most violent and sanguinary characters of the French Revolution. He bore a principal of the college as Fouche, and proved the college as Fouche, and proved the college as Fouche, and principal of the college as Fouche as Fouche, and proved himself one of the most violent as Fouche as Fouche, and proved himself one of the most violent as Fouche, and proved himself one of the most violent as Fouche, and proved himself one of the most violent and proved himself one of the most violent and proved himself one of the most violent and sanguinary characters of the Fouche, and proved himself one of the most violent and sanguinary characters of the Fouche as Fouche, and proved himself one of the most violent and sanguinary characters of the Fouche as Fouche cipal part in the murders and massacres which followed the destruction of the Bastille; voted immediate death to Louis XVI.: and officiated as president of the Convention on Oct. 18, 1793. He was afterward deported to Cayenne, and subsisted on a small pension allowed him by Petion. He died in Haiti, in 1819.

Bill Broker, a financial agent or money dealer, who discounts or negotiates bills of exchange, promissory notes, etc.

Bille, Steen Andersen, a Danish naval officer, born in Copenhagen, Dec. 5, 1797. He was a member of the expedition that went to South America in 1840, and had command of a scientific expedition round the world, in the corvette "Galatea," 1845-1847, of which he wrote an interesting account. He died in Copenhagen, May 7, 1883.

Billeting, a mode of feeding and lodging soldiers when they are not in camp or barracks by quartering them on the inhabitants of a town.

Billiards, a word probably derived from old French billiard, "a stick with a curved end;" in English, introduced as the name of a game, and made plural. The origin of billiards is uncertain.

Billings, John Shaw, an American surgeon and librarian, born in Switzerland county, Ind., April 12, 1839: was graduated at Miami 1857, and University, in the Ohio Medical College, in 1860; was demonstrator of anatomy in the last institution, in 1860-1861; entered the Union army as an Assistant Surgeon, in 1861; was promoted to Lieutenant-Colonel and Deputy Sur-Dieutenant-Colonel and Deputy Surgeon General, June 6, 1894; and was retired, Oct. 1, 1895. He was Professor of Hygiene in the University of Pennsylvania, in 1893-1896; and in the last year was appointed Director of the New York Public Library (Astor, Lenox and Tilden foundations). After the close of the war Dr. Billings took charge of the library in the Surgeon-General's office; reorganized the United States Marine Hospital Service; was Vice-President of the National Board of Health, in 1879-1882; and had charge of the compilation of vital statistics in the Eleventh Census. He died March 11, 1913.

Billings, William, an American composer, born in Boston, Oct. 7, 1746. One of the earliest of American composers, he is accredited with having introduced into New England a spirited style of church music. He died in Boston, Sept. 26, 1800.

Billingsgate, a word said to have been derived from Belinus Magnus, a somewhat mythic British prince, father of King Lud, about B. C. 400. More probably it came from some unknown person called Billing. It is applied to the celebrated London fish market existent at least as early as A. D. 979, made a free market in 1699, extended in 1849, rebuilt in 1852, and finally exposed to the rivalry of another market begun 1874, completed 1876. The word is also used to indicate foul, abusive language, such as is popularly supposed to be mutually employed by fish-wives who are unable to come to an amicable understanding as to the proper price of the fish about which they are negotiating.

Billion, in English notation 1,000,-000 times 1,000,000, and in England it is written 1,000,000,000,000, i. e., with twice as many ciphers as 1,000,000 has. In the United States and in France the notation is different, the word billion signifying only 1,000 millions, written 1,000,000,000.

Billiton, a Dutch East Indian island between Banca and the S. W. of Borneo, of an irregular, sub-quadrangular form, about 40 miles across. It produces iron and tin, and exports sago, cocoanuts, pepper, tortoise shell, trepang, edible birds' nests, etc. It was ceded to the British in 1812 by the Sultan of Palembang, but in 1824 it was given up to the Dutch. Pop.

(Est.) 45,000.

Bilney, Thomas, an English martyr, born about 1495, probably at Norwich; studied at Trinity Hall, Cambridge, and was ordained in 1519. He was opposed to the formal "good works" of the Schoolmen, and denounced saint and relic worship; and to these mild Protestant views he con-verted Hugh Latimer and other young Combridge men. In 1527 he was arr; igned before Wolsey, and on recanting, absolved, but was confined in the Tower for over a year. Stung by remorse, after two years of suffering, he began to preach in the fields of Norfolk, but was soon apprehended and condemned; and although allowed to receive the sacraments of the Church from which he differed so little, he was burned as a heretic at Norwich, Aug. 19, 1531.

Biloxi, a city in Harrison co., Miss., the site of the first settlement on the Mississippi by white men, under the direction of d'Iberville, in 1699. Pop. (1930) 14.850.

Biloxi Indians, the name given to on of the 10 groups of tribes into which the Siouan stock of North American Indians is divided.

Bimetallism, a term invented by Henry Cernuschi and currently used to denote a double monetary standard of value. A Bimetallic Congress was held at Brussels in April, 1896, repre-France, the United States, Germany, Austria-Hungary, Belgium, Denmark, Holland, Rumania, and Russia being present. Ultimately the members Britain, Great members

constituted themselves a permanent committee, and expressed their opinion that a preliminary and immediate agreement might result from the restablishment of bimetallism by the United States, the reopening of the Indian mints for the coinage of silver, the turning into silver of part of the metallic reserve of the Bank of England, and the absorption of a suf-ficient amount of silver by the vari-ous European States. The currency question in the United States influenced very materially the canvass for the Presidency in 1896. It appeared, as the year wore on, that free silver doctrines had captured a majority of the Democratic party, and at the Chi-cago Convention (July 7th) this majority adopted a platform demanding "the immediate restoration of the free and unlimited coinage of gold and silver at the present legal ratio of 16 to 1, without waiting for the aid or consent of any other nation," and that "the standard silver dollar shall be full legal tender equally with gold for all debts, public and private." WILLIAM JENNINGS BRYAN Was nominated for the Presidency, but was decisively beaten by WILLIAM MCKIN-LEY, the Republican candidate, who favored a single gold standard, though he pledged himself to promote action by international agreement. To this end he sent commissioners to France, Great Britain and Germany, in 1897, and they, together with the French Ambassador, laid various proposals before the British Government, the chief of which were that the Indian mints should be reopened, and that Great Britain should annually purchase \$50,000,000 of silver. The Indian Government, however, declined to agree to the first suggestion, and no action resulted.

Binary Arithmetic, a method of notation invented by Leibnitz, but which appears to have been in use in China about 4,000 years ago. As the term binary implies, there are only two characters in this notation; these are 1 and 0. By it, our 1 is noted by 1, our 2 by 10, 3 by 11, 4 by 100, 5 by 101, 6 by 110, 7 by 111, 8 by 1,000, 9 by 1,001, 10 by 1,010, etc. The principle is that 0 multiplies by 2 in place of by 10, as on the common system.

Binary Engine, usually an engine having one cylinder, the piston being impelled by steam, which, hav-ing done its work there, is exhausted into another part of the apparatus, where it is allowed to communicate its unutilized heat to some liquid volatile at a lower temperature; the va-por of this second liquid, by its ex-Binn pansion in a second cylinder, yields additional useful force.

Bingen, a German town in the Province of Rhine-Hesse, Hesse; on the left bank of the Rhine, and the right of the Nahe. It is of considerable historical interest, containing the ruins of the Castle of Klopp, blown up by the French in 1689; the remains of a 12th century monastery; and the tower, which, tradition tells us, was the scene of the tormenting death of Hatto, Archbishop of Mainz, said to have been eaten alive by mice in the 9th century. A statue of "Germania," heroic size, has been erected here to commemorate the German victories of 1870-71. Pop. (Est.) 10,000.

Bingham, Hiram, an American Congregational clergyman, born in Bennington, Vt., Oct. 30, 1789; was one of the first missionaries of the Congregational Church to be sent to the Sandwich Islands, where he acquired much influence with the natives. He died in New Haven, Conn.,

Nov. 11, 1869.

Bingham, John A., an American politician, born in Mercer, Pa., in 1815; became a lawyer in 1840; manager of the trial of President Johnson; minister to Japan in 1873-1885. He died, March 20, 1900.

Bingham, Kinsley S., an American legislator, born in Camillus, N. Y., Dec. 16, 1801; went to Michigan in 1833; was a member of Congress in 1849-1851; Governor in 1855-1859, and United States Senator in 1859-1861. He died, Oct. 5, 1861.

Binghamton, city and capital of Broome county, N. Y.; at junction of the Chenango and Susquehanna rivers and on several railroads; 50 miles E. of Elmira; has a Government Building, State Asylum for the Insane, Armory, and the Commercial Harden Armory, and the Commercial Harden Binturong (bear-marten), a generic Home; is one of the largest cigar manufacturing cities in the nus of carnivores in the civet section. Its resemblance to raccoons, beside

Binley, Ward, the Garrick of the Dutch stage, was born at Rotter-dam in 1755, of English parents. In 1799 he made his debut on the stage of Amsterdam, and from the first took his place at the head of his profession. He died at The Hague

Binnacle, corrupted from bittacle, a wooden case or box in which the

compass on board a ship is kept to protect it from injury.

Binney, Hib-bert, a Canadian clergyman, born in Nova Scotia, Aug. 12, 1819; graduated at Oxford University in 1842. He became Bishop Bishop (Anglican) of Nova Scotia and Prince Edward Island, in 1851, this being the first instance of England founding a bishopric in her colonies. He attended the General Convention of the Protestant Episcopal

BINNACLE.

Church held in Chicago in 1886. He died in 1887.

Binney, Horace, an American lawyer, born in Philadelphia, Jan. 4, 1780; was graduated at Harvard in 1797; and for many years was at the head of the Pennsylvania bar. He had a number of distinguished cases in his career; the most noted one being the defense of the city of Philadelphia against the executors of Stephen Girard. He was also a director in the United States Bank. He wrote many valuable papers, and was the author of "The Leaders of the Old Bar of Philadelphia," and "The Privilege of the Writ of Habeas Corpus Under the Constitution." He died in Philadelphia, Aug. 12, 1875.

Binocular, literally, having two eyes or pertaining to both eyes; an instrument having two tubes, each furnished above with an eye glass, so as to enable one to see with both

which it used to be placed, is entirely superficial. It is a slow, arboreal and nocturnal animal, partly vegetarian, indeed omnivorous, in its diet, with lank body, coarse, dark hair, long, tufted ears, and prehensile tail. There is but one species found in India, Malay, Sumatra and Java. It is easily tamed.

Binue, or Benue, the largest and most important tributary of Niger river, West Africa. It rises in the mountains N. of Adamawa and at Lokoja joins the Niger.

Biobio, the largest river of Chile, has a W. N. W. course of about 200 miles, from near the volcano of Antuco in the Andes to Consepcion on the Pacific Ocean. It is 2 miles wide at its mouth, and navigable for 100 miles. The river, since 1875, has given name to a province with an area of 5.353 square miles, and a pop. (1914) of 103,873.

Biograph, an apparatus that displays in rapid sequence a long series of photographs. It differs from the kinetoscope in that instead of showing small pictures through an enlarging lens by reflected light, it projects them on a screen where they are shown life size, or larger if desired.

Biology, a term first introduced by Treviranus of Bremen, adopted by the leading English speaking naturalists, and now having universal currency. It is used in two senses: (1) (In a more restricted sense): Physiology; (2) (In a wider sense): The science of life in its widest accepta-

Biot, Jean Baptiste, French mathematician and physicist born at Paris 1774, and died there 1862. He became professor of physics in the College de France in 1800, in 1803 member of the Academy of Sciences, in 1804 was appointed to the Observatory of Paris, in 1806 was made member of the Bureau des Longitudes, in 1809 became also professor of physical astronomy in the University of Paris. In connection with the measurement of a degree of the meridian he visited Britain in 1817. He is especially celebrated as the discoverer of the circular polarization of light.

magnesia mica, hexagonal mica, and uniaxial mica; named after Jean Baptiste Biot.

Biped, a descriptive term, sometimes applied to man, but more frequently to birds.

Birch, the English name of the trees and shrubs belonging to the botanical genus betula. The common birch grows best in healthy soils and in Alpine districts. The drooping or weeping birch is a variety of this tree. It grows wild on the European continent and in Asia. The wood of the birch is tough and white. It is used for making brooms; it is often burned into charcoal; twigs are by many employed for purposes of castigation. The oil obtained from the white rind is used in tanning Russia leather. The Russians turn it to account also as a vermifuge and as a balsam in the cure of wounds. In some countries the bark of the birch is made into hats and cups. The canoe birch, of which the North American Indians constructed their portable capoes is so called for that reason.

Birch, Samuel, an English Orientalist, born in London, Nov. 3, 1813. He entered the British Museum as Assistant Keeper of Antiquities, in 1836, and ultimately became Keeper of the Egyptian and Assyrian Antiquities. He was especially famed for his ca-pacity and skill in Egyptology, and was associated with Baron Bunsen in his work on Egypt, contributing the philological portions relating to hieroglyphics. He died Dec. 27, 1885.

Bird, Charles, an American military officer, born in Delaware, June 17, 1838. On March 2, 1867, he was brevetted First Lieutenant and Captain in the United States army for tain in the United States army for gallantry in the battle of Fredericksburg, Major for Spottsylvania, and Lieutenant-Colonel for Petersburg, Va. He was appointed a Second Lieutenant, 14th United States Infantry, in 1866; promoted to Major and Countermaster in 1895; commissioned in the States Infantry, in 1866; promoted to Major countermaster in 1895; commissioned Countermaster in 1895; and Quartermaster in 1895; commissioned Colonel of United States Vol-unteers in 1898; Brigadier-General and retired in 1902. Died, 1920.

Bird, Frederic Mayer, an Amer-Biotite, a hexagonal and an optically uniaxial mineral, formerly called versity of Pennsylvania in 1857, and at the Union Theological Seminary in 1860. He was rector at Spotswood, N. J., in 1870-1874; Chaplain and Professor of Psychology, Christian Evidences and Rhetoric, at Lehigh University in 1881-1886; and acting chaplain there in 1893-1898. He was noted as a hymnologist, and as the collector of one of the most complete and valuable musical libraries in the United States. Died April 2, 1908.

Bird, Robert Montgomery, an American dramatist and novelist, born in Newcastle, Del., about 1803; died in Philadelphia, Jan. 22, 1854.

Bird-Catching Spider, a name applied to a gigantic spider, a native of Surinam and elsewhere which preys upon insects and small birds which it hunts for and pounces on.

Bird Lice, the common name given to the small parasites so frequently seen infesting birds.

Bird Lime, a substance whitish and limy in appearance; used, as its name imports, for capturing birds. It is, in general, manufactured from the bark of the holly.

Bird of Ill Omen, a phrase often applied to a person who is regarded as unlucky; one who is in the habit of bringing ill news. The ancients thought that some birds indicated good luck, and others evil.

Bird of Paradise, the English designation of a family of conirostral birds. They are closely allied to the crows, with which, indeed, they are united by some writers. They have magnificent plumage, especially the males, who can, moreover, elevate quite a canopy of plumes behind their necks.

Bird's Eye, the eye or eyes of a bird. In botany, the name of several plants with small, bright, usually blue, flowers.

Bird's-Eye Maple, curled maple, the wood of the sugar maple when full of little knotty spots, somewhat resembling birds' eyes, much used in cabinet work.

Bird's-Eye View, the representation of any scene as it would appear if seen from a considerable elevation right above.

Bird's Nest the nest of a bird. ince, and intersected by the railway Those of the several species vary in from Bingen to Saarbruck. It has an

their minor details so as to be in most cases distinguishable from each other. Edible birds' nests are nests built by the collocalia esculenta, and certain other species of swallows inhabiting Sumatra, Java, China, and some other parts of the East. The nests, a Chinese luxury, are formed of a mucilaginous substance, secreted by the birds from their salivary glands. See SALANGANE.

Birds of Passage, birds which migrate with the season from a colder to a warmer, or from a warmer to a colder climate.

Bireme, a Roman ship of war with two banks of oars. It was inferior in magnitude and strength to the trireme.

Biren, Ernest John, Duke of Courland, a Lithuanian of mean family, was born in 1690, and went in 1714 to St. Petersburg. Anna, Duchess Dowager of Courland, made him her favorite, and when she became Empress of Russia, intrusted to him the administration of the kingdom. On the death of the Empress he assumed the regency, by virtue of her will; but, in 1740, a conspiracy was formed against him by Marshal Munich, and he was condemned to death, which sentence was changed to banishment. Peter III. recalled him, and Catherine II. restored him to his former dignity. In 1763, Biren re-entered Mitau; and governed with mildness and justice. He died in 1772.

Birge, Edward Asahel, an American naturalist, born in Troy, N. Y., Sept. 7, 1851; graduated at Williams College in 1873; studied physiology and histology at Leipsic in 1880-1881. He became Instructor of Natural History in the University of Wisconsin in 1875; Professor of Zoology in 1879; and Dean of the College of Letters and Science in 1891; Acting President, 1900-1903; President, 1918-1925; President-Emeritus since 1925. In 1897 he became Director of the Geological and Natural History Survey of Wisconsin. Writer on zoology and limnology.

Birkenfeld, a German principality belonging to Oldenburg, but surrounded by the Prussian Rhine Province, and intersected by the railway from Bingen to Saarbruck. It has an

area of nearly 200 square miles, with a population of (1921) 60,000; it has been connected with Oldenburg, 300 miles distant, since 1817. The capital, Birkenfeld, has a population of about 3,000.

Birmingham, city and county-seat of Jefferson co., Ala.; at the junction of several trunk railroads; 96 miles N. W. of Montgomery, the State capital. Birmingham was incorporated as a city in 1871 with a population of less than 1,000. Its noticeable development began in 1880 and its remarkable progress may be said to date from 1890. In 1896 its two largest iron and steel corporations began selling pig iron for export at prices as satisfactory as those ob-tained on domestic orders; and since prices as satisfactory as those obtained on domestic orders; and since then it has had a larger development a division. He died Aug. 14, 1907.

Birmingham, a city of England, on the Rea river near its confluence with the Tame, in the N. W. of Warwickshire, with suburbs extending into Staffordshire and Worcestershire; 112 miles N. W. of London, and 97 S. E. of Liverpool. It is the principal seat of the hardware manufacture in Great Britain. Birmingham is known to have aristed in mingham is known to have existed in the reign of Alfred, in 872, and is mentioned in the Domesday Book (1086) by the name of Bermengeham. Another old name of the town is Bromwycham, a form still preserved very nearly in the popular local pronunciation, Brummagem. Pop. (1801) 73,670; (1891) 478,113; (1901) 523,-179; (1921) 919,438.

Birney, David Bell, an American military officer, born in Huntsville, Ala., May 29, 1825; son of James Gillespie Birney; studied law in Cincinnati, and, in 1848, began practice in Philadelphia. At the outbreak of the Civil War he entered the Union army. He distinguished himself in the battles of Yorktown, Williams Productive Chancellars. Chancellars of the civil well-to-do the well-to-do th the battles of Yorktown, Williams-burg, Fredericksburg, Chancellors-ville and Gettysburg. He died in Philadelphia, Pa., Oct. 18, 1864.

American statesman and publicist, rule, about 105 boys are born to 100 born at Danville, Ky., Feb. 4, 1792, girls.

Though a Southern planter, he emancipated his slaves and became a prominent anti-slavery leader in the South, proprietor and editor of the anti-slavery journal, "The Philauthropist," etc. He was candidate of the Liberty Party for President in 1840 and 1844. He died at Perth Amboy, N. J., Nov. 25, 1857.

Birney, William, an American lawyer, born in Madison county, Ala., May 28, 1819; was educated in Paris; nay 28, 1819; was educated in Faris; took part in the Revolution of 1848; and was appointed, on public competition, Professor of English Literature in the College at Bourges, France. In 1861 he entered the United States army as a private, and was promoted to broat Maior-Gen-

in the iron and steel industry than any city S. of Pittsburg. Pop. (1890)
26,178; (1900) 38,415; (1920) 178, about 1524. He took a prominent part in the civil wars of Huguenot part in the civ and Catholic, and served at the bat-tles of Dreux, St. Denis and Moncon-tour. He negotiated the peace of St. Germain, and narrowly escaped at the massacre of St. Bartholomew. He was killed at the siege of Epernay, in 1592.

Biron, Charles de Gontault, Duc de, son of the preceding; born in 1562, was Admiral and Marshal of France, and is noted for the friend-ship which Henry IV. entertained for him, and for his treason toward that monarch. He early covered himself with glory at the battles of Arques and Ivry, and at the sieges of Paris and Rouen. The king loaded him with honors, saved his life at the fight of Fontaine Francaise, and made him ambassador to England. Biron entered into a conspiracy with Spain and Savoy against his sovereign; and the plot being revealed by Lafin, its instigator, he was beheaded in 1602.

having a lower rate than the average. lle and Gettysburg. He died in In the United States the rate among foreign residents is 38.29; natives, Birney, James Gillespie, an 26.35; general average, 26.68. As a Biru, the name of a warlike chief of South America, who flourished in the 16th century. In 1526, this name was given to the empire of the Incas, now known as Peru.

Biscay or Vizcaya, the most northerly of the Basque Provinces of Spain, is bounded N. by the Bay of Biscay, E. and S. by its sister provinces, Guipuzcoa and Alava, and W. by Santander. It has an area (very northern the S.) of 836 square mountainous in the S.) of 836 square miles, and pop. (1913) of 363,587. Chief town, Bilbao; pop. 93,536.

Biscay, Bay of, that portion of the Atlantic Ocean which sweeps in along the N. shores of the Spanish Peninsula in an almost straight line from Cape Ortegal to St. Jean de Luz, at the W. foot of the Pyrenes, and thence curves N. along the W. shores of France to the island of Ushant. Its extreme width is about 400 miles, and its length much about the same.

Biscuit, in general language, thin flour cake which has been baked in the oven until it is highly dried.

In pottery, articles molded and baked in an oven, preparatory to the glazing and burning. In the biscuit form, pottery is bibulous, but the glaze sinks into the pores and fuses in the kiln, forming a vitreous coating to the

Bishop (a word derived from the Greek episcopos, that is, overseer, through the Saxon biscop), in the early Christian Church, the name of every person to whom the care of a Christian congregation was intrusted. Every congregation even in country districts had at least one such overseer. The word was accordingly used in the early history of the Church in exactly the same sense as presbyter or elder.

In the United States a bishop is the highest dignitary in the Greek, Catholic and Protestant Episcopal Churches. These bishops generally claim to be successors of the apostles. In the Methodist Episcopal and Protestant Episcopal Churches the bishop is elected by the Conference or Convention representing the respective churches of the diocese. In the Ro-State of North Dakota, and countyman Catholic Church growth has been seat of Burleigh co.; on the Missouri sufficient in the opinion of the ruling river, and the Northern Pacific rail-

functionaries of that communion, to warrant the establishment of the greater hierarchy, and as a consequence the office and dignity of a bishop have become secondary—the highest places being occupied by a cardinal and numerous archbishops. A new bishop is appointed by the Pope from a list of three recommended by the clergy of a vacant diocese.

Bishop, Mrs. (ISABELLA L. BIRD). traveler and author, born in York-shire, England, 1832, died 1904.

Bishop, John Remsen, an American educator; born in New Bruns-wick, N. J., Sept. 17, 1860; was grad-uated at Harvard University in 1882; uated at Harvard University in 1882; taught Greek and English at St. Paul's School, Concord, N. H., in 1882-1883; was principal of the Princeton Preparatory School in 1884-1887; instructor of Greek and Latin at Hughes High School, Cincinnati, in 1888-1895; and became principal of the Walnut Hills High School Cincinnati, in 1895-1895; and became principal of the Walnut Hills High School Cincinnati, in 1895 School, Cincinnati, in 1895.

Bishop, Louis Faugeres, an American physician, born in New Brunswick, N. J., March 14, 1864; graduated at Rutgers College in 1885, and at the New York College of Physicians and Surgeons in 1889. He was resident physician of St. Luk.'s Hospital, New York, in 1889–1892, and secretary of the New York Academy of Medicine and Chairman of its Section of Medicine in 1900.

Bishop, Seth Scott, an American surgeon, born in Fond du Lac, Wis., Feb. 7, 1852; graduated at the Northwestern University, in 1876. He began practice in Chicago, and has been a professor in various medical colleges.

Bishops Suffragan, a class of bishops in England appointed by the crown to take the places of the early bishops in partibus, who were assistants to the active bishops of English sees, and who held their warrant at the pleasure of the bishops to whom they were assigned. They were dis-tinguished from suffragan bishops in the Church of England, as every regular bishop was a suffragan of his superior or metropolitan.

road; 194 miles W. of Fargo. It contains the State Capitol (which cost over \$500,000), the State Penitentiary, court-house, city hall, opera house, a State Hospital for the In-sane, St. Paul Seminary, and an im-mense river warehouse. The river is here spanned by a bridge that cost \$1,000,000. (1930) 11,090.

Bismarck, Herbert, Prince von, a German statesman, born in Berlin, Dec. 28, 1849; son of Otto Eduard Leopold, Prince von Bismarck-Schon-hausen. He ranked high as a diplo-

mat. He died Sept. 18, 1904.

Bismarck-Schonhausen, Eduard Leopold, Prince von, a German statesman, born at Schonhausen in Brandenburg, of an old family, of which various members gained a reputation both as soldiers and statesmen, April 1, 1815. He received his university education at Gottingen, Berlin, and Griefswald. Before 1847 he was little heard of, but about that time he began to attract attention in the new Prussian Parliament as an Ultra Royalist. He opposed the scheme of a German Empire as proposed by the Frankfort Parliament of 1849.

In the spring of 1862 King William, on the urgent advice of the Prince of Hohenzollern, transferred Bismarck as ambassador to Paris, in order to give him an insight into the politics of the Tuileries. During his short stay at Paris Bismarck visited short stay at Paris Bismarck visited London, and had interviews with the leading politicians of the time, in-cluding Lord Palmerston and Mr. Disraeli. In the autumn Bismarck was recalled, to take the portfolio of the Ministry of Foreign Affairs, and the presidency of the Cabinet. Not being able to pass the reorganization bill and the budget, he closed the Cham-bers (October, 1862), announcing to the Deputies that the king's government would be obliged to do without their sanction. When the "conflict era," as it was called, approached a crisis, the death of the King of Denmark reopened the Schleswig-Holstein question, and excited a fever of na-tional German feeling, which Bis-marck was adroit enough to work so as to aggrandize Prussia by the acquisition of the Elbe duchies.

the candidature of Prince Leopold of Hohenzollern for the throne of Spain gave Bismarck the opportunity of carrying into action the intensified feeling of unity among Germans. During the War of 1870-1871, Bismarck was the spokesman of Germany; he it was that in February, 1871, dictated the terms of peace to France. Having been made a Count in 1866, he was now created a prince and Chan-cellor of the German Empire. Following the Peace of Frankfort (May 10, 1871), the sole aim of Bismarck's policy, domestic and foreign, was to consolidate the young empire of his own creating.

In 1884 Bismarck inaugurated the career of Germany as a colonizing power, a new departure which brought him into sharp but temporary conflict with the England of Gladstone. For the rest, his foreign policy mainly aimed at isolating France and render-ing her incapable of forming anti-German alliances. On the other hand, he gradually combined the central powers of Europe into a peace league, aiming at counteracting the aggressiveness of Russia and France, separately or combined, on the Danube or the Rhine. The nucleus of this peace league was formed in 1879 by the Austro-German Treaty of Alliance (published in February, 1888), which Italy formally joined in 1886, and which entitles Bismarck to be called the "peacemaker" and the "peacekeeper" of Europe.

Bismarck's life was often threatened, and twice actually attempted once at Berlin in 1866, just before the Bohemian campaign, by Ferdinand Cohen (or Blind), a crazy youth who aimed at making himself the instrument of popular dissatisfaction with Bismarck, as the champion of absolutism and the fancied apostle of a fratricidal war; and again in 1874 at Kissingen, by a Catholic tinsmith named Kullman.

Emperor William died on March 9, 1888. The short reign of Emperor Frederick followed and then Emperor William II ascended the throne. On March 18, 1890, Bismarck fell. The cause of his fall has not yet been told. When Bismarck's 81st birthday was celebrated there was talk of reconciliation between the Prince and his sover-The action of France in regard to eign. The Emperor sent his photograph to Bismarck, the latter returned were almost wholly dependent on these

achievements."

officially given by Germany to New necessary to send out an expedition to Britain, New Ireland, New Hanover, collect a few specimens in view of this and several smaller adjoining islands contingency; and a report furnished in the South Pacific.

Bismuth, a triad metallic element, found associated with the ores of nickel, cobalt, copper and silver, in Saxony, Austria, Peru, Australia and Bo-

livia.

Bison, the name applied to two species of ox. One of these, the Eurospecies of ox. One of these, the European bison or aurochs (Bos bison or Bison Europeaus), is now nearly extinct, being found only in the forests of Lithuania and the Caucasus. The other, or American bison (Bison Americanus), is found only in North America, and is remarkable for the great hump or projection over its fore shoulders, and for the length and fine-

ness of its woolly hair.

The American bison, or buffalo, was once extensively diffused over what is now the territory of the United States, except that part lying on the E. of Hudson river and Lake Champlain, and narrow strips of coast on the Atlantic and Pacific. Southward its range extended to the delta of the Mississippi and into part of Mexico, while in the N. W. it reached even as far as the Great Slave Lake. The great prairies connected with the Mississippi system formed its favorite feeding-grounds, and here it used to be seen in berds whose numbers were well-nigh incredible.

All this is now a thing of the past, and the wholesale destruction of the bison is one of the most melan-choly stories in the history of zoology. So long as it was pursued only or mainly by the Indians there was little to fear for it, though many tribes

thanks, and little by little the way animals for food, clothing, tents, utenwas paved for a meeting between the sils, etc. Vast multitudes owing to two men, and eventually for the State this were slaughtered annually; but it visit which the Emperor paid to Bis- is to be deeply regretted that the marck at Friedrichsruhe, where the white hunters (especially after the statesman died July 30, 1898.

spread of railroads) were in the habit In September, 1903, letters have of destroying these interesting and been published showing the close and valuable beasts in the most wanton cordial relations between Bismarck and unnecessary manner. It was and Kaiser William the First, and common for such persons to shoot that the emperor attributed Germany's bisons, even when they had abundance triumph in 1870-1871 to what he of food, for the sake of the tongue or called Bismarck's "world-historical hump alone.

Bismarck Archipelago, the name seum of the United States thought it to the museum in 1886 shows what difficulty the expedition had in ful-filling its mission in consequence of the extermination of the bison having been already so nearly effected. They found herds almost extinct; even Montana, where they had been abundant.

had less than 100 animals left. About 300 were in National Parks.

A campaign for preservation resulted in rapid increase of bison in North America. A survey in 1924 reported 14,369 head, of which about two-thirds were in Canada. Over 100 were in Yellowstone National Park: over 1,000 near Great Slave Lake in northern Canada; a herd of about 7,500 at Wainwright, Alberta. "Cat-talo," a crossing of bison and do-

mestic cattle, proved unsatisfactory.

Bissagos Islands, a group of small volcanic islands, about 30 in all, off the W. coast of Africa, opposite the mouth of the Rio Grande.

Bissao, an island and Portuguese station closer to the African coast than the Bissagos and opposite the

Jeba's delta.

Bissell, Edwin Cone, an American Congregational clergyman and writer, born at Schohaire, N. Y., March 2, 1832. Having served in the Civil War (1862-1863), he became pastor in Massachusetts and California, missionary in Austria (1873-1878), Professor in the Hartford Congregational Theological Seminary (1881-1892), and the McCormick Presbyterian Theological Seminary. Presbyterian Chicago (1892-1894). He died in Chicago, April 9, 1894.

Bissell, Wilson Shannon, an American lawyer, born in New London, N. Y., Dec. 31, 1847; died Oct. 6, 1903; graduated at Yale University in 1869; and studied law in Buffalo with Cleveland & Folsom. In 1872 he formed a partnership with Lyman K. Bass, the firm of which Grover Cleveland became a member in 1873. When Mr. Cleveland was elected governor of New York the firm was disbanded. Subsequently it was reorganized, and, in 1900, consisted of Bissell, Carey & Cooke. He was a delegate to several State Conventions; in 1884 was a Democratic Presidential Elector; and in 1893–1895 was Postmaster-General. He died Oct. 6, 1903.

Bissen, Wilhelm, a Danish sculptor, born in Schleswig in 1798, and from 1823 to 1833 studied in Rome under Thorwaldsen, who, in his will, commissioned him to complete his unfinished works. He died March 10, 1868.

Bissextile Year, the early name for Leap Year. In the Julian calendar, the 24th of Feb. was counted twice (bis), and as it was the sixth (sextus) before the Kalends of March it was called bis-sextilis.

Bistimeau, a navigable lake in N. W. Louisiana; 25 miles long by 2 miles wide; discharges into the Red river.

Bitlis, a town of Turkish Armenia, in a vilayet of the same name, 62 miles W. of Van, over 5,000 feet above the sea-level. It has numerous mosques and convents of dancing dervishes, and manufactures of a noted bright-red dyed cotton cloth. In the great war it was occupied by the Russians on March 2, 1916, and evacuated by them on Aug. 8 following. Pop. est. at 40,000. See APPENDIX: World War.

Bitter, Arthur, pseudonym of SAMUEL HABERSTICH, a Swiss poet and story writer, born in Ried near Schlosswyl, Oct. 21, 1821. He died in Bern, Feb. 20, 1872.

Bitter Lakes, salt lakes on the line of the Suez canal.

Bittern. The bitterns are distinguished from the herons proper, besides other characteristics, by having the feathers of the neck loose and dishade.

vided, which makes it appear thicker than in reality it is.

BITTERN.

Bitter Nut, a tree of North America, of the walnut order, the swamp hickory, which produces small and somewhat egg-shaped fruits, with a thin, fleshy rind; the kernel is bitter and uneatable.

Bitter Root, a plant of Canada and part of the United States, order mesembryaceæ, so called from its root being bitter though edible, and indeed esteemed as an article of food by whites as well as Indians.

Bitter Root Mountains, a range of the Rocky Mountains, in Montana, deriving its name from a plant with rose colored blossoms.

Bitter Root River, a tributary of the Columbia in Montana, flowing N. into Clark's river in Missoula county; length about 110 miles.

Bitter Root Valley, on the E. of the Bitter Root Range, in Montana, is 90 miles long and 7 miles wide, enwalled by lofty mountains, and abounding in farms and cornfields.

Bitter Sweet, the woody night-shade.

Bitumen, a mineral substance, remarkable tor its inflammability and its strong, peculiar odor; generally, however, supposed to be of vegetable origin.

Bituminous Coal, coal which burns with a yellow, smoky flame, and on distillation gives out hydrocarbon

Bituminous Limestone, limestone impregnated with bitumen.

Bitzius, Albert (better known under the nom de plume of JEREMIAS GOTTHELF), a Swiss author, born in Murton, Canton of Freiburg, Oct. 4, 1797. As a pastor in retired districts, he saw the hard conditions of the poor, and in 1837 wrote "The Peasant's Mirror," a vividly realistic presentation of peasant life. He died at Lutzelfluh, Bern, Oct. 22, 1854.

Bivalves, those mollusks whose coverings consist of two concave shelly plates or valves united by a hinge.

SHELL OF A BIVALVE.

A. The line across marks the thickness. B, a, anterior extremity; b, posterior; c, d, muscular impressions; e, f, palleal impressions; g, lower edge of the left valve.

Bivouac, an encampment of soldiers in the open air without tents, each remaining dressed and with his weapons at hand.

Bizerta, a fortified seaport, Algeria, the most northern town of Africa; at the extremity of a bay formed by Capes Ras-el-Zebib and El-Arid. The town is built on the shore of a lake which communicates with the sea by a canal; and in the time of Bar-

barossa it was a city of great strength and magnificence. The lake is the chief source of trade, as it abounds in many valuable kinds of fish. Beside the fishery there are valuable coral, grape, olive, and pottery industries. The port is surrounded by walls and defended by two castles. Bizerta steadily declined in commercial and political importance till 1892, when the French Government began converting it into a magnificent naval port. Three years were occupied in this work, which included the opening and improvement of the lake, which is now large enough to accommodate at one time all the navies of the world.

Bizet, Georges, (ALEXANDER CE-SAR LEOPOLD), the composer of the opera "Carmen." He was born in France 1837; died 1875.

Bjornson, Bjornstjerne, a Norwegian novelist, poet, and dramatist, born at Kvikne, Norway, Dec. 8, 1832. He published his first story, "Synnove Solbakken," in 1857, and that, with "Arne" (1858) and "A Lively Fellow" (1860), established his reputation as a novelist. He published a volume of "Poems and Songs" in 1870. He died April 26, 1910.

Black, the negation of all color, the opposite of white.

Black, Adam, a Scotch publisher, born in Edinburgh, Feb. 20, 1784. In 1808 he began business as a bookseller, and later with his nephew, Charles B. Black, established a publishing house in Edinburgh. Their most famous publications were "Encyclopædia Britannica," and the "Waverly Novels." Adam Black was twice Lord Provost of Edinburgh and in 1856–1865 represented that city in Parliament. He declined the honor of knighthood, and a statue was erected in Edinburgh in recognition of his public services, in 1877. He died Jan. 24, 1874.

Black, Frank Swett, an American lawyer, born in Limington, Me., March 8, 1853; graduated at Dartmouth College in 1875; was editor of the "Journal" in Johnstown, N. Y. He studied law at Troy in the office of Robertson & Foster, and was admitted to the bar in 1879. He won much popularity by his activity in prosecuting the men who murdered

Robert Ross in the election riots in Troy in 1892. In 1895-1897, he was a member of Congress, and in 1897-1899 Governor of New York. He died

March 22, 1913.

Black, Jeremiah Sullivan, an American lawyer, born in Glades, Pa., Jan. 10, 1810; studied law, and was admitted to the bar in 1831. In 1857 he was appointed Attorney-General of the United States by President Buchanan, and in 1800–1861 was United States Secretary of State. On the accession of President Lincoln he retired from public life. He died in York, Pa., Aug. 19, 1883.

Black, John Charles, an Amer-

Black, John Charles, an American lawyer, soldier, and statesman, born in Lexington, Miss., Jan. 27, 1839; graduated at Wabash College, Crawfordsville; entered the Union army in 1861 as Colonel of the 37th Illinois Volunteers; was severely wounded in the service; and was brevetted Brigadier-General. After the war he was elected Congressmanat-large from Illinois; was appointed Commissioner of Pensions, United States District Attorney for the Northern District of Illinois, and U. S. Civil Service Commissioner (President 1904–13). He died Aug. 17, 1915.

Black, William, a Scottish novelist, born in Glasgow in November, 1841. He received his education at private schools. In 1874 he abandoned the career of journalism, which he had successfully pursued, visited the United States in 1876, and, returning to London, devoted himself anew to literature. In addition to an interesting story, his novels contain fine descriptions of scenery. They are very popular. He died in Brighton, England, Dec. 10, 1898.

Black Art, exorcism, the alleged ability to expel evil spirits from haunted houses or from persons bewitched; necromancy, or anything similar.

Black Assize, in English history, an assize held at Oxford in 1557, when the High Sheriff and 300 other persons died of infectious disease caught from the prisoners.

Black Belt, an agricultural region of Alabama; 70 miles wide, extending entirely across the State, between 33° and 31° 40′; so called from organized a corps of physicians and

the fact that the negroes greatly predominate in numbers.

Blackburn

Blackberry, a plant common in the northern portions of the United States and in most parts of Europe, and also in Northern Central Asia.

Black Bird, a well known bird. There are two American species, red winged blackbird, and the crow blackbird.

Blackburn, a town and parliamentary borough of England, 21 miles N. N. W. from Manchester. It is pleasantly situated in a sheltered valley and has rapidly improved since 1850, Blackburn is one of the chief seats of the cotton manufacture, there being upward of 140 mills as well as works for making cotton machinery and steam engines. The cottons made in the town and vicinity have an annual value of about £5,000,000. Pop. (1921) 126,630.

Blackburn, Joseph Clay Styles, an American lawyer, born in Woodford county, Ky., Oct. 1, 1838; was graduated at Center College, Danville, Ky., in 1857. He was admitted to the bar in 1859, and practiced in Chicago. During the Civil War he served in the Confederate army, and after the war resumed practice in Kentucky. In 1871 he was elected to the

Kentucky Legislature, and in 1874 to Congress; and was a United States Senator in 1885–1897. During the presidential campaign of 1896 he was a leader in the free coinage silver

movement. Died, 1918.

Blackburn, Luke Pryor, an American physician, born in Fayette county, Ky., June 16, 1816; was graduated at Transylvania University, Lexington, Ky., in 1834, and began practicing in that city. When cholera broke out in the town of Versailles he went there and gave his services free during the epidemic. In 1846 he went to Natchez, Miss., and in 1848, when yellow fever appeared in New Orleans, as health officer of Natchez, he originated the first quarantine against. New Orleans that had ever been known in the Mississippi valley. During the Civil War he was a surgeon on the staff of General Price. In 1875, when yellow fever broke out in Memphis, he hastened to the city and organized a corps of physicians and

nurses, and in 1878 gave his services to the yellow fever sufferers at Hickman, Ky. He was elected Governor of Kentucky in 1879. He founded the Blackburn Sanitarium for Nervous and Mental Diseases in 1884. He died in Frankfort, Ky., Sept. 14, 1887.

Blackburn, William Maxwell, an American Presbyterian clergyman and educator, born at Carlisle, Ind., Dec. 30, 1828. He became President of the University of North Dakota in 1884 and of Pierre University, South Dakota, in 1885, and President-Emeritus of the last (now Huron College) in 1898. He died in 1900.

Black Cap, a European passerine bird of the warbler family. It ranks next to the nightingale for sweetness of song. The American black cap is a species of tit-mouse, so called from

the coloring of the head.

Black Death, The, one of the most memorable of the epidemics of the Middle Ages, was a great pestilence in the 14th century; which devastated Asia, Europe and Africa.

The whole period of time during which the black death raged with destructive violence in Europe was from 1347 to 1350; from this latter date to 1383 there were various pestilences, bad enough, indeed, but not as violent as the black death.

Blackfeet Indians, a tribe of American Indians, partly inhabiting the United States, partly Canada, from the Yellowstone to Hudson Bay.

Blackfish, a fish caught on the coast of the United States, especially in the vicinity of Long Island.

Black Flags, an organization of Chinese rebels who established themselves in the Red River valley in Tonquin, after the suppression of the Taiping Rebellion in Southern China (1850–1854). From their warlike character and desperate deeds they were called Black Flags as distinguished from the peaceable Yellow Flags. They were responsible for the massacre in 1884 of missionaries and native Christians.

Black Forest, a great forest, situated in Baden and Wurtemberg, near the source of the Danube.

Black Friars, friars of the Dominican Order: so called from their costume.

Black Friday, the Friday, Sept. 24, 1869, when the attempt of Jay Gould and James Fisk, Jr., to create a corner in the gold market by buying all the gold in the banks of New York city, amounting to \$15,000,000, culminated. For several days the value minated. For several days the value of gold had risen steadily, and the speculators aimed to carry it from 144 to 200. Friday the whole city was in a ferment, the banks were rapidly selling, gold was at 162½, and still rising. Men became insane, and everywhere the wildest excitement raged, for it seemed probable that the business houses must be closed, from ignorance of the prices to be charged for their goods. But in the midst of the panic it was reported that Secretary Boutwell of the United States Treasury had thrown \$4,000,000 on the market, and at once gold fell, the excitement ceased, leaving Gould and Fisk the winners of \$11,000,000. The day noticed above is what is generally referred to as Black Friday in the United States, but the term was first used in England, being applied in the first instance to the Friday on which the news reached London, Dec. which the news reached London, Dec. 6, 1745, that the young Pretender, Charles Edward, had arrived at Derby, creating a terrible panic; and finally to May 11, 1866, when the failure of Overend, Gurney & Co., London, the day before, was followed by a widespread financial wine. by a widespread financial ruin.

Black Hand, common name in the United States for an offshoot of two long-established societies of an intricate and powerful order of Italian criminals, known in their respective strongholds of Naples and Sicily as the "Camorra" and "Mafia." The habit of the members of signing blackmail and threatening letters with the words "black-hand," or a rude representation of one, gave these desperadoes in the United States their distinctive name.

Black Hawk, a famous chief of the Sac and Fox Indians, born in 1767. He joined the British in 1812, and fought against the United States in 1831-1832. He died in 1838.

Blackheath, a village and heath, in Kent, England, now absorbed in London (S. E.)

Black Hills, a mountainous region in the S. W. of South Dakota,

extending into the E. part of Wyoming; long. 103° to 105°. It was purchased from the Indians in 1876, for whom it had been one of the finest hunting grounds in the West. In hunting grounds in the West. In 1877-1878 thousands of miners went there, and in 1880 there had already sprung into existence three towns, Deadwood, Central City, and Lead-ville. Around these lay also groups of smaller towns and villages. From 1880 the gold mines yielded about \$4,-000,000 annually, and the silver mines about \$3,000,000 annually.

Black Hole of Calcutta, a small chamber, 20 feet square, in the old fort of Calcutta, in which, after their capture by Surajah Dowlah, the whole garrison of 146 men were confined during the night of June 21, 1756. Only 23 survived. The spot is now marked by a monument.

Blackie, John Stuart, a Scottish author, born in Glasgow in July, 1809; died in Edinburgh, March 2,

Black Lead, Graphite, or Plumbago, a mineral consisting chiefly of carbon, but containing also more or less of alumina, silica, lime, iron, etc., to the extent of 1 to 47 per cent., apparently mixed rather than chemically combined. Black lead is the popular name, and that by which it is generally known in the arts, though no lead enters into the composition of the mineral; graphite is that generally preferred by mineralogists.

Black List, a list of bankrupts or other parties whose names are officially known as failing to meet pecuniary The term is also apengagements. plied to a list of employes who have been discharged by a firm or corporation and against whom some objection is made and reported to other firms or corporations to prevent them obtaining employment.

chosen president-emeritus. He died in Wheaton, Ill., May 14, 1892.

Blanco, Antonio Guzman, a Venezuelan military officer, born in Caracas, Feb. 29, 1828. He became prominent in the Federalist revolts, 1859–1863, and when his party triumphed, was made first Vice-President in 1862, under Felora when we have do in 1863 under Falcon, who was de-posed in the Revolution of 1868. Blanco led a successful counter revo-lution in 1870, became President, and retained the office till 1882. In 1893 he was appointed Minister to France, where he resided till his death, July 29, 1899.

Blanco, Jose Felix, a Venezue-lan historian, born in Mariana de Caracas, Sept. 24, 1782. At different times he acted in the capacity of priest, soldier, and statesman. He was one of the leaders in the Revoluton at Caracas, April 19, 1810, and was the first editor of the great historical work, "Documentos para la historia de la vida publica del Libertodo" et la la dieda publica del Libertodo" et la dieda publica del Libertodo". tador," etc. He died in Caracas, Jan. 8, 1872.

Blanco, Pedro, a Bolivian statesman, born in Cochabamba, Oct. 19, He joined the Spanish army in 1812, but soon deserted to the patriots, and served with them till the end of the Revolution. In 1828 he became a general, and in the same year, when Sucre fell, was made President of Bolivia, but was superseded in the Revolution of Dec. 31, 1828. He was shot in Sucre, in January, 1829.

Blanco, Ramon y Arenas, Marquis de Pena Plata, Captain-General of the Spanish army in Cuba during the Spanish-American War; was born at San Sebastian, Spain, in 1833, and began his military career at the age of 22, entering the army in 1855 as a Lieutenant; was promoted to a captain in 1858, and won the rank of Lieutenant-Colonel in the war with San Domingo. When the Spaniards were driven from the island When the Span-Blanco went to the Philippines as governor of Mindanao. When he returned to Spain he was assigned to the Army of the North, and in the 1846 became President of Knox College at Galesburg, Ill. He was President of Wheaton College, Ill., in Plata, for which achievement he was 1880-1882; and, on resigning, was created a Marquis of that name. He succeeded General Weyler in command of the army in Cuba, where his career terminated with the U.S. occupation. He died April 4, 1906.

Blanco Encalada, Manuel, a Spanish-American military officer, born in Buenos Ayres, Sept. 5, 1790; distinguished himself in the Chilian War of Independence. He was chosen President of Chile in July, 1826, but soon resigned, and was made General of the army. He unsuccessfully invaded Peru in 1837, and was not allowed to retire till he had signed a treaty of peace. Chile annulled this treaty, and he was court-martialed, but freed. In 1847 he was Intendant of Valparaiso, and in 1853-1858 Minister to France. He died in Santiago, Chile, Sept. 5, 1875.

Bland, Richard Parks, an American legislator, born in Kentucky, Aug. 19, 1835; received an academical education, and, between 1855 and 1865, practiced law in Missouri, California, and Nevada, and was engaged for some time in mining. In 1865 he settled in Rolla, Mo., and practiced there till 1865, when he removed to Lebanon in the same State. He was a member of Congress in 1873-1895 and from 1897 till his death. In 1896 he was a conspicuous candidate for the Presidential nomination in the Democratic National Convention, but on the fourth ballot his name was withdrawn, and the vote of his State was cast for William J. Bryan. Mr. Bland was best known as the leader in the Lower House of Congress of the Free-Silver movement, and the author of the Bland Silver Bill. At the time of his death he was a member of the Committees on Coinage, Weights and Measures, and Expenditures on Public Buildings. He died in Lebanon, Mo., June 15, 1899.

Bland, Theodoric, an American military officer, born in Prince George county, Va., in 1742; studied medicine in the University of Edinburgh, and for a time practiced in England. He returned home in 1764, and was active in his profession until the outbreak of the Revolutionary War, when he

and later became a Colonel. He distinguished himself at the battle of Brandywine, and was placed in com-mand of the prisoners taken at Saratoga, who were marched to Charlotteville, Va. In 1780-1783 he was a member of the Continental Congress, and was a Representative from Virginia to the 1st Federal Congress in 1789. He died in New York city, June 1, 1790.

Bland Silver Bill, one of the most notable measures of American Congressional history. The original bill, as introduced by Representative Bland and passed by the House late in 1877, provided simply for the free and unlimited coinage of silver by all the mints of the United States. programme represented the full policy of the Silver men. The silver dollar had been demonetized by the act of 1873, and its coinage had been wholly abandoned. The Bimetallists desired to restore it to perfect equality with gold as a standard of value, and the original Bland bill, permitting owners of silver bullion to have their commodity coined into dollars by the mints, was intended as the means to accomplish that object. But the Senate amended the measure materially. The free coinage clause was stricken out, and, as a concession to the Silver men, it was directed that the Secretary of the Treasury should purchase monthly not less than \$2,000,000 and not more than \$4,000,000 worth of silver bullion, at the market price of the metal, and coin it into standard silver dollars, which should be unlimited legal tender for all debts. The amended bill was reported by Senator Allison, Chairman of the Finance Committee, and hence received the name of the Bland-Allison Act. was vetoed by President Hayes, but passed over his veto, Feb. 28, 1878, by but 196 to 73 in the House, and 46 to 19 in the Senate. The silver purchase clause in this act was repealed by the Sherman Act of 1890.

Blank Verse, verse which is void of rhyme.

Blarney, a village in Ireland, 4 miles N. W. of the city of Cork, with Blarney Castle in its vicinity. A stone Captain of the First Troop of Virginia cavalry. In 1777 he joined the top of the castle, is said to confer on main army as a Lieutenant-Colonel, those who kiss it the peculiar kind of persuasive eloquence alleged to be characteristic of the natives of Ire-

Blashfield, Edwin Howland, an American artist, born in New York city, Dec. 16, 1848; studied in Paris under Leon Bonnat; and began ex-hibiting in the Paris Salon in 1874. He returned to the United States in 1881, and has since distinguished himself by the execution of large decorative works.

Blasphemy, slander or even well merited blame, applied to a person or

in condemnation of a thing.

The word is particularly applied to any profane language toward God; blasphemy against the Holy Ghost means the sin of attributing to Satanic agency the miracles which were obviously from God.

Blast Furnace, a structure built of refractory material in which metallic ores are smelted in contact with fuel and flux, the combustion of the fuel being accelerated by air under

Blasting, the operation of breaking up masses of stone or rock in situ by means of gunpowder or other explosive. In ordinary operations, holes are bored into the rock of from one to six inches in diameter, by means of a steel pointed drill, by striking it with hammers or allowing it to fall from a height. After the hole is bored to the requisite depth it is cleaned out, the explosive is introduced, the hole is tamped or filled up with broken stone, clay or sand, and the charge exploded by means of a fuse or by electricity.

Blavatsky, Helene Petrovna, a noted theosophist; born in Yekaterinoslay, Russia, in 1831; founded the Theosophical Society in New York in 1875. She died in London, May 8, 1891.

Blazonry, the art of describing a coat of arms in such a way that an accurate drawing may be made from the verbal statements given.

Bleaching, the art of whitening linen, wool, cotton, silk, wax, also the materials of which paper is made, and other things.

Bledsoe, Albert Taylor, an

in Frankfort, Ky., Nov. 9, 1809. He was Assistant Secretary of War of the Southern Confederacy, and both an Episcopal and a Methodist minister. He died in Alexandria, Va., Dec. 1, 1877.

Bleeding, or Hemorrhage, one of the most serious accidents which can happen to an animal, and constitutes the most anxious complication

in surgical operations.

Blenheim, a village situated in the circle of the Upper Danube, in Bavaria on the Danube. Here was fought, Aug. 13, 1704, the famous battle of Blenheim (or, as it is more commonly called on the European Continent, the battle of Hochstadt, from another village of this name in the vicinity), in which Marlborough and Prince Eugene, commanding the al-lied forces of England and the German empire, gained a brilliant victory over the French and Bavarians.

Blennerhasset, Harman, an Englishman of Irish descent, noted for his connection with Aaron Burr's conspiracy, born in Hampshire, Oct. 8, 1764 or 1765; was educated at Trinity College, Dublin; studied law; and came to the United States in 1797. In the following year he built a beautiful residence on a little island in the Ohio river below Parkersburg, where Aaron Burr, after his fortunes were broken and he did not feel safe in New York, was received as a guest. Burr proposed his scheme for taking Mexico, where, in case of success, Burr was to be Emperor and Blennerhasset a duke and ambassador to England. Large sums were expended to fit out the expedition and when Burr was arrested, and Blennerhasset as a suspected person with him, creditors seized the island and home, and Blennerhasset found himself bankrupt. After this all projects failed with him. In his last years he was supported by the charity of a relative. He died on the Island of Guernsey, Feb. 1, 1831. His wife was a daughter of Governor Agnew, of the Isle of Man, and the author of many poems, including "The Desert-ed Isle," "The Widow and the Rock," ed Isle, The Wildow and the she etc. After her husband's death she petitioned Congress for a reparation of her losses, but died before any ac-American clergyman and writer; born tion was taken. Their son, Joseph

Lewis Blennerhasset, was a lawyer in Missouri.

Blesbok, an antelope of South Africa with a white marked face, a general purplish chocolate color, and a saddle of a bluish color; found in great numbers in the late Boer republies in South Africa and much hunted.

Blessington, Margaret, Countess of, was born near Clonmel, Ireland, 1789, died at Paris 1849. At the age of fifteen, she was married to a Captain Farmer, who died in 1817; and a few months after his death his widow married Charles John Gardiner, earl of Blessington. After the earl's death in 1829, Lady Blessington took up her abode in Gore House, Kensington. Her residence pecame the fashionable resort for all the celebrities of the time; and that notwithstanding a doubtful connection which she formed with Count D'Orsay, with whom she lived till her death. No name is more frequently mentioned by writers of the time.

Bligh, William, the commander of the English ship "Bounty" when the crew mutinied in the South Seas and carried her off, was born at Plymouth in 1753. The "Bounty" had been fitted out for the purpose of pro-curing plants of the bread fruit tree, and introducing these into the West Indies. Bligh left Tahiti in 1789, and was proceeding on his voyage for Jamaica when he was seized, and, with 18 men supposed to be well affected to him, forced into the launch, sparingly provisioned, and cast adrift; but Bligh, with 12 of his companions, arrived in England in 1790, while the mutineers settled on Pitcairn Island. where their descendants still exist. Bligh became Governor of New South Wales in 1806, but his harsh and despotic conduct caused him to be deposed and sent back to England. He afterward rose to the rank of Admiral. and died in London in 1817.

Blight, a diseased state of cultivated plants, especially cereals and grasses. The term has been very vaguely and variously used, having, in fact, been applied by agriculturists to almost every disease of plants in turn, however caused, especially when the

such diseases as are caused by parasite fungi or bacteria, as apple-blight, cherry-blight, potato-blight, etc.

Blind Fish, the name of several species of fish inhabiting the Amercan cave streams. They are all small. the largest not exceeding five inches.

Bliss, Cornelius Newton, an American merchant, born in Fall River, Mass., Jan. 26, 1833; was ed-ucated in New Orleans; entered his stepfather's counting room there; engaged in the commission business in Boston, and became head of the dry goods commission house of Bliss, Fabyan & Co., New York city, in 1881. He was a member of the Pan-American Conference; Chairman of the New York Republican State Committee in 1877-1878; and Treasurer of the National Republican Commit-tee in 1892 and 1896; declined to be a candidate for Governor of New York in 1885 and 1891; and was Secretary of the Interior Department in President McKinley's cabinet in 1897-1898. He died Oct. 9, 1911.

Bliss, Daniel, an American missionary, born in Georgia, Vt., Aug. 17, 1823; was graduated at Amherst College in 1842, and at the Andover Theological Seminary in 1855; was ordained a Congregational minister, Oct. 17, 1855; in missionary work in Syria in 1855-62; became President of the Protestant College in Beyrout, 1866. He died July 18, 1916.

Bliss, Edwin Elisha, an American missionary, born in Putney, Vt., April 12, 1817; graduated at Amherst College in 1837, and at Andover Theological Seminary in 1842; was or-dained as a missionary in 1843, and joined the American Mission in Turkey. He died in Constantinople, Dec. 29, 1892.

Bliss, Frederick Jones, an American explorer, born in Mt. Lebanon, Syria, Jan. 23, 1859; son of Daniel Bliss; was graduated at Amherst Col-lege in 1880, and at the Union Theological Seminary in New York in 1887; was principal of the prepara-tory department of the Syrian Prot-estant College of Beyrout for three years; was appointed Explorer to the Palestine Exploration Fund in 1890, and is best known for his excavations plant dies before reaching maturity. It and is best known for his excavations is now applied scientifically only to and finds in Jerusalem in 1891-1897. Bliss, Porter Cornelius, an American diplomatist, born in Erie county, N. Y., Dec. 28, 1838; became private secretary to James Watson Webb, United States Minister to Brazil; explored the Gran Chaco for the Argentine Government; compiled the various Indian dialects and investi-gated the antiquities of that region; and, in 1866, became private secretary to Charles A. Washburn, United States Minister to Paraguay. In 1870–1874 he was Secretary of the Legation in Mexico. Died Feb. 2, 1885.

Bliss, Tasker Howard, an American military officer, born in Lewisburg, Pa., Dec. 31, 1853; was graduated at the United States Military many kinds of blocks, as a nulley block, a Academy in 1875 and at the Artillery School in 1884; Professor of Military Science at the Naval War College in 1885-8; served through the Porto Rican campaign in 1898; chief of Cu-ban Customs Service in 1898-1902; special envoy to negotiate a reciprocity treaty with Cuba in 1902; in service in the Philippines in 1905-9; commanded the provisional brigade on the manded the provisional brigade on the Mexican border in 1911; brigadiergeneral, July 21, 1902, major-general, Nov. 20, 1915; became assistant to the Chief of Staff, U. S. A., in 1915. General, 1917, and member of Supreme War Council; Gov. U. S. Soldiers' Home, 1920–1927. Died Nov. 9, 1930.

Bliss, William Dwight Porter, an American clergymen born in Con-

an American clergyman, born in Constantinople, Turkey, 1856; Congregational clergyman; became an Episco-pal priest in 1887; organized the first Christian Socialist Society in the United States in 1889. Died Oct. 8,

Blizzard, a modern American word whose origin is in doubt. As applied to a severe snow storm the word came into general use in the American newspapers during the bitterly cold winter of 1880-1881, although some papers claim its use as early as the '70's. It is employed in the Western States to describe a peculiarly fierce and cold wind, accompanied by a very fine, blinding snow which suffocates as well as freezes men and animals exposed to it. These storms come up very suddenly and overtake the traveler without premonition. The sky becomes darkened, and the snow is seriously interferes with the ordinary

with a deafening roar. The blizzard which will long be remembered in the Eastern States began March 11, 1888, and raged until the 14th, New York and Philadelphia being the cities most affected. The wind at one time blew at the rate of 46 miles an hour. The streets and roads were blocked, rail-road trains snowed up for days, telegraphic communication cut off, and many lives were lost.

Block, a pulley or a system of pulleys rotating on a pintle mounted in its frame as a pulley block, a fish block, a fish block, a fly block, a heart block, a hook block, etc. A block and tackle is the block and the rope rove through it, for hoisting or obtaining a purchase.

Blockade, the act of surrounding a city with a hostile army, or, if it be on the sea coast, of placing a hostile army around its landward side, and ships of war in front of its sea defenses, so as, if possible, to pre-vent supplies of food

BLOCK AND TACKLE.

and ammunition from entering it by and ammunition from entering to by land or water. The object of such an investment is to compel a place too strong or too well defended to be at once captured by assault, to surrender on account of famine. The investment of a place by sea is to prevent any ships from entering or leaving its harbor. The practice seems to have been introduced by the Dutch about 1584.

To break the blockade is to forcibly enter a blockaded port, if not even to compel the naval force investing it to withdraw. To raise a blockade is to desist from blockading a place or to compel the investing force to do so. To run a blockade is to surreptitiously driven by a terrible wind which comes commercial right of trading with every place, international law carefully limits its operation, by certain provisions regarding the rights of nations not interested in the war.

Block Books, before, and for a short time after, the invention of printing, books printed from wooden blocks each the size of a page and having the matter to be reproduced, whether text or picture, cut in relief on the surface.

Block House, a fortified edifice of one or more stories, constructed chiefly of blocks of hewn timber. Block houses are supplied with loopholes for muskerry and sometimes with em-brasures for cannon, and when of more than one story the upper ones are made to overhang those below.

Block Island, an island in the Atlantic off the coast of Rhode Island, to which it belongs; named from Adrian Block, Dutch navigator who discovered it in 1616. Pop. (1930) 1,006.

Block Printing, the method of printing from wooden blocks (producing block books), as is still done in calico printing and making wall paper.

Block System, in railroad par-lance, the division of a railroad into a certain number of telegraphic districts, the distance between which is determined by the amount of traffic, each block station having signaling instruments by which the signal man can communicate with the operator on each side of him. When a train enters any block a semaphore signal is lowered, and no train is allowed to follow until the one in front has reached the end of the block.

Blodget, Lorin, an American physicist, born near Jamestown, N. Y., May 25, 1823; was educated at Hobart College: appointed Assistant Professor at the Smithsonian Institution, Washington, D. C., in charge of processors of the smith of the s researches on climatology, in 1851. He is credited with having laid the foundation of American climatology. He died in Philadelphia, Pa., March 24, 1901.

Blodgett, Samuel, an American inventor; born in Woburn, Mass., April 1, 1724. He took part in the French and Indian War; was a mem-

mon Pleas, in Hillsboro county, N. H. He was the inventor of an apparatus by which he recovered a valuable cargo from a sunken ship near Plymouth, Mass., in 1783. In 1793 he began the construction of the canal around Amoskeag Falls in the Merrimac which now bears his name, but did not live to complete the work. died in Haverhill, Mass., Sept. 1, 1807.

Blodgett, Henry Williams, an American jurist, born in Amherst, Mass., July 21, 1821; was educated at Amherst Academy; studied surveying and engineering; was admitted to the bar in 1844; and settled in Waukegan, Ill., to practice, in the following year. He served in the Lower House of the Legislature in 1852–1854, and in the State Senate in 1859–1865; and was United States District Judge for the Northern District of Illinois from 1869 till 1893, when he retired. He was appointed one of the counsel on the part of the United States before the Arbitration Tribunal on the Bering Sea fur seal controversy between the United States and Great Britain, in 1892. Died, Feb. 9, 1905.

Bloemfontein, city and capital of the Orange Free State (this name changed by the British for a time to Orange River Colony), South Af-rica; on the Modder river, 200 miles W. by N. of Durban, the base of British operations in the war against the Boers. It occupies an elevated site; is connected with Natal and Cape Colony by telegraph; and is the seat of an Anglican bishopric, and a col-lege. In the war between Great Britain and the South African and Orange Free State Republics in 1899–1900 it was the seat of important military operations. In June, 1899, a conference was held here between President Kruger of the South African Republic and Sir Alfred Milner, the British Commissioner of Cape Colony, with a view of averting war. After the appointment of Lord Roberts to the supreme command of the British forces operating against the Boers, he led an expedition against the city and forced its surrender on March 13, 1900, President Steyn escaping capture. Soon afterward the part of the repubber of the expedition against Louis-burg, in 1745; and subsequently be-came a judge of the Court of Com-tration. Pop. (1923) 38,865.

CIRCULATION OF THE BLOOD

Blois, the capital of the French Department of Loir-et-Cher, 99 miles S. S. W. of Paris, on the Loire.

Blondel, a French minstrel and poet of the 12th century, a confidential servant and instructor in music of Richard Cœur de Lion. While his master was the prisoner of the Duke of Austria, Blondel, according to the story, went through Palestine and all parts of Germany in search of him. He sang the king's own favorite lays before each keep and fortress till the song was at length taken up and answered from the windows of the castle of Loewenstein, where Richard was imprisoned.

Blondia, Charles, a French rope dancer, born at St. Omer, Pas-de-Calais, in 1824, was trained at Lyons, where he made such rapid progress that he was designated "The Little Wonder." After making a several years' tour of the United States, on June 30, 1859, before a crowd of 25,000 persons, he crossed the Falls of Niagara on a tight-rope in five minutes; on July 4, he crossed blindfold, trundling a wheelbarrow; on Aug. 19, he carried a man on his back; on Sept. 14, 1860, he crossed on stilts in the presence of the Prince of Wales. His last appearance was in 1888. He died Feb. 22. 1897.

Blood, the fluid which circulates through the arteries and veins of the human body and that of other animals, which is essential to the preservation of life and nutrition of the tissues. In insects and in others of the lower animals there is an analogous fluid which may be colorless, red, bluish, greenish, or milky. The venous blood of mammals is a dark red, but in passing through the lungs it becomes oxidized and acquires a bright scarlet color, so that the blood in the arteries is of a brighter hue than that in the veins. The central organ of the blood circulation is the heart. The specific gravity of blood varies from 1.045 to 1.075, and its normal temperature is 99° Fahr. 1000 parts contain 783.37 of water. 2.83 fibrin, 67.25 albumen, 126.31 blood corpuscles, 5.16 fatty matters and salts. The blood corpuscles or globules are characteristic. These are minute, red and white bodies floating in the fluid of the blood. The red

ones give color, and are flattish discs, oval in birds and reptiles, and round in man and most mammals. In man they average 1-3300th inch in diameter, and in the Proteus, which has them larger than any other vertebrate, 1-400th inch in length and 1-727th in breadth. The white or colorless corpuscles are the same as the lymph or chyle corpuscles, and are spherical or lenticular, nucleated, and granulated, and rather larger than the red globules.

Blood, Council of, the name popularly applied to the Council of Troubles, established by the Duke of Alva, in the Netherlands, in 1567. Although it had no charter or authority from any source, it was omnipotent and superseded all other authorities. In the first three months alone its victims numbered 1,800, and soon there was hardly a Protestant house in the Netherlands that had not furnished a victim.

Blood-hound, a variety of hound or dog, so called from the ability which it possesses to trace a wounded animal by the smell of any drops of blood which may have fallen from it.

Blood Indians, a tribe of North American Indians of the Siksika Confederacy, dwelling in the Northwest Territories of Canada; known also as Kino Indians.

Blood Poisoning, a name loosely used of pyæmia and allied diseases.

Blood-vessels, the tubes or vessels in which the blood circulates. They are divided into two classes—arteries and veins—which have two points of union or connection—the first in the heart, from which they both originate, and the other in the minute vessels or network in which they terminate.

Bloody Assizes, the name given by the people to those courts which were held in England by the infamous Judge Jeffreys, in 1685, after the suppression of the Duke of Monmouth's rebellion. Upward of 300 persons were executed after short trials; very many were whipped, imprisoned and fined; and nearly 1,000 were sent as slaves to the American plantations, some of whom established families.

Bloody Falls, the lowest cataract of the Copper Mine river in the North-

west Territories of Canada; so named because of a massacre here of Eskimos by Chippewa Indians, in 1770.

Bloody Mary, an epithet popularly applied to Mary, Queen of England, on account of the persecutions of the Protestants during her reign.

Bloomer, Amelia Jenks, an American reformer, born in Homer, N. Y., May 27, 1818; died in 1894. She will be remembered because of her adoption of a costume of a short skirt and Turkish trousers.

Bloomfield, a town in Essex county, N. J.; on the Morris canal, several railroads, and a trolley line connecting it with all nearby cities; 10 miles N. W. of New York city; founded in 1685; is the seat of a German theological seminary and of a noted mountainside hospital; manufactures organs, hats, shoes, rubber goods, electric elevators, and paper; and is the residence of many New York business men. Pop. (1930) 38,077.

Bloomfield, Maurice, an American educator, born in Bielitz, Austria, Feb. 23, 1855; came to the United States in 1857; became an Associate in Johns Hopkins University in 1881; and subsequently Professor of Sanskrit and Comparative Philology there. Died June 12, 1928.

Bloomington, city and capital of McLean county, Ill.; on several railroads; 60 miles N. E. of Springfield; is the seat of the Illinois Wesleyan University, of a Roman Catholic college, and of the general offices of the Chicago & Alton railroad; and nearby are the State Normal University and the State Soldiers' Orphans' Home. The city has important manufactures, is in a rich corn and oat section, and has large interests in raising cattle, swine, and fine horses. Pop. (1930) 30,930.

Blouet, Paul (Max O'REIL), a

French lecturer and author, born in Brittany, France, March 2, 1848. After the publication of his first book, "John Bull and His Island" (1883), he devoted himself to literature. He made several lecturing tours of the United States. Died in Paris, June, 1903.

Blount, James H., an American thus ma legislator, born in Macon, Ga., Sept. 12, 1837. He made his first appear- flies, etc.

ance in public affairs in 1872, when he was elected to Congress from the Sixth District of Georgia. He held his seat by successive re-elections till 1893, when he declined a further term. As he finished his last term the House paid him the unusual honor of suspending its proceedings to give the members an opportunity to testify to their appreciation of his worth. In his last term he was Chairman of the Committee on Foreign Affairs, and his familiarity with American relations with other countries led President Cleveland to appoint him a Special Commissioner to Hawaii in March, 1893, for the purpose of investigating the deposition of the royal government and the establishment of the American protectorate over the kingdom. On his arrival in Honolulu he at once caused the American flag to be hauled down from the Provisional Govern-ment House, and the United States marines to be withdrawn from the marines to be withdrawn from the locality. This proceeding led to considerable excitement in the United States; the withdrawal of United States; the withdrawal of United States Minister Stevens from Honolulu; the appointment of Commissioner Blount as his successor; and a renewal both in Washington and Honolulu of the agitation for the annexation of Hawaii to the United States. On the completion of his mission Minister Blount resumed private practice at his home. Died March 6, 1903.

BLOW-FLY.

Blow Fly, the name popularly given to such two winged flies as deposit eggs in the flesh of animals, thus making tumors arise. Several species of musca do this, so do breeze flies. etc.

Blowing Machine, an apparatus for producing an air blast for metallurgical purposes.

Blowitz, Henry Georges Stephane Adolphe Opper de, a French journalist, born in Pilsen, Austria, Sept. 28, 1832; settled in France; was successively appointed Professor of German in the Lycee of Tours and at Limoges, Poitiers, and Marseilles; was naturalized a French citizen in 1870; and became the Paris correspondent of the London "Times" in 1871. He died January 19, 1903.

instrument Blowpipe, a small used in the arts for glass blowing and soldering metals, and in analytical chemistry and mineralogy, for de-termining the nature of substances by the action of an intense and continuous heat. Its utility depends on the fact, that when a jet of air or oxygen is thrown into a flame, the rapidity of combustion is increased, while the effects are concentrated by diminishing the extent or space originally occu-pied by the flame.

Blowpipe, a kind of weapon much used by some of the Indian tribes of South America, both in war and for killing game. It consists of a long, killing game. It consists of a long, straight tube, in which a small poi-soned arrow is placed, and forcibly expelled by the breath.

Blubber, the fat of whales and other large sea animals, from which train oil is obtained. The blubber train oil is obtained. The blubber lies under the skin and over the muscular flesh. It is eaten by the Eskimos and the seacoast races of the Japanese Islands, the Kuriles, etc. The whole quantity yielded by one whale ordinarily amounts to 40 or 50. but sometimes to 80 or more hundred weights.

Blucher, Gebhard Leberecht von, a distinguished Prussian General, born at Rostock, Mecklenburg-Schwerin, Dec. 16, 1742. He entered the Swedish service when 14 years of age and fought against the Prussians, but was taken prisoner in his first campaign, and was induced to enter the Prussian service. Discontented at the promotion of another officer over his head, he left the army, devoted himself to agriculture, and by indus-

became a Major in his former regiment, which he commanded with distinction on the Rhine in 1793 and 1794. After the battle of Kirrweiler in 1794 he was appointed Major-General of the Army of Observation sta-tioned on the Lower Rhine. In 1802, in the name of the King of Prussia, he took possession of Erfurt and Muhlhausen. Oct. 14, 1806, he fought at the battle of Auerstadt. After the Peace of Tilsit he served in the De-After the partment of War at Konigsberg and Berlin. He then received the chief military command in Pomerania, but at the instigation of Napoleon was afterward, with several other distinguished men, dismissed from the service. In the campaign of 1812, when the Prussians assisted the French, he took no part; but no sooner did Prussia rise against her oppressors than Blucher, then 70 years old, engaged in the cause with all his former activin the cause with all his former activity, and was appointed commander-inchief of the Prussians and the Russian corps under General Winzingerode. His heroism in the battle of Lutzen (May 2, 1813), was rewarded by the Emperor Alexander with the Order of St. George. The battles of Bautzen and Hanau, those on the Katzbach and Leipsic, added to his glory. He was now raised to the rank glory. He was now raised to the rank of Field-Marshal, and led the Prussian army which invaded France early After a period of obstinate in 1814. conflict the day of Montmartre crowned this campaign, and, March 31, Blucher entered the capital of France. His King, in remembrance of the victory which he had grained at the Katzbach, created him Prince of Wahlstadt, and gave him an estate in Silesia. On the renewal of the war in 1815 the chief command was again committed to him, and he led his army into the Netherlands. June 15 Napoleon threw himself upon him, and Blucher, on the 16th, was de-feated at Ligny. In this engagement his horse was killed, and he was thrown under his body. In the battle of the 18th Blucher arrived at the most decisive moment upon ground, and taking Napoleon in the rear and flank assisted materially in completing the great victory of Belle Alliance or Waterloo. He was a try and prudence acquired an estate. Alliance or Waterloo. He was a After the death of Frederick II. he rough and fearless soldier, noted for

his energy and rapid movements. which had procured him the name of Marshal Vorwarts (Forward). died at Krieblowitz, Silesia, 1819.

Blue, one of the seven colors into which the rays of light divide themselves when refracted through a glass prism, seen in nature in the clear expanse of the heavens; also a dye or

pigment of this hue.

Blue, Victor, an American naval officer, born in Marion, S. C., Dec. 6, 1865; entered the United States Naval Academy in 1883; was commissioned a passed naval cadet in 1887; transferred to the Engineer Corps in 1889, and promoted to Ensign, Dec. 12, 1892. After serving on the "Alliance" and "Thetis" he was assigned to duty at the Naval Academy in 1896, and early in 1898 was promoted to Lieutenant, junior grade. In the war against Spain he traversed the enemy's lines during the bombardment of Santiago, and reported the location of Cervera's vessels. Chief of Staff, Pacific fleet, 1910-11; and became chief of the Bureau of Navigation, with the rank of rear-admiral, 1913. Died Jan. 22, 1928.

Blue Beard, the name of the blood thirsty husband in the familiar tale of "Blue Beard," best described in Perrault's "Tales" (1697). The original of this monstrous personage was a character celebrated in Breton legend, Gilles de Laval, Baron de Retz (1396-1440), famous in the wars of Charles VII. According to tradition he used to entice the children of peasants into his castle, and there sacrifice them to the Devil and practice sorcery with their remains. After 14 years of such a course he grew so bold that his crimes were discovered, and a heap of children's bones found in his castle. He was condemned to death, strangled, and his corpse burned at the stake at Nantes in 1440. Another Breton legend represents de Retz with a red beard about to marry a beautiful girl after having already made away with seven wives. The bride expostulates at the altar. De Retz offers her fine clothes, castles, all his possessions, finally his body and soul. "I accept!" shrieks the bride, turning into a blue devil and making a sign which transforms de Retz's beard from red to blue.

Blue Laws, a name given to certain rulings or decisions of colonial magistrates reported by Rev. Samuel A. Peters, a Church of England clergyman, of Connecticut, as the actual laws of the New Haven colony.

Henceforth he belonged to Hell, and became the dread of the country round, under the name of Blue Beard.

Blue Berry, a name given in the United States to the genus vaccinium. that which contains the bilberry, called in Scotland the blae berry.

Blue Bird, a beautiful bird. whole upper parts are sky blue, shot with purple, with its throat, neck, breast, and sides reddish chestnut, and part of its wings and its tail feathers black.

Blue Book, a printed volume, issued by authority of the British Par-liament containing a report.

Blue Bottle, a two-winged fly, the body of which has some faint resemblance to a bottle of blue glass.

Bluefields, town, seaport, and capital of the former Mosquito Indian Reservation; now the Department of Zelaya, Nicaragua, on the Atlantic coast near the mouth of the Bluefields river, and 165 miles E. of Managua. The reservation lies along the Atlantic coast extending S. almost to Graytown, one of the termini of the projected Nicaragua canal.

Blue Fish, a species of coryphæna found in the Atlantic; also, a fish like a mackerel but larger, found on the Atlantic coast, and sometimes called horse mackerel and salt water tailor.

Blue Grass, a grass cultivated for pasturage in Northern and Central Kentucky, deriving its name from the underlying strata of blue limestone which gives it a luxuriant growth.

Blue Hen State, a sobriquet for the State of Delaware. During the War for Independence, a certain pop-ular officer of Delaware, named Cap-tain Caldwell, asserted that a game cock to be unconquerable must be "a blue hen's chicken." This name a blue hen's chicken." was at once applied to his regiment and later to the State and its people.

Blue Jay, a common North American bird of the crow family, and occupying in the New World the place held by the jays of the Old.

Though one of them forbade a woman to kiss her child on the Sabbath or a fast day, and another provided in what fashion men should cut their hair, they have been soberly accepted by great numbers of people as actually enacted laws, illustrative of Puritan illiberality. They appear in Peters' "General History of Connecticut," and were evidently a somewhat spiteful satire upon the Puritan legislation, which contained many statutes concerning Sabbath observances and the vices of drinking and gambling that would now be deemed inquisitorial. The term is generally applied to any law one does not like that affects personal habits.

Blue Monday, in Bavaria and some other parts of Europe, a name formerly given to the Monday before Lent, when the churches were deco-rated with blue. It was kept as a holiday by classes whose ordinary avocation required them to labor on Sundays. As this led to violent disturbances the custom was legally abolished.

Blue Mountains, a beautiful wooded range of mountains in Oregon, from 8,000 to 9,000 feet high, which, with the Powder River Mountains, separate the Columbia valley from the Great Basin.

Blue Mountains, the central mountain range of Jamaica, the main ridges of which are from 6,000 to 8,000 feet high.

Blue Point, the S. extremity of Patchogue Bay, Long Island, N. Y., which lends its name to the well known oysters — blue points.

Blue Print Paper, paper sensitized by potassium ferricyanide and citric acid; used for making blue print photographs and print plans, mechanical drawings, etc., giving white lines on blue ground.

Blue Ridge, the most easterly range of the Alleghany Mountains. It forms the continuation of the chain called South Mountain in Pennsylvania and Maryland. It is known as the Blue Ridge till it crosses the James river; thence to North Carolina as Alleghany Mountains; and in North Carolina again as Blue Ridge.

Blue Stockings, a literary wom-

she is more or less pedantic. Boswell, in his "Life of Johnson," states that in his day there were certain meetings held by ladies to afford them opportunity of holding converse with eminent literary men. The most distinguished talker at these gatherings was a Mr. Stillingfleet, who always wore blue stockings. His absence was so felt that the remark became com-mon, "We can do nothing without the blue stockings." Hence the meetings at which he figured began to be called sportively Blue Stocking Clubs, and those who frequented them blue stockings.

Blum, Robert, a German Liberal leader, born in very humble circumstances at Cologne, Nov. 10, 1807; was secretary and treasurer of a theater at Cologne, and subsequently at Leipsic, until 1847, when he estab-lished himself as bookseller and publisher. His leisure was devoted to literature and politics, and in 1840 he founded at Leipsic the Schiller Society, which celebrated the poet's anniversary, as a festival in honor of political liberty. When the revolu-tionary movement broke out in 1848, he was one of its foremost leaders. At Vienna he joined the insurgents, was arrested, and was shot on Nov. 9.

Blumenbach, Johann Fried-Rich, a German naturalist, born in Gotha, May 11, 1752. He advocated the doctrine of the unity of the human species, which he divided into five varieties, Caucasian, Mongolian, Negro, American, and Malay. His anthropological treatises, and memoirs of his life by Marx and Flourens, were translated into English. He died in Gottingen, Jan. 22, 1840.

Blunderbuss, a short gun, unrifled and of large bore, widening toward the muzzle. It is by no means to be ranked with arms of precision, but is loaded with many balls or slugs, which scatter when fired, so that there is a certainty of some one of them hitting the mark.

Blunt, Edmund March, American author, born in Portsmouth, N. H., June 20, 1770; was noted for his publication of the "American Coast Pilot" (1796), describing all the coasts of the United an, generally with the imputation that States, and containing a vast amount More than 30 editions of this work practice this profession, giving it up have been published, and it is still in for the stage. Married Georgiana use in the United States and the prin- Drew, sister of John Drew. Had three cipal European countries, having been translated into nearly every foreign Barrymore (q. v.) Died March 25, translated into nearly every foreign language. He also compiled a number of nautical books and charts. He died in Sing Sing, N. Y., Jan. 2, 1862.

Blunt, George William, an American hydrographer, born in Newburyport, Mass., March 11, 1802; a son of Edmund March Blunt. He went to sea when 14 years old and served as a sailor till nearly 21; and in 1822-1866 was a publisher of charts and nautical books in New York. He made original surveys of many American harbors; was one of the committee that organized the present system of pilotage for New York city; made several revisions of the "American Coast Pilot;" and was influential in causing the Federal Government to adopt the French system of lighthouses and to organize the Lighthouse Board. He died in New York city, April 19, 1878.

Blunt, Stanhope English, an American military officer; born in Boston, Mass., Sept. 29, 1850; was graduated at the United States Military Academy and commissioned 2d lieutenant in 1872. He rose through the ranks to colonel in the ordnance department: retired in 1912.

Blushing, a sudden reddening of the skin, induced by various mental states, particularly those involving shame or humiliation, shyness or mod-

Blyden, Edward Wilmot, a negro author, born at St. Thomas, W. I., Aug. 3, 1832. After vainly seeking, in 1845, admission to some college in the United States, he went to Liberia, and graduated at the Alexander High School, of which he afterward became principal. In 1880 he became President of Liberia College. He was commissioner to the Presbyterian General Assembly of the United States in 1861 and 1880. He died Feb. 8, 1912.

Blythe, Herbert (better known as MAURICE BARRYMORE), an American actor; born in India in 1847; was graduated at Cambridge University, England; studied for the civil service;

of invaluable information for seamen. was admitted to the bar but did not 1905.

> Boa, the name of a genus of reptiles belonging to Cuvier's tribe of serpents proper.

The species properly belonging to this genus are among the largest of the serpent tribe, some of them, when full grown, being 30, and even 40 feet long. Though destitute of fangs and venom, nature has endowed them with a degree of muscular power which renders them terrible. Are found chiefly in Guiana.

Boabdil (properly Abu-Abdallah, and nicknamed Ez-Zogoiby, "the unlucky"), the last Moorish King of Granada, bethroned his father, Abu-l-Hasan, in 1481, and two years later was defeated and taken prisoner by the Castilians near Lucena. He was set free on condition of paying tribute, and returned to Granada to struggle with his father and with his heroic uncle, Ez-Zaghal, for the throne. Going to Africa, he there flung away his life in battle.

Boabicea, Queen of the Iceni, in Britain, during the reign of Nero. Having been treated in the most ignominious manner by the Romans, she headed a general insurrection of the Britons, attacked the Roman settlements, reduced London to ashes, and put to the sword all strangers to the number of 70,000. Suetonius, the Roman general, defeated her in a decisive battle (A. D. 62), and Boadicea, rather than fall into the hands of her enemies, put an end to her own life by poison.

Boanerges, a Greek word translated in Mark iii: 17, "sons of thunder." It is of doubtful etymology, but is probably the Aramaic pronunciation of Hebrew beni regesh, regesh in Hebrew meaning tumult or uproar, but in Arabic and Aramæan thunder. It is an appellation given by Christ to two of His disciples, the brothers James and John, apparently on account of their fiery zeal.

Boardman, George Dana, an American missionary, born in Liver-

Boardman, George Dana, an American clergyman and author, born in Tavoy, British Burma, Aug. 18, 1828; son of the American Baptist missionary of the same name. He was educated in the United States, graduating at Brown University in 1852, and at Newton Theological Institution in 1855. He became pastor at Barnwell, S. C.; afterward at Rochester and Philadelphia. D. 1903.

Boardman, Mabel T., an American executive widely known for her activities in the American National Red Cross, of which she was a vicechairman in 1917. Of her work President Taft wrote: "The moving spirit of the American Red Cross today is Miss Mabel Boardman. It is due to her indefatigable industry, her wide acquaintance, her high character as a woman, and the confidence that wealthy and benevolent men have in her that the association has become so prosperous and powerful for good.

Boas, Franz, a German ethnologist, born in Minden, Westphalia, July 9, 1858; studied at Heidelberg, Bonn, and Kiel Universities, in 1877-1882; traveled in the Arctic regions in 1883-1884; was assistant in the Royal Ethnographical Museum in Berlin, and privat docent in geography at the University in 1885-1886; and teacher of anthropology in Clark University, Worcester, Mass., in 1888-1892

Boat Bill, the English name of a genus of birds belonging to the true herons. The bill, from which the English name comes, is very broad from right to left, and looks as if formed by two spoons applied to each other on their concave sides. It inhabits the hot and humid parts of South America.

Boatswain, an officer on board a ship, whose function it is to take charge of the rigging, cables, cordage, anchors, sails, boats, flags and stores.

more, Me., Feb. 8, 1801. He studied He must inspect the rigging every more, Me., Feb. 8, 1801. He studied the must inspect the rigging every at Andover and was ordained in the Baptist Church. In 1825 he went to Burma, where he labored assiduously in spreading Christianity. The mission planted by him became the central point of all Baptist missions in Burma. He died in Burma, Feb. 11, 1831. or by deputy, inflict on them the punishment awarded.

Boaz, a Bethlehemite of means, who took upon himself the duty of providing for Ruth, as the near relation of her dead husband's family. From him Jesus Christ was directly descended.

Bobbin, a reel or other similar contrivance for holding thread.

Bobbin Net, a machine made cot-

ton net, originally imitated from the lace made by means of a pillow and bobbins.

Bobolina, a Greek woman, celebrated for her courage in aid of the Greek revolt. After her husband had been slain by the Turks in 1812, she resolved to avenge his death. In 1821, she equipped three vessels at own expense, fought with extraordinary courage at Tripolitiza and Naupha and was killed in action, in 1825.

Bob-o-link, Bobiink, Reed Bird, or Rice Bird, a common American bird found from Paraguay to Canada, the only one of its kind, and that difficult to classify. Some place it near the Baltimore bird, others near starlings, but both the characteristics and the character of the bob-o-link exhibit much that is unique.

The name — originally Bob Lincoln — is an imitation of the bird's note. In song, the full throated male bob-o-link is unique, rivaling the lark, inimitable by the mocking bird.

Bob White, popular name of a small game bird of the United States, given because of its peculiar call. In the Northern States it is known as QUAIL, and in the Southern as PART-BIDGE.

Boccaccio, Giovanni, an Italian novelist and poet, son of a Florentine

merchant, born in 1313; died in Certaldo, in 1375.

Bock, Karl Ernst, a German anatomist, born in 1809; died in

His title to fame rests chiefly on his "Handbook of Human Anatomy.

Bock Beer. (See BEER).

Bode, John Elert, German astronomer, born 1747, died 1826. His best works are his Astronomical Almanac and his large Celestial Atlas (Himmelsatlas), giving a catalogue of 17,-240 stars (12,000 more than in any former chart) .- Bode's Law is the name given to an arithmetical formula, previously made known by Kepler and Titius of Wittenberg, expressing approximately the distances of the planets from the sun. It assumes the series 0, 3, 6, 12, 24, 48, 96, etc., each term after the second being double the preceeding term; to each term 4 is added, producing the series 4, 7, 10, 14, 28, 56, 100, etc. These numbers are, with the exception of 28, roughly proportional to the distances between the planets and the sun. The law has no theoretical foundation.

Bodin, Jean, a French political writer; born in 1530, or 1529. His great work "De la République" great work "De la République" (1576) has been characterized as the ablest and most remarkable treatise on the philosophy of government and legislation produced from the time of Aristotle to that of Montesquieu. According to his view, the best form of government is a limited monarchy. He died in Laon in 1596.

Bodleian, or Bodleyan, Library, a library founded at Oxford, England, by Sir Thomas Bodley, in 1597. All members of Oxford University who have taken a degree are allowed to read in it, as are literary men of all countries.

Bodmer, Georg, a Swiss inventer, born in Zurich, Dec. 6, 1786. He invented the screw and cross wheels; and made valuable improvements in fire arms and in various kinds of machinery, particularly in that of wool spinning. He died in Zurich, May 26,

Bodmer, Johann Jakob, a Swiss literary critic, born near Zurich, July 19, 1698; was the first to make Eng-lish literature known in Germany; and wrote dramas, and epics. He was leader of the movement which released German literature from French classicism. He died Jan. 2, 1783.

Boece, or Boyce, Hector, a Scottish historian, born in Dundee about 1465; died in 1536.

Boehm, Sir Joseph Edgar, a British sculptor, born in Vienna, July 6. 1834. He executed busts of Gladstone, John Bright, John Ruskin, etc., and designed the effigy of Queen Victoria for the coinage commemorative of the 50th year of her reign. He died in London, Dec. 12, 1890.

Boehme, Jacob, a German mystical writer, born in 1575. A sect, taking their name from Boehme, was formed in England. He died in 1624.

Bœotia, a division of ancient Greece, lying between Africa and Phocis, and bounded E. and W. by the Eubœan Sea and the Corinthian Gulf respectively, had an area of about 1,100 square miles. With Attica. Beetia now forms a department of the "old territory" of Greece, with a pop. (census of 1907) of 407,063.

Boerhaave, Hermann, a celebrated Dutch physician, one of the most influential medical authorities living in the 18th century; born in Woorhout, near Leyden, Dec. 12, 1668. He died Sept 23, 1738.

Boers (Dutch, boer, a peasant or husbandman), the name commonly applied to the South African colonists of Dutch descent.

Boethus, a Greek sculptor, bosn in Chalcedon in the 2d century B. C. He is celebrated for his statues of children.

Boethius, Anicius Manlius Severinus, a Roman statesman and philosopher, called "the last of the classic writers"; born in Rome or Milan, of an ancient family, about A. D. 470; was educated in Rome, in a manner well calculated to develop his extraordinary abilities. Theodoric, King of the Ostrogoths, then master of Italy, loaded him with marks of favor and esteem, and raised him to the first offices in the empire.

Later, however, he was accused of a treasonable correspondence with the court of Constantinople. He was arrested, imprisoned, and executed A. D.

524 or 526.

Bog, a piece of wet, soft, and spongy ground, where the soil is com-posed mainly of decaying and decayed vegetable matter. Such ground is valueless for agriculture until reclaimed, but often yields abundance of peat for fuel.

Bogardus, Everardus, a minister of the Dutch Reformed Church in New Amsterdam, now New York; husband of Anneke Jans. The latter owned a farm of 60 acres, comprising now one of the most valuable sections of New York city. The Bogardus heirs have for many years endeavored unsuccessfully, to recover this property, which is held by the corporation of Trinity Church. He died Sept. 27, 1647.

Bogardus, James, an American inventor, born in Catskill, N. Y., March 14, 1800; was apprentized to a watchmaker, and early showed the bent of his mind by improvements in the construction of eight-day clocks, and by the invention of a delicate engraving machine. The dry gas meter is his invention, as is also the transfer machine to produce bank note plates from separate dies; and in 1839 his plan for manufacturing postage stamps was accepted by the British Government. Later he introduced improvements in the manufacture of india rubber goods, tools, and machinery; and invented a pyrometer, a deep sea sounding machine, and a dynamo-meter. He died in New York, April 13, 1874.

Boggs, Charles Stuart, an Amer-Boggs, Charles Stuart, an American naval officer, born in New Brunswick, N. J., Jan. 28, 1811; entered the navy in 1826; served on the "Princeton" in the Mexican War; was assigned to the gunboat "Varuna" in Farragut's Gulf Squadron in 1861. In the attack on Forts St. Philip and Jackson, in April, 1862, he destroyed six Confederate gunboats destroyed six Confederate gunboats and two rams, and in the last moments of the fight his own vessel was sunk. In 1869-1870 he served with the European Squadron; in the latter year was promoted to Rear-Admiral; and in 1873 was retired. He died in New Brunswick, April 22, 1888.

Bogomilian, a Sclavonic Christian sect, founded in the 12th century by a monk called Basil. His tenets were akin to those of the Mani-B.-11.

ated by a demon cast from Heaven, and was burned for his heresy.

Bogoslof Islands, a volcanic triplet in the Aleutian chain. The first appeared May, 1796; the second Sept., 1883; the third May, 1906, after the San Francisco earthquake.

Bogota, capital of the Republic of Columbia, situated within the limits of the department of Cundinamarca, on a tableland which, at an elevation of 8,694 feet above the sea, separates the basin of the Magdalena from that of the Orinoco. The tableland has an area of about 400 square miles, and is bounded on all sides by mountains, which, though lofty enough to give shelter, are yet below the line of per-petual snow. This extensive plain a temperate zone on the verge of the equator, with a salubrious climate and an average temperature of 60° F .- is exceedingly fertile, being as rich in pasture as in grain. The few manufactures of the city include soap, leather, cloth, and articles made from the precious metals. In 1920 the department of Cundinamarca had an area of 8.046 square miles and pop. of 820,000; Bogota had a pop. (1923) of 166,148.

Bogue, David, one of the founders of the London Missionary Society, was born in Berwickshire, in 1750. Bogue also took an active part in the establishment of the British and Foreign Bible Society and the Religious Tract Society. He was on the point of going as a missionary to India in 1796, when the East India Company refused to sanction the scheme. Bogue died at Brighton, Oct. 25, 1825.

Bohemia, a former Kingdom, now a Province of the Czecho-Slovakia republic (Austrian or Cisleithan portion) bounded by Bavaria, Saxony, the Prussian Province of Silesia, Moravia, and the Archduchy of Austria; area about 20,060 square miles, of which less than 1 per cent, is not tillable. Population (Est). 6,800,000, (over 2,000,000 Germans). In 1916 Bohemia had 130 deputies in the Reichsrath. The prevailing religion is the Roman Catholic, the country being an archbishopric with three bishoprics. The language of the country is the Czech dialect of the cheans and of the Gnostics. He be-country is the Czech dialect of the lieved that the human body was cre-Slavonic in some districts, and in most of the cities, German is spoken. hemia is surrounded on all sides by mountains, and has many large forests. Its plains are remarkably fer-tile. The chief rivers are the Elbe and its tributary the Moldau, which is even larger.

Bohlen Lectures, a lecture course on a foundation of \$10,000 furnished by John Bohlen, a lay member of the Protestant Episcopal Church. They are delivered each year in Philadelphia, Pa., by eminent representatives of that Church.

Bohol, one of the Philippine Islands, belonging to the Visayas or Bisayas group. It has an area of about 1,300 square miles and a population of the Philippine lation of 245,000. Sugar cane is grown and the island is reputed rich in gold deposits.

Boiardo, Matteo Maria, Count of Scandiano, one of the greater Italian poets, was born in 1434 at Scandiano, a village situated at the foot of the Lombard Apennines. He died at Reggio, in 1494.

Boieldieu, Francois Adrien, a French musical composer, born in 1775; died in 1835.

Boies Horace, an American lawyer, born in Aurora, Erie co., N. Y., Dec. 7, 1827. His opposition to the tariff and prohibition policy of the Republican Party caused him to unite with the Democrats; and, in 1890–1894, he served two terms as Governor of Iowa, being defeated for a third term in 1893. He was a conspicuous candidate for the presidential nomina-tion in the National Democratic Con-ventions in 1892 and 1896; and in the campaign of 1896 he supported Mr. Bryan. Died Apr. 4, 1923.

Boii, a powerful Celtic people who dwelt originally in Transalpine Gaul, part of whom settled in the modern Bohemia, and bequeathed their name

to that country.

Boil, a disease called by medical men furunculus. It is a phlegmonous tumor, which rises externally, attended with redness and pain, and sometimes with a violent, burning heat. Ultimately it becomes pointed, breaks, and emits pus. A substance called the core is next revealed. It is purulent, but so thick and tenacious that it Boise, James Robinson, an looks solid, and may be drawn out in American educator, born in Bland

the form of a cylinder, more pus following. The boil then heals. A blind boil is one which does not suppurate.

Boileau, Nicolas, a French poet, born at Paris, Nov. 1, 1636. He died

March 13, 1711.

Boiler, the name applied to any vessel or cauldron for boiling large quantities of liquor, but most com-monly used as the designation of a metallic vessel in which water is converted into steam by the action of fire, the steam being intended by its expansive force to give motion to a steam engine, or to be used for a variety of manufacturing purposes. Boilers may be subdivided into the following clases: (a) Shell or tank boilers. (b) Water-tube boilers.

Boiling, in general, the change of a substance from the liquid to the gaseous state which takes place throughout the liquid. The boiling point, in science, is the point or degree of the thermometer at which any

liquid boils.

Boisard, Francois Marie, French fabulist, born in 1774; died in 1833.

Bois d'Arc (sometimes corrupted into Bodock), also bow-wood, or osage orange, a tree which is a native of the Southern United States. Its large, beautiful orange like fruits are scarcely eatable, but its pines make it useful as a hedge plant. Its wood is strong, and hard, and elastic, and hence was used by the Indians in the manufacture of their bows.

Bois de Bologne, a pleasant grove near the gates on the W. of Paris, so named after the suburb Bou-

logne-sur-Seine.

Boise, city, capital of the State of Idaho, and county-seat of Ada co.; on the Boise river and the Union Pacific railroad; 45 miles S. W. of Idaho City. It occupies the site of a former trading post of the Hudson Bay Company; is in an agricultural and a rich mining region; and is supplied with pure hot water from a flowing boiling well. The city is said to be the only one in the world having a natural supply of hot water. Pop. (1930) 21,544.

ford, Mass., Jan. 27, 1815; died in

Chicago, Feb. 9, 1895.

Boisgobey, Fortune-Abraham du, a French novelist, born in Gran-ville, Sept. 11, 1821; died, 1891.

ican editor; born in Helder, Holland, 1863, and brought to America in child-hood. He edited the 'Ladies' Home Journal" until 1919. In 1923 created Journal" until 1919. In 1920. Won the American Peace Award. Won

the American Peace Award. Won the Pulitzer Prize with his "Americanization of Edward Bok."

Boker, George Henry, an American poet and dramatist; born in Philadelphia, Pa., Oct. 6, 1823. He graduated from Princeton in 1842; studied law; and was United States minister to Turkey in 1871-1875, and to Russia in 1875-1879. He died Jan. 2, 1890.

Jan. 2, 1890.

Bokhara, formerly a Russian vassal state, was made part of the Turkoman Soviet Socialist Republic in 1924. Its capital is now at Samarkand, and the population 1,030,500. The area, 491,216 square kilometers, includes Khiva and Bokhara. Cotton is the while vineyards, fruit chief crop, orchards, and silk growing also produce largely. Irrigation is needed on much of the land. Manufacturing is progressing, especially in textiles, and salt, coal and the oil production are growing. National independence and culture have been little encouraged by Russia until lately.

Bokhara, formerly capital of Bokhara, is 8 or 9 miles in circuit and is surrounded by a mud wall. It is poorly built, consisting of extremely narrow streets and paltry houses. The principal edifices are the palace of the amir, crowning a height near the cen-ter of the town and surrounded by a brick wall 70 feet high; and numerous mosques, the largest of which is enameled with tiles of azure blue, and has a tower 210 feet high. The trade was formerly large with India, but has now been almost completely absorbed by Russia. The pop. is estimated at 75,000.

Boleyn, Anne, second wife of Henry VIII. of England, was the eldest daughter of Sir Thomas Boleyn, and Elizabeth Howard, daughter of the Duke of Norfolk. She was born according to some accounts, in 1507,

but according to more probable ones about 1501. About 1522 she became lady of honor to Queen Catharine, whom she soon supplanted. The king, passionately enamored of her, found Bok, Edward William, an Amer- an unexpected opposition to his wishes, and Anne firmly declared that she could be had on no terms but those of marriage. She knew that the king already meditated a divorce from his wife, Catharine of Arragon; but she also knew what difficulties the Catholic religion opposed to the execution of this plan. Cranmer offered his services to bring about the accomplishment of the king's wishes, and thus gave the first occasion to the separation of England from the Roman Church. But the impetuous Henry did not wait for the ministers of this new religion to confirm his divorce; on the contrary, he married Anne in January, 1533, having previously created her Marchioness of Pembroke. Cranmer declared the first marriage void, and the second valid, and Anne was crowned queen at Westminster with unparalleled splendor. In 1533 she became the mother of the famous Elizabeth. She could not, however, retain the affections of the king, as inconstant as he was tyrannical; and as she had supplanted her queen while lady of honor to Catharine, she was now supplanted herself by Jane Sey-mour, her own lady of honor. She was tried and condemned to death on false charges of infidelity, and was executed May 19, 1536.

Bolingbroke, Henry St. John, Viscount, an English statesman and political writer; born in Battersea, near London, of an ancient family, in 1678. He died in Battersea in 1751.

Bolivar, Simon, an American military officer and statesman (named EL LIBERTADOR, from his having rescued Central South America from the Spanish yoke), born in Caracas, July 24, 1783. At Venezuela he en-tered upon his military career as a colonel in the service of the newly founded republic. At length, in 1821 the Independent troops were successful in the battle of Carabobo, where the Royalists lost upward of 6,000 men, and which decided the cause against Spain. On Aug. 20 of the same year a Republican Constitution was adopted, and decreed to continue, as then

Bolivia Bollworm

to the internal administration of the country. In 1823 he assisted the Peruvians to obtain their independence, and was declared their liberator, and invested with supreme authority. On Feb. 10, 1825, however, he convoked a Congress, and resigned his dictatorship. He now visited the Upper Provinces of Peru, which, calling a convention at Chuquisaca, gave the name of Bolivia to their country, in honor of their liberator, and appointed him Perpetual Protector, and to draw up a constitution. On May 25, 1826, he presented his Bolivian code to the Congress of Bolivia, which was afterpresented his Bo....

Congress of Bolivia, which was ward adopted, with some dissatisfaction, however, although it was also subsequently adopted by the Congress of Lima, where, under its provisions, he himself was elected President for life. He now set out for Colombia, lations and Worship, Finance, Justice and Industry, Government and Public Works, War and Colonization, and Education and Agriculture. The possessed by all who can republic is disupposed to be assuming the powers of a dictator. In 1829 new disturbances arose, and, in 1830, a convention was called for the purpose of framing a new constitution for Colombia. The proceedings were begun by Bolivar, who once more tendered his resignation. This was his last act which had relation to public affairs. He died at San Pedro, near Carthagena, Dec. 17, 1830.

Bolivia, a republic of South America; bounded on the N. by Peru and Brazil; on the E. by Brazil and Paraguay; on the S. by the Argentine Republic and Chile; and on the W. by Peru and Chile; area 514,155 square miles; pop. (1926 Est.) 2,599,398; the largest city and actual seat of government is La Paz; pop. (1926) 109,-750: the official capital is Sucre; pop. 16,194. The boundary disputes of Bolivia with Brazil and with Chile were settled by treaties in 1903 and 1904 respectively; that with Peru was settled by direct negotiations in 1911-1912; and that with Paraguay, long pending was still unsettled at the end

of 1927.

Agriculture: Wheat, maize, barley, beans, and potatoes are produced for local consumption; coffee is raised seacost.

chiefly for export; sugar cane is grown for distillation; and rubber, nocturnal moth, Heliothis Armigera.

defined, till 1834. Bolivar was chosen cinchona, and cocoa are important President, and he turned his attention and increasing products. Cattle, sheep, and llamas are extensively bred. sheep, and llamas are extensively bred. Bolivia has a very large mineral wealth in silver, copper, tin, lead, zinc, antimony, bismuth, gold, borax and salt, producing one half of the total tin output of the world. The metallic exports in 1925 had a value of over \$115,191,500.

The constitution (Oct. 28, 1880) vests the executive power in a President elected by direct normals vote.

dent, elected by direct popular vote, for a term of four years, and ineligi-ble for re-election at the end of his term of office. The legislative authority rests in a Congress, comprising a Senate of 16 members, elected suffrage is possessed by all who can read and write. The republic is di-vided into eight departments and these into provinces and cantons. The Roman Catholic is the recognized religion of the republic, and the exercise of other forms of worship is permitted. Primary instruction is free and nominally obligatory, and is under the care of the several municipalities. In 1925 there were 1,491 miles of railroad open and about 231 miles under construction.. Imports, 1927, 66,105,000 bolivianos; exports, 127,084,000 bolivianos.

In 1927, Prof. Edwin W. Kemmerer, of Princeton, was called to plan a monetary reform that was enacted into law in April 1928. The gold standard was reestablished after 14 years, and the boliviano stabilized at

36.5 cents.

In 1879 Chile declared war against Bolivia. Peru came to the aid of the latter and the Chilians defeated their allied opponents. As a result of this war Bolivia mortgaged to Chile the Littoral Department, which has an area of 29,910 square miles, and contains the important port of Antofagasta, thus losing her entire

The creature feeds on almost every variety of vegetable and cultivated crop. and is known in each locality by the name of the plant on which it feeds. as the corn-worm, tobacco-worm, cotton-worm, etc. Its first choice is cotton, and then corn, and in the South where both crops grow it has proven very destructive wherever it has been permitted to make headway. There are 4 or 5 broods each year; the July brood attacks corn, the August brood eats the cotton, and the last brood continues the race. It is as the cottonworm that it is called boll-worm, as the young grub eats the unfolded boll or bud of the cotton plant. The general government is making strenuous efforts to kill the pest.

Bolo, a short, broad, lance-shaped weapon; used by the Filipinos in their

FILIPINO BCLO.

American operations agains, the troops. The blade is about 18 inches breadth at its broadest dimension. It till 1876 was the extreme inland post

tapers from the middle toward the haft as well as toward the point, making it strongly resemble the ancient short sword. It is not double edged, however, but tapers from a thick back to an extremely keen edge. In April 1904, the United States troops operating in the Philippines, were supplied with bolos.

Bologna, one of the oldest, largest and richest cities of Italy, capital of the Province of same name, in a fertile plain at the foot of the Apennines, between the rivers Reno and Savena, surrounded by an unfortified brick wall. In the 12th and 13th centuries it was one of the most flourishing of the Italian republics; but the feuds between the different parties of the nobles led to its submission to the papal see in 1513. Several attempts were made to throw off the papal yoke, one of which, in 1831, was for a time successful. In 1849 the Austrians obtained possession of it. In 1860 it was annexed to the dominions of King Victor Emmanuel. Population (1921) 210,969.

Bolshevism, a term used to denote the Communist party now in control of the former Russian Empire. The Imperial Russian Government fell on March 12, 1917. On Nov. 7, 1917, the Bolshevist government, officially called the Russian Socialist Federal Soviet Republic, was established. Bolshevik means majority and was originated in 1903 from a split which took place in the Russian Social-Democratic party.

Bolton Abbey, a notable English structure in Yorkshire; in a highly-pic-turesque district on the river Wharfe, 6 miles E. of Skipton, and 21 N. W. of Leeds. Founded for Augustinian brated by Wordsworth in "The White Doe of Rylstone" and "The Force of Prayer."

Bolton, Sarah Tittle, an American poet, born in Newport, Ky., Dec. 18, 1815. She is known for her patriotic and war poems, including "Paddle Your Own Canoe," "Left on the Battlefield," etc. She died in Indianapolis, Ind., Aug. 4, 1893.

Boma, city and capital of the former Kongo Independent State, anin length by nearly 3 inches in nexed to Belgium by treaty of 1907,

of the Dutch and Portuguese traders. It contains the establishment of the governor-general and also the local government of the administrative district of the same name. It has an extensive import and export trade. Area of colony, 909,654 square miles; pop. officially estimated, 15,000,000.

Bomb, in ordnance, the same as a bomb shell; a hollow iron ball, spheroid, or anything similar, filled with gunpowder, and provided with a time or percussion fuse. It is fired

from a mortar or howitzer.

Modern political upheavals have induced a traffic in packages of explosives, which have been christened bombs. These terrific agents of destruction have been used with murderous effect in the larger European cities: St. Petersburg, Madrid and Paris; also in Chicago. The anarchists have regularly established factories for the production of these missiles, in which the elements are combined with great nicety and scientific precision. The usual method of construction is to fill a hollow sphere with some high explosive together with pieces of scrap iron, nails, bullets, or anything that will wound.

Bomba, a title popularly conferred upon King Ferdinand II. of Naples and by which he will be recorded in history. This appellation he received from the violation of his solemn oath to the citizens of Palermo, which city he perfidiously bombarded in 1840; thus outraging his own plighted word, the laws of humanity, and the constitutional policy he had sworn to ob-

serve.

Bombardier Beetle, a name applied to many coleopterous insects. They are called bombardier beetles on account of a remarkable property they possess of violently expelling from the anus a pungent acrid fluid, which, if the species be large, has the power of producing discoloration of the skin, similar to that produced by nitric acid. It also changes blue vegetable colors to red, and then to yellow. Found in this country and the tropics.

Bombardment, an attack with bombs. Specifically, the act of throwing shells and shot into a town, fort,

or ship.

Bombax, also known as the silk cotton tree. The fruit is larger than

a swan's egg, and when ripe opens in five parts, displaying many roundish, pea-like seeds enveloped in dark cotton. This tree yields a gum, given in conjunction with spices in certain stages of bowel complaints. The five leaved silk cotton tree rises to a great height. Its native country is South America and the adjacent West India Islands, where its immense trunk is scooped into canoes.

Bombay, the third largest of the provinces of British India. It stretches along the west of the Indian peninsula, and is irregular in its outline and surface, presenting mountainous tracts, low, barren hills, valleys, and high tablelands. It is divided into a Northern, a Central, and a Southern Division, the Sind and Aden Divisions and the island of Bombay. Total area, 123,059 square miles; pop. (1921) 19,-338,586. including the city and territory of Aden in Arabia, 80 square miles (pop. 46,165). The native or feudatory States connected with the province (the chief being Kathiawar) have an area of 63.864 square miles; pop. (1921) 7,412,341. The Portuguese possessions, Goa, Daman, and Diu, geographically belong to it. Many parts, the valleys in particular. 123,059 square miles; pop. (1921) 19,-Many parts, the valleys in particular, are fertile and highly cultivated; other districts are being gradually developed by the construction of roads and railroads. The southern portions are well supplied with moisture, but great part of Sind is the most arid portion of India. The climate varies, being unhealthful in the capital, Bombay, and its vicinity, but at other places, such as Poonah, very favorable to Europeans. The chief productions of the soil are cotton, rice, millet, wheat, barley, dates, and the cocoa palm. The manufactures are cotton, silk, leather, etc. The great export is cotton. The administration is in the hands of a Governor and council.

The chief source of revenue is the land, which is largely held on the ravatwar (small farmer) system. the entire population (Est.) 15,000,000 were Hindus.

Bombay, the chief seaport on the W. coast of India, and capital of the Province of the same name; at the southern extremity of the island of Bombay is divided into two portions, one known as the Fort, and formerly

surrounded with fortifications, on a narrow point of land with the harbor on the E. side and Back Bay on the W.; the other known as the City, a little to the N. W. In the Fort are Bombay Castle, the Government offices, and almost all the merchants' warehouses and offices; but most of the European residents live outside of the mercantile and native quarters of the city in villas or bungalows. Bombay has many handsome buildings, both public and private, as the cathedral, the university, the secretariat, the high court, the post and telegraph offices, etc. Various industries, such as dyeing, tanning, and metal working, are carried on, and there are large cotton factories. The commerce is very extensive, exports and imports of merchandise reaching a total value of over \$300,000,000 annually. harbor is one of the largest and safest in India, and there are commodious docks. There is a large traffic with steam vessels between Bombay and Great Britain, and regular steam communication with China, Australia, Singapore, Mauritius, etc. The island of Bombay, which is about 11 miles long and 3 miles broad, was formerly liable to be overflowed by the sea, to prevent which substantial walls and embankments have been constructed. The harbor is protected by formidable rock batteries. After Madras, Bombay is the oldest of the British possessions in the East, having been ceded by the Portuguese in 1661. Pop. (1921) 1,175,914.

Bombazine, a mixed silk and woolen twilled stuff, the warp consisting of silk and the weft of worsted. Black bombazine has been much in use for mourning garments.

Bomb Lance, a harpoon used in whale fishing which carries a charge of explosive material in its head.

Bombon, a large, fresh water lake in Luzon, Philippine Islands, about 50 miles S. of Manila. It is 105 square miles in area. There is a small island in the center, from which rises the volcano of Taal, the lowest in the world, its height being only 850 feet. The waters of the lake find an outlet to the sea through the Pansipit river.

described as the wife, sister, or daughter of Faunus. She was worshipped at Rome from the most ancient times, but only by women, even her name being concealed from men. Her sanctuary was a grotto on Mons Aventinus; but her festival (the 1st of May) was celebrated in the house of the consul. The solemnities were perferred to the consultant of the con formed generally by high born vestals. At this celebration, no males were allowed to be present; even portraits of men were veiled. During the celebration in the house of Cæsar the infamous Clodius was discovered disguised as a female musician. symbol of the goddess was a serpent.

Bona Fides, literally, good faith; honesty, as distinguished from mala fides (bad faith). The law requires all persons in their transactions to act with good faith; and a contract, when the parties have not acted bona fide, is void at the pleasure of the in-

nocent party.

Bonanno, an Italian architect and sculptor of the 12th century. In 1174 he commenced, with Wilhelm of Innsbruck, the famous Leaning Tower of Pisa. He was also the designer of the celebrated bronze doors of the cathedral of that city, which were, all but one, destroyed by a conflagration in 1596.

Bonaparte (pronounced in Italian in four syllables; in French and English in three), the name of a famous family, which was spelt Buonaparte by the Emperor Napoleon and his father till 1796, though the more usual, modern form also occurs in old Italian documents. In the 13th century and afterward, several families named Bonaparte figure with distinction in Italian records—at Florence, San Miniato, Sarzano, and Genoa. But as the name of Bonaparte occurs in Corsica as early as the 10th century, it is probable that the island may have been their original home. In the 16th century mention is again found of the Bonapartes in Corsica, where in Ajaccio they occupied a respectable position as a patrician or leading family. In the 18th century this family was represented by three male descendants, all residing at Ajaccio. Bona Dea, a mysterious Italian goddess of fertility, who is variously PARTE; and his nephew, CHARLES.

CHARLES BONAPARTE, father of the Emperor Napoleon, was born at Ajaccio in 1746; studied law at Pisa; and married, in 1767 — without the consent of his uncles — a beautiful young patrician lady, named Letizia Ramo-

lino. He died in 1785.

MARIA LETIZIA RAMOLINO, mother of Napoleon I., lived to see her family placed on the thrones of Europe, and also witnessed their downfall. She was born at Ajaccio in 1750. After the death of her husband she lived for some time in Corsica, and in 1793, when the island came under British rule, removed with her family to Marseilles, where she lived in poverty, mainly supported by the pension given to Corsican refugees. After her son became First Consul she removed to Paris, and when her son was crowned in 1804 received the title Madame Mere, and was made patroness of all the benevolent institutions of the empire. A brilliant court household was given to her, which, however, was never pleasing to her modest tastes. Remembering former adversities, and foreboding reverses of the splendid success of her sons, she was prepared for all that followed. After the downfall of Napoleon, Letizia lived with her stepbrother, Cardinal Fesch, in winter at Rome, and in summer at Albano, and submitted to her change of fortune with remarkable dignity. She died in 1836, leaving a considerable property, the result of saving habits

during her prosperity.

JOSEPH BONAPARTE, eldest brother of Napoleon, was born at Corte, in Corsica, in 1768. After the coronation of Napoleon Joseph Bonaparte was made commander-in-chief of the army of Naples; in 1805, ruler of the Two Sicilies; and in 1806, King of Naples. In 1808 Joseph Bonaparte was sum-marily transferred by his brother to the throne of Spain, and Murat took his place as King of Naples. For Jo-seph, this was no favorable change; he found himself unprepared to cope with the Spanish insurgents, and after the defeat of the French at Vittoria in 1813, he returned to his estate at Morfontaine, in France. After Waterloo Joseph sailed to the United States,

culture, and was highly esteemed by his neighbors. In 1832 he returned to Europe, and he died at Florence in 1844.

LUCIEN BONAPARTE, Prince of Canino, and brother of Napoleon, was born at Ajaccio in 1775, and received his education in the college of Autun, the military school at Brienne, and the seminary at Aix. Lucien was a Republican in opinion, and, therefore, opposed to the absolute rule of his brother; and his second marriage to the widow of a stockbroker did not improve their relations. On condition that he would divorce his wife, the crowns of Italy and Spain were offered him; but he refused them, and preferred living in retirement at his estate of Canino, in the Province of Viterbo, near the frontiers of Tuscany, where he devoted his time to art and science. Here he enjoyed the friendship of the Pope, who created him Prince of Canino and Musignano: but, having denounced in his private capacity the arrogant and cruel policy of his brother toward the Court of Rome, he was advised to leave the city in which he was at that period residing. In 1810 he took ship for America, but fell into the hands of the English. After the defeat at Waterloo, Lucien Bonaparte alone seems to have preserved his presence of mind. He immediately advised his brother to dissolve the Chambers, and assume the place of absolute dictator. After the second ascent of the throne by Louis XVIII., Lucien lived in and near Rome, and died at Viterbo in 1840.

LOUIS BONAPARTE, third brother of Napoleon, born in 1778, was educated in the artillery school at Chalons, where he imbibed anti-Republican principles. After rising from one honor to another he was made King of Holland in 1806; but, in fact, was never more than a French Governor of Holland, subordinate to the will of his brother. Yet he seems to have done his best to govern in the interests of his Dutch subjects, and when he found his efforts useless, he resigned in favor of his son in 1810. He returned to Paris in 1814, where he was became an American citizen, and lived coldly received by the Emperor. After for some years at Bordentown, N. J., living for some years in Rome—where he employed himself in agri- where he separated from his wite—

1

he removed in 1826 to Florence, where he lived in retirement. He died at Leghorn in 1846.

The amiable and accomplished Hortense Eugenie Beauharnais, the adopted daughter of Napoleon, Queen of Holland and Countess St. Leu, was born at Paris in 1783. She became the wife of Louis Bonaparte, Napoleon's third brother, and their son, Charles Louis Napoleon, became Emperor of the French as Napoleon the Third. She cied at Arenenberg in 1837, and was buried near the remains of her mother, Josephine, at Ruel, near Paris.

JEROME BONAPARTE, youngest brother of Napoleon, was born at Ajaccio in 1784. After receiving his education in the college at Juilly, he served as naval lieutenant in the expedition to Haiti. When war broke out between France and England in 1803, Jerome was cruising off the West Indies, and was compelled to take refuge in the port of New York. While in the United States he married Elizabeth Patterson (1785-1879), daughter of a merchant in Baltimore. He fought in the war against Prussia, and in 1807 was made King of Westphalia. His administration of his kingdom was careless, extravagant, and burdensome to his subjects. The battle of Leipsic brought the reign of Jerome to a close. He fought by the side of the Emperor at Waterloo. After his brother's ab-dication he left Paris and visited Switzerland and Austria, but ulti-mately settled in Florence. At the outbreak of the February Revolution (1848), Jerome Bonaparte was in Paris, where he was appointed Gover-nor of the Invalides, and in 1850 was made a French marshal. He died in

His marriage with Elizabeth Patterson having been declared null by Napoleon, Jerome was forced, after he had gained the Westphalian crown, to marry Catharine, daughter of King Frederick I. of Wurtemberg. After the battle of Waterloo, her father wished to annul the marriage; but she declared her resolution to share through life the fortunes of her husband. Jerome Bonaparte left in the United States one son, Jerome Napoleon (1805–1870), by his first marriage, who was a wealthy resident,

though he never became a naturalized citizen. He left two sons, (1) JEROME NAPOLEON BONAPARTE, born in Baltimore, in 1832. He served with credit in the United States and French armies. (2) CHARLES JOSEPH BONAPARTE, b., 1851; died, 1921; graduated in law at Harvard; became a prominent public man; U. S. Sec. of Navy 1905; and in 1906 U. S. Atty. Gen. By his second wife, Jerome Bonaparte had three children. Of the Emperor Napoleon I. and his brothers, Joseph and Louis, male issue is now extinct. The Emperor's brothers, Lucien and Jérome, are represented by living descendants. (See NAPOLEON).

Bonar, Horatius, a celebrated Scotch hymnist, born in Edinburgh, Dec. 19, 1808; wrote "Hymns of Faith and Hope," many of which have been taken into the hymnals of most of the Protestant Churches. He also wrote more than 20 volumes on theological and religious subjects. He died July 31, 1889.

Bonaventura, St., an Italian friar of the Order of St. Francis, born in Tuscany in 1221. He died July 15, 1274, from sheer ascetic exhaustion.

Bona Vista, a bay, cape, and town on the E. coast of Newfoundland. The town is a port of entry, and one of the oldest settlements in the island.

Bonchamp, Charles, Marquis de, a Vendean leader, was born in Anjou, May 10, 1760. He served as a volunteer in the American Revolutionary War, and was a captain in the French army at the outbreak of the French Revolution. A strong Royalist, he naturally disliked the Revolution, and consequently lived in retirement until chosen leader of the Anjou insurgents. In the encounter at Cholet, Oct. 17, 1793, Bonchamp received a fatal shot in the breast, and when his followers vowed to revenge his death on 5,000 Republican prisoners, the dying hero exclaimed: "Spare your prisoners. I command it!" This, his last command, was obeyed.

Bond, a written acknowledgment or binding of a debt under seal. The person who gives the bond is called the obligor, and he to whom it is given the obligee.

Bond, in masonry, a stone or brick which is laid with its length across a wall, or extends through the facing course into that behind, so as to bind

the facing to the backing.

Bond, George Phillips, an American astronomer, born in Dorchester, Mass., May 20, 1825; a son of Wil-lian Cranch Bond; assisted his father in the Harvard College Observatory, and at the time of the latter's death was appointed director. He discovered independently 11 new comets, and was the author of an elaborate me-moir on the appearance of Donati's comet in 1858. Died Feb. 17, 1865.

Bond, Sir Robert, an English colonial statesman; born in Torquay, England, Feb. 25, 1857; was educated for the bar, but early entered political life; became premier and colonial secretary of Newfoundland in 1900; was long conspicuous in international negotiations concerning the Newfoundland fisheries; and concluded the Bond-Blaine convention in 1890 and the Hay-Bond treaty, which the United States Senate rejected, in 1902.

Bond, William Cranch, an American astronomer, born in Port-land, Me., Sept. 9, 1789; began life as a watch maker, and constructed the first ship's chronometer made in the United States. He established a private observatory at Dorchester, Mass., which was at the time the finest in the country. Invited to move his observatory to Cambridge, he accepted the invitation of the Harvard College authorities, and in 1840 was appointed Astronomical Observer to the university, and later to the directorship of the observatory erected there in 1843-1844. He was the inventor of the method of registering the beats of a clock by galvanic circuit, together with the observed transits of stars over the wires of a transit instrument, upon a chronograph, and he invented the spring governor, which bears his name, for controlling the motion of the chronograph barrel. His most important work was in connection with the determination of longitudes, both of points in the United States from the Harvard College Observatory, and that of the observatory itself from Greenwich by the observation of a portant fertilizers in agriculture. The vast number of ocultations of stars by value of bones as manure arises chief-

the moon, both at 'Dorchester and Cambridge. He died Jan. 29, 1859.

Bonded Warehouses, places where taxable imports or manufactures may be left in government custody, under bond for payment of the duty, till the importer or manufac-turer is prepared to make full pay-ment of duty.

Bondi, Clemente, one of the most popular poets of modern Italy; born in Mizzano, in the duchy of Parma, June 27, 1742; died in Vienna, June

20, 1821.

Bone. The bones are the hardest and most solid parts of animals; they constitute the frame, serve as points of attachment to the muscies, and afford support to the softer solids. They are the instruments, as muscles are the organs, of motion. In the mam-malia, birds, fish, and reptiles, the whole system of bones united by the vertebral column is called the skeleton.

Bone, or Bona, a town and sea-port of Algiers, 85 miles N. E. of Constantine, at the mouth of the Seybouse river. It is built on the site of Aphrodisium, the port of ancient Hippo. The Vandals having destroyed Aphrodisium, an Arab town arose on its ruins. The city having outgrown its former limits, the present ramparts are beyond the old walls. Bone has been modernized to some extent, many old buildings being removed to make room for new ones. The surface is irregular and some of the streets steep. There are mosques, a cathedral and other churches and a synagogue.

Bone Ash, ash made of calcined bones.

Bone Bed, in geology, a bed containing numerous fragments of fossil bones, teeth, etc.

Bone Back, animal charcoal. is obtained by charring bones. It has the power of absorbing gases, removing the coloring matter and alkaloids, etc., from their solutions. It is used to disinfect ulcers, etc., also to decolorize sugar and other organic sub-stances; its properties can be re-stored by heating it to redness in closed vessels.

Bone Manure, one of the most im-

ly from the phosphates and nitrogenous organic matters they contain. It is of most service, therefore It is of most service, therefore, where the soil is deficient in this respect, or in the case of crops whose rapid growth or small roots do not enable them to extract a sufficient sup-ply of phosphate from the earth, turnips, for instance, or late sown oats and barley.

Boner, John Henry, an American poet and literary worker, born at Salem, N. C., Jan. 31, 1845.

Boneset, or Thoroughwort, useful annual plant, indigenous to the United States, and easily recognized by its tall stem, 4 or 5 feet in height, passing through the middle of a large, double, hairy, leaf, and surmounted by a broad, flat head of light purple flowers. It is much used as a domestic medicine.

Bongabong, a town in the S. E. part of Luzon, Philippine Islands, with an estimated popplation of 20,-000. It lies in a mountainous district, and attained military importance as the headquarters of a regiment of United States troops. The town has a municipal government based upon popular election.

Bonheur, Rosa, (properly Marie Rosa), celebrated French artist and painter of animals was born at Bor-deaux, March 22, 1822. She received deaux, March 22, 1822. She received early tuition from her father, a drawing teacher, and when only 18 years of age, exhibited at the Salon, two pictures, "Goats and Sheep," and "Two Rabbits eating Carrots." Among her famous pictures are, "Ploughing in the Nivernais," "Haymaking in Auvergne," "The Normandy Horse Fair," and "Deer in the Forest" (the last two in the Metropolitan Museum of Art, New York city). She died at By, May 25, 1899.

Boulface, St., a saint of the Ro-

Boniface, St., a saint of the Roman calendar, and a native of England, who was sent by Gregory II. to convert the Germans. Gregory III. made him an archbishop. Born in Devonshire in 680, slain by some peasants in Friesland, in 755. His letters were printed in 1616.

Bonington, Richard Parkes, an English painter in oil and water colors, born near Nottingham. Oct. 25, 1801. He died Sept. 23, 1828.

Bonivard, or Bonnivard, Francois de, cadet of a family holding large possessions under the House of Savoy, was born about 1496 at Seyssel, on the Rhone, and in 1513 became prior of St. Victor at Geneva. Falling under the suspicion of the Duke of Savoy, he was taken prisoner by him in 1519. After 20 months' imprisonment he was set free, but in 1530 he was again seized, and taken to the castle of Chillon at the E. end of the Lake of Geneva, where he was imprisoned for six years, the last four in that subterranean vault which the genius of Byron has made famous by his poem on the sufferings of "The Prisoner of Chillon." He died in 1570, leaving the town his books, which were the nucleus of the Geneva. library.

Bonn, a German town in the Rhenish Province of Prussia, beautifully situated on the left bank of the Rhine, with magnificent promenades and prospects in the environs. It has some trade and manufactures, but is chiefly important for its famous university, founded in 1777 by Elector Maximilian Frederick of Cologne, and for its cathedral, which has a crypt of the 11th century and mediæval wall paintings. Enlarged and amply endowed by the King of Prussia, in 1818, the university is now one of the chief seats of learning in Europe, with a library of more than 200,000 volumes, an anatomical hall, mineralogical and zoological collections, museum of antiquities, a botanical gar-den, etc. The teachers in the five faculties number about 150, and the students nearly 2,000. Lange, Niebuhr, Ritschl, Brandis, and other names famous in science or literature are connected with Bonn, and Beethoven was born here. Bonn was long the residence of the Electors of Cologne, and finally passed into the hands of Prussia by the arrangements of the Congress of Vienna, in 1815. Pop. (1921 Est.) 91,410.

Bonner, Edmund, an English prelate of infamous notoriety, was born about 1495, of obscure parentage. He took a doctor's degree at Oxford, in 1525, and, attracting the notice of Cardinal Wolsey, received from him several offices in the church. On the dealth of Wolsey he acquired the favor

of Henry VIII., who made him one of his chaplains, and sent him to Rome to advocate his divorce from Queen Catharine. In 1540 he was consecrated Bishop of London, but on the death of Henry (1547), having refused to take the oath of supremacy, he was deprived of his see and thrown into prison. On the accession of Mary he was restored to his bishopric, and he distinguished himself during this reign by a persecution of the Protestants, 200 of whom he was instrumental in bringing to the stake. After Elizadeath in 1569.

Bonner, Robert, an American publisher, born near Londonderry, Ireland, April 28, 1824. He came to the United States in early youth, and nearned the trade of a printer, In 1844 he removed to New York, and, in 1851, purchased the "Ledger," then an insignificant paper. He made it remarkably successful. As a result he became very rich, and gratified his taste for fast horses by purchasing the most celebrated trotters in the world, though withdrawing them from learned the trade of a printer, In 1844 he removed to New York, and, in 1851, purchased the "Ledger," then world, though withdrawing them from the race course. Among these are "Peerless," "Dexter," "Maud S.," "Peerless," "Dexter," "Maud S.," America; died in 1848.

Which he bought from William H. Bonpland, Aime, a French bovening 2.0934, which he afterward reduced to 2.0834, and "Sunol." He made large gifts of money to Princer ton University and was widely known for his many benefactions. He retired from active control of the "Leddidition he collected upward of 6.000 plants previously unknown, and on

still worn by the Scotch Highlanders.

Bonneville, Benjamin L. E., an He afterward set died in 1858.

Ronsal. Ster American soldier and explorer, born in France, in 1793; explored in the Rocky Mountains and California; delberg. In the Bulgarian-Servian fought in the Mexican War; was

wounded at Churubusco; served as superintendent of barracks and recruiting officer in Missouri during the Civil War of 1861-1865. He died in 1878.

War of 1861–1863. He died in 1878.

Bonney, Charles Carroll, American lawyer, born at Hamilton, N. Y.,
Sept. 4, 1831; finished his studies at
Colgate University, which gave him
the degree LLD. After a teaching
and lecturing career in Illinois, aiding in the establishment of the State's ing in the establishment of the State's educational system, he joined the Illinois bar in 1852. He was president of the International Law and beth succeeded he remained unmolest- Order League (1885-93); president of ed until his refusal to take the oath the World's Congress Auxiliary of the of supremacy, on which he was com- Chicago Columbus Exposition (1893); mitted to the Marshalsea (1560), and president of the World's Religi-where he remained a prisoner until his ous Parliament Extension. He died in 1903.

Bonnivard. See BONIVARD. Bonnycastle, Charles, an Anglo-American mathematician, born in Woolwich, in 1792. He was Professor of Mathematics at Woolwich Military

neer, born in 1791; spent the greater part of his life in British North America; died in 1848.

tired from active control of the "Led-dition he collected upward of 6,000 ger" in 1887, giving it into the hands plants, previously unknown, and on of his sons. He died in New York city, July 6, 1899. He prided himself city, July 6, 1899. He prided himself on the facts that he had never raced a horse for money, never made a bet, never borrowed a dollar, and never gave a note in his life.

He prided himself made Director of the Catalens at Nation had proceeded to South America, and became Professor of Natural History at Buenos Ayres. Subsequently, tory at Buenos Ayres. Bonnet, a head dress; a dress or covering for the head worn by women; a cap or head covering, much used before the introduction of hats, and still worn by the Scotch Highlander.

He afterward settled in Brazil where

War he was special correspondent of In 1542 a Committee of Convocation the New York "Herald," serving in was appointed whose work, a litany, the same capacity in Macedonia and Cuba. He served as Secretary of Legation of the United States in Pekin, Madrid, Tokio, and Korea in 1891-6; appointed Commissioner of Utilities in the Philippines in 1914. Special mission to Germany and Bohemia, 1919.

Bontebok, an antelope of South Africa, allied to the blesbok.

Bonzano, Giovanni, Apostolic Delegate to the United States, born in Vigevano, Province of Pavia, Italy, Apostolic 1890; served as vicar-general of the diocese of Vigevano; appointed a Papal domestic prelate in 1904, rector of the Pontifical Urban Callerian Rome in 1906, and Apostolic Delegate to the United States, Feb. 1, 1912; and consecrated Archbishop of Militene, Mar. 1913. Died Nov. 26, 1927.

Booby, (Sula fusca), a swimming bird allied to the gannet, and so named by early mariners, owing to the stupidity with which it allowed itself to be killed without attempting to escape.

Book Binding, the art of stitching or otherwise fastening together and covering the sheets of paper or similar material composing a book.

Bookkeeping, the art of keeping books in which pecuniary transactions are so unremittingly and so accurately entered that one is able at any time to ascertain the exact state of his financial affairs, or of any portion of them, with clearness and expedition. It is generally divided into bookkeeping by single and bookkeeping by double entry. In the former every entry is single, i. e., is placed to the debit or credit of a single account, while in the latter it is double, that is, it has both a debtor and creditor account. In other words, by single entry each transaction is entered only once in the ledger, and by double entry twice.

Book of Common Prayer, the book that forms the liturgy of the Church of England. It is a development from the "Breviary Missal" and "Manual" compiled in the 11th century by Osmund, Bishop of Salis-bury. A revision of the "Breviary"

was appointed whose work, a litany, in English, was issued in 1544. In 1547 Cranmer's rendering of the "Missal" into English appeared as the "Order of Communion". In 1548 the "Order of Communion." In 1548 the first version of the present "Book of Common Prayer" was reported to the common Frayer was reported to the convocation and adopted by Parliament, as a part of the Act of Uniformity of 1548-1549. A second revision was sanctioned by Parliament in 1552. in 1552. This was repealed by Queen Mary, and restored by Elizabeth, with changes in 1559. The Puritans supence of 1661 modified it by concession to the Puritans. It was adopted in Ireland in 1662 and has since been used by the Anglican Church, in its various branches. It consists of va-rious tables, Morning and Evening Prayers, the Litany, Prayers and Thanksgivings, Collects, Epistles and Gospels chosen in accordance with the Church calendar, Order of Communion and other special services, as Matrimony, and Burial of the Dead, the Catechism, the Psalter services connected with the imposition of the clerical and lay offices, and Articles of Religion. The "Prayer Book" of the Protestant Episcopal Church of the United States is a revision of the Anglican book, authorized in 1789, and revised again, 1886-1893.

Book of Martyrs, a history of the persecution of Reformers in England, by John Fox.

Book of Mormon, a book forming the authoritative scriptures of the members of the Church of Jesus Christ of Latter-Day Saints. Joseph Smith, an American, of Manchester, N. Y., professed to have heard in 1823 the Angel Moroni reveal to him in visions that the Bible of the Western Continent was buried in a box near his resi-This, according to his own dence. account, he at length found - a volume six inches thick, with leaves of thin gold plate, eight inches long by seven broad, bound together with three gold rings; on which leaves was a mystic writing that he characterized as reformed Egyptian. With the book he professed to have found a pair of was made in 1516, by order of Cardi-nal Wolsey, and it was again revised in 1531, and the "Missal" in 1533.

which he dictated to an amanuensis. This book consists of an alleged history of America from 600 B. C., when Lehi and his family (descended from the dispersion after the building of the Babel tower) landed in Chile. Between the descendants of Nephi, Lehi's youngest son, and the offspring of his older brothers, who are the North American Indians, long conflicts were waged; the Nephites finally being almost annihilated. There remained a fragment, among whom were Mormon and his son, Moroni. They collected the records of their people, and bur-ied them in the hill of Cumorah, on the Divine assurance that they would be found by the Lord's prophet. Besides this history, the book, as it finally was received, has various moral and religious teachings.

Bookplate, an English name for labels of ownership frequently placed on the inside covers of books.

Bookworm, any grub which feeds on the paper of books. Most people are familiar with the effects of the bookworm's ravages; but the creatures are extremely rare in the United States, especially since so many chemical substances have been introduced into the manufacture of paper. In the United States books in libraries, though usually free from the ravages of the bookworm, are intested and damaged by a small cockroach.

Boom, a beam, tree, or pole. In navigation, a long pole run out from any part of a ship to stretch the foot of any particular sail; whence, jib boom, main boom, studdingsail boom, etc. In fortification, in marine defenses, a strong chain or cable stretched across the mouth of a river or harbor, to prevent the enemy's ships from entering, and having a number of poles, bars, etc., fastened to it; whence the name; as, to cut or burst the boom. In navigation, a pole set up as a sea mark to point out the channel to seamen, when navigat-ing in shallows. The word is also applied to a hollow, roaring sound; as the boom of a cannon; the reverberating cry of the bittern; and likewise to a sudden rise in the market value of

as, a real estate boom, a political boom; a boom in sugar.

Boomerang, a missle weapon invented and used by the native Australians, who are generally deemed the lowest in intelligence of any tribe or race of mankind. It is a curved stick, round on one side and flat on the other, about three feet long, two inches wide, and three-quarters of an inch thick. It is grasped at one end and thrown sickle-wise, either upward into the air, or downward so as to strike the ground at some distance from the the ground at some distance from the thrower. On throwing it downward to the ground, it rebounds in a straight line, pursuing a ricochet motion until it strikes the object at which it is thrown. The most singular curve described by it is when it is thrown at an angle of about 45° is thrown at an angle of about 45°.

Boone, city and capital of Boone county, Ia.; on the Chicago & Northwestern and other railroads; 37 miles W. of Des Moines; is in a fire and pottery clay section; has large milling, manufacturing, and coal mining interests; and contains extensive railroad and machine shops.

(1930) 11,886.

Boone, Daniel, the pioneer of Kentucky, born in Bucks county, Pa., Feb. 11, 1735. He was a Colonel in the United States service, and signalized himself by his many daring exploits against the Indians, and also by his extensive surveys and explorations his extensive surveys and explorations of the State of Kentucky. In 1793 he removed to Upper Louisiana, then belonging to the Spaniards, and was appointed by them commandant of a district there. He was one of the most successful of the enterprising American pioneers of the 18th century, and may be said to have explored and aided in the settlement of plored and aided in the settlement of the country from the Alleghany Mountains to the frontier of Missouri. Many places have been named in his honor. Died in Missouri, Sept. 26, 1820.

Boot, an article of dress, generally of leather, covering the foot and extending to a greater or less distance up the leg. Hence the name was given to an instrument of torture made of iron, or a combination of iron and wood, fastened on to the leg, between real estate, stocks or commodities; an which and the boot wedges were inenthusiastic popular movement in troduced and driven in by repeated favor of any person, cause or thing; blows of a mallet, with such violence as to crush both muscles and bones. The special object of this form of torture was to extort a confession of guilt from an accused person.

Bootes. In astronomy, a constellation called also Arctophylax, or the Bear river. It contains 54 stars, including 1 of the first magnitude, Arcturus, 7 of the third, and 10 of the fourth.

Booth, Ballington, General of the Volunteers of America, born in Brighouse, England, July 28, 1859. He is a son of Gen. William Booth, founder of the Salvation Army, with which body he was officially connected until 1896, when he seceded and founded the Volunteers, a religious military body organized in the interest of the unchurched masses. His wife, MAUDE, has ably seconded her husband's efforts, and is very popular on the lecture platform.

Booth, Barton, an eminent English actor, born in 1681; died in 1733.

Booth, Thomas, Edwin American actor, born near Belair, Md., Nov. 13, 1833; the fourth son of Junius Brutus Booth. When 16 years of age, he made his first appearance on the stage, in the part of Tressel, his father acting as Richard III. Two years later he himself successfully assumed the part of Richard in place of his father, who unexpectedly refused to fulfill an evening's en-gagement. The following year the two went to California, where the son remained for several years, visiting Australia meanwhile. Meeting with little pecuniary success, in 1856, he returned to the Atlantic States, and from that time forward was recognized as a leading member of his profession. He visited England (1861-1862), and in 1864 produced "Ham-let" at New York for 100 nights conlet" at New 10rk for 100 hights con-secutively. In 1869 he opened a splendid theater in New York, whose building cost over \$1,000,000, but which involved him in pecuniary ruin. He revisited California in 1876, and in the spring of 1877 was able to settle with his creditors, having earned during the season over \$600,000. Booth visited Great Britain and Germany in 1880-1882, and was every-where received with enthusiasm. He died in New York, June 7, 1893.

Booth, John Wilkes, an American actor, born in Hartford county, Md., in 1838; another son of JUNIUS BRUTUS BOOTH. He sided with the Confederates in the Civil War, and to avenge the defeat of their cause he formed a conspiracy against the life of President Lincoln. He mortally wounded the President, while the latter was attending a performance in Ford's Theater, in Washington, on April 14, 1865; broke his own leg in escaping from the building; and concealed himself in Virginia till the 26th, when, on being discovered, and refusing to surrender, he was shot.

Booth, Junius Brutus, an Anglo-American tragedian, born in the parish of St. Pancras, London, May 1, 1796. He received a classical education, but early manifested a predilection for the stage, and when 17 years of age appeared in some unimportant parts. Subsequently he played Richard III., at Covent Garden, a part in which he suddenly became famous. In 1821 he went to the United States, where for the ensuing 30 years he followed his profession with much success. He died suddenly on board a Mississippi river steamer, Nov. 12, 1852.

Booth, Mary Louise, an American journalist and author, born in Yaphank, Long Island, N. Y., April 19, 1831; was widely known as the editor of "Harper's Bazar," which place she held from 1867 till her death in New York city, March 5, 1889.

Booth, William, founder and General of the Salvation Army, was born at Nottingham, England, April 10, 1829, was educated there, and from 1850 to 1861, acted as minister of the Methodist New Connection. From the first he was zealous in holding evangelistic services, but the new departure which led to the creation of the Salvation Army on military lines began ir 1865 with mission work among the lower classes in the East End of London. Since 1878 Booth's movement has been known as the Salvation Army, of which he had continued to be the mainspring and controlling power, directing its movements at home and abroad from his headquarters in London. His enthusi-

asm and wonderful organizing power gave much life to the religious military system, of which he was really "general." The Salvation Army property was held for its exclusive use by Booth.

Booth, (William) Bramwell, religious worker and author, son of preceding, born, Halifax, Mar. 1856, General of the Salvation Army, 1912— 1929, after 34 years service as an officer in the Salvation Army. Deposed 13 Feb. 1929, because of failing ability to handle his work, succeeded by Edward J. Higgins, but retained title and honors of office. Died June 16,

Moss, Booth-Tucker, Emma daughter of William Booth of the Salvation Army, and wife of F. St. George Booth-Tucker, was born in 1860, and died in Oct. 1903, the victim of a railway accident. She held the rank of Consul, and with her husband, directed the army in the United States.

Booth-Tucker, Frederick St. George de Lauter, commander of the Salvation Army in the United States, was born in India, in 1853. He held important official posts in India, but resigned them in 1881 to join the Salvation Army. Upon his marriage with Emma Moss Booth, daughter of Gen. William Booth of the Salvation Army, he prefixed Booth to his own name of Tucker. In 1896 he became commander of the United States branch of the Salvation Army.

Bora, Katharina von, wife of Luther, was born in 1499. She took the veil early; but feeling unhappy in her situation, applied, with eight other nuns, to Luther. The nuns were re-leased from their convent, and, in 1525, Luther married her, having himself by this time laid aside the cowl. After Luther's death she kept boarders for her support. Died, 1552.

Borax, the anhydroborate of sodium, forms large transparent six-sided prisms, which dissolve readily in water, effloresce in dry air, and when heated melt in their water of crystallization, swell up, and finally fuse to a transparent glass. Borax dissolves metallic oxides which frequently impart to it characteristic colors. Empart to it characteristic colors. Employed in soldering metals, as it removes films of oxide, and leaves the metals in metallic contact with each other and with the solder. It is present Fall River, Mass., Jan. 29,

also employed in making fine glaze for porcelain, as it renders the materials more fusible. In medicine it is employed in ulcerations and in skin diseases.

Borchgrevink, Carsten Egebert, a Norwegian explorer and lecturer, born in Christiania, in 1864, his mother being English and his father a Scandinavian. He went to sea at an early age, but returned to go to college. In 1898 he went to Australia, joined the Survey Depart-ment, and scaled Mount Lindsay. In 1894-1895 he was in Antarctic waters, a region fully explored by him in 1897, when he attempted to reach the South Pole without success. In 1899 (Feb. 17) he had, however, reached Robertston Bay. Returning to London in 1900 he reported having reached lat. 78.50 S., long. 195.50 E. In 1902 he investigated volcanic conditions at St. Pierra ditions at St. Pierre.

Bordeaux, a city and port of France, capital of the Department of Gironde, on the Garonne river, about 70 miles from the sea. It is built in a crescent form round a bend of the river, which is here lined with fine quays and crossed by a magnificent stone bridge, and consists of an old and a new town. The former is mostly composed of irregular squares and narrow, crooked streets; while the latter is laid out with great regularity, and on a scale of magnificence hardly surpassed by any provincial town in Europe. The chief exports are wine and brandy; sugar and other colonial produce and wood are the chief imports. Shipbuilding is the chief industry, and there are sugar refineries, woolen and cotton mills, potteries, soap works, distilleries, etc. On Sept. 2, 1914, when the Germans were attempting the capture of Paris, the French government removed to Bordeaux. See Appendix: World

War. Pop. (1921) 267,409.

Borden, Robert Laird, a Canadian statesman; born in Halifax, N. S., in 1854; engaged in law practice; elected to the Dominion Parliament, 1896; became Conservative leader, 1901; succeeded Sir Wilfred Laurier

1798. He instructed himself in mathematics and devised successful surveying instruments. The first American geodetic survey was his work. In 1846 he began the construction of railroads. He died in Fall River, Oct. 28, 1856.

Bordentown, a city in Burlington co., N. J., on the Delaware river, the Delaware and Raritan canal, and the Pennsylvania railroad; 57 miles S. W. of New York city. It is noted as being a former residence of Joseph Bonaparte, brother of Napoleon I. and for many years the house and grounds belonging to the estate possessed much

interest. Pop. (1930) 4,405.

Bore, or Eagre, a sudden influx of the tide into the estuary of a river from the sea, the inflowing water ris-ing to a considerable height and advancing like a wall against the current. Chief among American bores are those of the rivers emptying into the Bay of Fundy; in Europe the eagres of the Severn and Trent, England; and the mascaret of the Seine, France. See also EAGRE.

Bore, in metallurgy, a tool bored to fit the shank of a forged nail, and adapted to hold it while the head is brought to shape by the hammer. The depression in the face of the bore is adapted to the shape required of the chamfered under part of the head. The word is also applied to the cavity of a steam engine cylinder, pump bar-rel, pipe, cannon, barrel of a firearm,

Boreas, a bellowing wind; the Northern wind; a cold, Northerly wind. In mythology, the son of Astræus and Eos, usually worshipped as the god of the North Wind. The assiduity with which the worship of Boreas was cultivated at Athens proceeded from gratitude, the North Wind. having on one occasion destroyed the fleet of the Persians when meditating the invasion of Attica. A similar cause induced the inhabitants of Megalopolis to consider Boreas as their gatopoins to consider Boreas as their peculiar divinity, in whose honor they instituted an annual festival. Boreas was usually represented with wings dripping with golden dewdrops, and the train of his garment sweeping along the ground.

Borghese, a Roman family, which derives its origin from Sienna, and maintain that the charges against her

which held the highest offices in this republic from the middle of the 15th century. Pope Paul V., who belonged to this family, and ascended the papal chair in 1605, loaded his relations with honors and riches.

Borghese, Princess Marie Pauline, the beautiful sister of Na-poleon; born in Ajaccio, Oct. 20, 1780. She died in Florence, June 9, 1825. She left many legacies, and 3 donation, the interest of which was to donation, the interest of which was to enable two young men of Ajaccio to study medicine and surgery. The rest of her property she left to her brothers, the Count of St. Leu and the Prince of Montfort. The whole property amounted to 2,000,000 francs.

Borgia Cesare, the natural son of Pope Alexander VI., and of a Roman lady named Vanozza, born in 1478. He was raised to the rank of Cardinal in 1492, but afterward divested himself of the office, and was made Duc de Valentinois by Louis XII. In 1499 he married a daughter of King John of Nayarre and accommend the control of King John of Navarre, and accompanied Louis XII. to Italy. He then, at the head of a body of mercenaries, carried on a series of petty wars, made himself master of the Romagna, at-tempted Bologna and Florence, and had seized Urbino when Alexander VI. died, 1503. He was now attacked by died, 1503. He was now attacked by a severe disease, at a moment when his whole activity and presence of mind were needed. He found means, indeed, to get the treasures of his father into his possession, and assembled his troops in Rome; but enemies rose against him on all sides, one of the most bitter of whom was the new Papa Inlins II. Borgia was arrested Pope, Julius II. Borgia was arrested and carried to Spain. He at length made his escape to his brother-in-law, the King of Navarre, and was killed before the castle of Viana, March 12, 1507. He was charged with the mur-der of his elder brother, of the husband of his sister Lucretia, and the stiletto or secret poisoning was freely used against those who stood in his way. With all his crimes he was a patron of art and literature.

Borgia, Lucretia, daughter of Pope Alexander VI., and sister of Cesare Borgia, was born in 1480. She was accused of almost every species of crime; but several modern writers

E.-12.

are false or much exaggerated. She patronized art and literature. She died in 1523.

Boring, a process in mechanical and engineering operations, variously performed according to the medium dealt with.

Bornemann, Wilhelm, a Low German dialect poet, born in Gardelegen in 1766. He is one of the foremost representatives of modern Low German poetry. He died in 1851.

Borneo, an island, next to Australia and Papua, the largest in the world, is situated in the Indian Archipelago. It is bounded on the E. by the Sea of Celebes and the Macassar Strait, S. by the Sea of Java, W. and N. by the Gulf of Siam and the China Sea. Of the estimated total area of 289.846 square miles and pop. of 1,940.726. Great Britain claims an area of 31.106 square miles and pop. of 257.804. and the Netherlands an area of 206.810 square miles and pop. of 1,682,922.

British Borneo is north of the Madei Mountains; Dutch Borneo to the south. The lowlands are malarious and unhealthful; the north highlands temperate. Nutmegs, cloves, cinnamon, pep-per, betel, ginger, rice, millet, sweet potatoes, yams, cotton in Amuntai, sugar cane in Sambas and Montrado, indigo, tobacco, coffee in Sambas, pineapples, coconnuts, etc., are cultivated. The mountains and forests contain many monkeys, among which is the orang outang. Tapirs, a small kind of orang outang. Tapirs, a small kind of tiger, small Malay bears, swine, wild oxen or banteng, and various kinds of deer abound. The elephant is only found in the N., and the rhinoceros in the N. W. The few domesticated animals are buffaloes, sheep, goats, dogs, and cats. A few horses are seen in Banjermassin. Among the birds are eagles, vultures, argus pheasants, peacocks, flamingoes, pigeons, parrots, and also the swifts, which construct the edible nests prized by the Chinese for making soup. The rivers, lakes, and lagoons swarm with crocodiles, and many kinds of snakes, frogs, lizards, and leeches. Fish is plentiful, and the coasts are rich in tortoises, pearl mussels, oysters, and trepang. Brilliant butterflies and moths are in especially in Montrado; antimony, iron, tin, platina, nickel, diamonds and other precious stones, rock crystals, porcelain clay, petroleum, and sulphur. The diamond mines are chiefly in Landak and Pontianak; Sambas produces the greatest quantity of gold; the kingdom of Brunei, Kutei, and Banjermassin, the largest amount of coal. The Pengaron coal field, worked by the Dutch Government, is one of the most important.

important. The population consists of three classes, the Dyaks or Dayaks, who are the aboriginal heathen inhabitants. and constitute the great bulk of the population; the Mohammedans or Malays—for this name is extended so as to include all professors of Islam, whether true Malays, Buginese, Javanese, Dyaks, or Arabs; and the Chinese. The Dyaks live chiefly in the interior, and employ themselves with tillage and the collecting of gutta percha, resin, gums, rattans, gold dust, and wax. They are divided into nu-merous tribes. The Malays (taking the name ethnographically) dwell on the coasts, are traders and bold sail-They are more civilized than the Dyaks, cultivate the grounds around their houses, lay out gardens, keep cat-tle, and live partly by fishing. The Chinese, chiefly from Canton, have pene-trated far into the interior. The prin-cipal exports are gold, gold dust, diamonds, coal, rattans, gutta percha, edible nests, cotton, wax, timber, dye woods, mats, resins, sandalwood, camphor, etc.; the imports, earthenware iron, steel, and copper work, piece goods, yarns, woolen and silk fabrics medicines, provisions, wines, spirits rice, sugar, tea, tobacco, opium, tre-

pang, gambir, gunpowder, etc.

Bornier, Henri, Vicomte de,
a French dramatist, member of the
Academy, born at Lunel, Dec. 25,
1825. His plays are notable for splendor of diction. He is the author of
several successful novels and romances. He died in 1868.

and lagoons swarm with crocodiles, and many kinds of snakes, frogs, lizards, and leeches. Fish is plentiful, and the coasts are rich in tortoises, pearl mussels, oysters, and trepang. Brilliant butterflies and moths are in great variety. Among the mineral products are coal, gold, and copper,

mail are made both for horses and mail are made both for norses and their riders. The population, which is estimated at about 5,000,000, are mostly of negro race, and called Bornuese or Kanuri. The ruling race, called Shuwas, are of Arab descent and bigoted Mohammedans; but many traces of fetichism remain among the masses. Whatever they have of civil-ization is derived from the Arabs. The shores and islands of Lake Tchad are inhabited by negro pirates. The slave inhabited by negro pirates. The slave trade is eagerly prosecuted in Bornu.

Boro Budor (the "Great Buddha"), the ruin of a splendid Buddhist temple in Java, Kadu Residency, near the junction of the Ello and Progo, is the most elaborate monument of the Buddhist style of architecture anywhere existing. Buddhism was early introduced into Java, and Javanese chronicles place the building of the temple in the beginning of the 7th century; there are no inscriptions, but it was probably finished between 1400 and 1430.

Borodino, a village of Russia, 70 miles W. of Moscow; on the Kaluga, an affluent of the Moskwa. It gave name to the great battle fought between the French army under Napoleon and the Russians under Kutusoff, Sept. 7, 1812. Out of 257,000 men engaged, between 70,000 and 80,000 were killed and wounded. The Russians retreated on the following day, but in the most perfect order, and, therefore, claim this battle as a victory; but the French, who name the battle from the Moskwa, have always maintained a similar claim.

Borough, originally a fortified town. In England, a corporate town or township; a town with a properly organized municipal government. If it sends a representative or representatives to Parliament it is a Parliamentary borough, if not, it is only a muni-cipal borough. The name is given to the five local divisions of the city of New York.

Borromean Islands, a group of four small islands on the W. side of Lago Maggiore, Northern Italy.

Borrow, George Henry, traveler, linguist, and writer on gypsy life, born in Norfolk, England, in 1803. Chief works, "The Bible in Spain," "Lavengro," "The Romany Rye." Died 1881.

Borsippa, a very ancient city of Babylonia, the site of which is marked by the ruins Birs Nimrud.

Boscawen, Edward, a British admiral, son of the first Viscount Falmouth, born in Cornwall, Aug. 19, 1711. His chief exploit was a great victory, in 1759, over the Toulon fleet, near the entrance of the Straits of Gibraltar. He died in Surrey, Jan. 10, 1761.

Bosch Bok, the bush buck, a name given to several South African species of antelope.

Bosch Vark, the bush hog or bush pig of South Africa, one of the swine family, about 5 feet long, and with very large and strong tusks. The Kaffirs esteem its flesh as a luxury, and its tusks, arranged on a piece of string and tied around the neck, are considered great ornaments.

Boscobel, a locality in Shropshire, England, remarkable historically as the hiding place of Charles II. for some days after the battle of Worcester, Sept. 3, 1651.

Bosna-Serai, or Serajevo, the capital of Bosnia, on the Migliazza, 570 miles W. N. W. of Constantinople. It contains a palace, built by Mohammed II., to which the city owes its name. It was formerly surrounded with walls, but its only defense now is a citadel, built on a rocky height at a short distance E. from the town. Bosna-Serai is the chief mart in the province, the center of the commercial relations between Turkey, Dalmatia, Croatia and South Germany, and has, in consequence, a considerable trade, with various manufactures. It was here that the Archduke Francis Ferdinand, heir to the Austrian throne, and his wife, were assassinated on June 28, 1914, by an alleged Servian plotter. The act was the immediate cause of the great war. See APPENDIX: World War. Pop. (1921) 55,-000.

Bosnia, a former Turkish province in the N. W. of the Balkan Peninsula, W. of Servia; with the province of Herzegovina and the sanjak of pies 16,000); pop. (1921) 1,899,929, mostly of Slavonian origin, and mainly speaking the Servian language. The principal religions are Mohammedanism, Catholic and Greek.

Bosnia, in ancient times a part suc-cessively of Illyria, Pannonia and Dalmatia, was during the great migra-tions occupied by Slavs or Slavonized Illyrians, at first dependent on Hungary; but it became a kingdom in 1376, under Tivartko, a native prince. Occupied by the Turks in 1401, it was annexed in 1463, but not recognized by Europe as a Turkish Province till 1699. Extortionate taxation caused a rebellion of the Christians, in 1849, suppressed by Omar Pasha; but a more determined rising in 1875, which the Turks failed to put down, led to the occupation of the Province by the Austro-Hungarians, which the Moslem population opposed in a fierce but un-availing struggle. The Treaty of Berlin formally intrusted the administra-

Bosporus, or Bosphorus, the strait, 19 miles long, joining the Black Sea with the Sea of Marmora, called also the Strait of Constantinople. It is defended by a series of strong forts; and by agreement of the European powers no ship of war belonging to any nation stall pass the Bosporus without the permission of Turkey. Over this channel (about 3,000 feet wide) Darius constructed a bridge of boats on his Ecythian expedition. The Cimmerian Bosporus was the name given by the ancients to the strait that leads from the Black Sea into the Sea of Azov. There was also, anciently, a kingdom of the name of Bosporus, so called from this strait, on both sides of which it was situated.

Boss, an elevated or thickened portion, usually around an aperture, or a swage or stump used in shaping sheet metal. In Gothic architecture it is the protuberance in a vaulted ceiling formed by the junction of the ends of

College, in 1870; astronomer of the Northern Boundary Survey for the de-termination of the line between the W. part of the United States and Britw. part of the United States and Entitle States and honorary foreign associate of the Royal Astronomical Society, in 1890; best known for his work on star declina-tions. He died Oct. 5, 1912.

Bossuet, Jacques, Benigne, illustrious French preacher and theologian, was born in 1627, died in 1704. In 1652 he was ordained priest, and made a canon of Metz. In 1670 he was appointed preceptor to the Dauphin, and in 1681 he was raised to the see of Meaux. He drew up the famous propositions adopted by the assemble of Franch cleary which are sembly of French clergy, which secured the freedom of the Gallican Church tion to Austria-Hungary, the nominal supremacy of the Sultan being recognized in 1879. Since 1918, deputies (one to each 40,000 people) are sent to the Jugo-Slavia Legislature. strength and acumen as a controver-sialist. His wife was largely occupied in controverting Protestantism. His fame rests mainly upon his sermons.

Boston, a city, capital of the State of Massachusetts; the commercial metropolis of New England; and the seventh city in population in the United States according to the Federal census of 1920. It is built at the W. end of Massachusetts Bay, and comprises Boston proper, East Boston, South Boston, Roxbury, Dorchester, Charlestown, Brighton, West Roxbury, and adjoining territory, giving it, in 1925, an area of about 47% square miles. Municipality of Boston, population (1930) 781,188. The metropolitan area includes, in addition to Municipal Boston, 39 adjacent cities and towns, an area of 409.5 sq. mi., and 1,659,000 inhabitants. Old Boston, or Boston proper, occupied a peninsula of about 700 acres of uneven surface, originally containing three hills, known as Bea-con, Copp, and Fort. These hills caused several ribs, and serving to bind them together.

Boss, Lewis, an American astronomer, born in Providence, R. I., Oct.

1846; was graduated at Dartmouth the carly settlers to call the place Trimountain, since changed to Tremont. Boston, East Boston, Charlestown, Carlestown, Charlestown, Cha

two miles along the harbor and separated from Boston proper by an arm arated from Boston proper by an arm of it, is South Boston, containing large railroad docks and warehouses. Several bridges across Charles river connect the city with Charlestown and Cambridge. The harbor is an indentation of Massachusetts bay, embracing about 75 square miles.

Boston is especially noted for its magnificent park system. Among the attractions of the system are the Common, a park of 84 acres in the heart of the city; the Public Garden, separated from it by Charles street, and comprising 22 acres; the Back Bay Fens; the Jamaica Pond; Bussey Park; the Arnold Arboretum; Marine Pork; the City Baint; and the Charles Park at City Point; and the Charles River Embankment. In the Common is a Soldiers' and Sailors' Monument, erected near the site of the famous Old Elm, which was destroyed in a gale in 1876. In the Public Garden are an equestrian statue of Washington, a bronze statue of Edward Everett, a statue of Charles Sumner, one representing "Venus Rising from the Sea," and a monument commemorat-Sea," and a monument commemorating the discovery of ether as an anæsthetic.

The State House stands on Beacon Hill, and is a structure 490 feet long, and 211 feet wide, with a collonnade in front and an imposing gilded dome. Statues of Daniel Webster and Horace. Mann ornament the terrace in front of the building, and within it are statues and busts of a number of the eminent men of Boston and Massachusetts, a collection of battle flags, and a variety of interesting historical articles. The new building of the Public Library, which was occupied in 1895, is one of the six libraries in the U. S. with over 1,250,000 volumes. The Old State-house, erected in 1748, at the head of State street, contains an historical museum in its upper floors, and business establishments in its lower. The City Hall, one of the most striking buildings of the city, on School street, is built of white Con-cord granite in the Italian Renaissance style, and is surmounted by a dome over 100 feet high. What is considered the most interesting building, historically, in the United States, next limits, June 17, 1775. Washington to Independence Hall in Philadelphia, forced the British to evacuate in 1776. is Faneuil Hall, known as "The Cra-The city charter was granted in 1822.

dle of Liberty" erected in 1742, destroyed by fire in 1761, rebuilt in 1768, and remodeled to its present size in 1805. The basement of the building is now used as a market, and the second floor for large public gatherings. Occupying the site of the Old Redoubt on Breed's Hill, in the Charlestown district, is the famous Bunker Hill Monument. In the Charlestown district also is located the United States Navy Yard, which, among other objects of interest, contains the largest rope walk in the country, and an immense dry dock.

Boston is widely noted for the number and high character of its educational institutions. The institutions for higher education include Boston College (Roman Catholic), opened in 1872; Massachusetts Institute of Technology (non-sectarian), opened in 1865; Boston Normal School; Massa-chusetts Normal Art School; Simmons College (women, non-sectarian); Emmanuel College (women Roman Catholic); Boston University (Methodist-Episcopal); Kindergarten Training School, and Training Schools for Nurses at the Almshouse and Hospital, City Hospital, Children's Hospital, Massachusetts General Hospital, Massachusetts Homœopathic Hospital, New England Baptist Hospital, New England Deaconess' Home and Hospital, New England Hospital for Women and Children, St. Elizabeth's Hospital, Somerville Hospital, and Women's Charity Club Hospital.

Boston was settled in 1630, by a party of Puritans from Salem. It was named after a town in Lincolnshire. England, from which most of the colonists had come. In 1632 the first meeting house was erected, and in 1635 a public school was built. In the same year the first grand jury in the country met here. A memorable massacre occurred here in 1770, and in 1773 several cargoes of English tea were thrown overboard in the harbor, by citizens exasperated by the imposition of taxes. During the early part of the Revolution the British were quartered in the town. The battle of Bunker Hill was fought on

and in 1872 a great fire broke out in the business portion of the city and destroyed about 65 acres of buildings. This part of the city was soon rebuilt, and, since then, Boston has been one of the most prosperous cities in the United States.

Boston is the central reserve city of the First Federal Reserve District unyear ended Sept. 30, 1928, aggregated \$26,244,367, an increase in a year of \$157,061. The commercial transactions in the celephone recial to, physician were: Imports of merchandise, \$202,-990,325; exports, \$183,924,962, a considerable increase over the totals of each of the two preceding years. The manufacturing interests in 1910 manufacturing interests in 1910 showed 3,155 establishments, \$175,-182,000 capital, 85,158 wage earners, \$124,577,000 cost of materials used in manufacturing, and \$237,457,000 value of products, printing and publishing (\$28.021.000), and boots and shoes (\$26,147.000) leading. In 1917 the net public debt was \$86,517,831, and the assessed valuation of all taxable property \$1,608,701,-300.

Boston, a seaport in Lincolnshire, England, 107 miles N. E. of London. Its name is a contraction of Botolph's town, and it is commonly supposed to occupy the site of the Benedictine Abbey founded on the Witham by St. Botolph in 654, and destroyed in 870 by the Danes. Foxe, the martyrologist, and Herbert Ingram, founder of the "Illustrated London News," were natives of Boston.

Boston Tea Party, The, a famous exploit preceding the American Revolution. In order to make as emphatic a protest as possible against the British crown's policy of taxing imports, a party of Bostonians, dis-guised as Indians, threw into the water on the night of Dec. 16, 1773, the cargoes of three English tea ships that had just arrived in the harbor. Enraged at this act, Parliament passed (March, 1774) the Boston Port Bill, taking away from that town the privileges of a port of entry from June 1, 1774, on. This bill aroused much indignation in the colonies and was an important factor in precipitating the outbreak of hostilities.

Boswell, James, a Scotch biographer: the son of Lord Auchinleck; born in Edinburgh, Oct. 29, 1740. In 1791 appeared his "Life of Johnson," a work which he had been long preparing, and which at once gave readers the same delight as it has ever since inspired. A second and enlarged edition came out in 1793. By this

ate of Yale, and of Bellevue Hospital Medical College, where he became throat specialist. His publications treat mainly of his specialty.

Botanic Gardens, establishments in which plants from all climates are cultivated for the purpose of illustrating the science of botany, and also for introducing and diffusing useful or beautiful plants from all parts of the world. Until modern times their sole design was the cultivation of medici-nal plants. In the United States the chief are those of New York, Wash-ington, Philadelphia, and Cambridge.

Botany, or Phytology, the science which treats of the vegetable kingdom. It thus forms one of the two great divisions of biology, or the science of organization and life, the other being zoology. During the 19th century, and especially in the latter half of it, enormous progress was made in the study of vegetable anatomy, histology, and physiology, and cryptogamic botany was carried to great perfection. This was mainly due to the great improvement of the microscope, but much of the work done was inspired by the wider conceptions introduced into the science by the work of Darwin, Wallace, and other scientific evolutionists.

Botany Bay, a bay of New South Wales, Australia, 5 miles S. of Syd-ney. It was discovered by Captain Cook, on his first voyage, in 1770, and named by him from the great number of new plants found in its vicinity. In 1787 it received England's first penal colony in the East; and, though it was supplanted the very next year by Port Jackson, yet it long continued to be the popular designation, not merely of this penal settlement, but of the Australian convict settlements generally.

Bot Fly, a stout bodied, hairy fly, with antennæ inserted in rounded pits, and with rudimentary mouth parts, developing from thick, spiny maggots, which are parasites in cattle, horses, sheep, etc.

Botha, Louis, a Boer statesman, born in Greytown, Natal, about 1863. He began life as a farmer, and, as a young man, had a share in the establishment of the Transvaal Republic. Later he fought in the Kaffir campaign. He was elected to the Volksraad at Pretoria. Upon the outbreak of the Boer War with England in 1899, he was given a subordinate command, and, upon the death of General Joubert, in March, 1900, he became commander of the Boer forces. In 1910 he became premier of the South African Union, and on July 8, 1915, he forced the surrender of German South-West Africa, renamed the South-West Africa Protectorate. Died

Bothnia, Gulf of, the N. part of the Baltic Sea, which separates Sweden from Finland; length about 450 miles, breadth 90 to 130, depth from 20 to 50 fathoms. Its water is but slightly salt, and it freezes in the winter, so as to be crossed by sledges and carriages.

Aug. 1919. See APPENDIX: World War.

Bothwell, James Hepburn, Earl of, known in Scottish history by his marriage to Queen Mary; born about 1526. It is believed that he was deeply concerned in the murder of Darnley, Mary's husband. He made love to the widowed queen, and seizing her at Edinburgh, he carried her a prisoner to Dunbar Castle, and prevailed upon her to marry him. Mary was soon a prisoner in Edinburgh, and Bothwell was forced to flee to Denmark, where he died in 1576.

Botocudos, the most barbarous of the Indian tribes of Brazil, inhabiting the East Coast range, between the Rio Pardo and Rio Doce. They wear pieces of wood in their lower lips and ear lobes.

Bo Tree, the peepul, or sacred fig tree of India and Ceylon, venerated by the Buddhists and planted near their temples. **Botrychium**, the rattlesnake fern, from its growing in such places as those venomous reptiles frequent.

Bottesini, Giovanni, an Italian violinist, born in Crema, in Lombardy, Dec. 24, 1832. A concert tour, begun in 1840, and extending to the United States, established his fame as the greatest master of the double bass fiddle. He died in Parma, in 1889.

Bottger, or Bottiger, Johann Friedrich, a German alchemist, the inventor of the celebrated Meissen porcelain. born in Schleiz, Feb. 4, 1682. He found refuge in Saxony, where the Elector erected a laboratory for him, and forced him to turn his attention to the manufacture of porcelain, resulting in the invention associated with his name. He died in Dresden, March 13, 1719.

Botticelli, Sandro, (for Alessandro), an Italian painter of the Florentine school, born in 1447, died 1515. Working at first in the shop of the goldsmith Botticello, from whom he takes his name, he showed such talent that he was removed to the studio of the distinguished painter Fra Lippo Lippi. From this master he took the fire and passion of his style, and added a fine fantasy and delicacy of his own. He paints flowers, especially roses, with incomparable skill. In 1481 Botticelli was in charge of the decorations in the new chapel of the Vatican, and painted a number of the portraits of the popes, and three of the large frescoes: Life of Moses, Temptation of Christ, and the Punishment of Korah, Dathan and Abiram. He also drew illustrations for Dante's Inferno. His Madonnas are the best examples of his work, for nowhere else does he show such feeling and energy. The best known of his paintings is the "Primavera" or "Spring" in the Florence Academy of Fine Arts. In his later years Botticelli became an ardent disciple of Savonarola, and is said by Vasari to have neglected his painting for the study of mystical theology.

Bottle Gourd, a gourd called also the white pumpkin. The Hindus cultivated it largely as an article of food.

Bottle Nose, a cetacean, the bottle nosed whale, very destructive to food fishes, and of comparatively little economic value itself.

Botts, John Minor, an American legislator, born in Dumfries, Va., Sept. 16, 1802. He studied law and, in 1833, entered the Virginia legislature. He was elected to Congress in 1839 and was frequently re-elected. Upon and was frequently re-elected. Upon the outbreak of the Civil War he asserted his devotion to the Union, and, in 1862, he suffered imprisonment on that account. After the war he was one of Jefferson Davis' bondsmen; and attended the Convention of Southern Loyalists, in Philadelphia. H died in Culpepper, Va., Jan. 7, 1869.

Boucher, Jonathan, an American loyalist during the period prior to the Revolutionary War. He was born in England in 1738, came to America at the age of 21, and later became rector of William and Mary College in Virginia. With all the force of a vigorous nature he opposed the Revolution with voice and pen, until he was forced to leave the country and return to England. In a volume of collected discourses, which he dedicated to Washington with whom he was on terms of intimate friendship, he sets forth the position of the American loyalists during the agitation that led up to the Revolution.

Boucicault, Dion, a dramatic author and actor, born in Dublin, Dec. 26, 1822; educated at London University. He produced his first dramatic work, "London Assurance," before he was 19 years old. It was signally successful, and its success determined his career in life. Once embarked in the profession of a play writer, Boucicault produced piece after piece in rapid succession, and greatly increased the reputation which his first attempt had brought him. Boucicault distinguished himself equally in comedy, farce and melodrama. When he went upon the stage, as he soon did, he added a high reputation as an actor to the reputation he had previously gained as an author. From 1853 to 1860 he was in the United States, where his popularity was scarcely less than it had been in England. His chief works include "The Octoroon," "Colleen Bawn,"
"Arrah-na-Pogue," "Used up," "The "Arrah-na-Pogue," "Used up." "The Corsican Brothers," "The Shaugraun." Amour, Marquis de, a French gen-Died, New York city, Sept. 18. 1890. eral, born in Cluzel, Nov. 19, 1739;

Boudinot. Elias, a distinguished American patriot and philanthropist, born in Philadelphia, May 2, 1740; was President of the Continental Congress (1782), and first President of the American Bible Society (1816-1821). He died in Burlington, N. J., Oct. 24, 1821.

Bougainville, Louis Antoine de, a French navigator, born in Par-is, Nov. 11, 1729. At first a lawyer, he afterward entered the army and fought bravely in Canada, under the Marquis of Montcalm. After the bat-tle in which Montcalm was killed, Bougainville returned to France and served with distinction in the cam-paign of 1761, in Germany. After the peace he entered the navy, and became a distinguished naval officer. Bougainville then made a voyage round the world, which enriched geography with a number of new discoveries. In the American War of Independence he distinguished himself at sea, but withdrew from the service after the Revolution. He died in Paris. April 31, 1811.

Boughton, George Henry, an English-American landscape and genre painter, born near Norwich, England, in 1834. His parents came to the United States in 1839, and settled in Albany. He studied art without a master, and, in 1853, went to London and Paris to continue his studies. He

died in London, Jan. 19, 1905.

Boughton, Willis, an American educator, born in Victor, N. Y., April 17, 1854. He has won note in the work of university extension.

Guillaume Bouguereau, Adolphe, a French painter, born 1825. His admirers consider him preëminent as a painter of flesh, but there is a certain theatric air about his work that fails to recommend it to the most discriminating. He was president of the Sociétié des Artistes in 1885. His paintings always attract attention and are well known through reproductions, his pictures of child-life being especially striking. Among his later works are "Psyche et l'Amour," "L'Admiration," and "Compassion," He died April 19, 1905.

entered the army at the age of 14 and served with distinction in Germany during the Seven Years' War. In 1768 he was appointed governor of the island of Guadeloupe, and afterward commander-in-chief of all the French forces in the West Indies. When war broke out in 1778, he successively took from the British, Dominica, Tobago, St. Eustache, Saba, St. Martin, St. Christopher's, and Nevis. Louis XVI. nominated him a member of the Assembly of Notables in 1787-1788; in 1790 he was made commander-in-chief of the army of the Meuse, the Saar, and the Moselle. His decision of character prevented the dissolution of the army and the outbreak of civil war. For his share in the attempted escape of Louis XVI. he had to flee from France. In 1791 he entered into the service of Gustavus III., of Sweden, and afterward served in the corps of the Prince of Conde. He rejected a proposal, made in 1793, that he should take the chief command in La Vandea. take the chief command in La Vendee; and went to England, where his advice in West Indian affairs was useful to the government. He died in London, Nov. 14, 1800.

Boulainvilliers, Henry, Count, a French author, descended from an ancient family in Picardy, born in St. Saire, Normandy, Oct. 11, 1658; died in Paris, Jan. 23, 1722.

Boulanger, Georges Ernest Jean Marie, a French soldier, born in Rennes, April 29, 1837. After a successful career in Algeria and in the East he became Minister of War. In the ministerial crisis of 1887 he lost his portfolio, and was appointed to the command of the 13th Army Corps, but was retired March 28, 1888. In January, 1889, he was elected Deputy to the National Assembly by 81,000 majority, in consequence of which the Floquet ministry resigned. In August, 1889, he was charged with embezzlement, treason and conspiracy, and found guilty by the Senate; the elections in the 12 cantons were annulled, and he was sentenced to deportation. He died in Brussels, Sept. 30, 1891.

Boulder, a large, rounded block of stone, which, whether lying loose on the surface of the ground or imbedded in the soil, is of different composition from the rocks adjacent to which it now rests.

Boulder Formation, a forma-tion consisting of mud, sand, and clay, more frequently unstratified than the reverse, generally studded with frag-ments of rocks, some of them angular, others rounded, with boulders scattered here and there through the mass.

Boulevard, a French word formerly applied to the ramparts of a fortified town, but when these were leveled, and the whole planted with trees and laid out as promenades, the name boulevard was still retained. Modern usage applies it also to many streets which are broad and planted

with trees.

Boulogne, or Boulogne-sur-Mer, a fortified seaport of France, Department of Pas de Calais, at the mouth of the Liane. It consists of the upper and lower town. The former is surrounded with lofty walls, and has well planted ramparts; the latter, which is the business part of the town, has straight and well built streets. In the castle, which dates from 1231, Louis Napoleon was imprisoned in 1840. Napoleon, after deepening and fortifying the harbor, encamped 180,000 men here with the intention of invading England at a favorable moment; but, upon the breaking out of hostilities with Austria, in 1805, they were called to other places. Pop. (1926) 55,336.

Boulton, Matthew, an English mechanician, born in Birmingham, Sept. 3, 1728. He engaged in business as a manufacturer of hardware, and invented and brought to great perfection inlaid steel buckles, buttons, watch chains, etc. The introduction of the steam engine at Soho led to a connection between Boulton and James Watt, who became partners in trade, in 1769. He died in Soho, Aug. 16, 1809.

Bounty, a grant or benefaction from the Government to those whose services directly or indirectly benefit it, and to whom, therefore, it desires to accord some recompense, or at least recognition.

Bounty Jumper, a term used during the Civil War in the United States to denote one who enlisted in the United States military service to secure the bounty paid by the Government for volunteers, and then deserted.

Bouquet de la Grye, Jean Jacques Anatole, a French hydrographical engineer, born in Thiers, May 20, 1827. He became a member of the Institute; commander of the Legion of Honor, and a member of the Academy. A project which he long urged was to make Paris a seaport by means of a ship-canal up the Seine. He died in 1909.

Europe, the Bourbons of France, Spain, and Naples. The first of the line known in history is ADHEMAR, who, at the beginning of the 10th century, was Lord of the Bourbonnais (now the Department of Allier). The power and possessions of the family increased steadily through a long series of Archambaulds of Bourbon, till, in 1272, BEATRIX, daughter of Agnes of Rourbon and Lobo of Parameters. Bourbon and John of Burgundy, married Robert, sixth son of Louis IX. of France, and thus connected the Bourbons with the royal line of the Capets. Their son, Louis, had the barony converted into a dukedom and be-came the first Duc de Bourbon. Two branches took their origin from the two sons of this Louis, Duke of Bourbon, who died in 1341. The elder line was that of the Dukes of Bourbon, which became extinct at the death of the Constable of Bourbon in 1527, in the assault on the city of Rome. The younger was that of the Counts of La Marche, afterward Counts and Dukes of Vendome. From these descended ANTHONY of Bourbon, Duke of Vendome, who, by marriage, acquired the kingdom of Navarre, and whose son, HENRY of Navarre, became Henry IV. of France.

By the death of the Count of Chambord, in 1883, the elder line of the Bourbons of France became extinct, and the right of succession merged in the Count of Paris, grandson of King Louis Philippe, representative of the younger, or Orleans line.

Bourbon, Charles, Duke of, or Constable of Bourbon, son of Gil-bert, Count of Montpensier, born in 1489, and, by his marriage with the heiress of the elder Bourbon line, acquired immense estate. He received from Francis I., in the 26th year of

Jean services by the victory of Marignano and the capture of Milan. On May 6, 1527, his troops took Rome by storm, and the sacking and plundering continued for months. But the Bour-bon himself was shot as he mounted the breach at the head of his soldiers. He was but 38 years of age.

Bourbonnais, a village of Illinois in Kankakee county, 55 miles south of Bourbon, an ancient French fam-Chicago. Noted since 1865 as the seat ily which has given three dynasties to of the R. C. College of St. Viator's

and of Notre Dame Academy.

Bourdaloue, Louis, a Jesuit, and one of the greatest preachers France ever produced, was born in 1632. The extreme popularity of his sermons induced his superiors to call him to Paris, and he became the favorite preacher of Louis XIV. Died in 1704.

Bourdon (named after Mr. Bourdon of Paris, who invented it in 1849), a barometer consisting of an elastic flattened tube of metal bent to a circular form and exhausted of air, so that the ends of the tube separate as the atmospheric pressure is diminished, and approach as it increases.

Bourgeoisie, a name applied to a certain class in France, in contradistinction to the nobility and clergy as well as to the working classes.

Bourget, Paul, a French novelist, born in Amiens, Sept. 2, 1852. He was admitted to the Academy in 1894. He ranks among the first of the present day French novelists.

Bourinot, John George, a Canadian publicist, born in Sydney, Nova Scotia, Oct. 24, 1838. He was educated at Trinity College, Toronto; founded and edited the "Halifax Reporter," became clerk of the Dominion Parliament in 1880; was created a member of the Order of St. Michael and St. George in 1890; and in 1892 became President of the Royal Sobecame President of the Royal Society of Canada. Died, Oct. 12, 1902.

Bourke, John Gregory, American military officer, born in Philadelphia, Pa., June 23, 1846. He was graduated at West Point in 1869, and saw much service against the Indians, rising through various grades to the rank of major. He became an quired immense estate. He received from Francis I., in the 26th year of his age, the sword of Constable, and in the war in Italy rendered important June 8, 1896.

Bourmont, Louise Auguste Victor de Ghaisne, Comte de, Marshal of France, born in Anjou, Sept. 2, 1773; died in Anjou, Oct. 27, 1846.

Bourne, Hugh, founder of the sect of Primitive Methodists, born in Staffordshire, England, April 3, 1772. In the course of his life he visited Scotland, Ireland, Canada, and the United States, where his ministrations were attended with great success. He

died in Bemersly, Oct. 11, 1852.

Bourrienne, Fauvelet de, French diplomatist, born in 1769, and educated along with Bonaparte at and educated along with Bonaparte at the School of Brienne, where a close intimacy sprang up between them. Bourrienne went to Germany to study law and languages, but, returning to Paris in 1792, renewed his friendship with Napoleon, from whom he obtained various appointments, and, latterly, that of minister plenipotentiary at Hamburg. Notwithstanding that his character suffered from his being involved in several dishonorable monetary transactions, he continued to fill high State offices, and, in 1814, was made prefect or poince. On the contraction of Napoleon he paid his court to Louis XVIII., and was nominated a Minister of State. The Revolution made prefect of police. On the abdia Minister of State. The Revolution of July, 1830, and the loss of his wealth affected him so much that he lost his reason, and died in a lunatic asylum in 1834.

Bourse, an exchange where merchants, bankers, etc., meet for the transaction of financial business. Used especially of the Stock Exchange of Paris.

Boussa, or Bussang, a city of Africa, in the Sudan, on the Niger, near which are rapids. It was here that Mungo Park met his death in 1805. Pop. est. 12,000 to 18,000.

Boutelle, Charles Addison, an American legislator, born in Damar-iscotta, Me., Feb. 9, 1839; served in the navy during the Civil War, enter-ing as an acting master, and being promoted to lieutenant for gallantry in action. In 1870 he became the editor of the Bangor "Whig and Courier." He was elected to Congress in rier." He was elected to Congress in 1882, and held his seat till December, 1900, when he resigned, and was made 1882, and held his seat till December, 1900, when he resigned, and was made a captain on the retired list of the Mass., April 4, 1840; was graduated

navy. He was author of the bill (1890) authorizing the construction of the first modern battleship of the United States Navy. He died in Waverly, Mass., May 21, 1901.

Boutwell, George Sewell, an American statesman, born in Brook-line, Mass., Jan. 23, 1818; was ad-mitted to the bar in 1836; served in the state Legislature in 1842-1851; Governor of Massachusetts in 1851-1852; was organizer of the Republican Party in 1854; appointed the first commissioner of the newly established Department of Internal Revenue in 1862; a Representative in Congress in 1863–1869; one of the managers of the impresement trial of President John impeachment trial of President Johnson; Secretary of the Treasury in 1869-1873; and a U. S. Senator, 1873-79. He died Feb. 28, 1905.

Bouvard, Alexis, a Swiss mathematician and astronomer, born in 1767; went to Paris about 1785 to study mathematics and astronomy, and in 1793 obtained a position in the Paris Observatory. He is celebrated for his researches in the theory of planetary motions, especially those of Jupiter and Saturn. Later he took up the theory of Uranus, and was the first to suggest that the discrepancies between the old and new observations could only be reconciled by the hypothesis of another undiscovered disturbing planet, an opinion which he re-tained till his death, three years be-fore the discovery of Neptune.

Bovidæ, the ox family of ruminating animals, containing not merely the oxen, but many others animals, placed in other families, such as the bison, buffalo, yak, zebu, etc. They are generally of large size, with broad, hairless muzzles; most of them have been domesticated.

Bowditch, Henry Ingersoll, an American physician, born in Salem, Mass., Aug. 9, 1808. He discovered the law of soil moisture as a cause of consumption in New England; introduced several new features in surgical treatment, and was author of many general and special works in medical science. He died in Boston, Mass., Jan. 14, 1892.

at Harvard in 1861, and subsequently studied chemistry and medicine, and, after the Civil War, in which he reached the rank of major in the Union service, he took a special course in physiology in France and Germany. In 1871–1876 he was Assistant Professor of Physiology in the Harvard Medical School, and in 1876 was elected to the full chair. He was a member of the American Academy of Arts and Sciences, as well as of numerous medical societies, and has published many papers on physiological subjects. He died March 13, 1911.

Bowdoin, James, an American patriot, born in Boston, Aug. 8, 1727. He was prominent in Massachusetts during the Revolution. He became governor of his State in 1785, and, in the following year, suppressed Shay's rebellion. Bowdoin College was named after him. He died in Boston, Nov. 6, 1790.

Bowdoin College, a college for men, established in Brunswick, Me.; organized in 1794 under the auspices of the Congregational Church; but is now non-sectarian. Its several departments have about 400 students, and 40 instructors.

Bowen, Henry Chandler, an American editor and publisher, born in Woodstock, Conn., Sept. 11, 1813. He received a common school education and entered business. In 1848 he helped found "The Independent," in New York. He died in Brooklyn, N. Y., Feb. 24, 1896.

Bowen, Herbert Wolcott, United States Minister to Venezuela, who acquired world-wide repute as a diplomatist by his management in behalf of Venezuela of negotiations with England, Germany, and Italy, which brought to a close the blockade of Venezuela ports by those powers in 1902-1903. Mr. Bowen was born in Brooklyn, N. Y., Feb. 29, 1856; studied at the Brooklyn Polytechnic, in Europe and at Yale, and was graduated with honor from the Columbia Law School in 1881. He practiced law in New York, and was appointed in 1890 Consul and Consul-General to Barcelona, and afterward Minister to Persia. In June, 1901, he was appointed Minister to Venezuela. When the allies began war on Venezuela to compel

payment of certain claims President Castro requested Mr. Bowen to act in behalf of Venezuela in arranging terms for a settlement. He was a successful diplomat, but in June, 1905, was dismissed from government service owing to injudicious charges against his predecessor, Assist. Sec. of State F. B. Loomis. Died May 29, 1927.

Bower Birds, the name given to certain birds found in Australia. The name is given because these birds are in the habit of building bowers as well as nests.

Bowery, The, a New York street. It begins at Chatham Square and terminates at Cooper Union. It was long notorious for the resorts located along its length, but its character has undergone improvement.

Bowie, James, an American frontiersman, born in Burke county, Ga., about 1790. He took part in the revolt of Texas against Mexico, and fell in the Alamo massacre, March 6, 1836. He gave his name to the bowie knife.

Bowling, an ancient English game, still exceedingly popular. The favorite form in the United States is played indoors, in an "alley" 50-65 feet long and about 6 feet wide. At the further end 10 "pins," generally of ash wood, are set up in the form of a triangle. The players roll wooden balls at these, with the object of knocking down as many as possible at each throw.

Bowman, Edward Morris, American organist and musical theorist, b. Barnard, Vt., in 1848; studied in Berlin, Paris, and London, under famous masters; and was the first American A. R. C. O. of London. In 1877 he published "Bowman-Weitzmann's Manual of Musical Theory;" in 1891 succeeded Dr. F. L. Ritter at Vassar; was organist of the Bapt. Temple, Brooklyn, 1895-1905; then of Calvary Church, N. Y. C. He died Aug. 27, 1913.

Bowne, Borden Parker, an American philosophical writer, born in Leonardsville, N. J., Jan. 14, 1847. He was religious editor of the New York "Independent," 1875–1876, becoming Professor of Philosophy at Boston University in 1876. D. 1910.

Box, the English name of buxus, a genus of plants. In its wild state

it is a small tree. It is found all over the world in some form of species. It is an evergreen.

Boxers, members of a Chinese secret society which aims ostensibly at the expulsion of foreigners. origin of the Boxers appears to have been due to fanatic opposition to Christian missionaries, and to the encroachments of European powers upon

Chinese territory.

Early in 1900 the native population in Shantung were found to be rallying around the standard of the Boxers and adopting its motto, "Uphold the dynasty, drive out the for-eigners." The Diplomatic Corps at Peking called upon the Imperial Government to suppress the movement. In May, 1900, they began concerted movement upon the Chinese capital which, notwithstanding the protests of the Diplomatic Corps, remained unchecked.

The situation had been rendered additionally threatening by the action of the allies in opening fire upon the forts at Taku. On June 17 the warships of the Powers were in force at that port; when fired upon by the Chinese they opened a bombardment. The demonstration before Taku had been deprecated by the United States com-mander, Admiral Kemps, who did not participate in the bombardment. His warning that hostilities would unite the Chinese against the foreigners was

justified by events.

In June, 1900, Peking was reduced to a state of siege by the Boxers. The position of the foreigners in the capital became precarious. The entire Diplomatic Corps was cut off from communication with the outside world. After capturing Tien-Tsin the forces of the powers advanced on Peking, defeating the Chinese who opposed them, and rescuing the legations from de-struction. The troops were just in time to save the inmates of the legations, and a large number of native Christians from outrage and massacre. The Chinese court fled from Peking, and after many months of desultory warfare and negotiation China consented to pay full indemnity and to punish the officials guilty of inciting the Boxers. The society is still a menace to foreigners.

Boxing. See Pugilism.

Box Tortoise, a name given to one or two North American tortoises that can completely shut themselves into their shell.

Boyaca, a Department of Colombia, touching Venezuela. In the W. it is mountainous; in the E. it has vast prairies, and is watered by the Meta and its tributaries. The Muzo emerators ald mine is the richest in the world, and the Department is rich in salt springs, coal, iron, plumbago, and copper ore. Area, 16,460 square miles; population (1912) 586,499. Capital, Tunja.

Boyar, Boiar, or Boyard, a name first used by the Bulgarians, Serbs and Russians, subsequently adopted by the Moldavians and Wallachians, and synonymous with bojarin, used by the Bohemians, Poles, and other Slavic tribes, to qualify the highest social condition; corresponding in certain respects to that of an English

Boycotting, a practice which owes its name to Capt. C. C. Boycott (died June 21, 1897), of Lough Mask House, in Mayo, Ireland, and agent, in 1880, of Lord Erne, an Irish nobleman. The former gentleman having given offense about agrarian matters to the people among whom he lived, during the land agitation of 1880-1881, no one would gather in his crops. The case being reported in the "Press," about 60 Orangemen, belonging to the North of Ireland, each man carrying a revolver, organized themselves into a "Boycott relief expedition." The Government gave them a strong escort of cavalry, besides foot soldiers and constabulary, artillery also being added on the return journey. The crops were gathered in and sent away, and the Captain himself brought off to a region of greater security. The object of a boycott is to put a person outside the pale of the society, amid which he lives, and on which he depends; socially to outlaw him, to refuse to sell to, and decline to buy from, him; to refuse to work for or to employ him.

In the United States and in England the boycott is made use of by trade unionists as a strike measure. It has in some instances been enjoined by the courts, and in some States laws have

been passed against it.

Boyd, Belle, a Confederate spy, born in Martinsburg, W. Va., May 9, 1843. She rendered aid to the Southern cause by detecting the Federal plans of campaign and revealing them to the Confederates. Gen. "Stonewall" Jackson sent her a letter of thanks. She died at Kilbourn, Wis., June 11, 1900.

Boyd, Thomas Duckett, an American educator, born in Wythe-ville, Va., Jan. 20, 1854. He was graduated at Louisiana State University, and has held important posts in the educational institutions of Louisiana. President of Louisiana State University; 1896-1927; president-emeritus since June, 1927.

Boyden, Seth, an American inventor, born in Foxboro, Mass., Nov. 17, 1788; was brought up on a farm, and attended a district school. Mechanically inclined, he spent much time experimenting in a blacksmith shop. His first invention was a machine for making nails, and in 1809 he undertook to manufacture both nails and files. Soon afterwards he invented a machine for splitting leather, and in 1815, he took it to Newark, N. J., where he engaged in the leather business. In 1816 he invented a machine for cutting brads, and followed this by the invention of patent leather, which he manufactured till 1831, when which he maintractived thi 1831, when he began making malleable iron cast-ings, on a system of his own. In 1835 he turned his attention to steam en-gines; substituted the straight axle for the crank in locomotives; and invented the crank in locomotives; and invented the cut-off now used instead of the throttle valve. In 1849 he went to California, but was unsuccessful, and returned to New Jersey, where he applied himself to farming, and developed a variety of strawberry previously unequaled in size or quality. He ly unequaled in size or quality. He died March 31, 1870.

Boyer, Jean Pierre, President of the Republic of Haiti, was a mulatto, born in Port-au-Prince in 1776. He was educated in France, and, in 1776, entered the military service. He was unanimously elected President of the Republic in 1818. He arranged the financial affairs, collected funds into the treasury, improved the administration, and encouraged arts and sciences. After the death of Christophe, he united the monarchical part of the

island with the Republic in 1820; and, in 1821, the eastern district also, which had hitherto remained under the dominion of Spain; and he urgently sought the recognition of the inde-pendence of the youthful State by France, which was obtained, in 1825, upon payment of an indemnity of 150,-000,000 francs. Boyer carried on the government of the Republic of Haiti for 15 years from this time with the most perfect peace; but his policy, which was rather arbitrary, and directed to the object of depressing the negroes in favor of his own race, resulted in a victorious insurrection in 1843. Boyer fled to Jamaica. In 1848 he went to Paris, and died there, July 9, 1850.

Boyesen, Hjalmar Hjorth, an American novelist, born at Frederiksvarn, Norway, Sept. 23, 1848. He came to the United States in 1869; returned to Europe in 1872 and studied Germanic Philoiogy at Leipsic two years; then, returning to this country, he was Professor of German in Corpell University for six years, and then nell University for six years, and then of Germanic Languages and Literature in Columbia College till his death. He died in New York, Oct. 4, 1895.

Boy Scouts, a semi-military organization, founded in England in 1910 and introduced into the United States the same year. The object is to develop patriotism, discipline, courage, and self-control im boys, as well as to put the Golden Rule into daily practice. The unit of the organization is the "patrol" of from six to eight boys; a "troop" comprises two or more "patrols;" and the "scout master" is the officer in charge of a troop. Lieut.-Gen. Sir Robert Bader Payell was the father of the bar den-Powell was the father of the boy scout movement in England, and Ernest Thompson Seton in the United In both countries the idea States. took at once with boys and found general favor among their elders. In 1910 the founder visited New York in its interest.

Boyton, Paul, an Irish-American swimmer, born in Dublin, June 29, 1848; served in the United States navy in 1863-1865. He invented a life-preserving suit, in which in 1874, he leaped from a vessel off the coast of Ireland, and, after remaining seven hours in the water, reached land safeBert

devotion to his country, in defending it against the Turks. He fell in a

the lowlands of Holland and Belgium, extending from the Waal to the sources of the Dyle, and from the Meuse and Limburg plains to the Lower Scheldt. It is divided between the Kingdoms of Holland and Belgium, into three provinces, (1) Dutch or North Brabant, area 1,920 square miles, pop. (1921) 732,035; (2) Belgian Province of Antwerp, area 1,093 square miles, pop., 1,000,000, and (3) the Belgian Province of South Brabant, area, 1,268 square miles, pop., 1,567,259.

Brachiopoda, animals with arm-like feet; one of the great classes into which the moluscous sub-kingdom of the animal kingdom is divided.

Bracken, or Brake, a species of fern very common in the United States and Europe generally, and often covering large areas on hillsides and waste grounds.

17, 1881, he started from Cedar the French in America, and, with a Creek, Mont., to swim to St. Louis, force of nearly 2,000 British and Mo., and accomplished the long journey, 3,580 miles, Nov. 20. In 1888 he made a voyage down the Ohio river. He published an account of his travels. later he sailed as commander against Duquesne, on the present site of Pittsburg, Pa. On the right bank of the river he was attacked by a party of 900 French and Indians, and 63 out Bozzaris, Marcos, a Greek pa- of 86 officers, and 914 out of 1.373 triot, born in 1789. He was a Sumen engaged, were either killed or liote, and distinguished himself by his wounded. Braddock was carried wounded. Braddock was carried from the field, and died July 13.

devotion to his country, in defending it against the Turks. He fell in a night attack upon a body of the Turco-Albanian army, who were advancing with the view of taking Missalonghi, which he had successfully defended for a considerable time, Aug. 20, 1823.

Brabant, the central district of plies. Pop. (1930) 19,306.

Bradford, a municipal and parliamentary borough and important manufacturing town in the W. Riding of Yorkshire, England, the chief seat in England of the spinning and weaving of worsted yarn and woolens. Pop. (1921) 285,979.

Bradford, Joseph, an American journalist and dramatic author, born near Nashville, Tenn., Oct. 24, 1843. His real name was WILLIAM RAN-DOLPH HUNTER. Besides satirical verses he wrote a number of poems which were highly esteemed, especially

which were highly esteemed, especially those on the death of Victor Hugo and of General Grant. He died in Boston, Mass., April 13, 1886.

Bradford, Royal B., an American naval officer, born in Turner, Me., July 22, 1844. He was graduated at the United States Naval Academy in 1865, and received promotion through various grades to the rank of Comparison. various grades to the rank of Commander. He made a specialty of equipment, and after 1897 was chief of the Bureau of Equipment of the Navy. He died Aug. 4, 1914.

Bradford, William, an American painter, born in New Bedford, Mass., in 1827. He entered business early in life, but abandoned it for art. His subjects were the ice fields of the North Atlantic. He died in New York

city, April 25, 1892.

Bradford, William, an American colonial governor and author, born in Austerfield, Yorkshire, England, in March, 1588. He was one of the signers of the celebrated compact on the Mayflower; and, in 1621, on the death of the first governor, John Carver, was elected to the same office, which he continued to fill (with the exception of a brief period when he declined reelection) until his death. His administration was remarkably efficient and successful, especially in dealing with the Indians. He died in Plymouth, Mass., May 9, 1657.

Bradlee, Nathaniel, an American architect, born in Boston in 1829; began the study of architecture in 1846. He achieved wonderful success, having been the architect of over 500 prominent buildings in the city of Boston. In 1869 he made a national reputation by moving bodily the large brick structure known as the Hotel Pelham to the corner of Tremont and Boylston streets. The work attracted wide attention, both in this country and in Europe. He subsequently superintended the removal of the Boylston Market. He died in 1888.

Bradley, John Edwin, an American educator, born in Lee, Mass. He was graduated at Williams College, in 1865. He served as principal of the High School at Pittsfield, Mass., and at Albany, N. Y. In 1892–1900 he was President of the Illinois College.

Bradley, Joseph Philo, an American jurist, born in Berne, N. Y., March 14, 1843; was graduated at Rutgers College in 1836; admitted to the bar in 1839; and became a Justice of the United States Supreme Court in 1870. As a member of the Electoral Commission he cast the vote which gave the Presidency to General Hayes, in 1877. He died in Washington, D. C., Jan. 22, 1892.

Bradstreet, Anne, the earliest American poet, born in Northampton, England, in 1612. She was a daughter of Gov. Thomas Dudley. In 1630 she emigrated to America with her husband, Simon Bradstreet, Governor of Massachusetts. Her poems are quaint and literal in style. She died Sept. 16, 1672.

Brady, Cyrus Townsend, author and P. E. clergyman, born in Allegheny, Pa., Dec. 20, 1861; graduated 1883 at the U. S. Naval Academy; and was ordained priest in 1890. His published writings include several volumes of fiction, and semi-historical works, all exceedingly popular. Died. 1920.

all exceedingly popular. Died, 1920. Bragg, Braxton, an American military officer; born in Warren Co., N. C., March 22, 1817; graduated at West Point, in 1837; was appointed Second Lieutenant in the 3d Artillery; served with distinction under General Taylor in the Mexican War; and retired to private life in 1856. At the outbreak of the Civil War, he became a Brigadier-General in the Confederate army, and was stationed at Pensacola to act against Fort Pickens. In 1862, having been appointed a general of division, with orders to act under Gen. A. S. Johnston, commanding the Army of the Mississippi, he took an important part in the two days' battle of Shiloh. On Johnston's death he was appointed to his command, with the full rank of General, and succeeded General Beauregard as commander of the Department, in July of the same year. The last command he re-signed in December, 1863. His chief success was at Chickamauga, in September, 1863, when he inflicted a defeat on the army of General Rosecrans, but was himself, in turn, defeated by General Grant, which led to his temporary removal from command in January, 1864, and he was appointed military adviser to Jefferson Davis. In 1864, he assumed command of the Department of North Carolina. After the war he was chief engineer of the State of Alabama, and superintended the improvements in Mobile Bay. He died in Galveston, Tex., Sept. 27, 1876. He

Bragg, Edward Stuyvesant, an American legislator, born in Unadilla, N. Y., Feb. 20, 1827; educated at Geneva, now Hobart, College, and admitted to the bar in New York, in

1848. He removed to Fond du Lac, Wis., served in the Union army during the Civil War, and won his way to the rank of Brigadier-General. He was a member of the Union Convention, at Philadelphia, in 1866; Representative in Congress in 1877-1885; and a delegate to the Democratic National Conventions of 1872, 1884, 1892, and 1896. In the Convention of 1884, he seconded the renomination of Grover Cleveland, when he uttered the memorable phrase, "We love him for the enemies he has made." In 1888 he was appointed minister to Mexico; and in June, 1902, became the first United States consul-general in Havana under the new republic of Cuba, retiring the same year on account of a letter which he wrote reflecting on the Cubans. He died June 20, 1912.

Bragi, the Scandinavian god of betry. He is represented as an old man with a long flowing beard, like Odin; yet with a serene and unwrinkled brow. His wife was Idunna.

Brahe, Tycho, a Swedish astronomer, born in Knudstrup, near Lund, Dec. 14, 1546. He was descended from a noble family, and was sent, at the age of 13, to the University of Copenhagen, where he had not been more than a year, when an eclipse of the sun turned his attention to astronomy. His uncle destined him for the law, but Brahe, while his tutor slept, busied himself nightly with the stars. In 1573 he married a peasant girl. After some time spent in travel, Brahe received from his sovereign, Frederic II., the offer of the island of Hven or Hoene, in the Sound, as the site for an observatory, the King also offering to defray the cost of erection, and of the necessary astronomical instruthe necessary astronomical ments, as well as to provide him with a suitable salary. Brahe accepted the generous proposal, and, in 1576, the foundation stone of the castle of Uraienburg ("fortress of the heavens") was laid. Here, for a period of 20 years, Brahe prosecuted his observations with the most unwegied in vations with the most unwearied industry. So long as his munificent pat-ron, Frederick II., lived, Brahe's posi-tion was all that he could have de-sired, but on his death in 1588 it was greatly changed. For some years, under Christian IV., Brahe was just toler this in 1597 his persecution | Kins, an American poet, born in New London, Conn., Oct. 21, 1796; died in New London, Conn., Sept. 26, 1828.

had grown so unbearable that he left the country altogether, having been the year before deprived of his observatory and emoluments. After residing a short time at Rostock and at Wandsbeck, near Hamburg, he accepted an invitation of the Emperor Rudolf II.— who conferred on him a pension of 3,000 ducats— to Benatek, a few miles from Prague, where a new Uranienburg was to have been erected for him; but he died at Prague on Oct. 24, 1601.

Brahma, the name of the first of the three gods who constitute the triad of principal Hindu deities. The epithets applied to this divinity are very numerous.

Brahman, Brahmin, Bramin, or Brachman, one of the Aryan conquerors of India, who discharged priestly functions, whose ascendency, however, over his fellows was intellectual and spiritual, but not yet political or supported by the caste system; also one of the four leading castes of India.

Brahmanism, or Brahminism, the system of religious belief and practice introduced and propagated by the Brahmans.

Brahmaputra, a large river of Asia, whose sources, not yet explored, are situated near Lake Manasarovara, in Tibet, near those of Indus.

Brahmo-Somaj, or the Thiestic Church of India, was founded in 1830 by an enlightened Brahman, who sought to purify his religion from impurities and idolatries.

Brain. the encephalon, or center of the nervous system and the seat of consciousness and volition in man and the higher animals.

Brainard, David Legge, an American explorer, born in Herkimer county, N. Y., Dec. 21, 1856. He received a common school education and enlisted as a private in the United States army in 1876. He rose to distinction in which the tinction in various conflicts with the Indians and in the Greeley and other Arctic Expeditions, and was promoted to Colonel, June 8, 1912. In 1899 he became Chief Commissary at Manila.

Brainard, John Gardiner, Cal-

Braine, Daniel Lawrence, an American naval officer, born in New York city, May 18, 1829. He entered the United States navy in 1846 and became a Rear-Admiral. He served with distinction through the Mexican and Civil Wars. In 1873 he obtained the surrender by Spain of 102 survivors of the "Virginius" prisoners. He died in Brooklyn, N. Y., Jan. 30, 1898.

HUMAN BRAIN.

Longitudinal Median Section through Head and Upper Part of Neck, to Show Relation of Brain to Cranium and the Spinal Cord.

c, cerebrum; cb, cerebellum; sc, spinal cord; spc, spinal column; mo, medulla oblongata passing, through foramen oblongata passing, through foramen magnum, into the spinal cord; pv, pons Varolii; cp, cerebral peduncles or crura Varolii; cp, ecrebral peduncles or crura cerebri; cqa, anterior corpora quadrigemina; cqp, nosterior corpora quadrigemina; pg, pineal gland; pb, pituitary body; cc, corpus collosum, divided transversely; f, fornix; mg, marginal gyrus; pf, gyrus fornicatus; cmg, calloso-marginal suleus; O, occipital lobe; po, parieto-occipital fissure; cf, calcarine fissure; dm, dura mater, separating cerebrum from cerebellum. brum from cerebellum.

Brainerd, David, an American missionary, born at Haddam, Conn., April 20, 1718. He entered Yale Col-April 20, 1718. He entered Yale College in 1739, but three years later was

he was licensed to preach, and sent as a missionary to the Indians in Massa-chusetts. He labored afterward among the Indians in Pennsylvania, and with much success in New Jersey, baptizing there no fewer than 77 converts, of whom 38 were adults. He died in

Whom 38 were adults. He died in Northampton, Mass., Oct. 9, 1747.

Brain Fever, a term in common use for inflammation of the lining membranes of the brain, meningitis; or of the brain itself, cerebritis. Brain fever is characterized by violent headache, intolerance of light, excitement. extreme sensitiveness, hyperæmia, delirium, convulsions, and coma.

Braintree, a town in Norfolk county, Mass.; on the New York, New Haven & Hartford railroad; 10 miles S. of Boston; is noted as the birth-place of many of the Adams family; and is chiefly engaged in granite quarrying. Pop. (1926 Est.) 13,800.

Brake, a device for regulating or stopping motion by friction. Rail-road air-brakes consist of a cylinder and piston under each car, connected by tubes with a reservoir for com-pressed air, automatically filled by a special engine under control of the

Bramah, Joseph, an English inventor; born in Yorkshire in 1749; especially known for an ingenious lock, and for the hydraulic press. He died in Pimlico, Dec. 9, 1814.

Bramante d'Urbino (real name DONATO LAZZARI), an Italian architect, born in 1444. Showing an early taste for drawing, he was brought up to the profession of a painter, but he quitted it to dedicate his talents to architecture, which he cultivated with uncommon success. He first designed and commenced in 1513, the erection of St. Peter's at Rome, carried on and finished by other architects after his death. He was a great favorite with Pope Julius II., who made him super-intendent of his buildings, and, under that pontiff, he formed the magnificent project of connecting the Belvidere Palace with the Vatican by means of two grand galleries carried across a valley. He built many churches, monasteries, and palaces at Rome, and in other Italian cities, and was employed expelled for declaring that one of the college tutors had no more of the grace of God than a chair. That same year portraits with ability, and he was

THE HARBOR OF RIO DE JANEIRO

skilled in music and poetry. He died in 1514.

Brambanan, a district of the Province of Surakarta, Java, rich in remains of Hindu temples, of which there are six groups, with two apparently monastic buildings. The edifices are composed entirely of hewn stone, and no mortar has been used in their construction. The largest is a cruciform temple, surrounded by five concentric squares, formed by rows of detached cells or shrines, embracing an area of 500 feet square. In several of these dagobas the cross-legged figures of Buddha remain but the larger figures which must have occupied the central temples have disappeared from all but one.

Bramble, or Blackberry, a plant having prickly stems, which somewhat resemble those of the rasperry. The flowers do not appear till the summer is considerably advanced, and the fruit ripens toward the end of it, continuing to be produced till the frosts of winter set in. The fruit is too well known to need description. In the United States blackberries are extensively cultivated for their fruit.

Bramwell, John Milne, a British physician and author, born at Perth, New Brunswick, Canada, 1852. He graduated from the University of Edinburgh, and made a specialty of hypnotism, combining with considerable success the Parisian and Nancy methods of hyponosis. His published writings include "What is Hypnotism?"

Bran, the skins or husks of ground maize, wheat, rye, or other grain, separated from the flour. The nutritive value of these husks increases as we proceed from the outside of the grain toward the interior. The outer skin, or coarse bran, is very indigestible, owing to the presence of a layer of silica.

Branch, that part of a plant which is produced from a lateral leaf bud on the primary axis or stem. It is looked upon as part of the stem, and not as a distinct organ.

Branchia, the gills of fishes and various other inhabitants of water. They are the apparatus for enabling the animal to extract oxygen from the water, instead of being dependent on

the atmosphere.

Brand, Sir John Henry, a Boer statesman, born in Cape Town, Dec. 6, 1823. Queen 'ictoria knighted him in recognition of his aid. Brandford was named in his honor, and Ladybrand was named in honor of his wife. He died July 15, 1888.

Brandeis, Louis Dembitz, an American jurist, born in Louisville, Ky., Nov. 13, 1856; was admitted to the bar in 1878; began practice in Boston in 1879; gave special attention to railroad problems; was special counsel for the Interstate Commerce Commission in 1913–14, also in various Federal and municipal investigations; chairman of the Provisional Committee for General Zionist Affairs in 1914–15; widely known as an efficiency expert; was confirmed as an Associate Justice of the United States Supreme Court, June 1, 1916.

Brandenburg, a province of Prussia, surrounded mainly by Mecklenburg and the provinces of Pomerania, Posen, Silesia, and Prussian Saxony. The soil consists in many Saxony. The soil consists in many parts of barren sands, heaths, and moors; yet the province produces much grain, as well as fruits, hemp, flax, tobacco, etc., and supports many sheep. The forests are very extensive. The principal streams are the Elbe, the Oder, the Havel, and the Spree; but the first two merely skirt the territory. Brandenburg carries on an active trade in manufactured articles, and is well situated for commerce, since it has many canals, rivers, good roads, and is intersected by the railways from Berlin to Leipsic, etc. The province of Brandenburg includes, besides some other districts, the greater part of the former mark of Brandenburg, which formed the cradle of the Prussian monarchy, and the center round which the present extensive kingdom has grown up. It is divided into the three administrative divisions of Berlin, Potsdam, and Frankfort, and it has a total area of 15,376 square miles, with a pop. (census 1925) 2,588,688. Most of the inhabitants are Lutherans; the rest are chiefly Roman Catholics and Jews. From 1685 to 1688 many French refugees, Walloons, and inhabitants of Lorraine and of Palatinate. settled here. It is now the most impordoes the capital (Berlin), and the governments of Potsdam and Frankfort.

Brandes, Georg, a Danish literary critic of Jewish family; born in Copenhagen, Feb. 4, 1842, where he graduated at the university in 1864. Several books on æsthetic and philosophic subjects brought on him a charge of skepticism which was not removed by an epoch-making series of lectures. delivered before large audiences. In 1882 he returned to Copenhagen, his countrymen having guaranteed him an income of 4,000 crowns, with the stipulation he deliver public lectures on literature. Died, Feb. 1927.

Branding, an ancient mode of punishment by inflicting a mark on an offender with a hot iron. It is generally disused under the English civil law, but is a recognized punishment for some military offenses, as desertion. It is not, however, now done by a hot iron, but with ink, gunpowder, or some other preparation, so as to be visible, and not liable to be obliterated. The mark is the letter "D," not less than an inch in length, and is marked on the left side two inches below the armpit.

Brandt, Sebastian, a German author; born in Strasburg, in 1458; studied law and the classics with zeal at Basel, where he received permission to teach; and soon became one of the most influential lecturers in that city. The Emperor Maximilian showed his regard for Brandt by appointing him an imperial councilor. His fame rests wholly upon "The Ship of Fools," a satire on the follies and vices of the time (1494). Its distinguishing note is its abounding humor; but it owed its great popular success very largely to the clever woodcuts with which it was illustrated. He died in Strasburg in 1521.

Brandy, a spirit produced by the distillation of both white and red wines, and largely manufactured in European countries.

Brandywine Creek, in Pennsylvania and Delaware, is formed of two forks, the E. and W., which effect a

the British and German troops, 18,000 strong, under Howe, and the Americans numbering 13,000 men, under Washington. The consequence of this battle was the occupation of Philadelphia by the British troops.

Branner, John Casper, geologist, born in New Market, Tenn., 1850, graduated at Cornell University in 1874; was attached to the Brazilian Imperial Geological Commission 1875-1877, and in 1899 became vice-president of Leland Stanford University, president 1913-15. Died, March 1922.

Brant, Joseph, a Mohawk chief, born in Ohio in 1742. He participations of the president 1755.

ed in the campaign of 1755, and held the post of secretary to Col. Johnson, superintendent-general of Indian affairs. On the outbreak of the American Revolution, Brant took an active part in raising an Indian force to oppose the colonists, and was present at the action of Cherry Valley, and in other_engagements. In 1786 he visited England and collected funds for an Anglican Church, the first erected in Canada West. He passed the clos-ing years of his life at Burlington Bay, on Lake Ontario, on an estate granted him by the British Govern-ment. One of Brant's sons commanded a mixed Canadian and Indian force during the War of 1812. He died in Canada, Nov. 29, 1807.

Brantford, city and capital of Brant county, Ontario, Canada; on the Grand river and the Grand Trunk and other railroads; 65 miles S. W. of Toronto; contains many beautiful churches, Wickcliffe Hall (Y. M. C. A.), Court-house and county buildings of white brick, City Hospital, Technical School, and a number of benevolent homes; and manufactures farm implements, brass and iron castings, engines and mill machinery. Pop. (1930 Est.) 30,000.

Brasenose, one of the colleges of Oxford University, founded in 1509.

Brass, an alloy of copper and zine, of a bright yellow color, hard, ductile, and malleable. The best brass conforks, the E. and W., which effect a sits of two parts by weight of copper junction in Chester county of the first named State, and, taking a S. E. course, empties into Christiana creek at Wilmington. Here, Sept. 11, 1777, was fought a severe battle between and charcoal. Even now this process. is easier than the direct fusion together of the two metals. The proportion of copper and zinc vary.

Brasses, Monumental, large plates of brass, or of the mixed metal called latten or laton, inlaid on slabs of stone, and usually forming part of the pavement of a church.

Brassey, Lady Anne, an English descriptive writer born in London, about 1840. After her marriage she spent half of her life at sea, on Lord Brassey's yacht, the "Sunbeam." She died at sea Sept. 14, 1887.

Brassey, Thomas, an English engineer and railroad contractor, born in Baerton, Cheshire, Nov. 7, 1805. After receiving an ordinary education, he was, at the age of 16 years, apprenticed to a surveyor, whom he succeeded in business. After building parts of the Grand Junction and the London and Southampton railways, he contracted in 1840, in partnership with another, to build the railway from Paris to Rouen. In a few years he held under contract, in England and France, some 10 railways, involving a capital of \$180,000,000, and employing 75,000 men. In partnership with Betts and Peto he undertook the Grand Trunk of Canada, 1,100 miles in length. He died Dec. 8, 1870. His son Thomas, 1st Lord Brassey, born 1836, is an active British statesman. He has written "Work and Wages," "The British Navy," and other economical works. Died, 1918.

Brassicacese, an order of plants more generally called crucifers (crucifers). Among the well known plants ranked under the order may be mentioned the wall flower, the stock, the watercress and other cresses, the cabbage, the turnip, etc.

Bravi, the name formerly given in Italy, and particularly in Venice, to those wno were ready to hire themselves out to perform any desperate undertaking. The word had the same signification in Spain.

Bravo, Nicholas, a Mexican statesman, born in 1790. He participated in the revolution against Spain (1810-1817), and later aided Iturbide in establishing a republic. Under Santa Ana he twice acted as President. He died in 1854.

Bravura, an air requiring great skill and spirit in its execution, each syllable being divided into several notes. It is distinguished from a simple melody by the introduction of florid passages, a style of both music and execution designed to task the abilities of the artist.

Braxy, a disease in sheep. This term is frequently applied to totally different disorders, but the true braxy is undoubtedly an intestinal affection, attended with diarrhea and retention of the urine.

Bray, a small English parish, near Maidenhead, Berkshire, of which Simon Aleyn was vicar from 1540 to 1588, during the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. He kept his vicarage by changing his faith according to that of the State for the time being, becoming a Protestant with Henry, Catholic again in the reign of Mary, and Protestant again on the accession of Elizabeth. His principle was to live and die Vicar of Bray, and to it he adhered.

Bray, Anna Eliza, an English woman of letters, born in London, Dec. 25, 1790. Her maiden name was Kempe; was married to Charles A. Stothard, son of the famous artist, and, after his death, became the wife of the Rev. Edward A. Bray, Vicar of Tavistock. She died in London, Jan. 21, 1883.

Brazil, now called officially the UNITED STATES OF BRAZIL, a vast republic in South America, occupying a space nearly equal to one-half of that entire continent. It is of extremely irregular outline and varying dimensions; its greatest diameter being, E. to W., or from Cape Augustin to the Yavari or Jabary river, which separates it from Peru, 2,630 miles; and, N. to S., from Cape Orange E. of Oyapok bay, to the S. extremity of Lake Mirim, 2,580 miles; area 3,275,510 square miles. It is bounded S. E., E., and N. E. by the Atlantic Ocean; N. by French, Dutch, and English Guiana, and Venezuela; W. and S. W. by Colombia, Peru, Bolivia, Paraguay, and the Argentine provinces of Missiones, and by the republic of Uruguay. Its entire coast-line, from the extreme S. point already mentioned, to the head of the Bay of Oyapok is

upward of 4,100 miles. Throughout this vast extent of coast there are few great indentations, though in some parts smaller harbors and inlets are pretty numerous, many of the former excellent and generally surrounded by

With the exception of the Rio Francisco and the Parana, all the large rivers of Brazil empty themselves on its N. shores, and nearly all run parallel courses from S. to N., traversing the vast plains which occupy the center and N. W. portions of the country, and presenting means of internal communication, unequaled in any other part of the globa

er part of the globe.

Brazil is divided, politically, into 21 States (formerly provinces) of which there are at least nine each exceeding Great Britain in superficial extent. It is, however, difficult to obtain the area of the States, and of the whole counof the States, and of the whole country, the existing data being very unsatisfactory and conflicting. The total population as given by the Federal census of Dec. 31, 1926, was 30,635,605 distributed as follows: Native born, 29,045,227: Italian born, 558,405: Portuguese, 433,577; Spanish, 219,142; German, 52,870; Japanese, 27,976, and United States, 4,139. Immigration within the past few decades has been increasing. Great numbers of Portuguese. ing. Great numbers of Portuguese, Spaniards, Italians, Poles, and French have entered the country. Within recent years Japan has added her quota to the total. In the Southern States of Parana, Santa Catharina and Rio Grande do Sul there exist numerous colonies of Germans. The government has encouraged immigration by granthas encouraged immigration by granting lands and by forming immigrant colonies. The immigrants numbered 34,821 in 1922 and 86,767 in 1923. Of the latter 31,866 were Portuguese, 15,839 Italians, 10,141 Spaniards, and 2,854 Germans. The population of the principal cities is as follows: Rio de Tapaira the capital had in 1920 1 157. Janeiro, the capital, had in 1920 1,157,-873; Sao Paulo, 579,033; Bahia, 283,-422; Pernambuco, 238,843; Para, 236,402; Porto Alegre, 179,263; Nictheroy, 86,238; Curyteba, 78,986.

There are 378 important waterfalls, only 154 of which have been roughly measured, and have a potential force of at least 50,000,000 horsepower. In addition there are a great number having between 6,000 and 50,000

horsepower. Less than one per cent has been developed.

In remarkable contrast to the countries on the W. side of the South American continent, Brazil has no mountains of very great elevation. The higher mountains of Brazil, most of them occurring at greater and lesser distances from the E. coast, extend generally in a direction more or less from S. to N., though numerous inferior ranges traverse the country in various other directions. The river system of Brazil is unequaled, perhaps, in any other part of the world for the number and magnitude of the streams of which it is composed, the surface of the whole N. W. portion being interlaced with rivers of every length and volume; presenting the complex appearance of vessels in the human body, to which the Amazon and its larger tributaries may be said to stand in the relation of main arteries. By far the greater portion of these numberless streams have more or less of a N. direction, and finally find their way, either directly or through their principals, to the Amazon. The largest river of Brazil, and the largest. it is believed, in the world, though not the longest, is the Amazon, which enters the country from the W., about lat. 4° 30′ S.; lon. 70° W., and after a N. E. course from the point named of about 800 miles, flows into the Atlantic near the equator. In order of magnitude follow the Rio Negro and Medeira, both tributaries of the Amazon; the former flowing from the N. W., the latter from the S. W. The other large rivers in this portion of the country are the Branco, a tributary of the Rio Negro; the Tapajos and Xingu, other two large tributaries of the Amazon; the Araguay, Tocantins, Maranhao, and Paranahyba. The next in size is the Rio Francisco, which, after flowing N. for about 800 miles and the size of t miles, suddenly turns due E., and subsequently S. E., falling into the sea about lat. 11° S. Passing along the coast, S. from the embouchure of the Francisco, the following considerable rivers occur—the Vazabarris, Itapicuru, Paraguassu, Belmonte or Jequitinhonha, in the State of Bahia; Doce, State of Espirito-Santo; and the Paraiba-do-Sul, the S. boundary of the same State. In this enumeration of

the rivers having their embouchures on the E. coast of Brazil, we have omitted an immense number of smaller streams, perhaps not many below a hundred. In the interior of the S. In the interior of the S. portion of the country occur the large rivers Uruguay, Yguazu, Paranapan-ema, Tieta, Para, Paraguay, and Parana, with numerous smaller streams — smaller in comparison to these, but still large rivers—winding in all directions through every province. Although unrivalled in the number and magnitude of its rivers, Brazil has comparatively few lakes of any great extent. The largest is the Lagoa dos Patos, a lagoon in the State of Rio Grande do Sul, the extreme S. of the Brazilian States; it is about 150 miles in length, and 35 miles in breadth at the widest part, and is separated from the sea by a narrow strip of land only; it discharges its water into the ocean by a channel called the Rio Grande. Farther N. several smaller lakes oc-cur, the largest of which may be from 20 to 30 miles in length. There are hardly any others worth mentioning.

The mineral wealth of Brazil is considerable, and includes gold, silver, and iron, diamonds, topazes, and other precious stones. Among the earliest discovered and first wrought gold mines were those of Jaragua, but they have long ceased to be regularly worked, the precious metal being found more easily and in greater abundance mingled with the sands and alluvial deposits of rivers. The process of separation, the gold being in small par-ticles, is effected by repeated washings, which are continued till nothing but the pure metal remains at the bottom of the vessel. The entire quantity of gold produced has now greatly fallen off, being hardly a fourth of what it formerly was, owing chiefly to the auriferous sand having been exhausted. Large quantities of diamonds have been obtained in Brazil. The district from which most stones have been de-The district rived is Diamantina in Minas Geraes, adjoining the Serra do Espinhaco. The diamonds have been hitherto found in the beds of rivers only, and are washed from the sand and stones with which they are mingled much in the same way as the gold. The largest known Brazilian diamond was found in the Rio and oppressive; but vegetation is vig-Bogagens, and weighed 254½ carats. orous and profuse, the ground being

The negro who found a diamond weighing 17 carats, used to obtain his liberty, a variety of proportionate rewards being appointed for those of lesser value. About 20,000 negroes were at one time employed in the diamond wines. The government record representations of the second results are recorded as the second results are recorde mond mines. The government received one-fifth of the total value of all the gold and diamonds found in the country. Notwithstanding the sounding names of these two items of the mineral wealth of Brazil, neither of them has been nearly so profitable, nor so beneficial to the general interests of the country as the homeliest of its agricultural productions. In the short space of a year and a half the exports of sugar and coffee amounted to more than the value of diamonds found throughout a period of 80 years within the limits of Brazil.

As almost the whole of Brazil lies S. of the equator, and in a hemisphere where there is a greater proportion of sea than land, its climate is generally more cool and moist than that of countries in corresponding latitudes in the Northern Hemisphere. This is particularly applicable to the flat portions of the country, where impenetrable for-ests occupy the alluvial plains, and, by preventing the sun's rays reaching the earth, cut off one of the principal sources of heat—radiation. In the S. parts of Brazil, in consequence of the gradual narrowing of the continent, the climate is of an insular charnent, the climate is of an insular character—cool summers and mild winters. The quantity of rain that falls in Brazil differs widely in the amount in different localities. The N. States generally are subject to heavy rains and violent storms; but the S. regions rejoice in a settled, mild, and salubrious climate. The rainy season brious climate. The rainy season commences in October, and usually lasts till March, setting in with heavy thunder-storms. At Rio, where the climate has been much modified by the clearing away of the forests in the neighborhood, the mean temperature of the year is 72°; and the rains have been so diminished as to have seriously reduced the supply of water to the city. Generally the climate of Brazil is delightful, diffusing and maintaining a perpetual summer throughout this favored land. In the N. parts the air in the lower tracts is somewhat sultry

covered with flowers, and the trees with a foliage that is ever green; while the nights are deliciously cool. Near the coast the temperature is modified by the trade wind, which, after tra-versing the Atlantic, fans the shores of Brazil, imparting a refreshing cool-

ness to the atmosphere.

The soil of Brazil, so far as its capabilities have been tested, is highly fertile. Altogether but a comparatively small portion has yet been subjected to this test, probably not more than a hundredth part of the surface being under cultivation, and this portion is almost entirely limited to the coast, and to the N. E. part of the country, which seems peculiarly well adapted for the cultivation of maize, sugar, and coffee. The pastures, moreover, are of vast extent, and, as they afford food for immense numbers of horned cattle, they form one of the principal sources of the wealth of the country. Being almost wholly within the limit of the palm region, the vegetation of Brazil is characterized generally by the peculiar physiognomy which tha beautiful family of vegetables impresses on tropical countries. Of these nearly 200 species are known as native to the country. The chief food-supplying plants are sugar, coffee, cacao, rice, maize, wheat, manioc (cassava), beans, bananas, yams, lemons, oranges, figs, etc.— the two first, sugar and coffee, being the staple products of the republic. The manioc is a native of Brazil, and its farina is almost the only kind of meal used in that country. An acre of manioc is said to yield as much nutriment as six acres of wheat. The Indians find in this beautiful and useful plant a compensation for the rice and other cereals of the Old World. But it is in the boundless forests of Brazil that the vigor of the vegetative power is exhibited in its most imposing form. Rubber, drugs, dyes, fibers, vegetable ivory, and cabinet woods are all prod-ucts of the Brazilian forests. Among the trees are the andaacu, or Purga da Paulistas, the seeds of which yield a purgative oil; the cacao or chocolate tree; the Brazil-wood tree, used, under the name of Pernambuco wood, for markable for the beauty of their coldyeing silk of a crimson color; the rosewood tree, the fustic, mahogany, and a variety of others well adapted as 14,000 species are known. In

for various purposes. The beauty, variety, and abundance of the flowers of this extraordinary country are no less remarkable than any other of its vege-

table productions.

The principal domestic animals of Brazil are horned cattle and horses; the numbers of the former are prodigious, covering the boundless plains of the interior. The greatest part of them live in a wild or semi-wild state. Horses are numerous in the S. provinces: they are of a middling give from inces; they are of a middling size, from 12 to 141/2 hands high, but strong, lively, and swift. Mules are reared in the S. States. Sheep are in little repute, the meat being ill flavored and the wool of indifferent quality. Goats and hogs are abundant. The woods of Brazil swarm with wild animals, including the puma, jaguar, sloth, ar-madillo, etc. Wild hogs are also commadillo, etc. Wild hogs are also com-mon, as well as an amphibious animal called the water hog or capybara, resembling a hog in form, but of the size of a heifer. Monkeys are likewise nu-merous; and vampire bats are in some localities so destructive as to prevent the rearing of cattle. Among the feathered tribes are, the smallest, the humming-bird, and one of the largest, the humming-bird, and one of the largest, the rhea or ostrich. There are also parrots in great variety, and a powerful eagle, the harpy. Water-fowl, especially geese and ducks, abound in certain seasons on the lakes and lagoons at the S. extremity of Brazil. The reptiles consist of the boa constrictor and other species of servents some tor and other species of serpents, some of them venomous, especially the jarraraca, which is much dreaded by the natives. When full grown it is usually about six feet long, and is nearly allied to the rattlesnake genus. It prevails over all the S. States. Its bite is attended with great suffering, and with the most serious consequences, even where death is averted. In the marshy countries of the S. the boa or python is said to attain a length of over 20 feet. Other im-portant reptiles are several species of alligator and different kinds of turtle, which, on the Amazon in particular, supply abundance of food. The in-sects of Brazil are, many of them, re-markable for the beauty of their col-

LUMBERING INDUSTRY

some localities insects are so numerous in the woods that their noise is heard in a ship at anchor some distance from the shore. The white ants are especially numerous and destructive. The scorpions of Brazil attain a length of six inches. Most of the bees of the country are stingless, there being no fewer than 30 species of that descrip-tion. The shores and rivers abound with fish. Among the most valuable of those caught on the former is the garopa, which attains a length of from 12 to 20 feet, and is well flavored; they are most numerous on the coast of Bahia, where great quantities are annually taken and exported. The numbers of fish caught in the Amazon and other rivers of the country are very great, constituting a principal part of the subsistence of the inhabitants.

In every town schools for teaching the first rudiments are now to be found, to which the children of all citizens are admitted free. The University of Rio de Janiero was founded in 1920, and there are also govern-ment colleges of law, medicine, etc. In all large towns there are professorships of Latin, Greek, English, French, philosophy, rhetoric, geometry, chemistry, botany, etc.; and printing presses are now common throughout Brazil.

The varied population of Brazil consists of people of pure Portuguese blood, who form a comparatively small minority of the whole; of full-blooded negroes, who form the largest unmixed element in the population; of abor-igines or native Indians; and of people of mixed race, the most numerous of all; besides a certain number of German and other European immi-grants. The Portuguese portion of the population have made Portuguese the national language of the country. The native Indians are copper-colored, robust, well-made, but of short stature. They generally go naked, paint their skins, and are fond of ornamenting their heads with feathers. A number are nominally Christians. They belong to various tribes of which the chief are the Tupi, Guarani, and the Onagua. In recent years there has been considerable immigration of Europe a considerable immigration of Euro-

\$386,266,510: exports, 430,005,924. Of this \$88,746,757 was imported from the United States, and \$203,-017,937 exported to that country. Manganese is exported exclusively to the United States (249,324 tons in 1927) also a large part of the world's 1927) also a large part of the world's supply of monozite. The gold production is \$3,000,000 a year. Exports include also coffee, four-fifths of the world's supply being grown in Brazil, sugar, rubber (\$12,548,303 was the value of 1927 export), cotton, hides, drugs, gums, and diamonds. There are over 19,025 m. of railroad, the principal system being government owned, and joined with the railroads of Paraguay, Argentina, and Uruguay. of Paraguay, Argentina, and Uruguay. In 1926 Brazil had 4,090 m. of first class motor roads, and 28,360 of sec-ond class. There are over 42,000 m. of telegraph wire and extending tele-phonic systems. A feature of the telegraphic system is the cable laid on the bed of the Amazon river and giving Para, Manaos and other towns on its banks telegraphic connection with the rest of the world.

Practically all excepting 100,000 of the population are Catholics. Since the overthrow of the empire in 1889 republican institutions have been estab-lished, each of the old provinces being now a State, whose internal affairs are administered without interference from the central federal government. At the head of affairs is a president, by whom, and the national congress, legislation is carried on. The congress consists of a chamber of 212 deputies and of carried condeputies and a senate of 63 members, the former elected by direct vote as representative of the different States; while the senators are chosen by direct vote, three for each State and the Federal District for nine years. On Jan. 1, 1928, the foreign debt was \$156.890.267.

The revenue of the republic in 1928 aggregated \$250,671,960; and the expenditures \$250,657,920. The military budget for 1915 was \$36,270,-

Brazil was discovered Jan. 26, 1500, by Vincente Yanez Pincon, one of the companions of Columbus, and was subsequently taken possession of by Pedro Alvares de Cabral. Emanuel, King of pean colonists, the majority Italians. Portugal, had equipped a squadron for Imports for 1927 were in amount of a voyage to the East Indies, under the

Brazil Brazil

command of Cabral. The admiral, quitting Lisbon, March 9, 1500, fell in accidentally, April 24, with the continent of South America, which he at first supposed to be a large island on the coast of Africa. In this conjecture he was soon undeceived, when the natives came in sight. Having discovered a good harbor, he anchored his vessels, and called the bay Puerto Seguro. On the next day he landed with a body of troops, and having erected the cross, took possession of the country in the name of his sovereign, and called it Terro da Vera Cruz; but the name was afterward altered by King Emanuel to that of Brazil, from the red wood which the country produces.

The value of Brazil to Portugal continued steadily to increase after the discovery of the gold mines in 1698, and the discovery of the diamond mines in 1728. Up to the year 1810 Brazil had sent to Portugal 14,280 hundred-weights of gold and 2,100 pounds of diamonds, which foreign countries, and especially Great Britain, at last succeeded in purchasing at the Lisbon market. Rio Janeiro now became the mart for the proceeds of the Brazilian mines and native productions. But the administration was anything but adapted to promote the prosperity of the country. The attention of the government was turned almost exclusively to the gold washings and to the working of the diamond mines; and the policy of the administration consisted in the exaction of taxes and duties, which were collected from the fortified ports, to which trade was solely confined. Foreigners were excluded or jealously watched, and trade was paralyzed by numerous restrictions. the interior, the lands situated on the great rivers, after being surveyed, were frequently presented, after the year 1640, by the kings of the house of Braganza, to the younger sons of the Portuguese nobility, whom the system of entails excluded from the prospect of inheritance. These grantees enlisted adventurers, purchased negro slaves by thousands, and subjected the original inhabitants or drove them from their districts, and ruled their dominions with almost unlimited sway. The missions of the Jesuits also received similar donations from the kings.

On the invasion of Portugal in 1808 by the French, the sovereign of that kingdom, John VI., sailed for Brazil, accompanied by his court and a large body of emigrants. Soon after arriving there he began to improve the condition of the country by placing the administration on a better footing, and throwing open its ports to all nations. On the fall of Bonaparte the king raised Brazil to the rank of a kingdom, and assumed the title of King of Portugal, Algarve, and Brazil. The revolution which took place in Portugal in 1820, compelled the king to return to that country; he next year sailed for Lisbon, leaving Pedro, his eldest son and successor, as lieutenant and regent. But as the Portuguese Cortes was not willing to grant the entire equality of civil and political relations demanded by the Brazilians, and had expressly declared that Brazil was to be divided into governments, and ruled by the ministry of State at Lisbon, and the prince-regent was to be re-called to Portugal—such violent con-vulsions were excited in Rio Janeiro and various parts of Brazil, December, 1821, that it was explicitly declared to the prince-regent that his departure would be the signal for establishing an independent republic. The prince, therefore, resolved to remain in Brazil, and gave a public explanation of his reasons, Jan. 9, 1822, to his father. to the Cortes in Portugal, and to the people of Brazil. The Portuguese troops were removed from Brazil. The prince-regent assumed, May 13, 1822, the title of "perpetual defender of Brazil," and in June convened a National Assembly, composed of 100 deputies, to frame a separate constitution for the country. The National Assembly of Brazil declared the separation of that country from Portugal, Aug. 1, 1822, and Oct. 12, appointed Dom Pedro the constitutional Emperor of Brazil. The new emperor retained, at the same time, the title of "perpetual defender of Brazil."

The king, after some slight and ineffectual attempts to re-establish the former relations between Portugal and Brazil, acknowledged the independence of the latter country in 1825. Some years afterward a series of tumultuary proceedings ended in the abdication of Dom Pedro, who left Brazil on April

7, 1831, leaving his son, who was under age, as his successor. The rights of the latter were recognized and protected, and a regency of three persons appointed by the Chamber of Deputies to conduct the government during his minority. In 1840 the young emperor was declared of age, being then in his 15th year, and was crowned on July 18, 1841. The new government had considerable difficulty in crushing the republican and revolutionary party, which kept up a series of struggles in several provinces for some years. In 1845 the insurgents had all laid down their arms, but in 1848 a new rising took place, which was put down not without difficulty in the following year. In 1851 a war broke out with Rosas, dictator of Buenos Ayres, in which Brazil was joined by Paraguay, Uruguay, Corrientes, and Entre Rios, and which ended in favor of the allies. From this war Brazil received a cer-tain impulse. The trade now in-creased, the finances of the country improved, and the government began to further the development of the country by constructing roads, encouraging immigration, and fostering the education of the people. In 1853 the Bank of Brazil was founded, and the construction of railways began. In 1859 a minister for agriculture, commerce, and public work was appointed, and a large government loan for the construction of railways was authorized. In 1863, in consequence of the arrest of three English naval officers, a misunderstanding arose with Eng-land, which led to the termination of diplomatic relations for a time between the two countries. Meanwhile (November, 1864) hostilities had been commenced by the Paraguayans under President Lopez against Brazil, in consequence of the interference of the latter in the affairs of Uruguay; and in May, 1865, an alliance for the purpose of carrying on war against Paraguay was concluded between Brazil, the Argentine Confederation, and Uru-guay. This war, the brunt of which had to be borne by Brazil, lasted till 1870, the Paraguayans having maintained a heroic resistance, and having

mense expenditure of men and money to Brazil, but it established her reputation as a great power and secured the freedom of the navigation of the La Plata river system. For some years after this a movement toward greater freedom went on in Brazil. In 1888 it took the form of a total abolition of slavery without compensation, and in 1889 it received further development in a revolution which overthrew the monarchy. On Nov. 16 a provisional government was formed, the emperor with his family sailed for Europe, and a new constitution proclaimed the Republic of the Federated United States of Brazil. In 1924 there were further internal disturbances culminating in a revolutionary uprising in Sao Paulo and neighboring states. Seven states were declared in state of siege.

Military service is compulsory in Brazil, and an army of about 43,000 officers and men is maintained, with reserves of 560,000. The navy has two dreadnaughts manned by 10,300 officers and men. In 1926 Brazil withdrew from the League of Nations and refused to reconsider its decision.

Brazilian Grass, an incorrect popular name applied to a substance used in the manufacture of a very cheap kind of hats, known as Brazilian grass hats.

Brazil Nuts, the seeds of a Brazilian tree. The nuts or seeds are largely exported from Para, whence they are sometimes called Para nuts.

Brazil Tea, a tree—the mate, the leaves of which are used in South America as a substitute for Chinese or India tea.

Brazil Wood, a kind of wood used for dyeing, and extensively imported from the West Indies, Brazil, and other tropical countries.

Brazing, the act of soldering together the surfaces of iron, copper, brass, etc., with an alloy composed of brass and zinc, sometimes with the addition of a little tin or silver.

had to be borne by Brazil, lasted till 1870, the Paraguayans having maintained a heroic resistance, and having only given up the contest on the death of their leader, Lopez, in battle against the Brazilians (March 1, 1870). This struggle was attended with an im-

gable by steamboats for about 300 miles.

Breach, the aperture or passage made in the wall of any fortified place by the ordnance of the besiegers for the purpose of entering the fortress.

Breach, in law, any violation of a law, or the non-performance of a duty imposed by law.

Bread. In the earliest antiquity we find the flour or meal of grain used as food. Bread, as is well known, is made from the flour or meal of the cereals, Indian corn, millet, and rice being principally used for the purpose in the more S. countries, rye, barley, and oats in the more N., and wheat in the intermediate and temperate re-gions; but other vegetable products, such as beans, peas, lentils, turnips, carrots, potatoes, and even the bark of trees, are also sometimes employed either alone or mixed with the flour of the cereals.

Breadfruit. The breadfruit is a large, globular fruit of a pale-green

BREADFRUIT.

color, about the size of a child's head, marked on the surface with irregular six-sided depressions, and containing a white and somewhat fibrous pulp, which when ripe becomes juicy and yellow. The tree that produces it grows wild in Tahiti and other is-

leaves, deeply divided into seven or nine spear-shaped lobes. The eatable part of this fruit lies between the skir and the core, and it is as white as snow and somewhat of the consistence of new bread. When gathered it is generally used immediately; if it be kept more than 24 hours, it becomes hard and choky. The inhabitants of the South Sea Islands prepare it as food by dividing the fruit into three or four parts and roasting it in hot embers. Its taste is insipid, with a

slight tartness.

As the climate of the South Sea Islands is not very different from that of the West Indies, it was thought de-sirable that some of the trees should be transferred in a growing state to the British islands there; and it was for this purpose that the "Bounty" for this purpose that the "Bounty" sailed in 1787 to the South Seas, under the command of the well-known Bligh. This expedition being unsuccessful, a second, also under Bligh, was fitted out in 1791. He arrived in safety at Tahiti, and after an absence from Findland of about 18 sence from England of about 18 months, landed in Jamaica with 352 breadfruit trees in a living state, hav-ing left many others at different places in his passage thither. From Jamaica these trees were transferred to other islands; but the negroes, having a general and long-established predilection for the plantain, the breadfruit is not much relished by them. Where, however, it has not been generally introduced as an article of food, it is used as a delicacy; and whether employed as bread or in the form of pudding, it is considered highly palatable by the white inhabitants.

Breakwater, a pier, wall, mole, sunken hulk, or anything similar, placed at the entrance of a harbor, at the exposed part of an anchorage, or in any such situation, with the view of deadening the force of the waves which roll in from the ocean. There are several notable breakwaters in this country - one of the longest and most country — one of the longest and most notable being that in Lake Michigan, protecting the harbor of the city of Chicago. It is peculiar in its construction, being built perpendicularly and encased with wooden beams. The lands of the South Seas. It is about Delaware breakwater, in Delaware 40 feet high, with large and spreading Bay, is built with sloping sides, being branches, and has large bright green much broader at its base than on top.

Bream, the carp bream. It is of a yellowish white color, which changes, through age, to a yellowish brown. The sides are golden, the cheeks and gill covers silver white, the fins, light colored, tinged, the ventral one with red and others with brown. It is found in deep waters and lakes. It found in deep waters and lakes. It is sought after by anglers, who, however, consider the flesh insipid.

Breastwork, in fortification, a hastily constructed parapet made of material at hand, such as earth, logs, rails, timber, and designed to protect troops from the fire of an enemy. architecture, the parapet of a build-ing. In shipbuilding, a railing or balustrade standing athwartships across a deck, as on the forward end of the quarter deck or roundhouse. The beam supporting it is a breastbeam.

Breckinridge, Clifton R., an American legislator and diplomatist, born in Lexington, Ky., Nov. 25, 1846; received a public school education and served in the Confederate army and served in the Confederate army and navy. After the war he attended Washington College (now Washington and Lee University) for three years, and engaged in mercantile business in Pine Bluff, Ark. He was elected to Congress in 1882 as Representative-at-large. On July 19, 1894, he was appointed United States Minister to Russia serving until 1807. ister to Russia, serving until 1897.

Breckinridge, or Breckenridge, John, an American statesman, born in 1760. In 1795 he was made Attorney-General of the new State of Kentucky, and he served in its Legislature from 1797 to 1800. He entered the United States Senate, in 1801, becom-ing four years later Attorney-General in Jefferson's cabinet, in which office he died in 1806.

Breckinridge, John Cabell, Vice-President of the United States, born near Lexington, Ky., Jan. 21, 1821; practiced law in Lexington until 1847, when he was chosen major of a volunteer regiment for the Mexican War. He sat in Congress in 1851-1855, and in 1856 was elected Vice-President, with James Buchanan as President. In 1860 he was the proslavery candidate for the presidency, but was defeated by Abraham Lin-coln. A United States Senator from March to December, 1861, he then en- inner angle is the throat.

tered the Confederate army, was appointed a Major-General, in 1862, and held some important commands during the Civil War. He was Secretary of War in Jefferson Davis' cabinet at the close of the struggle, and escaped to Europe, whence he returned in 1868. He died in Lexington, May 17, 1875.

Breckinridge, Joseph Cabell, an American military officer, born in Baltimore, Md., Jan. 14, 1842; a cousin of Gen. John C. Breckenridge of the Confederate army. He practhe Confederate army. He practiced law in Danville, Ky., till the beginning of the Civil War, when he joined the Union army. He was made a First Lieutenant in the Regular army Aug. 1, 1863, a Captain in 1874, Brigadier and Inspector-General in 1889, and Major-General of Volunteers, May 4, 1898. He served in the Santiago campaign and had a horse shot under him 1813, 1898. shot under him. Died, 1920.

Breckinridge, Robert Jefferson, a Presbyterian clergyman and bon, a freesystem cleryman and theological writer, born at Cabell's Dale, Ky., March 8, 1800. He was originally a lawyer. He was President of Jefferson College in 1845-1847; from 1847 he was pastor at Lexington, Ky. He was a leader in the division of the Presbyterian Church in 1837 into Old and New Schools. He died in Danville, Ky., Dec. 27, 1871.

Breda, a town in Holland, Province of North Brabant, at the confluence of the Merk and the Aa. Breda was once a strong fortress and of great military importance as a strategical position. From the 16th to the end of the 18th century Breda has an interesting military history of sieges, assaults and captures, with which the names of the most famous generals of their time, the Duke of Parma, Maurice of Orange, the Marquis Spinola, Dumouriez, and Pichegru, etc., are connected. It was the residence for a time of the exiled Charles II. of England, and it was in the Declaration of Breda that he promised liberty of conscience, a general amnesty, etc., on his restoration.

Breech, in firearms and ordnance, the rear portion of a gun; the portion behind the chamber; in shipbuilding, the outer angle of a knee timber; the Breeches Bible, a name given to a Bible printed in 1579; and so called from the reading of Gen. iii: 7: "They sowed figge tree leaves together and made themselves breeches."

Breech Loader, a firearm in which the charge is introduced at the rear instead of at the muzzle.

Breech Pin, in firearms, a plug screwed into the rear end of a barrel, forming the bottom of the charge chamber. Otherwise called a breech plug or breech screw.

Breech Screw, in firearms, the plug which closes the rear end of the bore of a firearm barrel. The parts are known as the plug, the face, the tenon, the tang, and the tangscrew hole.

Breech Sight, the hinder sight of a gun. In conjunction with the front sight, it serves to aim the gun at an object.

Breeding, the art of improving races or breeds of domestic animals, or modifying them in certain directions, by continuous attention to their pairing, in conjunction with a similar attention to their feeding and general treatment.

No sooner had the Revolutionary War closed than importations of improved stock began. This was kept up till the War of 1812 temporarily checked it.

Mr. Rommel says that the year 1817 will always be memorable in American cattle history. In that year, following the short-horn importations of 1812, came the beginning of the Devon and Hereford importations, together with still another arrival of shorthorns. Growth was slow up to 1827, when there came renewed activity, especially in short-horns. Companies were formed and the improvement of cattle was marked. In point of num-bers the shorthorn breed rapidly as-sumed the foremost position, and till about the year 1880 was the only beef of prominence.

The expansion of the cattle business

was rapid. Up to the opening of the Union Pacific railroad it was mainly carried on in the part of the country E. of the Missouri river. Then came

tle raising industry was then abnormal. "In the early eighties," says Mr. Rommel, "pure-bred cattle by the thousands were brought from England to supplement the American herds in breeding bulls for the range, and the nearest that the Hereford and Angus breeds ever came to having a boom in this country was at this time. After the collapse, which was bound to follow, the cattle business is now on what is thought to be a substantial and healthy foundation.

Breed's Hill, a slight elevation in the Charlestown district of Boston, Mass., about 700 yards from Bunker Hill. Although the famous engage-ment of June 17, 1775, is known as the Battle of Bunker Hill, most of the fighting was done on Breed's Hill. Here was located the American redoubt, against which the British made their three historical charges, and here Warren fell. The Bunker Hill monument stands on Breed's Hill.

Breitenfeld, a village of Saxony, 5 miles N. of Leipsic, remarkable for three battles fought in its neighborhood. In the first, fought on Sept. 17 (old style, 7th), 1631, Gustavus Adolphus inflicted a decisive defeat upon the imperialists under Tilly, who, as well as his generals, Pappenheim and Furstenberg, was wounded. The second battle was also a victory of the Swedes under Torstenson over the imperial forces under the Archduke Leo-pold and Piccolomini, Nov. 2 (old style, Oct. 23), 1642. The third battle was one act of the great "Battle of the Nations" at Leipsic, Oct. 16, 1813.

Bremen, a free city of Germany, an independent member of the Republic, one of the three Hanse towns, on the Weser, about 50 miles from its mouth, in its own small territory of 99 square miles, besides which it possesses the port of Bremerhaven, at the mouth of the river. The city is partly on the right, partly on the left, bank of the Weser, the larger portion being on the former. Its situation renders Bremen the emporium for Hanover, Brunswick, Hesse, and other countries tra-versed by the Weser, and next to Hamburg it is the principal seat of the exthe discovery of the great opportuni-ties offered by the far Western plains of Germany. Only small vessels can for grazing. The growth in the cat-pass up to the city itself; the great

bulk of the shipping trade centers in Bremerhaven and in Geestemunde. Bremerhaven is now a place of (1920) 26,400. inhabitants, has docks capable of receiving the largest vessels, and is connected by railway with Bremen, where the chief merchants and brokers have their offices. The chief imports are tobacco, raw cotton and cotton goods, wool and woolen goods, rice, coffee, grain, petroleum, etc., which are chiefly re-exported to other parts of Germany and the Continent. World War completely ruined the trade of the Revival of commerce began in

port. Revival of commerce began in 1922. Pop. of city (1925) 294,966.

Bremer, Fredrika, a Swedish novelist, was born at Tuorla, Finland, Aug. 17, 1801; was brought up at Arsta, about 20 miles from Stockholm. She varied her literary labor by long inverse in Italy England the United journeys in Italy, England, the United States, Greece, Palestine. She died in Arsta, Dec. 31, 1865.

Brennus, the name of two individ-uals known in history. (1) The first was the hero of an early Roman legend which relates to the migration of the Gauls into Italy and their march to Clusium and Rome. In the account given by Livy, he figures as the Regu-lus Gallorum, or chieftain of the Gauls. When he arrived at Clusium, the inhabitants called on the Romans for aid. He engaged with and defeated the Romans on the banks of the Allia, the name of which river they ever after held in detestation. The whole city was afterward plundered and burned, and the capitol would have been taken but for the bravery of Manlius. At last, induced by famine and pestilence, the Romans agreed that the Gauls should receive 1,000 pounds of gold, on the condition that they would quit Rome and its terribrought false weights, but his fraud was detected. The tribune Sulpicius exclaimed against the injustice of Brennus, who immediately laid his sword and belt on the scale, and said, "Woe to the vanquished." The dictator, Camillus, arrived with his forces at this critical time, annulled the capitulation, and ordered him to prepare for battle. The Gauls were defeated: there was a total slaughter, and not a man survived to carry home the lin; is the capital of the province of news of the defeat. (2) A king of Silesia. It is situated in a spacious

the Gauls, who, B. c. 279, made an irruption into Macedonia with a force of 150,000 men and 10,000 horses. Proceeding into Greece, he attempted to plunder the temple at Delphi. He engaged in many battles, lost many thousand men, and himself received many wounds.

Brent, Charles Henry, an American clergyman; born in Newcastle, Ontario, Canada, in 1862; was graduated at the University of Trinity College in 1884; ordained deacon in the Protestant Episcopal Church in 1886, priest in 1887; consecrated the free priest in 1887; consecrated the first bishop of the Protestant Episcopal Church for the Philippine Islands in December, 1901; declined the bishopric of Washington, 1908, and of New Jersey, 1914.

Brent Goose, a wild goose, smaller than the common barnacle goose and of much darker plumage, remarkable for length of wing and extent of migratory power, being a winter bird of passage in the United States, Canada, etc. It breeds in high northern latitudes; it feeds on drifting seaweeds and saline plants, and is considered the most delicate for the table of all

the goose tribe.

Brescia, a city of Lombardy, North Italy. Brescia is a place of considerable trade and manufacturing industry. Near it are large iron-works, and its firearms are esteemed the best that are made in Italy. It has also silk, linen, and paper factories, tan-yards, and oil mills, and is an impor-tant mart for raw silk. But it de-rives its greatest interest from its fine Roman remains, having been at one time the seat of a Roman colony. In 1796 it was taken by the French, and was assigned to Austria by the general treaty signed at Vienna on June 9, 1815. In 1849 it was involved in the commotions of Continental Europe; its streets were barricaded; but the city was eventually captured by the Austrians under General Haynau. It was ceded to Sardinia by the treaty of Zurich in 1859. Pop. (1921) 96,-424.

Breslau, a large city of the German Republic, and the second in the Prussian dominions, being excelled in population only by the capital, Ber-lin; is the capital of the province of plain at the confluence of the Ohlau and the Oder, the latter dividing it into two main portions, which, with islands in the river, are connected by a large number of bridges. There are electric and other tramways. The public squares and buildings are handsome. The fortifications which surrounded the old or inner city have been converted into promenades, and the ditch into an ornamental sheet of water. Pop. (1925) 155,801.

Brest, a seaport in the N. W. of France, Department of Finistere. It has one of the best harbors in France, and is the chief station of the French marine, having safe roads capable of containing 500 men-of-war in from 8 to 15 fathoms at low water. The entrance is narrow and rocky, and the coast on both sides is well fortified. The design to make it a naval arsenal originated with Richelieu, and was carried out by Duquesne and Vauban in the reign of Louis XIV., with the result that the town was made almost impregnable. Brest stands on the summit and sides of a projecting ridge, many of the streets being exceedingly steep. Several of the docks have been cut in the solid rock, and a breakwater extends far into the roadstead. Pop. (1921) 73,960.

Bretagne or Brittany, one of the Provinces into which France was divided. It now forms the Departments of Finistere, Cotes-du-Nord, Morbihan, and Loire-Inferieure. In ancient times, under the name of Armorica, it was the central seat of the confederated Armorican tribes, who were of Celtic and Kymric origin. Traces of them still remain in the old Kymric dialect of the three most westerly Departments, and in the numerous so-called Druidical monuments. The Breton has generally a tinge of melancholy in his disposition; but often conceals, under a dull and indifferent exterior, lively imagination and strong feelings. The greater number of the people are found to be ignorant and coarse in their manners, and their agriculture is of a very rude character, by no means calculated to develop the natural resources of the country.

natural resources of the country.

The Duchy of Bretagne was incorporated with France in 1532, by Francis I., to whom it had come by marriage, and subsequently shared in the

general fortunes of the kingdom, but retained a local parliament until the outbreak of the Revolution. During the Revolution Bretagne, which was intensely loyal, was the arena of sanguinary conflicts, and especially of the movements of the Chouans, who reappeared as recently as 1832. The Bretons are also intensely Roman Catholic, and have made violent resistance in 1903 to the enforcement of the law closing unauthorized religious establishments.

Breton, Jules Adolphe, a French painter, born in Courrieres in 1827; was educated at St. Omer and at Douai, and trained as a painter under Felix Devigne at Ghent, and in Drolling's atelier at Paris. The subjects of his earlier pictures are taken from the French revolutionary period; but he soon turned to the scenes from peasant life which he has treated in a most poetic and suggestive manner, with an admirable union of style with realism. Breton was also known as a poet and author. Many of his pictures are in this country. He died July 6, 1906.

Brets, Brettys, or Brits, Britons, the name given to the Welsh, or ancient Britons, in general; also, to those of Strathclyde, as distinguished from the Scots and Picts.

Bretten, a town of Baden, Germany, the birthplace of Melanchthon, 16 miles E. N. E. of Karlsruhe by rail. The house in which the Reformer was born belongs now to a foundation bearing his name for the support of poor students, established in 1861. A monument was erected in 1867.

Breughel, the name of a celebrated Dutch family of painters, the first of whom adopted this name from a village not far from Breda.

Breve, in music, a note or character of time, equal to two semibreves or whole notes. It was formerly square in shape, but is now oval. It is the longest note in music.

Brewer, David Josiah, an American jurist, born in Smyrna, Asia Minor, June 20, 1837; graduated at Yale College, 1856. He studied law in the office of his uncle, David Dudley Field, and was admitted to the bar in New York city in 1858. Removing to Kansas, he became prominent in his

profession. He was judge of the Supreme Court of Kansas, 1870-1881, and was appointed United States Judge for the 8th Circuit in 1884. He rendered a memorable decision on the Kansas Prohibition Law, affirming the right of liquor manufacturers to compensation, for which he was severely criticised by the Prohibitionists. President Harrison elevated him to the Supreme Court of the United States in 1889. He was made a member of the Venezuelan Commission by President Cleveland in 1896, and its chairman. He died March 28, 1910.

Brewer, Thomas Mayo, an American ornithologist, born in Boston, Mass., Nov. 21, 1814; died in Boston, Mass., Jan. 23, 1880.

Brewer, William Henry, an

Brewer, William Henry, an American scientist, born in Poughkeepsie, N. Y., Sept. 14, 1828. He was graduated at Yale Scientific School in 1852. He made important government surveys, and after 1864 was Professor of Agriculture at Sheffield Scientific School (Yale). He died Nov. 2, 1910.

Brewing, the operation by which beer is made, including under this term all kinds of liquors produced from grain by fermentation. The name beer, may be given to any drink produced by the fermentation of a fluid consisting of water sweetened with honey, sugar, or molasses; but, strictly speaking, the term should only be applied to beverages prepared, either wholly or partially, from malted grain by fermentation.

Brewster, Benjamin Harris, an American lawyer, born in Salem Co., N. J., Oct. 13, 1816. He was graduated at Princeton in 1834, was admitted to the Philadelphia bar in 1838, and in 1881 became Attorney-General of the United States in President Arthur's cabinet, in which capacity he prosecuted the Star Route cases. He died in Philadelphia, Pa., April 4, 1888.

Brewster, Sir David, a Scotch natural philosopher, born in Jedburgh in 1781. His discoveries in reference to the properties of light have led to great improvements in the illumination of lighthouses. He died in Montree, Scotland, Feb. 2, 1868.

Brewster, William, one of the Massachusetts Pilgrims, born in

Scrooby, England, in 1560. He came of a well known family; was educated at the University of Cambridge, and was for a time postmaster at Scrooby. He accepted the Separatist doctrines taught by Hooker and others, and, in consequence, had to flee to Holland, where he supported himself by printing. He was one of the leaders of those who sailed for the New World in the "Mayflower," and, as elder of the church, encouraged his fellow colonists at Plymouth both by his preaching and his example. He died in Plymouth, Mass., April 10, 1644.

Brian (surnamed BOROIMHE), King of Ireland, for many years ruled his dominions with vigor and prosperity; but fell in the battle of Clontarf, on Good Friday, 1014.

Briand, Aristide, French statesman; born at Nantes, March 28 1862; became a lawyer and Socialist deputy; Minister of Justice and Public Worship in the Clemenceau Cabinet; acquired high reputation for statesmanship and parliamentary ability by his conduct on the debate on separation of Church and State; handled with firmness the railroad strike of 1910; was several times premier.

Briareus, a famous giant, son of Cœlus and Terra, who had 100 hands and 50 heads, and was called by men Ægeon, and only by the gods Briareus.

Bribery, in the United States, the word applied to an attempt to corruptly influence, by means of offers of reward, the course of legislation, the result of an election, the verdict of a jury, the decision of a magistrate, etc. It is not necessary to constitute an indictable offence that the bribe be accepted. The tender of the bribe is the essence of the crime. If a bribe be offered a witness to swear falsely the crime is not bribery, but is merged into subordination of perjury. The penalty for bribery is fine or imprisonment, or both.

Brice, Calvin Stewart, an American reference have led to e illuminated in Monson of the born in came interested in 1863. He practiced law in Cincinnati from 1866 to 1880, when he behorn in came interested in railroad and various

other financial undertakings. He was presidential elector on the Tilden ticket in 1876 and the Cleveland ticket in 1884, and chairman of the Democratic National Committee in 1888. In 1890 he was elected United States Senator from Ohio, and served on the Appropriations, Pensions, Pacific Railroad, and Public Buildings and Grounds Committees. Shortly before his death Committees. Shortly before his death, in New York city, Dec. 15, 1898, he formed a syndicate which secured vast railroad and mining concessions in

Brick, a kind of artificial stone, made of clay, molded in prismatic form, dried in the sun and baked in a The word is also applied to the block in its previous condition as a molded plastic mass, and as a dried block in which the water hygrometrically combined with the clay is driven off. When this condition is accepted as a finality, the block so dried is an adobe. Bricks were made at a remote period of antiquity by the Egyptians, the Babylonians, the Assyrians, and some of them, being inscribed with written characters, have been of priceless value in conveying historic facts

to the present age.

In the United States every State and Territory, excepting Alaska, now produces bricks and tiles, and the value of the combined output in 1921 was \$194,329,400. The trade classification is common or building, vitrified paving or block, front, enameled, fancy

and ornamental, and fire.

Bridge, the short name of a comparatively recent and increasingly popular form of the card game of whist. Its rules and points are too numerous to be given here, and the reader is referred to special works.

Bridge, a structure consisting of an arch or series of arches supporting a roadway above it, designed to unite two banks of a river or the

two sides of an open space.

The Brooklyn Suspension bridge, across the East river, between New York and Brooklyn, opened in 1883, is built of steel. It has a central span of 1,595½ feet, and two land spans of 930 feet each; making, with ap-proaches, a total length of 5,989 feet,

119 feet one way, by 132 feet the other, rising to a height of 90 feet above high water mark, weighing 60,000 tons each. The towers are 278 feet high. The weight of the whole structure suspended between the towstructure suspended between the stress of ers is nearly 7,000 tons. The stress of suspension is borne by four cables of 5,296 steel wires each, 15% inches in diameter. The foundations of the towers were laid by means of caissons and compressed air, at a level of about 80 feet below high water mark. The roadway presents five parallel avenues of an average width of 16 feet each. The two outmost avenues, 19 feet wide, are devoted to vehicles; the central avenue, 151/2 feet wide, for foot passengers; and on the two intermediate avenues are laid railways for car traffic.

Cantilever Bridges .- A cantilever is a bracket. It is a structure overhung from a fixed base. The bridge across the river Forth on the North British railway system is one of the largest and most magnificent bridges in the world. The site of the bridge is at Queensferry. At this place, the estuary of the Forth is divided by the Island of Inchgarvie into two channels, whose depth, as much as 200 feet, precluded the construction of intermediate piers. Hence, two large spans of 1,700 feet each were adopted. Between these, the central pier is founded on the island midway across, and is known as Inchgarvie pier. There are two other main piers, shore piers, known respectively as the Fife pier and the Queensferry pier. these three piers respectively three double lattice work cantilevers like scalebeams, 1,360 feet, or a quarter of a mile in length, are poised in line, reaching toward each other, and connected at their extremities by ordinary girders 350 feet long, by which the two main spans are completed. The bridge consists of two main spans of 1,700 feet, or nearly one-third of a mile each; two of 675 feet each, being the shore ends of the outer cantilevers; and 15 spans of 168 feet each. The total length of the viaduct, including piers, is 8,296 feet or a little over 114 miles of miles length of the viaduct. over 11/2 miles, of which almost exactor about one mile and one furlong. ly one mile is covered by the great The anchorage at each end is a solid cantilevers. The clear headway under cubical structure of stone, measuring the center of the bridge is 152 feet at high water, and the highest part of the

bridge is 361 feet above the same level.

There are several of these bridges in the United States, the first of any size being the Niagara cantilever, built in 1883. Its total length is 910 feet, and it is 295 feet above the surface of the river, with steel towers 130 feet high. The Hudson river bridge at Poughkeepsie, built in 1889, has a length of 6,767 feet and is built in five spans; the first, third and fifth being true cantilever spans with fixed continuous spans connecting them.

The new East River bridge is also late example of the suspension idge. The new Blackwell's Island bridge is an example of the cantilever. There are four channel piers, 85 by 45 feet at the base, and 135 feet above high tide. These piers contain 810,000 cubic feet of granite. The bridge is 2 miles in length, with two channel spans of 846 feet each, and a span across Blackwell's Island of 613 feet. The distance from the floor of the bridge to the top of the girders forming the span is 100 feet, making the top of the structure 235 feet above high tide. Other patable cartillage. high tide. Other notable cantilever bridges are those across the Colorado river at Red Rock, Cal., and across the Mississippi river at Memphis, Tenn.

Bridges in the shape of arches are often built in places where a more artistic structure than a truss is desired. The High Bridge and Washington Bridge across the Harlem river in New York city are examples of this style of bridge. The High Bridge was built to carry the Croton_Aqueduct across the Harlem river. It consists of 13 granite arches, the highest one being 116 feet above the river. The bridge, crossing the river and valley, is 1,460 feet long. The Washington Bridge is situated a short distance N. of the High Bridge and consists of nine arches, three of granite on the E. side, four of granite on the W. and two central steel spans connecting them. The entire length of the bridge and 135 feet above high water. Another noted bridge built 1906-07 is the suspension span, 230 ft. long, across the Grand Cañon Gorge, 2,627

Florence and Cañon City, Col. The floor is glass set in steel, to allow the view beneath.

One of the best examples of American long-span iron-bridge construc-tion is the bridge across the Kentucky river on the Cincinnati Southern railroad, noteworthy for its economical design and comparatively light weight. The iron work of the bridge is 1,138 feet in length, and it consists of three spans of 375 feet each. It crosses a limestone canon at a height of 280 feet above the bed of the stream. The piers are of stone to a height of 60 feet, to clear the highest recorded floods; and they are about 34 feet thick at the flood level. Above the stonework the piers are of iron.

The iron lattice bridge, so called from having sides constructed with cross bars, like lattice work, is the natural outcome of the tubular bridge for long spans, developing equal strength with considerable economy of material and labor. Lattice girders are now almost universally adopted for iron bridges for long spans.

Of the rock formations called natural bridges, the most remarkable is the natural bridge over Cedar Creek, in Virginia, 125 miles W. of Rich-mond. The mass of siliceous limestone through which the little river passes is presumably all that remains of a once extensive stratum. The cavern or arch is 200 feet high and 60 feet wide. The solid rock walls are nearly perpendicular, and the crown of the arch is 40 feet thick.

Bridgeport, Conn., a city and port of entry at the mouth of the Pequonnock, on an inlet of Long Island Sound, 58 miles N. E. of New York. Important for sewing machine, cartridge and other factories and coast-

ing trade. Pop. (1930) 146,716.

Bridges, Robert, English Poet
Laureate, born Oct. 23, 1844, on the
Island of Thanet, educated at Eton and Corpus Christi Colleges, Oxford, studied medicine at St. Bartholomew's, London, becoming Casualty Physician is 2,300 feet, and width, 80 feet; the there and Assistant Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician at the central spans being each 510 feet long London Children's Hospital and Physician et al. there and Assistant Physician at the sician at the Great Northern Hospital. His writing was great in volume as

well as in quality. Died Apr. 21, 1930. **Bridgeton**, a city, port of entry, ft. above the Arkansas River between summer resort, and capital of Cum-

berland county, N. J.; on the navi-gable Cohansey creek and several railroad, 38 miles S. of Philadelphia. It is the trade center of an extensive farming section, has large fruit and vegetable canning interests. and interests, manufactures foundry and rolling-mill products, glass, nails, woolen goods, machinery, and carriages. Pop. (1926 Est.) 14,400. Bridgewater, Francis Egerton, carriages.

third **Duke of**, the "Father of Inland Navigation in Great Britain," born in 1736. For the purpose of connecting the cities of Liverpool and Manchester, he completed a navigable canal, with the assistance of the celebrated engineer, Brindley, in 1761. Trunk Canal navigation. He became ultimately the possessor of immense wealth, realized from the results of his life's labors. He died in London, March 3, 1803.

Bridgman, Frederic Arthur, an

American artist, born in Tuskegee, Ala., Nov. 10, 1847. He studied at the Brooklyn Art School and National Academy of Design, and was a pupil of J. L. Gerome, and at the Ecole des Beaux Arts. He has since 1871 had a studio in Paris. He is noted for figure pieces and Oriental and archeological pictures. Died Jan. 13, 1928.

Bridgman, Laura, an American blind mute, born in Hanover, N. H., Dec. 21, 1829. At two years of age both sight and hearing were entirely destroyed by fever. In 1839 Dr. Howe, of Boston, undertook her care and education at the deaf and dumb school. The first attempt was to give her a knowledge of arbitrary signs, by which she could interchange thoughts with others. Then she learned to read emothers. Then she learned to read em-bossed letters by touch; next, em-bossed words were attached to different articles, and she learned to associate each word with its corresponding object. Her touch grew in accuracy as its power increased; she learned to know people almost instantly by the touch alone. In a year or two more she was able to receive lessons in geography, algebra, and history. She learned to write a fair, legible, square hand, and to read with great dexterity, and at last even to think deeply, and to reason with good sense and discrimination. She died May 4, 1889.

Brig, (contracted from brigantine), a vessel with two masts, square-rigged on both.

Bridle Bit, a bit connected with a idle. Such bits are seen in Assyrbridle. ian and Egyptian paintings and sculptures, and are subsequently mentioned by Xenophon.

Brief, from the Latin brevis, short, a brief or short statement or summary, particularly the summary of a client's case which the solicitor draws up for the instruction of counsel.

Briel, or Brielle, sometimes The Brill, a fortified scaport town of South Holland, on the N. side of the Island of Voorne, near the mouth of the Maas. It contains a government arsenal and military magazines, and possesses a good harbor. The tower of St. Peter's Church serves as a lighthouse. Pop. 5,000, chiefly engaged as pilots and fishermen. Briel may be considered as the nucleus of the Dutch republic, having been taken from the Spaniards by William de la Marck in 1572. This event was the first act of open hostility to Philip II., and paved the way to the complete liberation of the country from a foreign yoke.

Brienne, a town of France, in the Department of Aube; 15 miles N. W. of Bar-sur-Aube. It is remarkable as formerly possessing a military college where the Emperor Napoleon I. re-ceived the first rudiments of his education. Here also he attacked Blu-cher, Jan. 29, 1814, forcing him from the town, which was reduced to ashes, and compelling him, on the following day, to retreat to Trannes.

II.

Brigade, a portion of an army, whether infantry, cavalry, or artillery, consisting of two or more regiments, under the command of a briga-dier-general. A division consists of two or more brigades under the command of a major-general, and an army corps, the largest division of our army, consists of two or more divi-sions, and is commanded by a majorgeneral.

Brigade Major, a staff officer attached to the brigade to assist the offi-

cer by whom it is commanded.

Brigadier, an abbreviation of brigadier-general. It is in common use in the armies of modern civilized na-tions, the forces being divided into brigades in charge of brigadiers.

Brigadier-General, a military officer of intermediate rank between

a major-general and a colonel.

Brigands, a name originally given to the mercenaries who held Paris during King John's imprisonment (1358), and who made themselves notorious for their ill behavior. It was applied by Froissart to a kind of ir-regular foot soldiery, and from them was transferred to simple robbers; it is now used especially of such of these as live in bands in secret mountain or forest retreats.

Brigantine, a sailing vessel with two masts, the foremast rigged like a brig's, the main mast rigged like a schooner's.

Briggs, Charles Augustus, an American clergymen and religious writer, born in New York city, Jan. 15, 1841. In 1874 he was appointed Professor of Hebrew in Union Theological Seminary in New York city. He was tried for heresy in 1892, but was aquitted. In 1899 he formally severed his connection with the New York Discharge of the New York Presbytery and was ordained a clergyman of the Protestant Episcopal Church. He died June 8, 1913.

Briggs, Henry, an English mathematician, born near Halifax, York-shire, in 1561; died in Oxford, Jan.

26, 1631.

Bright, John, an English statesman, son of Jacob Bright, a Quaker cotton spinner and manufacturer at Rochdale, Lancashire, born in Lan-was an important city, and with its cashire, Nov. 16, 1811. When the excellent port became a considerable Anti-Corn Law League was formed in naval station of the Romans. Its im-

1839 he was one of its leading members, and, with Mr. Cobden, engaged in an extensive free-trade agitation throughout the kingdom. He was incessant, both at public meetings and in Parliament, in his opposition to the Corn Laws. In 1845 he obtained the appointment of a select committee of the House on the Game Laws, and also one on the subject of cotton cultivation in India. Elected in 1857 for Birmingham, he seconded the motion against the second reading of the Conspiracy Bill which led to the over-throw of Lord Palmerston's govern-ment. Though he only once held office in the administrations of his time - as president of the Board of Trade president of the Board of Trace in 1868 and Chancellor of the Duchy of Lancaster—he is credited with having exercised a greater influence upon the conduct of public affairs in England and abroad than, perhaps, any other man. Died March 27, 1889.

Brighton, a borough and chief seaside resort of England; on the English channel; 47 miles S. of London; has a notable sea-wall drive and promenade, a grand "Royal Pavilion," a college for noblemen's sons, and a statue of Queen Victoria. Pop. (1921) 142,427.

Bright's Disease, a granular disease of the cortical portion of the kidneys, so called because it was first diagnostically described by Dr. Richard Bright, an English physician. It is first emphasized by the secretion of urine containing a large amount of albumen, and this symptom is followed by other complications, usually in rapid sequence. The most commonly observed pathological effects are dropsy, uræmia, and, in some cases, petrification of the kidneys and ureters.

Brindaban, or Brindraban, a town of the Northwest Provinces, British India; on the right bank of the Jumna, 6 miles N. of Muttra. It is one of the holiest cities of the Hindus, and crowds of pilgrims go there from all parts of India.

Brindisi, (ancient Brundusium), a seaport and fortified town, Province of Lecce, Southern Italy, on the Adriatic. In ancient times Brundusium was an important city, and with its

portance as a seaport declined in the Middle Ages, but during the World War became an important torpedo station.

Brindley, James, an English civil engineer, born in 1716. After distinguishing himself by the contrivance of water engines and other mechanical apparatus, he became known to the Duke of Bridgewater, then planning his great scheme of inland navigation for connecting Liverpool and Manchester by means of a canal, and after almost insuperable difficulties, the success of this bold attempt was triumphantly established. In 1766 Brindley commenced the formation of the Grand Trunk Canal, uniting the rivers Trent and Mersey; which undertaking was completed after his death (1772), in 1777.

Brine, water saturated with com-mon salt. It is naturally produced in many places beneath the surface of the earth, and is also made artificially, for preserving meat, a little saltpetre being generally added to the solution.

Brine Shrimp, the only animal, except a species of fly, which lives in the Great Salt Lake of Utah. It is a phyllopod crustacean, with stalked phyllopod crustacean, with stalked eyes, a delicate, slender body, which is provided with 11 pairs of broad, paddle-like or leaf-like feet. It is about 14 of an inch long. Similar forms live in brine vats in various parts of the world.

Brinton, Daniel Garrison, an American surgeon, archæologist and ethnologist, born at Thornbury, Pa., May 13, 1837. During the Civil War he was a surgeon in the Union army. From 1867 to 1887 he was editor of the "Medical and Surgical Reporter." He was a high authority on all American archæological topics. He died in Atlantic City, N. J., July 31, 1899.

Briquette, the name, originally French ("small brick"), given to a comparatively new form of fuel, made mostly from waste coal dust.

Brisbane, Arthur, an American editor and writer. Born 1864 at Buffalo, N. Y. His writings and editorials have given him a power and influence probably not surpassed by any editor of his time. Since 1918 editor Chicago Herald and Examiner.

Australia, situated about 500 miles N. of Sydney, in Moreton District. It stands about 25 miles from the mouth of a river of its own name, which falls into Moreton Bay, and it is divided into the four divisions of North Brisbane, South Brisbane, Kangaroo Point, and Fortitude Valley. Pop. of portions within a 10-mile radius (1927 Est.) 295,430.

Brisson, Eugene Henri, a French politician and journalist, born in Bourges, July 31, 1835. He entered the Chamber of Deputies, in 1871, and won much attention by urging am-nesty for the Communists and other political offenders. Afterward he was one of the foremost members of the Radical Party. He was elected President of the Chamber, in 1881, and retained that office until the overthrow of the Ferry ministry in 1885, when he accepted the Premiership. He was re-elected to the Presidency of the Chamber in 1894, and, in 1895, retired and was a conspicuous candidate for the Presidency of France. He died April

14, 1912. Brissot de Warville, Pierre, a French political writer; born in 1754. Embracing the Revoluborn in 1794. Embracing the Revolution, he was elected to the National Assembly for Paris and to the Convention for the Department of the Eure et Loir. As leader of the Girondist party, his history belongs henceforward to the history of France. He voted, out of policy, for the death of Louis XVI., subject to confirmation by the vote of the people; and he caused war to be declared against Holland and England in February, 1793. This was his last political act. He was executed in Paris, Oct. 30. 1793.

Bristles, the strong hairs growing on the back of the hog and wild boar, and extensively used in the manufacture of brushes, and also by shoemakers and saddlers.

Bristol, a cathedral city of England, a municipal and a parliamentary borough, situated partly in Gloucestershire, partly in Somersetshire, but forming a county in itself. It stands at the confluence of the rivers Avon any editor of his time. Since 1918
editor Chicago Herald and Examiner.

Brisbane, the capital, a seaport
and chief seat of trade of Queensland, miles to the Bristol Channel. The

Avon is a navigable river, and the tides rise in it to a great height. Sebastian Cabot, Chatterton, and Southey were natives of Bristol. (1921) 377,061.

Bristol Bay, an arm of Bering Sea immediately N. of Alaska.

Bristol Channel, an arm of the Atlantic, extending between the S. shores of Wales and the S. W. peninsula of England, and forming the continuation of the estuary of the Severn. It is remarkable for its high tides.

Bristow, Benjamin Helm, an American lawyer, born in Elkton, Ky., June 20, 1832. He was admitted to the bar in Kentucky in 1853. He served with distinction in the Civil War, and at its close was appointed United States District Attorney of Kentucky. In 1874 he became Secre-tary of the Treasury, and made his name memorable by the exposure and prosecution of a notorious whiskey ring. He died in New York city, June ring. 22, 1896.

Bristow Station (old form, now Bristoe), a village in Prince William Co., Va.; 4 miles S. W. of Manassas Junction. On Aug. 27, 1862, a drawn battle took place here between the Federal army under General Hooker, and a Confederate one under General Early, and on Oct. 14, 1863, the Federal troops under General Warren repulsed with severe loss a Confederate attack under Gen. A. P. Hill.

Brittannia, the name applied by Cæsar and other Roman writers to the island of Great Britain.

Britannia Metal, an alloy of brass, tin, antimony, and bismuth, used to make cheap spoons, teapots, etc.

Brittany. See BRETAGNE. British Association for the Advancement of Science, a society first organized in 1831, mainly through the exertions of Sir David Brewster, whose object is to assist the progress of discovery, and to disseminate the latest results of scientific research, by bringing together men eminent in all the several departments of science.

British Central Africa Protectorate, The, former name (since 1907 the Nyassaland Protectorate) of the ing the shores of Lake Nyassa. It includes all British Nyassaland, as well or rather Britannica, was the name part of British Central Africa border-

as the Shire Highlands, and the greater part of the basin of the river Shire. The area of the Protectorate is about 39,573 square miles; European inhabitants number about 1,656, and native

inhabitants are (1926 Est.) 1.292,541. **British Columbia**, a Province (including Vancouver Island) of the Dominion of Canada, bounded on the N. by the 60th parallel of lat.; E. by the Rocky Mountains; S. by the United States; and W. by Alaska, the Pacific Ocean, and Queen Charlotte's Sound; area, 372,680 sq. miles; pop. (1930 Est.) 600,000; the capital is Victoria.

It is to its mineral wealth that British Columbia owes its present im-Gold was discovered portance. 1857, and was the cause of the establishment of the separate colony. In 1897 the disclosing of the phenomenal gold field in the Klondike region led to great excitement throughout both Canada and the U. S., and since gold mines have been worked extensively at Rossland. Branch lines of the Canadian Pacific and the U. S. Great Northern railroads have opened up rich mineral, farming, and fruit-grow-

ing districts.
This Province has probably the richest fisheries in the world, the only obstacle to their rapid development being their remoteness from the consumers. Salmon is the principal catch, and is famous all over the world. British Columbia was originally a portion of the Hudson Bay Territory, and known as New Caledonia. In 1858 it was created a colony; in 1866 the colony of Vancouver Island was united to it; and in 1871 the united colony was admitted to the Dominion of Canada.

British East Africa, a territory of East Africa, between former Gerof East Africa, between former German East Africa and the Italian protectorate of Somaliland. In 1929, it comprised the protectorates of Nyasaland (39.573 sq. m., pop. 1.292.541, capital, Zomba); Kenya (245.060 sq. m., pop. (1926 Est.) 2,736.500, capital, Mombasa); Uganda (109,119 sq. m., pop. 3,361,000, capital, Entebbe); and Tanganyika, (373,494 sq. mi., pop. (1926 Est.) 4,314,330.) Zanzibar is now separately governed. is now separately governed.

which was given by the Romans to modern England and Scotland. The name Great Britain was applied to England and Scotland after James I. ascended the English throne in 1603.

Extent of Empire.—The European dominions of the British empire com-

comminons of the British empire comprise—in addition to Great Britain, Ireland, the Isle of Man, and the Channel Islands—the rocky promontory of Gibraltar, captured from Spain in 1704; and Malta, Gozo, and adjacent islets, ceded to Great Britain in 1800. The most important of the Asiatic possessions of Great Britain is India, acquired gradually since the is India, acquired gradually since the incorporation of the East India Company in 1600, and especially during the great struggle with France in the 18th century. Great Britain also possesses Ceylon, acquired by conquest from the Dutch and from native rulers in 1796-1815; the Straits Settlements of Singapore (ceded in 1824), Penang (1786), Wellesley Province (1800), and Malacca (1824), on which are dependent various native States of the Malay peninsula; the island of Hong-Kong (taken in 1841) and territory on the adjacent mainland; portions of the islands of Borneo, namely British North Borneo (company chartered in 1881), to which is attached the island of Labuan (ceded 1846), the sultanate of Brunei, and Sarawak (practically British since 1842); Aden (1839), the island of Perim, the Kooria Mooria Islands, and the Bahrein Islands. Cyprus, though belonging to Turkey, has since 1878 been administered by Great Britain. In Africa Great Britain owns Cape Colony, gradually developed since its final acquirement in 1806, and including Walfisch bay; Basutoland (British since nscn bay; Basutoland (British since 1868); the Bechuanaland Protector-ate (acquired in 1884); Natal (pro-claimed British in 1843), to which are now annexed Zululand, and Tonga-land (acquired in 1887); Rhodesia, including Matabeleland, Mashonaland, Paratteland et a recently beauty to be Barotseland, etc., recently begun to be developed by the British South Africa Company; the Central Africa Protectorate (acquired in 1889–1890, and proclaimed a protectorate in 1891); the West African Colonies; namely, Gambia (recognized as British in Guinea (1: 1783), the Gold Coast (partly acquired in the 17th century), Sierra the Pacific.

Leone (ceded 1787), and Lagos, with dependencies (occupied in 1861); Nigeria, including the Niger Coast Protectorate (1884) and the territories formerly administered by the Royal Niger Company (chartered in 1886); the East Africa Protectorate, proclaimed in 1895 over territories previously under the Imperial British viously under the Imperial British East Africa Company (chartered 1888); the Uganda Protectorate, now including also Unyoro, Usoga, etc. (proclaimed in 1894); the Zanzibar Protectorate, consisting of the islands of Zanzibar and Pemba (under the protection of Great Britain since 1890); the Somali Coast Protectorate (acquired in 1884); the islands of Mauritius (taken from France in 1810), with its dependencies the Seychelles, etc.; the island of Socotra (1886); and the Atlantic islands, St. Helena (1651), Ascension (1815), and Tristan d'Acunha (1816). Besides Great Britain virtually rules Egypt and the reconquered Egyptian (1808) though the former is Egypt and the reconquered Dgyptian Sudan (1898), though the former is nominally part of the Ottoman empire; and, since the South African War, the former territories of the Orange Free State, and the Transvaal. Orange Free State, and the Transvall. Her possessions in the New World comprise the Dominion of Canada, most of which was obtained from France by conquest and treaty between 1713 and 1763; the island of Newfoundland, the oldest English colony (discovered by John Cabet in ony (discovered by John Cabot in 1497), with its dependency Labrador; British Honduras (1783); the Bermudas Islands (1609); the West Indian Islands, namely, Jamaica (1655), the Bahamas (1629), several of the Lee-Bahamas (1629), several of the Leeward Islands (Antigua, St. Christopher, Dominica, etc.), the Windward Islands (Barbados, St. Lucia, St. Vincent, Grenada, the Grenadines, Tobago, etc.), and Trinidad (1797); British Guiana (1814); and the Falkland Islands (organized 1833) and South Georgia. The British empire in Australasia includes Australia (explored and settled from the latter (explored and settled from the latter part of the 18th century onward); Tasmania (settled by Englishmen in 1803); New Zealand (begun to be Guinea (1884); the Fiji Islands (1874); and many small islands in

Early results of the World War accoming to Great Britain include the establishment of a protectorate over Egypt, Dec. 19, 1914, and the occupation of German Togoland, Aug. 27, 1914; German Samoa, Aug. 29, 1914; German New Guinea, Sept. 11, 1914; German Southwest Africa, July 8, 1915; and the German Kamerun col. 1915; and the German Kamerun colony, in February, 1916.

British Museum, the great national museum in London, owes its foundation to Sir Hans Sloane, who, in 1753, bequeathed his various collections, including 50,000 books and MSS., to the nation, on condition of \$100,000 being paid to his heirs. The British Museum is under the management of 48 trustees, among the chief being the Archbishop of Can-terbury, the Lord-Chancellor, and the Speaker of the House of Commons. The museum is open daily, free of charge. Admission to the reading-room as a regular reader is by ticket, procurable on application to the chief librarian, there being certain simple conditions attached. The institution contains something like 2,000,000 volumes in the department of printed books. A copy of every book, pamphlet, newspaper, piece of music, etc., published anywhere in British territory, must be conveyed free of charge to the museum.

British South Africa Com-pany, a corporation founded in 1889, with a royal charter, by Cecil Rhodes and others, for the purpose of controlling, settling, administering and opening up by railways and telegraphs, etc., certain territories in Central South Africa. Mashonaland was first settled, and, in 1893, Matabeleland was annexed and settled after the defeat of King Lobengula. In 1895, North Zambezia, in British Central Africa, was added, as well as a strip of territory in the Bechuanaland Proof territory in the Bechanana of the tectorate. This territory is now known as Rhodesia (q. v.), has an area of 438,575 square miles and a pop. est. at 2,028,000, and is divided into two parts by the Zambesi river, Northern and Southern Rhodesia. Rhodes resigned from the company in 1896, and a joint administrator of the territory was appointed. territory was appointed.

Island, N. Y., Jan. 15, 1858. He was Professor of Botany in Columbia School of Mines in 1888–1896, and later Director of the New York Botanical Garden.

Broad Arrow, the mark cut or stamped on all English government property and stores. It was the cognizance of Henry, Viscount Sydney, Earl of Romney, Master-General of the Ordnance, 1693-1702, and was at first placed only on military stores. It is also the mark used in the Britanian and the Britanian It is also the mark used in the British Ordnance Survey to denote points from which measurements have been

Broad Bill, a species of wild duck, the shoveler; also the spoon bill.

Broadhead, Garland Car, an American geologist; born in Albemarle Co., Va., Oct. 30, 1827. He studied at the University of Missouri and was long the State Expert in Geology. From 1887 to 1897 he was Professor of Geology at the University of Missouri. He died in 1912.

Broad Mountain, a mountain ridge of Pennsylvania, in Carbon and Schuylkill counties, about 50 miles long.

Broad River, a river of North Carolina, rising in the Blue Ridge mountains, and making a junction with the Saluda at Columbia to form the Congaree; about 200 miles long.

Broad Top Mountain, a mountain in Bedford and Huntington counties, Pennsylvania; extensively mined for anthracite coal. Height about 2,500 feet.

Broadway, the great business street of New York. Starting from Bowling Green, at the lower extremity of the island, it runs northward in a somewhat diagonal direction, separating the city into substantially equal eastern and western parts. It was formerly the Boulevard above 59th

Britton, Nathaniel Lord, an cauliflower, hardier and with more American botanist; born on Staten color in the lower leaves. The part

of the plant used is the succulent flower stalks. Although broccoli is inferior in flavor to cauliflower it serves as a fair substitute.

Brock, Sir Isaac, a British military commander, born in Guernsey, Oct. 6, 1769; suppressed a threatened mutiny in Canada in 1802; made Lieutenant-Governor of Upper Canada in 1810; took Detroit from the Americans under General Hull in 1812; and was killed at the battle of Queenstown, Oct. 13, 1812. A monument to his memory stands on the W. bank of the Niagara river.

Brocken, the culminating point of the Hartz Mountains, in North Germany, Kingdom of Saxony, cultivated nearly to its summit, which is 3,740 feet above the level of the sea. The phenomenon called the "Specter of the Brocken" is here occasionally seen at sunset and sunrise. It is caused by the rising of the mists from the valley opposite to the sun.

Brockton, a city in Plymouth county, Mass.; on the New York, New Haven & Hartford railroad; 20 miles S. of Boston; is one of the largest boot and shoe manufacturing places in the country, with also an extensive output of shoe machinery, rubber goods, and sewing machines, and has a property valuation exceeding \$40,000,000. Pop. (1930) 63,797.

Brockville, a port of entry and capital of Leeds county, Ontario, Canada; on the St. Lawrence river and the Grand Trunk and other railroads, 125 miles S. W. of Montreal. Pop. (1921) 10,043.

Broderick, David Colbreth, an American legislator, born in Washington, D. C., Feb. 4, 1820; was defeated for Congress in New York in 1846; went to California, and was elected a member of the Constitutional Conven-tion of 1849; served as Speaker of the Senate; and was elected to the United States Senate in 1856, where he actively opposed the admission of Kansas. He was killed in a duel by Judge David S. Terry, Sept. 16, 1859.

Brodhead, John Romeyn, an

American historian, born in Philadelphia, Jan. 2, 1814; graduated at Rut-gers College in 1831; made a valuable was published by the State of New York; author of a "History of the State of New York." He died in New York city, May 6, 1873.

Brody, a town of Galicia, Austria, 62 miles E. of Lemberg by rail and 9 miles from the Russian frontier; long noted for its extensive commercial interests, especially with Russia. Pop. about 19,000, of which two-thirds are Hebrews. The town was conspicuous in the great Galicia campaign of 1916-17. See APPENDIX: World War.

Broglie, a prominent French family, of Piedmontese origin. JACQUES VICTOR ALBERT, Duc de Broglie, born June 13, 1821, early entered the field of literature, and was elected an Academician in 1862. Returned as a deputy in 1871, he was, till May, 187 Ambassador at London; he then became leader of the Conservative Right Center, and with a view to force a monarchial government on France. he brought about the resignation of Thiers, and the election of MacMa-hon, in 1873. He was twice Premier, resignation being on both occasions forced by Gambetta's exposures. He died Jan. 19, 1901.

Broiling, the cooking of meat or fish on a gridiron above a fire, or by laying it directly on the coals, a very wholesome method of cookery.

Broke, Sir Philip Bowes Vere, a British admiral, born near Ipswich. Sept. 9, 1776; distinguished himself particularly in 1813, as commander of the "Shannon," in the memorable action which that vessel fought with the United States vessel "Chesapeake" off the American coast, and in which the latter was captured. He died in London, Jan. 2, 1841.

Broken Wind, a disease of the organs of respiration in horses, commonly produced by the rupture of the lung cellular tissue.

Broker, an agent employed to make bargains and contracts between other persons, in matters of commerce, for a compensation commonly called brokerage. A broker usually confines his attention to one particular market, as wool, sugar, or iron, and the special knowledge he thus acquires renders his services useful to the gencollection of documents in Europe eral merchant, who has no such inti-bearing upon American history that mate acquaintance with the trade.

The broker is strictly a middleman, or intermediate negotiator between the parties, finding buyers or sellers as required. He does not act in his own name, nor has he generally the custody of the goods in which he deals, thus differing from a factor, and he cannot sell publicly like an auctioneer. He is treated as the agent of both parties, though primarily he is deemed the agent of the party by whom he is originally employed. Besides ordinary commercial brokers, there are several other sorts, such as stock-brokers, share-brokers, ship-brokers, insurancebrokers, bill-brokers, etc.

Bromide, a combination of bromine with a metal or a radical. Bromides are soluble in water, except silver and mercurous bromides; lead bromide is very slightly soluble.

Bromine, a non-metallic element. Bromine has been applied externally as a caustic, but rarely. Its chief officinal preparations are bromide of ammonium, useful in whooping cough, infantile, convulsions, and nervous diseases generally; and bromide of potassium, now very extensively used, especially in epilepsy, hysteria, delirium tremens, diseases of the throat and larynx, bronchocele, enlarged spleen, hypertrophy of liver, fibroid tumors, etc. Also, as an antaphrotumors, etc. disiac, for sleeplessness, glandular swellings, and skin diseases. Its alterative powers are similar to but less than those of the iodides. It has a pungent saline taste, no odor, and occurs in colorless cubic crystals, closely resembling the iodide. As a hypnotic its usefulness is much increased by combining it with morphia or chloral hydrate.

Bronchi, the two branches into which the trachea or windpipe divides in the chest, one going to the right lung, the other to the left, and ramifying into innumerable smaller tubes - the bronchial tubes.

Bronchitis, inflammation of the air tubes leading to the pulmonary vesicles, accompanied by hoarseness, cough, increase of temperature, and soreness of the chest anteriorly. The uneasy sensations begin about the region of the frontal sinuses, passing shire, March 24, 1820 from the nasal mucous passages, trachea, and windpipe to the chest, with ough, May 28, 1849.

hoarseness, cough, and expectoration; but in capillary bronchities the cough is dry and without expectoration. acute cases the sputum is first thin, then opaque and tenacious, lastly purulent; the breathing is hurried and laborious, the pulse quickened, and the skin dry. The danger increases in proportion as the finer bronchial tubes become involved, and, instead of the healthy respiratory sound we have sharp, chirping, whistling notes, varying from sonorous to sibilant. sharp sound is most to be feared, as grave, sonorous notes originate in the larger tubes. Spitting of blood sometimes occurs, and in severe cases persons actually die suffocated from the immense quantity of mucus thrown out, obstructing the tubes and causing collapse of the vesicular structure of the lungs. The ratio of the respiration to the pulse is high, going up to 60 or even 70 in the minute, with a pulse rate of 120 or 130. Chronic bronchitis, or bronchial catarrh, is extensively prevalent, especially among the aged, recurring once or twice a year in spring or autumn, or both, till it becomes more or less constant all the year round.

Bronchocele, an indolent tumor on the forepart of the neck caused by enlargement of the thyroid gland, and attended by protrusion of the eyeballs, anamia, and palpitation.

Brongniart, Alexander, a French geologist and mineralogist, born in Paris, Feb. 5, 1770; died in Paris, Oct. 7, 1847. His son, ADOLPHE THEODORE BRONGNIART, born in 1801, died in 1876, became Professor of Botany at the Jardin des Plantes, Paris, 1833, and was the author of several botanical works held in high esteem.

Bronte, a town of Sicily, at the W. base of Mt. Etna, 33 miles N. W. of Catania. The lava streams of 1651 and 1843 lie on either side, but the district around is fertile, and produces wine. Lord Nelson was created Duke of Bronte by the Neapolitan Govern-ment in 1799. Pop. (1901) 20,366.

Bronte, Anne, an English novelist and poetess, born in Haworth, York-shire, March 24, 1820; sister of Char-She died in ScarborBronte, Charlotte, (afterward Mrs. Nicholls), an English novelist, born in Thornton, Yorkshire, April 21, 1816; was the third daughter of the Rev. l'atrick Bronte, rector of Thornton, from which he removed in 1820 on becoming incumbent of Haworth in the West Riding of Yorkshire. (afterward worth, in the West Riding of York-shire, about 4 miles from Keighley. Her mother died soon after this removal, and her father, an able though eccentric man, brought up Charlotte and her sisters in quite a Spartan fashion, inuring them to every kind of rashon, muring them to every kind of industry and fatigue. After an education received partly at home and partly at neighboring schools, Charlotte became a teacher, and then a governess in a family. In 1844 arrangements were entered into by the three sisters to open a school at Harranth but from the worst of success. worth, but from the want of success in obtaining pupils no progress was ever made with their scheme. resolved now to turn their attention to literary composition; and, in 1846, a volume of poems by the three sisters was published, under the names of CURRER, ELLIS and ACTON BELL. It was issued at their own risk, and attracted little attention, so they quitted poetry for prose fiction, and produced each a novel. Charlotte (CURRER BELL) entitled her production "The Professor," but it was everywhere refused by the publishing trade, and was not given to the world till after her death. Emily (ELLIS BELL) with her tale of "Wuthering Heights," and Anne (ACTON BELL) with "Agnes Grey," were more successful. nes Grey," were more successful. Charlotte's failure, however, did not discourage her, and she composed the novel of "Jane Eyre," which was published in October, 1847. Its success was immediate and decided. Her second novel of "Shirley" appeared in 1840. Previous behalf of the second novel of "Shirley" appeared in 1840. 1849. Previous to this she had lost her two sisters, Emily dying on Dec. 19, 1848, and Anne May 28, 1849 (after publishing a second novel, the "Tenant of Wildfell Hall"). In the autumn of 1852 appeared Charlotte's third novel, "Villette." Shortly after, she married her father's curate, the Rev. Arthur Bell Nicholls, but in nine months died of consumption, March 31, 1855. Her originally rejected tale of "The Professer" was published after her death in 1857, and sidered by men of ancient times as

the same year a biography of her appeared from the pen of Mrs. Gaskell.

Brontosaurus Excelsus, a species of herbivorous dinosaur of the Triassic and Jurassic periods. It is supposed to have been a hippopotamuslike animal, and to have lived on vegetation in the waters. It was about 60 feet long, and 15 feet high at the middle of the body, and, although its body was of this great size, it had one of the smallest heads known among vertebrates.

Brontotherium, or Titanotherium, a genus of the extinct mammals first found in the Bad Lands of South Dakota, and later in Nebraska and Colorado. The brontotherium was about the size of the elephant. The nose was evidently flexible, but there was no true proboscis.

Bronx, The, a borough of Greater New York, lying N. and E. of the borough of Manhattan, between the Hudson river, East river, and Long Island Sound, including City, Riker's, Hunter's, Twin, Hart, High and several adjacent islands; area, 25,270 acres; pop. (1930) 1,265,268. It contains an extensive public park, with a botanical garden of 250 acres, and is the site of the newly established New York Zoological Gardens. The statistics of this borough are included with those of Manhattan borough. See NEW YORK CITY.

Bronze, an alloy of copper and tin. It was used by the ancient Assyrians and Egyptians. Layard brought many ornaments and other articles of this metal from Assyria. Bronze is more fusible, as well as harder than copper. It is also a fine-grained metal, taking a smooth and polished surface; hence its universal use, both in ancient and modern times, in making casts of all kinds, medals, bas-reliefs, statues, etc. Its color is a reddish-yellow, and is darkened by exposure to the atmosphere. Its composition varies according to the purpose for which it is to be employed, and other constituents besides copper and tin frequently enter into it. Whatever alloy is principally formed of these metals, however, is

sacred to the gods; and the Roman emperors who struck gold and silver coins could not strike them of bronze without the permission of the senate; hence the inscription S. C. (Senatus consulto).

Bronzing, the process of giving a bronze-like or antique metallic ap-pearance to the surface of metals or

plaster casts.

Brooch, a kind of ornament worn on the dress, to which it is attached by a pin stuck through the fabric.

Brooke, Henry, an Irish novelist and dramatist; born in Rantavan, County Cavan, Ireland, about 1703; died in Dublin, Oct. 10, 1783.

Brooke, Sir James, Rajah of Sarawak, was born in Benares, India, April 29, 1803. In 1838, having gone to Borneo, he assisted the Sultan of Brunei (the nominal ruler of the island) in suppressing a revolt. For his services he was made Rajah and Governor of Sarawak, a district on the N. W. coast of the island, and, being established in the Government, he endeavored to induce the Dyak nahe endeavored to induce the Dyak natives to abandon their irregular and piratical mode of life and to turn themselves to agriculture and commerce; and his efforts to introduce civilization were crowned with wonderful success. He was made a K. C. B. in 1847, and was appointed Governor of Labuan. He died in Devonshire, England, June 11, 1868.

Brooke, John Rutter, an American military officer, born in Pottsville, Pa., July 21, 1838. He entered the army as captain in a volunteer regiment on the breaking out of the Civil War in 1861, and resigned in February, 1866, with the rank of Brevet Major-General. In July of the same year he was appointed Lieutenant-Colonel of the 37th United States Incolone of the 3th United States Infantry. He was promoted to Colonel in March, 1879; Brigadier-General, April 6, 1888, and Major-General, May 22, 1897. After the declaration of war against Spain, he was placed in command of the First Provisional Army Course and subsequents distinction. Army Corps, and subsequently distinguished himself in the campaign in Porto Rico, and was made a member

he was appointed Military and Civil Governor of Cuba, a post which he held till April, 1900, when he was succeeded by Gen. Leonard Wood. On May 10, following, he succeeded Ma-jor-General Wesley Merritt as commander of the Military Department of the East, with headquarters in New York. Retired in 1902.

Brooke, Stopford Augustus, an English Unitarian preacher, born in Dublin in 1832. He was educated at Trinity College, Dublin. He has held important curacies in London, and in 1872 was appointed Chaplain in Or-dinary to the Queen. He subsequently became a Unitarian. Died. 1916.

Brook Farm Association, community which originated in 1841, with William Henry Channing, George Ripley, and Sophia, his wife, with whom were united from time to time George William Curtis, Nathaniel Hawthorne, Theodore Parker, Charles Anderson Dana, John Sullivan Dwight, Margaret Fuller, and other personages of a philosophic turn of mind. The scheme of the association contemplated utilizing the labor—physically and intellectually—of each of its members, at a certain fixed rate, the intention being to dispose of the results of such labor to the outside public, and with such profit that all the delights and adornments of life were to be procurable therefrom, and were to be held in common by the mem-The whole undertaking came bers. to an end in 1846.

Brookline, a town in Norfolk county, Mass.; on the Charles river and the Boston & Maine railroad; 3 miles W. of Boston; manufactures electrical and philosophical appli-ances; is best known as one of the wealthiest and most beautiful resi-dential sections in the country; has a property valuation exceeding \$150,-

000,000. Pop. (1930) 47,490.

Brooklyn, a former city, and the fourth in population in the United States, according to the Federal census of 1890; since Jan. 1, 1898, one of the five boroughs of the city of Greater New York; situated on the W. extremity of Long Island, on New York Bay and the East river, which separates it from New York and consequences it from New York and conof the joint military commission to separates it from New York and conarrange the cession of the island to nects Long Island Sound with New the United States. On Dec. 13, 1898, York Bay. Brooklyn is connected

with New York by several bridges, tunnels, and numerous ferries. It comprises Brooklyn proper, Williamsburg, Gravesend, Flatbush, Flat Lands, New Lots, New Utrecht and several smaller suburban towns that were united with it prior to its consolidation with New York. It now extends from the At-lantic Ocean at Coney Island to the East river and New York harbor, and occupies the whole of Kings county; area 66.39 square miles: pop. (1920) 2,022,356; (1928 Est.) 2,308,631.

There are 30 parks in Brooklyn, with an area of 1,126 acres. Prospect Park is the largest, with 526 acres, including 77 acres of lakes and waterways, 70 acres of meadows, 110 acres of woodland, and 259 of plantations. It is situated on an elevated ridge and commands a magnificent view of the ocean, the Sound, Long Island, New Jersey, and New York city. It has been left to a great extent in its original wooded condition, making it one of the most picturesque parks in the United States. There are 8 miles of drives, 11 miles of walks, and 4 of bridle paths. The Flatbush avenue bridle paths. entrance, or the Plaza, is paved with stone and surrounded by grass. There is a Soldiers' and Sailors' Memorial Arch and a statue of President Lincoln at this entrance. Of the other parks, Washington Park, the site of Revolutionary fortifications, of which Fort Green is the principal one, is the largest. A memorial to Lafayette was dedicated by Marshal Joffre, of the French War Mission, in 1917.

The most notable and important navy yard in the United States is lo-acted here, and is always a place of large patriotic interest, because of its buildings, its relics, and the old and new types of warships that are gen-

erally to be seen here.

Brooklyn has been widely known as the City of Churches. There are now about 650 of such edifices and chapels. The Roman Catholic, with 113 churches, is the strongest denomination. Then follow the Methodist Episcopal (54); Protestant Episcopal (86); Baptist (52); Lutheran (64); Pres-byterian (49); Congregational (38); Reformed (40); synagogues (40); and others of various denominations (about 100). In 1912 there were 603,-475 church members; 138,136 Sunday

School scholars, and, in the same year, the churches owned property, churches, chapels, parsonages, etc., valued at

\$42,500,000.

The most important hospitals in Brooklyn are the Long Island College, Brooklyn, Cumberland, Caledonian. General, St. Mary's Methodist, St. John's, and St. Peter's. The city has 24 dispensaries, 5 training-schools for nurses, 25 orphan asylums and industrial schools, 11 homes for the aged, and 6 nurseries. The public institu-tions are mostly at Flatbush, and con-sist of the Insane Asylum, Hospital, and Almshouse. There is an Inebriates' Home in Bay Ridge.

The borough is noted for the number and standing of its educational insti-tutions, public and private. The Packer Institute for girls, the Polytechnic Institute for boys, Adelphi College, and the Pratt Institute have national renown. The Brooklyn Institute of Arts and Sciences, an outgrowth from an association founded in 1823, is another noted institution. includes 25 departments with lectures, so that its teaching methods resemble

those of a large university.

Brooklyn was settled by the Dutch in 1636 at New Utrecht. In 1646 five small towns consolidated under the name of Breuckelen, from the Dutch town whence most of the settlers came. In 1666 the first Dutch church was built in Breukelen. About this time the English came into possession of New York and Long Island, and Breuckelen became a part of West Riding. On Aug. 27, 1776, the battle of Long Island was fought in Brooklyn, and the village was held by the British till 1783. Brooklyn was incorporated as a village in 1816; and in 1834 it became a city. Several adjoining towns were annexed from time to time, and in 1896 Brooklyn comprised all of Kings county. On Jan. 1, 1898, Brooklyn was consolidated with Greater New York, under the name of the Borough of Brooklyn.

Brooks, Eldredge Streeter, an American author; born in Lowell, Mass., in 1846; died in Somerville, Mass., Jan. 7, 1902.

Brooks, Maria Gowan, an American poet, pseudonym Maria del Oc-CIDENTE, born in Medford, Mass., about 1795; spent her youth in Charlestown, Mass., and the rest of her life in London, New York and Cuba. She died in Matanzas, Cuba, Nov. 11, 1845.

Brooks, Noah, an American journalist and author, born in Castine, Me., Oct. 30, 1830. Died Aug. 16, 1903.

Brooks, Phillips, an American clergyman of the Episcopal Church, born in Boston, Dec. 13, 1835. He was rector of Protestant Episcopal churches successively in Philadelphia and in Boston, and was made Bishop of Massachusetts in 1891. He was an impressive pulpit orator, had great spiritual force, and published many volumes of sermons and lectures. He died in Boston, Jan. 23, 1893.

Brooks, Preston Smith, American legislator, born in Edgefield, S. C., Aug. 14, 1819. He served in the Mexican War; was elected to Con-gress in 1853, and on May 22, 1856, he assaulted Senator Charles Sumner in the Senate Chamber, beating him into insensibility with a cane. He afterward resigned, but was immediately returned to the House by his District. He died in Washington, D. C., Jan. 27, 1857.

Brooks, William Keith, naturalist, born in Cleveland, O., March 25, 1848, graduated LL. D. from Williams College (1870); Ph. D. Harvard (1874). From 1876 assistant-professor, and after 1883, professor of zoology in Johns Hopkins University. His works include " Invertebrate Zoology." He died Nov. 12, 1908.

Brother Jonathan, a phrase applied to the people of the United States, as "John Bull" is to the people of England. Washington, on assuming command of the New England Revolutionary forces, was in great straits for arms and war material. The governor of Connecticut, Jonathan Trumbull, was a man of excellent judgment and an esteemed friend of Washington. In the emergency Wash-ington said, "We must consult Broth-er Jonathan." This expression was repeated on other difficult occasions,

evolent purposes, and were numerous in the Middle Ages.

Brotherhood of Andrew and Phillip, founded in 1888 by Rev. Rufus W. Miller of the Second Reformed Church, Reading, Pa., has grown into a religious and social order among 15 Protestant denominations; with 1,402 chapters and 18,000 members in the United States, and chapters also in Canada, Japan, and Australia.

Brotherhood of St. Andrew, of the Protestant Episcopal Church, founded in Chicago in 1883 by the Rev. W. H. Vibbert and James Houghteling for "the spread of Christ's Kingdom among young men;" has 1,-200 active about 12 000 200 active chapters, and about 13,000 members.

Brotherhood of St. Paul, of the Methodist Episcopal Church, founded 1895 by the Rev. F. D. Leete, Rochester, N. Y., comprises the Orders of Jerusalem, Damascus, and Rome, for various grades of membership.

Brougham, Henry Peter, Lord Brougham and Vaux, a British statesman, orator, and author, born in Edinburgh, Sept. 19, 1778; entered the University of Edinburgh in 1792. In 1802 he helped to found the "Edinburgh Review," contributing to the first four numbers 21 articles, and to the first 20 numbers 80 articles. The article on Byron's "Hours of Idleness" provoked the poet to write his "English Bards and Scotch Reviewers." In 1810 Brougham entered Parliament, where his remarkable elequence gave him at once a commanding place. He was counsel for Queen Caroline in George IV.'s suit against her (1820), winning a decisive vic-tory, which raised him to the height of fame and popularity. He became Lord Chancellor in 1830, and was at the same time created a baron; he resigned on the defeat of the Whigs in 1834, and never again held public office, though still taking effective part in the business and debates of the House of Lords. He died in Cannes, France, May 7, 1868.

repeated on other difficult occasions, and became a convenient name for the whole people.

Brotherhoods, Religious, were societies instituted for pious and ben-

and, with the exception of a short reand, with the exception of a short return trip to England in 1860, remained here until his death. He was the author of over 100 comedies, farces, and burlesques. He died in New York, June 7, 1880.

Broughton, Rhoda, an English novelist, daughter of a clergyman, born in Wales, 1840. Among her works are "Alas!"; "Scylla or Charybdis"; "Dear Faustina". Died, June 1920.

Broussa, Brussa, or Boursa, the ancient Prusa, where the Kings of Bithynia usually resided, situated in Asiatic Turkey, at the foot of Mount Olympus, in Asia Minor, 13 miles S. of the Sea of Marmora. Broussa is pleasantly situated, facing a beautiful and luxuriant plain. The water supply is good, and water flows down the center of some of the streets, which are clean, but for most part narrow and dark, and the bazaars very good. It contains about 200 mosques, some of which are very fine buildings, also three Greek churches, an Armenian and several synagogues. The vilayet of Broussa has an area of 25,400 sq. miles and pop. of (1927) 66.664.

Broussais, Francois Joseph Victor, a French physician, born in St. Malo, Dec. 17, 1772. Professor at the Military Hospital of Val de Grace in 1820, he became Professor of Gen-eral Pathology in the Faculty of Medicine, in Paris, 1832, and afterward was made a member of the Institute. The influence of Broussais in his generation was unbounded, and his so-called "Physiological Doctrine" rapidly acquired a great sway, the traces of which are visible even now, though a more exact knowledge of physiology has demonstrated that the views of Broussais were one-sided and exag-gerated. The basis of Broussais' doctrine was the assumption that the animal tissues are endowed with a propwhich is called into play by the action of stimuli of various kinds, and by the operations of which all vital phenomena are produced. He died in Paris, Nov. 17, 1838.

Brown, the color produced when certain substances — wood or paper, for example — are scorched or partially burned. Brown is not one of the primary colors in a spectrum. It E. E."), an American author and

is composed of red and yellow, with black, the negation of color. It is also the name of a genus of colors, of which the typical species is ordinary brown timed with gravish or black brown, tinged with grayish or black-ish. The other species are chestnut brown, deep brown, bright brown, rusty, cinnamon, red brown, rufous, glandaceous, liver colored, sooty, and lurid.

Brown, Benjamin Gratz, an American politician, born in Lexington, Ky., May 28, 1826; graduated at Yale in 1847. He practiced law in Missouri, and was a member of the State Legislature in 1852-1858. In the Civil War he served in the Union army, recruiting a regiment, and be-coming a Brigadier-General of volun-teers. In 1863-1867 he was United States Senator from Missouri, and in 1871 was elected governor of his State. He was the candidate for the Vice-Presidency of the United States on the ticket with Horace Greeley in 1872. He died in St. Louis, Dec. 13, 1885.

Brown, Charles Brockden, an Brown, Charles Brockden, an American novelist, born in Philadelphia, Jan. 17, 1771, was of a highly respectable family, of Quaker descent. He studied law, but took a disgust to the practice of the profession, and abandoned it for literature. In 1798 he established himself in New York, and when the yellow fever broke out there he refused to forsake his friends and neighbors; and, after performing and neighbors; and, after performing the last offices of affection for one of them, a young physician, was himself attacked by the pestilence. Between 1803 and 1809 he published three political pamphlets, which excited general attention. He died Feb. 22, 1810.

Brown, Charles Rufus, an American clergyman and Hebrew scholar, born in East Kingston, N. H., Feb. 22, 1849. He was ordained a Baptist minister in 1881, and became Professor of Hebrew at Newton Theological Institution 1886. He died Feb. 2, 1914.

Brown, Elmer Ellsworth, an American educator, born in Kiantone, N. Y., Aug. 28, 1861; was United States Commissioner of Education in 1906-11; then became Chancellor of the University of New York.

artist, born in Concord, N. H., Oct. 18, 1847.

Brown, Sir George, an English military officer, born near Elgin in 1790; served in the Peninsular War, and in the American campaign of He became lieutenant-general in 1851; and distinguished himself in the Crimean War at Alma, Inkermann, and Sebastopol. He was made K. C. B. in 1855, and died in 1865.

Brown, Goold, an American grammarian, born in Providence, R. I., March 7, 1791; died in Lynn, Mass., March 31, 1857.

Brown, Harvey, an American army officer, born in Rahway, N. J., in 1795; graduated at West Point in 1818. He was in constant service for more than 45 years. In the Black Hawk expedition, the Seminole Indian campaigns, in the Army of Occupation in Mexico, and to the time of the Civil War, he did gallant duty, for which he received several brevets. In 1862 he was brevetted a Brigadier-General in the Regular army and pro-moted Colonel, and in 1863 was promoted to Major-General, U. S. A., and retired. He died in Clifton, Staten Island, N. Y., March 31, 1874.

Brown, Henry Kirke, an American sculptor, born in Leyden, Mass., Feb. 24, 1814. He made the equestrian statue of Washington in Union Square, New York, the altar piece for the Church of the Annunciation in the same city, portrait busts of William Cullen Bryant, Dr. Willard Parker, Erastus Corning and other New York men, and the statue of De Witt Clinton in Greenwood cemetery.

The last named was the first bronze statue cast in the United States. Mr. Brown brought skilled workmen from Europe and did the first work in bronze casting attempted in this country. Some of his other well known works are a statue of Lincoln in Pro :pect Park, Brooklyn, and equestrian statues of Gen. Scott and Nathanael Greene for the National Government, etc. He died in Newburg, N. Y., July 10, 1886.

Brown, Jacob, an American army officer, born in Bucks county, Pa., May 9, 1775. He was a commander on the so distinguished himself as to receive the thanks of Congress, Nov. 13, 1814. The city of New York also voted him its freedom. At the close of the war he was in command of the Northern Division of the army, and, in March, 1821, became general-in-chief of the United States army. He died in Washington, D. C., Feb. 24, 1828.

Brown, John, an American opponent of slavery, born in Torrington, Conn., May 9, 1800. He early con-ceived a hatred for slavery, and, haying removed to Osawatomie, Kan., in 1855, he took an active part against the pro-slavery party, the slavery question there having given rise al-most to a civil war. In the summer of 1859 he rented a farmhouse about 6 miles from Harper's Ferry, and organized a plot to liberate the slaves of Virginia. On Oct. 16, he, with the aid of about 20 friends, surprised and captured the arsenal at Harper's Ferry, but was wounded and taken prisoner by the Virginia militia next day; and was tried and executed at Charlestown, Dec. 2, 1859. His fate aroused much sympathy in the North, and undoubtedly hastened the great antislavery conflict. "John Brown's body lies moldering in the grave, But his soul is marching on," was a favorite marching song of the Union troops in the Civil War.

Brown, John George, an Anglo-American painter, born in Durham, England, Nov. 11, 1831; was edu-cated in the common schools in Newcastle-on-Tyne, and came to the United States in 1853. He studied in the schools of the National Academy of Design; was elected an Academician in 1863; received honorable mention at the Paris Exposition in 1899; and in 1900 was president of the American Water Color Society. Died, 1913.

Brown, John Hamilton, American inventor, born in I American inventor, born in Liberty, Me., July 28, 1837. At the age of 18 he was apprenticed to a gunsmith and in 1857 he entered business in Haverhill, Mass. He served in the Civil War as a sharpshooter, and in 1882 was a member of the American Rifle Team at Wimbledon. He began in 1883 to perfect the invention of a weapon for military use later known Canadian frontier in the War of 1812. weapon for military use later known In the engagements at Fort Erie he as the Brown segmental wire-wound

gun, which, after numerous Government tests, was pronounced a success.

Brown, John Howard, an American editor, born in Rhinebeck, N. Y., Nov. 8, 1840. After studying law in New York city and engaging in journalism in Washington, D. C., and Augusta, Ga., he became a publisher in New York city. He was a member of the American Academy of Political and Social Science; the Society of American Authors, and the American Social Science Association. D. 1917.

Brown, Joseph Emerson, an American statesman, born in Pickens county, S. C., April 15, 1821; educated at Calhoun Academy, and graduated at Yale in 1846. He settled in Canton, Ga.; served in the State Legislature, and was elected governor in 1857; serving three tarms. 1857; serving three terms. As war governor he opposed Jefferson Davis in the matter of the conscription laws and raised 10,000 recruits to oppose Shayman's merch to the society. Sherman's march to the sea; but would not allow them to leave the State. After the war he gave hearty support to the reconstruction measures, and supported Gen. Grant for the Presidency. He was Chief Jus-tice of Georgia in 1868, and United States Senator in 1880-1891. He died in Atlanta, Ga., Nov. 30, 1894.

Brown, Nicholas, an American merchant, born in Providence, R. I., April 4, 1769; best known as the chief patron of Brown University. In honor of his gifts, which exceeded \$100,-000, the name of the institution was changed, in 1804, from Rhode Island College to Brown University. He gave also magnificent sums to other public institutions of Providence. He died Oct. 27, 1841.

Independents, was born about 1540, and studied at Cambridge, where, in 1580, he began openly to attack the government and liturgy of the Church of England as anti-Christian.

Brown, Robert, a Scotch botanist, born in Montrose, Dec. 21, 1773. March 6, 1809. In 1846 she was marIn 1800 he was appointed naturalist to Flinders' surveying expedition to Australia. He returned with nearly 4,000 species of plants. He died in London, June 10, 1858. As a naturalin Camberwell, England, May 7, 1812.

ist Brown occupied the very highest

rank among men of science.

Brown, Walter F., born in Toledo, May 31, 1869. Practiced law in Massillon, O.; Ass't. Secretary of Commerce, Nov. 1927-Mar. 1929; then General Postmaster appointed President Hoover.

Browne, Charles Farrar, an American humorist, best known as ARTEMUS WARD, born at Waterford, Me., April 26, 1834. Originally a printer, he became editor of papers in Ohio, where his humorous letters became very popular. He subsequently lectured in the United States, and in England, where he contributed to the popular periodical "Punch." He died in Southampton, England, March

Browne, William, an English poet, born in Tavistock, Devonshire, in 1591; died in Ottery St. Mary

about 1643.

Brownell, Franklin P., a Canadian artist, born in New Bedford, Mass. His specialties are portrait and figure painting. He has for some years been principal of the Ottawa Art School.

Brownell, Henry Howard, an American poet and historian, born in Providence, R. I., Feb 6, 1820. His first poetic venture was a spirited versification of Farragut's "General Orders" to the fleet below New Orleans. Died at East Hartford, Conn., Oct. 31, 1872.

Brownell, William Crary, an American essayist and critic, born in New York city, Aug. 30, 1851. He graduated from Amherst, and devoted himself to critical and editorial work

in New York. Died July 22, 1928.

Brownie, an imaginary being to Brown (or Browne), Robert, whom evil properties were attributed; founder of an English religious sect a domestic spirit or goblin, meager, first called Brownists, and afterward shaggy, and wild, supposed to haunt whom evil properties were attributed; many old houses, especially those attached to farms

Browning, Elizabeth Barrett, a distinguished English poet, regarded by some as the greatest which England has ever produced; born in London, March 6, 1809. In 1846 she was mar-ried to Robert Browning, and died at

His father, who was a clerk in a bank, had the boy educated in a school at Peckham, after which he attended lectures at University College. At the age of 20 he traveled on the Continent and resided for some time in of its medieval history. In 1846 he married Elizabeth Barrett, and settled with her in Florence, where they remained for nearly 15 years. Recognition of his literary fame, which came slowly, was made in 1867, when he was elected an honorary fellow of Baliol, an M. A. of Oxford, and later an LL. D. of Cambridge. He died in Venice, Dec. 12, 1889. His body was taken from Venice to England, where, in national recognition of his genius, it was buried in Westminster Abbey between Cowley and Chaucer.

Brownlow, William Gannaway ("PARSON BROWNLOW"), an American politician, journalist, and author, born in Wythe county, Va., Aug. 29, 1805. During his early career he was an itinerant preacher, editor, and lecturer. He was a Union champion during the Civil War, and was ban-ished from the Confederate lines on that ground. In 1865 he was elected Governor of Tennessee, and was re-elected in 1867. He was United States Senator from 1869 to 1875. He died in Knoxville, Tenn., April 29, 1877.

Brown-Séquard, Charles Edouard. Franco-American physiologist and physician, was born in Mauritius in 1818, his father being a sea captain from Philadelphia, who married on the island a lady named Sequard. The son studied in Paris, and graduated M. D. in 1846. He devoted himself mainly to physiological research, and received numerous prizes, French and British, for the results of valuable experiments on blood, muscular irrita-bility, animal heat, the spinal cord, In 1864 he and the nervous system. became Professor of Physiology at Harvard, but in 1869 returned to Paris as Professor of Pathology in the School of Medicine. In 1873 he became a medical practitioner in New York, treating especially diseases of the nervous system; and in 1878 he succeeded Claude Bernard as Professor of Experimental Medicine at the English. After many successes he

Collège de France. He died in Paris. April 1, 1894.

Brownson, Orestes Augustus, an American author; born in Stock-bridge, Vt., Sept. 16, 1803; died in Detroit, Mich., April 17, 1876.

Brownsville, city, port of entry, and county-seat of Cameron Co., Tex.; on the Rio Grande and the Rio Grande railroad, opposite Matamoras, Mexico. In the suburbs is Brown, a garrisoned United States post. In May, 1840, Brownsville was occupied and fortified by a small body of United States troops, who maintained their position in the face of a heavy bombardment that lasted for 160 hours; and in November, 1863, it was taken from the Confederates by a Federal army under General Banks. Pop. (1930) 22,021.

Brown University, a co-educational institution in Providence, R. I.; organized in Warren in 1764 as Rhode Island College; removed to Providence in 1770, and renamed in honor of Nicholas Brown in 1804. It has al-ways been affiliated with the Baptist Church, but its management is nonsectarian.

Brozik, Vacslav, a Bohemian artist, born in Pilsen in 1852. His picture, "Columbus at the Court of Isa-bella," was presented to the city of New York by Morris K. Jesup, and is in the Metropolitan Museum. He is a pupil of Pilaty and Munkacsy, and is considered one of the foremost historical painters living.

Bruce, Catherine Wolfe, an American patron of science, born in New York city. She was a cousin of Catherine Lorillard Wolfe, from whom she inherited a fortune, which she used in furthering astronomical study to the property of the propert at Harvard. She gave \$50,000 to the Harvard Observatory in 1888. The Bruce Memorial Telescope at Are-quipa, Peru, was her gift. In 1897 she established a gold medal fund for the Astronomical Society of the Pacific. She died in New York, March 13, 1900.

Bruce, Edward, a brother of Robert I., who, after distinguishing himself in the Scottish War of Independence, crossed in 1315 to Ireland to aid the native septs against the was crowned King of Ireland at Carrickfergus, but fell in battle near Dundalk in 1318.

Bruce, James, an African traveler, born in Stirling, Dec. 14, 1730. In 1768 he set out for Cairo, navigated the Nile to Syene, crossed the desert to the Red Sea, passed some months in Arabia Felix, and reached Gondar, the capital of Abyssinia, in 1770. In that country he ingratiated himself with the sovereign and other influential persons, and in the same year succeeded in reaching the sources of the Abai, then considered the main stream of the Nile. Bruce lost his life by an accident, April 27, 1894.

Bruce, Robert, the greatest of the Kings of Scotland, born in 1274. In 1296, as Earl of Carrick, he swore fealty to Edward I., and in 1297 fought on the English side against Wallace. He then joined the Scot-tish army, but in the same year re-turned to his allegiance to Edward until 1298, when he again joined the National party, and became in 1299 one of the four regents of the kingdom. In the three final campaigns, however, he resumed fidelity to Edward, and resided for some time at his court; but, learning that the King meditated putting him to death on information given by the traitor Comyn, he fled, in February, 1306, to Scot-land, stabbed Comyn in a quarrel at Dumfries, assembled his vassals at Lochmaben Castle, and claimed the crown, which he received at Scene, March 27. Being twice defeated, he dismissed his troops, retired to Rath-lin Island, and was supposed to be dead, when, in the spring of 1307, he landed on the Carrick coast, defeated the Earl of Pembroke at Loudon Hill, and in two years had wrested nearly the whole country from the English. He then in successive years advanced into England, laying waste the country, and on June 24, 1314, defeated at Bannockburn the English forces advancing under Edward II. to the relief of the garrison at Stirling. In 1316 he went to Ireland to the aid of his brother Edward, and, on his re-turn in 1318, in retaliation for inroads made during his absence, he took Berwick and harried Northumberland and Yorkshire. Hostilities continued unAbbey in 1323, and though in that year a truce was concluded for 13 years, it was speedily broken. Not until March 4, 1328, was the treaty concluded by which the independence of Scotland was fully recognized. Bruce did not long survive the completion of his work, dying at Cardross Castle on June 7, 1329.

Bruce, Wallace, an American poet, born in Hillsdale, N. Y., Nov. 10, 1844; graduated at Yale College in 1867; and was United States Consul at Edinburgh, Scotland, in 1889– 1893.

Bruges, a city of Belgium, capital of West Flanders, at the junction of the canals from Ghent, Ostend, and L'Ecluse, 7 miles from the North Sea, and 60 miles N. W. of Brussels. The city has a circumference of nearly 41/2 miles, and is entered by six gates. Many large and noble ancient mansions and spacious public edifices present their pointed gables to the streets, and afford interesting specimens of the ornamental Gothic architecture of the Middle Ages. Among the most remarkable public edifices are the Cathedral of Notre Dame (Onser Vrouw), the old Gothic Hospital of St. John, and the elegant church of St. Saviour. In the great square is a lofty Gothic tower or belfry, the most beautiful in Europe, and its chimes are harmonious. In this tower there are 48 bells, some weighing six tons; they are played upon every quarter of an hour by means of an immense copper cylinder communicating with the clock, and weighing about nine tons. Pop. (1920) 54,308. The city was occupied by the Germans and greatly damaged by shell-fire on their violation of Belgian sovereignty on Oct. 15, 1914. See APPENDIX: World War.

Bruhns, Carl Christian, a remarkable self-taught astronomer, born in Plon, Holstein, Nov. 22, 1830, the son of a locksmith; died in Leipsic, July 25, 1881.

lief of the garrison at Stirling. In 1316 he went to Ireland to the aid of his brother Edward, and, on his return in 1318, in retaliation for inroads made during his absence, he took Berwick and harried Northumberland and Yorkshire. Hostilities continued until the defeat of Edward near Byland

thoroughly crushed mass of muscle. In the slighter forms of this injury, as in ordinary simple bruises, there is no tearing, but only a concussion of the textures, the utmost damage done being the rupture of a few small blood vessels, which occasions the discoloration that is always observed in these cases.

Brumaire, the second month of the year in the French Revolutionary calendar. It commenced on the 23d of October, and ended on the 21st of November, thus comprising 30 days. It received its name from the fogs that usually prevail about this time. The 18th of Brumaire, VIII. year (Nov. 9, 1799), is celebrated for the overthrow of the Directory and the establishment of the sway of Napoleon.

Brummel, George Bryan, (the Brummel, George Bryan, (the sometime famous Beau Brummel), born in London, June 7, 1778. He was educated at Eton, and there formed intimacies with the younger nobility of the day. On his father's death, inheriting a fortune of about \$\frac{4150.000}{150.000}\$ he become his george as a \$150,000, he began his career as a man of fashion, and became the inti-mate associate of the Prince of Wales (afterward George IV.). He it was who inaugurated the reign of dandyism, and for a period of 20 years exercised almost despotic sway over English society in the matter of dress. His fortune being soon swallowed up, he maintained his position in society by his success at play, and the indescribable charm of his manner and conversation. After a rupture with the Prince, his influence gradually de-clined; and oppressed by debt, and the falling off of former friends, he retired to Calais, and afterward to Caen, where he was appointed British consul, and where he died, March 30, 1840.

Brunei, a State in the northern or British part of the Island of Borneo, lying N. E. of Sarawak; area 4,000 square miles; population (1925) 25,454. It was formerly an independent Mohammedan territory, whose sultan was the overlord of the entire island. Both Brunei and Sarawak were placed under British protection in 1888, and the sultan surrendered the administration to the British in 1906. Capital, Brunei; pop. 10,000.

Brunel, Sir Marc Isambard, a French civil engineer, born in Hacqueville, near Rouen, April 25, 1769. He entered the mercantile marine, made several voyages to the West Indies, and, when the French Revolution of 1793 drove him from his country, he went to New York, with the resolution of endeavoring to turn his engineering skill to some account. Accordingly, he, conjointly with another, surveyed the ground for the canal which now connects the Hudson river at Albany with Lake Champlain. In 1825 he began excavating for the Thames tunnel. This extraordinary work was opened to the public in 1843; but previously, in 1841, the honor of knighthood had been conferred upon him. He died in London, Dec. 12, 1849.

Brunel, Isambard Kingdom, son of the above, born in Portsmouth, England, April 9, 1806; was educated at the College of Henri IV., at Caen, France, and began the study of civil engineering under his father. He was the resident engineer of the Thames tunnel, and the designer and civil engineer of the "Great Western," the first steamship built to cross the Atlantic. He was also the constructor of the magnificent iron steamship, the "Great Eastern," which was built at Millwall. He died in Westminster, Sept. 15, 1859.

Brunetiere, Ferdinand, a French critic; born in Toulon, July 19, 1849. He was critic of the "Revue des Deux Mondes"; became an Academician 1893; and 1897 lectured in the U.S. He inclined to the idealist as opposed to the naturalist school, and denounced literary fads. He died Dec. 9, 1906.

Brunn, Heinrich, a German archæologist; born in Worlitz, Anhalt, Jan. 23, 1822; became Professor of Archæology at Munich; and published several works of high repute among scholars. He died in Munich, July 23, 1894.

Brunn, a Czecho-Slovak town, capital of Moravia, on the railway from Vienna to Prague, nearly encircled by the rivers Schwarzawa and Zwittawa. It is the center of Moravian commerce, a great part of which is carried on by fairs. Near it is the fortress of Spiel-

berg, in which Trenck and Silvio Pellico were confined. Pop. (1891) 95,-342; (1927) 221,758.

Bruno, Giordano, an Italian philosopher, one of the boldest and most original thinkers of his age, born in Nola, about 1550. He became a Dominican monk, but his religious doubts. and his censures of the monastic orders, compelled him to quit his monastery and Italy. He embraced the doctrines of Calvin at Geneva, but doubt and free discussion not being in favor there, he went, after two years' stay, to Paris. He gave lectures on philosophy there, and, by his avowed opposition to the scholastic system, made himself many bitter enemies. He next spent two years in England, and became the friend of Sir Philip Sidney. In 1585 he went again to Paris and renewed his public lectures. Af-ter visiting and teaching in various towns in Germany, he returned, in 1592, to Padua, and went afterward to Venice, where he was, in 1598, arrested by the Inquisition and sent to Rome. He lay in prison two years, and on Feb. 17, 1600, was burned as a heretic.

Bruno the Great, one of the most eminent men of his time, born about 925, the third son of Henry the Fowler. He became archbishop of Cologne, and chancellor of the Empire under his brother, Otto I., and afterward, as a reward for his services, Duke of Lorraine. He strove to reform the monasteries and advance the love of learning among the clergy. He died in Rheims, Oct. 11, 965.

Brunswick, Free State of, in Germany, consists of five detached portions of territory on the rivers Weser, Seine, Ocker and Aller. It occupies part of the vast plain which stretches from the foot of the Hartz Mountains and their continuations (the Solling) to the German Ocean and the Baltic, with a portion of the rise of those chains on the N. side. The largest portion contains the districts of Wolfenbuttel and Schoningen, in which the cities of Brunswick and Wolfenbuttel, and the towns of Konigsbutter and Helmstadt, are situated.

Badenburg, are inclosed by the Hanoverian territory, and form part, the former of the Weser district, the lat-ter of the Seine district. Finally, the detached circle of Kalvorde, inclosed within the Prussian Province of Saxony, belongs to the district of Schoningen. The state has an area of 1,418 square miles. The inhabitants are mostly engaged in agricultural and mining pursuits. Iron is the chief produce of the mines worked in the three districts of the Hartz, Weser and Blankenburg. Nearly the whole of the inhabitants are members of the Lutheran Church. Pop. (1925) 501,-675. Brunswick, the capital, is on the Ocker, in a level and fertile district. A fine avenue of linden trees leads to the ducal palace, which, destroyed by fire in 1830 and 1865, was rebuilt in 1869. Pop. (1925) 140,143.

Brunswick, Family of, a distinguished family founded by Albert Azo II., Marquis of Reggio and Modena, a descendant, by the female line, of Charlemagne. In 1047 he married Cunigunda, heiress of the Counts of Altorf, thus uniting the two houses of Este and Guelph. His son Guelph, was created Duke of Bayaria in 1071, His son Guelph, and married Judith of Flanders, a descendant of Alfred of England. From Guelph was descended George Louis, son of Ernest Augustus and Sophia, granddaughter of James I. of England, who succeeded his father as Elector of Hanover in 1698, and was called to the throne of Great Britain in 1714 as George I.

Brunswick, Friedrich Wilhelm, Duke of, fourth and youngest son of Duke Karl Wilhelm Ferdinand of Brunswick, born in 1771. During the war against France in 1792 and subsequently, he fought in the Prus-sian armies, was twice wounded, and once made prisoner with Blucher at Lubeck. For the campaign of 1809 he raised a free corps in Bohemia, but was compelled to embark his troops for England, where he was received with enthusiasm. His corps immedi-ately entered the British service, and was afterward employed in Portugal and Spain, returning to his hereditary dominions, 1813. The events of 1815 called him again to arms, and he fell at Quatre Bras, 1815. Caroline, wife of Two small detached portions of territory, viz., the circles of Theding-talled him again to arms, and he fell at Quatre Bras, 1815. Caroline, wife of Lausen on the Weser, and that of George IV., was a sister of this prince.

Brush, Charles Francis, an American scientist; born in Euclid, near Cleveland, O., March 17, 1849. He was graduated at the University of Michigan, in 1869. He invented the modern arc system of electric lighting and founded the Brush Electric Company.

Brussels, the capital of Belgium; on the river Senne, communicates with Antwerp and the Baltic Sea by means of the Scheldt canal, and railroads connect it with Germany, France, and Holland, as well as with all the principal towns of Belgium. Pop. (1927)

758,727

On the outbreak of the World War (July, 1914), Germany invaded Belgium on its attempted march on Paris. On Aug. 20 the Germans occupied Brussels, on Oct. 9, Antwerp, and on Oct. 15, Ostend. The Belgian Government then accepted asylum in Havre, France, and Germany assumed the civil government of the occupied territory. From October, 1915, to October, 1916, the Germans levied on Belgium 480,000,000 francs, payable monthly. See APPENDIX: World War.

Brussiloff, Alexei Alexeivitch, a Russian military officer; born in the Caucasus of Russian parents, his father being a military officer, in 1848; entered the army at an early age, choosing the cavalry branch; was given an important command in Galicia in the campaign of 1914, secured Russia's early successes in the Carpathians, and penetrated the famous Dukla Pass; was appointed commander-in-chief of the Russian armies in June, 1917; resigned his command on the subsequent defection of the Russian forces facing the Germans; and later agreed to resume it. It was he who commanded the brilliant Russian offensive in Galicia, Volhynia, and Bukowina in the summer of 1916. Died in Moscow, Mar. 17, 1926. See Appendix: World War.

17, 1926. See APPENDIA. WORK.

Brutus, Lucius Junius, a Roman hero; son of Marcus Junius and the daughter of the elder Tarquin; saved his life from the persecutions of Tarquin the Proud by feigning himself insane, on which account he received the surname Brutus (stupid). During a plague that broke out at Rome he accompanied the son of Tarquin to the oracle in Delphi. When Lucretia.

the wife of Collatinus, plunged a dagger into her bosom that she might not outlive the insult which she had suffered from Sextus, the son of Tarquin. Brutus, being present, threw off his mask. He drew the dagger, all bloody, from the wound, and swore vengeance against the Tarquins. The people submitted to him, and he caused the inhabitants to be assembled, and the body to be publicly exposed. then urged the banishment of the Tarquins. After this had been resolved on, Brutus proposed to abolish the regal dignity, and introduce a free government. It was then determined that two consuls should exercise supreme power for a year, and Junius Brutus and Tarquinius Collatinus were chosen for the first term. Tarquin, who had seen the gates shut against him, and found himself deserted by his army, sent ambassadors Rome to demand a restoration of his private property, and, at the same time, to promise that he would make no attempt against the re-public. His request was granted. The ambassadors, however, set on foot a conspiracy, and drew into it many young men, among whom were the two sons of Brutus and the nephews of Collatinus. But a slave named Vindex discovered the plot. The criminals were imprisoned, and the consuls caused the people the next morning to be called to a meeting. All were deeply shocked to see the sons of Brutus among the prisoners, and their father on the judgment seat to condemn them. Collatinus wept, and even the stern Valerius sat silent. But Brutus arose firmly, and, after the crime had been proved beyond a doubt, ordered the listors to accent the law. Neither the lictors to execute the law. Neither the entreaties of the people nor of his sons could alter his resolution. He returned to the Assembly when Collatinus wished to save his guilty nephews. The people condemned them all, and chose Valerius consul in place of Collatinus. In the meantime. Tarquin, supported by Porsenna, collected an army and marched against Rome. The consuls advanced to meet him. Brutus led the cavalry, Aruns, son of Tarquin, commanded the body opposed to him. They pierced each other with their spears at the same moment, and both fell 509 B. C. The Romans came off conquerors, and Brutus was buried with great splendor. The women lamented him a whole year, as the avenger of the honor of their sex. The details of the story of Brutus, which may be regarded as a poetical legend, have been shown by Niebuhr to be irreconcilable with history.

Brutus, Marcus Junius, one of the most distinguished Romans at the close of the republican period; born of a plebeian family 85 B. C. He was at first an enemy of Pompey, who had slain his father in Galatia, but forgot his private enmity, and was reconciled to him when he undertook the defense of freedom. He did not, however, assume any public station, and, after the unfortunate battle of Pharsalia, surrendered himself to Cæsar, who received him generously, allowed him to withdraw from the war, made him in the following year governor of Cisalpine Gaul, and afterward con-ferred on him the government of Macedonia. Notwithstanding these benefits, Brutus allowed himself to be drawn into, and made the head of the conspiracy against Cæsar. He was led into the conspiracy by Cassius, who, impelled by hatred against Cæsar, sought, at first by writing, and then by means of his wife, Junia, sister of Brutus, to gain his favor; and when he thought him prepared for the proposal, disclosed to him verbally the plan of a conspiracy against Cæsar, who had now made himself master of the supreme power in the State. Brutus was induced to agree to the design, and his influence led many of the most distinguished Romans to embrace it also. Cæsar was assassinated in the senate house. In public speeches Brutus explained the reasons of this deed, but he could not appease the dissatisfaction of the people, and retired with his party to the capital. He soon after took courage, when the consul, P. Cornelius Dolabella, and the prætor, L. Cornelius Cinna, Cæsar's brother-in-law, declared them-selves in his favor. But Antony, whom Brutus had generously spared, was reconciled to him only in appearance, and obtained his leave to read Cæsar's will to the people. By means of this instrument Antony succeeded in exciting the popular indignation elected to Congress in 1890, and was they were compelled to flee from Rome. The preparing subsequently for the bar at Union College, Chicago. In 1887 he removed to Lincoln, Neb., and was they were compelled to flee from Rome. The preparing subsequently for the bar at Union College, Chicago. In 1887 he removed to Lincoln, Neb., and was they were compelled to flee from Rome.

Brutus went to Athens and endeavored to form a party there among the Roman nobility; he gained over, also, the troops in Macedonia. He then began to levy soldiers openly, which was the easier for him, as the remainder of Pompey's troops since the defeat of their general, had been roving about in Thessaly. Hortensius, the governor of Macedonia, aided him; and thus Brutus, master of all Greece and Macedonia, in a short time stood at the head of a rowerful arm. at the head of a powerful army. He went now to Asia and joined Cassius, whose efforts had been equally successful. In Rome, on the contrary, the triumvirs prevailed. All the conspirators had been condemned and the people had taken up arms against them.

Brutus and Cassius having finally with difficulty subdued the Lycians and Rhodians, returned to Europe to oppose the triumvirs. The army passed over the Hellespont, and 19 legions and 20,000 cavalry were assembled on the plains of Philippi, in Macedonia, whither also the triumvirs, Antony and Octavianus (afterthe Emperor Augustus), marched with their legions. Although Roman historians do not agree in their accounts of the battle of Philippi, this much at least seems certain, that Cassius was beaten by Antony; that Brutus fought with greater success against the division of the army commanded by Octavianus; that 20 days after he was induced, by the ardor of his soldiers, to renew the contest; and that he was this time totally defeated. He escaped with only a few friends, passed the night in a cave, and as he saw his cause irretrievably ruined, ordered Strato, one of his confidents, to kill him. Strato refused a long time to perform the command; but, seeing Brutus resolved, he turned away his face, and held his sword, while Brutus fell upon it, and died in 42 B. C.

Bryan, William Jennings, an American political leader, born in Salem, Ill., March 19, 1860. He was graduated at Illinois College in 1881,

WILLIAM JENNINGS BRYAN (1860-1925)

BY F. E. WRIGHT

VARIOUS BREEDS OF HORSES

AN UP-TO-DATE BARN

BOTTLING MILK FOR MARKET

MODERN DAIRY

United States by the Democratic National Convention at Chicago. The nomination of Mr. Bryan at Chicago The came as the result of a twenty-minute speech made the day that the free silver platform was adopted by the Democratic Convention. Mr. Bryan's speech in favor of the platform simply swept the delegates of the convention off their feet and the temporary chairman had great difficulty in maintaining sufficient order for Mr. Bryan to pro-In demanding the free and unlimited coinage of silver by the United States at a ratio of 16 to 1 and the abandonment of the single gold standand Mr. Bryan's oratory carried the convention with him. His peroration was a fitting climax to this era-making speech—"We shall answer their demand for the gold standard by saying to them: 'You shall not press down upon the brow of labor this crown of thorns. You shall not crucify marking upon a cross of gold'"

mankind upon a cross of gold."

It made no difference that 300 of the delegates were said to be pledged to Bland, the father of the Bland Silver Dollar Bill, and that about 100 were counted as Patterson and Blackburn delegates. The delegates simply forgot all party lines and party pledges and stampeded for the new leader. The Bland forces managed to secure an adjournment until next day, hoping that after sleeping over it the convention would come to its senses and forget the magnetism of the orator who had so swayed them. But the next day brought no change in the new line-up of delegates and Bryan received the nomination for President by the Democratic Convention upon the fifth ballot. He was nominated amidst an emotional tumult seldom witnessed. Not since the day that Garfield in 1880 had nominated John Sherman for the position of standard bearer of the Republican Party, and nominated him so adroitly that he secured the honor of nomination himself, had any political convention been so swayed by the magnetism of one man. Bryan was not in the conven-tion hall when nominated, but both he and Mrs. Bryan were at the Clifton Hotel in Chicago. Both had no doubt of the outcome of the balloting. Mr. Bryan immediately announced that if elected he would not be a candidate His hold upon the rank and file of his for a second term. But the strongest party seemed as strong, even after

papers of the country, as well as many of the most prominent Democratic leaders, refused to follow Bryan in his campaign for free silver.

William McKinley, the Republican nominee for President, was nominated upon a platform whose principal fea-tures were a firm stand against free silver and a corresponding strong de-mand for a higher tariff. The Repub-lican press, as well as the major Democratic press, joined in a concerted attack upon Bryan and his silver principles and had no small degree of in-fluence upon the final outcome in the November elections. McKinley received 271 votes in electoral college to 176 for Bryan. In 1900 McKinley again defeated Bryan by an increased majority, this time 292 votes, in electoral college, to 155. The Democratic platform again demanded the free coinage of silver and a new feature was inserted — anti-imperialism — an out-growth of the Spanish-American War.

Bryan now founded "The Commoner" at Lincoln, Nebr., a weekly political journal, which he edited with considerable success. The weekly was changed to a monthly in 1913.

A tour of the world by Mr. Bryan and Mrs. Bryan consumed the greater part of 1905-6. Everywhere he visited Mr. Bryan received most flattering attention, not only as being one of America's most distinguished citizens but as a man whose influence was weighty in the shaping of our national character. In 1908 Mr. Bryan again received the nomination for the presidency at the hands of the Democratic National Convention. This time the Democratic platform called for immediate downward revision of the tariff and vigorous enforcement of the law against guilty trust magnates. a strenuous campaign in which Mr. Bryan toured the country from coast to coast he again suffered defeat at the polls, W. H. Taft, the Republican Party standard bearer, being elected by the vote, in electoral college, of 321 to 162.

Mr. Bryan by becoming the nominee of a political party for three times broke all records. Never before had a man been selected thrice as the leader of a party in a presidential campaign. three defeats, as it had ever been during his political life.

Much of Mr. Bryan's time about this period had been given to his Chautauqua Institute lecture tours, which carried him practically into every state. His lecture engagements soon became so numerous that had he so desired, his whole time could have been thus employed. These lecture These lecture engagements were remunerative to a great degree but he never allowed them to interfere with his deep sense of party obligations or to lessen in any degree his interest in the welfare Whenever of the Democratic Party. his services were asked for he put himself at once at the call of party leaders.

The campaign of 1912 was now approaching with renewed hopes, amongst the leaders of the Democratic Party, for a successful issue at the polls. This hope was based upon the disorganization of the Republican Party caused by the dissatisfaction of the Progressive wing of the Republican Party, headed by Ex-President Roosevelt, with the conduct of national affairs by the Republican incumbent in the White House, President Taft. The split in the Republican ranks caused the two wings of the party to nominate candidates. President Taft was renominated by the regular Republican Party and Ex-President Roosevelt by the Progressive wing of

the party.

Within the Democratic Party there was almost a like divergent of views and interests. Champ Clark, then speaker of the House of Representatives, was the choice of the majority of delegates elected to the Baltimore Democratic Convention, which met in Baltimore, Md., to elect a candidate for the presidency. Bryan was a delegate to the convention and easily dominated the action of that assembly. He was an instructed delegate of the Clark forces, but stressed the point that no candidate should be chosen whose nomination was dependent upon New York's ninety delegates under the leadership of Charles T. Murphy, the head of Tammany. He claimed that they represented the reactionary in-terests as well as the Wall Street viewpoint of affairs. In a sensational speech he attacked such prominent cruel law."

Democrats as T. F. Ryan and August Belmont as leaders of the reactionary faction.

In the face of his instructions Bryan bolted Clark for Woodrow Wilson, and with this move eliminated Clark as a successful candidate for the nomina-Wilson was nominated on the 46th ballot and in the ensuing election in November, 1912, was elected over Taft and Roosevelt, receiving 435 votes to 8 for Taft and 88 for Roosevelt.

Mr. Bryan became secretary of state in the cabinet of President Woodrow Wilson, March 4, 1917, and served until June 9, 1918, resigning because of dissatisfaction with the President's war policy and especially in the handling by the President of the situation arising by the sinking of the Lusitania by a German submarine. When told by Mr. McAdoo that his resignation would destroy him politically Mr. Bryan replied: "You are right. I think it may destroy me politically, but my conscience tells me I am right, and I would prefer to be destroyed than to violate my conscience.

Bryan took a prominent part in the Democratic Conventions of 1916, 1920 and 1924, and did much to shape the Democratic policies and principles embodied in the platforms of those con-

In 1925 he entered as vigorously a campaign that had no political princampaign that had no pointed principles at stake. This was the famous trial of John T. Scopes, a school teacher of Tennessee, who had been indicted under the Tennessee statute, prohibiting the teaching of evolution in public schools, as being contrary to

the Biblical account of human origin.

During the course of the trial Mr. Bryan defined evolution as being an "imaginary process wholly unproven, that begins with life but does not attempt to explain life, and represents man as the climax of a series of changes coming up from a simple cell through millions of forms of life, dif-ferent from man." But that is not But that is not ate. "If the evoall, he goes on to state. lutionary hypothesis is true, man has come up through the animals below him by a cruel law under which the strong kill off the weak. Darwin argued that the race was necessarily impaired by the suspension of this Mr. Bryan claimed that the acceptance of the theory of evolution would automatically lead to agnosticism. That it strikes at the root, not only of Christianity but of civilization. That one could only accept one of two concrete facts as being true, the Bible or evolution.

or evolution.

The legality of the statute was upheld by the court and an appeal taken by Mr. Darrow, counsel for Scopes, to

higher state courts.

During the trial, Mr. Bryan was a guest at the home of Richard Rogers, a prominent citizen of Dayton and a very good friend of Mr. Bryan.

On Sunday afternoon, July 26th, 1925, Mr. Bryan retired to his room to

rest for an hour or two.

He was apparently in good health and while in a deep sleep suffered a stroke of apoplexy and died without regaining consciousness.

The whole world grieved the loss of

"the Great Commoner."

Bryant, William Cullen, an American poet; born Nov. 3, 1794, in Cummington, Mass. His father, a man of great literary culture, practiced as a physician. He prepared, when he was but 14, a collection of poems, which were published in Boston in 1809. In that volume appeared "The Embargo," the only poem dealing with the politics of the day he ever wrote. In the following year Bryant entered Williams College as a student of law, but left without taking a degree in 1815, when he was admitted to the bar. In that year he became a contributor to the "North American Review," in which appeared the following year his "Thanatopsis," a poem in blank verse, which received much laudatory criticism. Six years later he published a second collection of poems which brought him into real fame. He definitely abandoned law for literature in 1825, and went to New York, where he founded the "New York Review," and a year after became the editor of the "Evening Post." an old established paper with which he was connected till his death. A complete edition of his poems up to 1855 was published in that year, and in 1863 appeared a small volume entitled "Thirty Poems." His last works of importance are his translations of the "Iliad" (1870) and the "Odyssey"

(1872. translations which many American critics rank above any that had hitherto appeared in the English language. Early in 1878 appeared "The Flood of Years," his last poem of any great length. On the occasion of uncovering a statue to Mazzini (May 30, 1878) he had to stand uncovered for about an hour under a burning sun. On his way home he met with an accident which was followed by concussion of the brain, and on June 12 he expired.

Bryce, James, a British diplomat, born in Belfast, May 10, 1838. After graduating at Oxford in 1862, he studied at Heidelberg, and subsequently practiced law in London. From 1870 till 1893 he was Regius Professor of Civil Law in Oxford, and has had a distinguished political career. In 1907-13 was British ambassador to the United States; and in 1914 was raised to the peerage as Viscount Bryce. He was a voluminous author, his most noted works being "The American Commonwealth" (1888), revised edition (1910), and his report on German atrocities in Belgium (1915); created viscount in 1914 and awarded Order of Merit. Died, 1922.

Bryn Mawr College, an educational institution for women, at Bryn Mawr, Pa.; founded in 1880 by Joseph Taylor. Its standard of admission is very high; its system of undergraduate studies combines required courses and varied elective groups.

Bryophyllum, a genus of plants belonging to the houseleeks. Its native country is the East Indies, whence it has been carried to other places. In Bermuda, where it is naturalized and grows abundantly, it is called life plant.

Bubalis, a genus in the antelope division of hollow horned, even toed ruminants, not to be confused with Buffalo. The species of bubalis are among the more oxlike antelopes, and one of them is supposed to be the bubalus of the ancients. In this genus the head is elongated, the snout broad, the horns twisted and present in both sexes, the tear pits small, the back sloping off behind, the teats two in number. The bubaline of the North African deserts is a handsome animal of a reddish brown color, standing

about 5 feet high at the shoulder, liv-ing ir herds, and readily tamed. It is figured on Egyptian monuments. hartebeest is found in the S., is per-haps slightly larger, has a general gray brown color (black on the outside of the legs and on middle of forehead, with large white spots on haunches), and is at home on the mountains. The sassaby, the bastard hartebeest of the Cape Colonists, is slightly smaller, and is differently colored. The bontebok is a smaller and more beautifully col-ored form of the S. interior, where another species, the violet colored blesbok, is also abundant.

Bubonic Plague, a disease supposed to be identical with the plague known as the Black Death, which had its origin in China, and made its first appearance in Europe 543 A. D., at Constantinople. It derives its mod-ern name from the fact that it attacks the lymphatic glands in the neck, armpits, groins and other parts of the body. The swollen parts are extreme-ly sensitive to the touch, the patient suffers from headache, vertigo, high fever, vomiting and great prostration.

Another feature is the appearance of purple spots and a mottling of the skin. In severe cases death generally ensues in 48 hours, and, at best, recovery is slow. At the Hoagland laboratory in Brooklyn, N. Y., extensive experiments have been made, both sive experiments have been made, both in the culture of the germs and in an anti-toxin. The disease has been called "the poor's plague," from the fact that it first attacks the half starved masses who congregate in the slums of the cities. This was the case in Bombay, where so fatal were its ravages that a panic ensued and more than 450,000 people, one-half the population, left the city. The first authentic description of the bubonic thentic description of the bubonic plague is contained in the writings of Rufus of Ephesus, who described the disease as having existed in Northern Africa during the 3d or 4th century B. C. He presented the testimony of

foundation. In the reign of Justinian, 542 A. D., the disease appeared in Egypt, and within a year extended to Constantinople, where it is said to have caused the death of 10,000 persons in one day. In 1352 the plague spread through the whole of Europe and nearly one-fourth of the popula-tion died. It is estimated by Hecker that during this reign of terror, out of 2,000,000 inhabitants of Norway, but 300,000 survived. It was estimated by Pope Clement VI. that the mortalby Pope Clement VI. that the mortality from black death for the entire world was 40,000,000. This outbreak lasted about 20 years. During the great plague of London, in 1665, there were 63,596 deaths out of a population of 460,000. It was believed the infection was introduced by bales of merchandise from the Levent The intection was introduced by bales of merchandise from the Levant. The sanitary condition of London, at the time, was notoriously bad. It is a significant fact that those who lived out of town and on barges and ships on the Thames did not contract the disease. In 1903 the disease was redisease. In 1903 the disease was reported in Southern Russia and other castern regions, and great care was exercised to keep it out of the United

Buccaneer, an order of men, not quite pirates, yet with decidedly piratical tendencies, who for nearly 200 years infested the Spanish main and the adjacent regions. A bull of Pope Alexander VI., issued in 1493, having granted to Spain all lands which might be discovered W. of the Azores, the Spaniards thought that they possessed a monopoly of all countries in the New World, and that they had a right to seize, and even put to death, all interlopers into their wide domain. The association of buccaneers began about 1524, and continued till after the English revolution of 1688, when the French attacked the English in the West Indies, and the buccaneers of the two countries, who had hitherto been friends, took different sides, and were separated forever. Thus weakened, physicians of that period to corroborate his arguments. Since that time the disease has been variously described by writers under the name of Levantine, Oriental and Bubonic Plague and the black plague, or black death.

These designations are more or less open to criticism and lack scientific

Walker, who sought to establish himself as a ruler in Central America.

Buccleugh, the title (now a dukedom) of one of the oldest families in Scotland, tracing descent from Sir Richard le Scott in the reign of Alexander III.

Bucentaur, a mythical monster, half man and half ox. The splendid galley in which the Doge of Venice an-nually wedded the Adriatic bore this name, doubtless because of the figure of a bucentaur on her bow.

Bucephalus, the celebrated horse of Alexander the Great, whose head resembled that of a bull, whence his name. Alexander was the only one who could mount him. In an engagement in Asia, where he received a heavy wound, he immediately hastened out of the heatly and dropped dead out of the battle, and dropped dead as soon as he had set down the King in a safe place. Alexander built on the river Hydaspes, in India, a city which he called after his name.

Bucer, Martin, a Protestant reformer; born in Schlestadt, Alsace, in 1491. In 1521 he left the Dominican Order, and became a convert to Lutheranism. He was at first preacher at the court of Frederick, the Elector of the Palatinate; afterward in Strasburg; and at the same time professor in the university there for 20 years. He died in Cambridge in 1551. In 1557 Queen Mary caused his bones to be burned, to show her detestation of Protestantism.

Buchanan, Andrews Hays, an American educator; born in Washington Co., Ark., June 28, 1828; was graduated at Cumberland University in 1853; and took a special course in civil engineering and mathematics in Lincoln University; taught civil engineering in 1854-1861; was military topographical engineer in the Confederate army during the Civil War; and became Professor of Mathematics and Civil Engineering in Cumberland Uni-versity in 1869. He was the author of "Plane and Spherical Trigonometry"; etc. He died in August, 1914.

of 1812, although affiliated with the Federalist Party. In 1820 he was elected to Congress, serving successive terms by re-election for 10 years, where he made some reputation in the advocacy of bills for reorganizing the courts and judiciary. In 1828 he supported Andrew Jackson for the Presidency, who, in turn, appointed him Minister to Russia, where he distinguished himself by arranging an important commercial treaty. In 1834, he entered the United States Senate, serving there 12 years, where he defended the spoils system instituted by Jackson, and declared against the right or power of the Government to interfere with slavery in the States. He was appointed Secretary of State by President Polk, after which service he was in retirement for four years. Under President Pierce he was sent in 1853 as Minister to England, where his advocacy of the annexation of Cuba by the United States led to his nomination to the Presidency in 1856. His cabinet contained men who supported the secession of South Carolina, and eventually joined the Confederacy. He announced in a message (1860) that the President had neither acy. the right nor the constitutional power to prevent a State from seceding. His unwillingness to take decisive action enabled the seceding States to arm and prepare for war before the Government did anything to prevent. After he retired, however, he supported the Union cause. He died in Lancaster, Pa., June 1, 1868.

Buchanan, Robert Williams, English poet, novelist and playwright; born in Warwickshire, Aug. 18, 1841; died in London, June 10, 1901.

Bucharest, the capital of the for-mer principality of Wallachia and of the present kingdom of Rumania, stands 265 feet above sea level, in the fertile but treeless plain of the small, sluggish Dambovitza. A strange meeting point of East and West, the town as a whole is but meanly built, but the streets are mostly paved and lighted with gas and electricity. An elaborate system of fortification was undertaken in 1885. There are some handsome hotels; and the metal Buchanan, James, an American statesman, 15th President of the United States, born near Mercersburg, Pa., April 23, 1791; graduated at Dickinson College in 1809, admitted to the bar in 1812. He supported the War

pot for the trade between Austria and the Balkan Peninsula, the chief articles of commerce being textile fabrics, grain, hides, metal, coal, timber, and cattle. Its manufactures are unimportant, and the workmen are chiefly Hungarians and Germans. Bucharest has been several times besieged; and between 1793 and 1812 suffered twice from earthquakes, twice from inundations, once from fire, and twice from pestilence. Important treaties were signed here, 1812 and 1886. On Aug. 27, 1916, Rumania made its long debated declaration of war against the Central Powers, and at once advanced into Transylvania, but it soon suffered a severe attack by the Germans on all the defences of its capital (Dec. 4), and in a year was practically conquered. See APPENDIX: World War. Pop. (1927) 345,666.

Buchner, Max, a German traveler and scientist, born in Hamburg, April 25, 1846. In 1878 he bore presents from the Emperor to Muatiamvo, in the Kingdom of Lunda, in Equatorial Africa. After several vain attempts to break through toward the N., he returned to the coast. In 1884 he accompanied Nachtigal in founding the colonies of Togo and Kamerun, in West Africa, where he acted temporarily as representative of the German Empire.

Buchtel College, a co-educational institution in Akron, O.; founded in 1871, under the auspices of the Universalist Church.

Buck, a name sometimes distinctively appropriated to the adult male of the fallow deer, the female of which is a doe. The term is often also applied to the male of other species of deer, as of the roebuck, although never to that of the red deer, which, when mature, is a stag or a hart.

Buck, Dudley, an American organist, composer, and author, born in Hartford, Conn., March 10, 1839. He was widely known through his instrumental and vocal music, and besides a number of cantatas, he wrote several books on musical topics. D. 1909.

Buckbean, the English name of menyanthes, a genus of plants belonging to the gentian worts. An infusion of its leaves is bitter. In Sweden two a pound of hops. In Lapland the roots are occasionally powdered and eaten.

Buckeye, the American horse chestnut tree. The term is also applied to the State of Ohio.

Buckingham, George Villiers, Duke of, favorite of James I. and Charles I., of England, born in 1592, his father being George Villiers, Knight. He was stabbed on Aug. 24, 1628, by John Felton, an ex-lieutenant who had been disappointed in being promoted.

Buckingham, James Silk, an English traveler, writer, and lecturer, born near Falmouth, Aug. 25, 1786. After trying several professions, and wandering over a great part of the world, he went to London, where he established the "Athenæum," well known as a literary journal. Subsequently he made a tour of three years. quently he made a tour of three years in the United States. In 1843 he became secretary to the British and Foreign Institute. He also published volumes on his Continental tours and an autobiography. He died in London, June 30, 1855.

Buckingham, William Alfred, an American statesman, born in Leb-anon, Conn., May 28, 1804; was for nine years Governor of Connecticut (1858-1866); called the "War Gov-ernor" for his zeal in furnishing troops in the Civil War; and was United States Senator from 1869 till his death. He was active in the temhis death. He was active in the tem-perance cause, and a patron of Yale College. He died in Norwich, Conn., Feb. 3, 1875.

Buckingham Palace, a royal palace in London, facing St. James' Park, and forming one of the residences of the British royal family.

Buckland, Cyrus, an American inventor, born in Springfield, Mass., Aug. 10, 1799; after assisting in building the machinery for the first cotton mills erected in Chicopee Falls, be-came, in 1828, the pattern maker in the United States armory, in Springfield. He remained here for 28 years, becoming master-mechanic. He designed machinery and tools for the manufacture of firearms; remodeled old weapons and designed. old weapons and designed new ones; perfected a lathe for turning out gun stocks: invented machines to bore and ounces of the leaves are substituted for turn gun barrels and for rifling muskets, and many other novelties in the manufacture of firearms and ordnance. Much of his machinery was adopted by foreign governments. Having received nothing for his labor at the armory, excepting his salary, Congress voted him \$10,000 when ill-health compelled him to resign. He died in Springfield, Feb. 26, 1891.

Buckland, Francis Trevelyan, an English naturalist; born in Oxford, Dec. 17, 1826. His preferences were for practical science, and, after retiring from his place as surgeon to the 2d Life Guards, he founded the journal, "Land and Water," of which he was editor. He was an authority on fish culture, and as such was consulted by foreign governments. He was a resolute opponent of Darwinism. He died Dec. 19, 1880.

Buckland, William, an English geologist, born in Tiverton, Devonshire, March 12, 1784. In 1845 he was made Dean of Westminster; but, under his great and continuous labors to benefit others, his mental faculties gave way seven years before his death, which took place Aug. 14, 1856.

Buckle, Henry Thomas, an English historian, born in Kent, Nov. 24, 1822. His chief work, a philosophic "History of Civilization," of which only two volumes (1858 and 1861) were completed, was characterized by much novel and suggestive thought, and by the bold co-ordination of a vast store of materials drawn from the most varied sources. He died, while traveling, at Damascus, March 29, 1862.

Buckles, metal instruments, consisting of a rim and tongue, used for fastening straps or bands in dress, harness, etc. They were formerly used on shoes, but are now supplanted by strings.

Buckley, James Monroe, an American religious editor, born in Rahway, N. J., Dec. 16, 1836. He studied theology at Exeter and joined the Methodist Episcopal Church. Since 1881 he has been editor of the New York "Christian Advocate." He has written "Travels in Three Continents," Died, 1920.

Bucknell University, a co-educational institution in Lewisburg, Pa.; oragnized in 1846, under the auspices of the Baptist Church. Buckner, Simon Bolivar, an American soldier and politician, born in Kentucky in 1823. He was graduated at West Point in 1840, and served in the Mexican War. He rose to distinction in the Confederate army during the Civil War, attaining the rank of Lieutenant-General. He was one of the pall bearers at Gen. Grant's funeral in 1885, by the personal selection of the ex-President, who had been warmly attached to him for many years. In 1896 he was nominated for Vice-President by the Gold Democrats, serving a term as Governor of Kentucky. He died Jan. 8, 1914.

Buckram, a coarse textile fabric stiffened with glue and used in garments to give them or keep them in the form intended.

Buckshot, a kind of leaden shot larger than swan-shot. About 160 or 170 of them weigh a pound. They are especially designed to be used in hunting large game.

Buckskin, a kind of soft leather, generally yellow or grayish in color, prepared originally by treating deerskins in a particular way, but now in general made from sheepskins. This may be done by oil, or by a second method, in which the skins are grained, brained and smoked.

Buckthorn, the English name of a genus of plants. The berries of the common species are black, nauseous, and, as the specific name rhamnus catharticus imports, highly cathartic; they afford a yellow dye when unripe, as the bark of the shrub does a green They are sold as French berries. The alder buckthorn, again, has dark purple purgative berries, which, in an unripe state, dye wool green and yellow, and when ripe bluish gray, blue, and green. The bark dyes yel-low, and, with iron, black. Of the foreign species, the berries of the rock buckthorn are used to dye the Maroquin, or Morocco leather, yellow, while the leaves of the tea buckthorn are used by poor people in China as a sub-stitute for tea. The species best kown to the pharmacopæia of this country is the cascara sagrada.

Buckwheat, or Brank, a plant with branched herbaceous stem, somewhat arrow-shaped leaves and purplish white flowers, growing to the height of about 30 inches, and bearing a small triangular grain of a brownish-black without and white within. The stalk is round and hollow, generally green, but sometimes tinged with red. Buckwheat was first taken to Europe from Asia by the Crusaders, and hence in France is often called Saracen corn. It is cultivated in China and other Eastern countries as a bread corn. In the United States it is very extensively used throughout the winter in cakes, which are cooked upon a gridiron.

Budapest, the official name of the united towns of Buda or Ofen and Pest or Pesth, the one on the right, the other on the left of the Danube, forming the capital of Hungary, the seat of the Hungarian Parliament and supreme courts. Buda, which is the smaller of the two, and lies on the W. bank of the river (here flowing S.), consists of the fortified Upper Town on a hill, the Lower Town or Water Town at the foot of the hill, and several other quarters, including Old Buda farther up the river.

Budapest contains the most important of the three universities of Hungary, attended by about 4,500 students and having over 220 professors, lecturers, etc. Another important educational institution is the technical high schools, with 60 teachers and 1,100 to 1,200 students, and a library of 60,000 volumes. In commerce and industry Budapest ranks first in the new Republic. Its chief manufactures are machinery, gold, silver, copper, and iron wares, chemical, textile goods, leather, tobacco, etc. A large trade is done in grain, wine, wool, cattle, etc. At Budapest are the largest electrical works in all Europe. Engineers employed there have brought to perfection the science of applying electricity to motors. They constructed there the first successful underground trolley lines. Their ideas have been adopted in the construction of electric roads all over the world. In 1799 the joint population of the two towns was little more than 50,000; in 1890 it was 506,384; in 1921, 925,724.

Budaun, a town of India, Northwest Provinces. There is a handsome

an area of 2,000 square miles. Pop. 1,200,000.

Buddha, or The Buddha, (that is "the enlightened"), the sacred name of the founder of Buddhism, who would appear (according to the judgment of those scholars who have given most attention to this point) to have lived in the 5th century B. C.

Buddhism, the system of faith introduced or reformed by Buddha. In its origin Buddhism was a reaction against the caste pretensions of the Brahmins and other Aryan invaders of India, and was, therefore, eminently fitted to become, as it for a long time was, the religion of the Turan-ians. Buddhism was dominant in In-dia for about 1,000 years after its establishment by Asoka. Then, having become corrupt and its vitality having decayed, reviving Brahminism prevailed over it, and all but extinguished it on the Indian continent, though a modification of it, Jainism, still exists in Marwad and many other parts. It has all along held its own, however, Ceylon. On losing Continental India, its missionaries transferred their efforts to China, which they converted, and which still remains Buddhist. The religion of Gautama flourishes also in Tibet, Burma and Japan, and is the great Turanian faith of the modern as of the ancient world.

Budding, the art of multiplying plants by causing the leaf bud of one species or variety to grow upon the

branch of another.

Bude Light, (from Bude, in Cornwall, England, where Mr. Gurney, the inventor of the light, lived), an oil or gas burner supplied with a jet of oxygen gas; the flame is very brilliant.

Budget, the annual statement relative to the finances of a country, made by the proper financial functionary, in which is presented a balance sheet of the actual income and expenditure of the past year, and an esti-mate of the income and expenditure for the coming year, together with a statement of the mode of taxation proposed to meet such expenditure.

Buel, Clarence Clough, American editor and author, born at mosque, American mission, etc. Pop. Laona, Chautauqua county, N. Y., 33,680. The district of Budaun has July 29, 1850. He was connected are miles ?
